The Journal of Physiology

The Journal of Physiology (ISSN 0022 – 3751) is published monthly for the Physiological Society by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street. New York NY 10022.

Twelve volumes (395–406) are published in 1988; each volume being fully bound in hard covers. The 1988 annual subscription price (which includes postage) is £500.00 net (UK only); for subscribers elsewhere £550.00 net (US $1,200.00 in the USA and Canada). Individual volumes may be purchased at £45.00 (US $115.00 in USA and Canada) each, plus postage. Orders, which must be accompanied by payment, may be placed with a bookseller or directly with the publisher.

POSTMASTER: send address changes in USA and Canada to *The Journal of Physiology*, Cambridge University Press, 32 East 57th Street, New York, NY 10022.

Second class postage paid at New York, NY, and at additional mailing offices.

Back Volumes

Volumes 1–253 (1878–1975) are available from Wm Dawson and Sons Ltd., Cannon House, Folkestone, Kent, England.

Volumes 254–394 (1976–1987) at £37.00 ($115.00) net each, are available from the publisher.

Volumes 61–120, 168–169, 180, 181, 184 and 210 were published in four parts, other volumes to 273 in three parts. Volumes to 273 are available in paper covers only. Volume 274 onwards are available in hard bound covers only.

Indexes

Cumulative indexes to the following volumes are available from Wm Dawson and Sons Ltd.:

Volumes 61–100 (1947), 101–115 (1952), 116–134 (1957), 135–154 (1961), 155–175 (1965), 176–199 (1969), 200–224 (1973), 225–244 (published as part 3 of Vol. 253, 1975).

Cumulative indexes to the following volumes are available from the publishers: 245–285 (1979), 286–321 (1981) and 322–357 (1984) at £37.00 ($115.00) net.

Copying

This Journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $07.50. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3751/88 $7.50 + 0.00.

SUBJECT INDEX

Absorption

Regional protein absorption rates from the pleural cavity in dogs. **369**, 159*P*, 1985

Absorption of water and electrolytes from hypotonic, isotonic and hypertonic solutions. **373**, 90*P*, 1986

Acclimatization

Some physiological effects of a sojourn in a tropical climate. **373**, 40*P*, 1986

Acetyl co-enzyme A

The effects of post-exercise glucose and alanine ingestion on plasma carnitine and ketosis in humans. **390**, 295, 1987

Acetylcholine

Mechanism of action of insulin on acetylcholine-evoked amylase secretion in the mouse pancreas. **358**, 469, 1985

Long-term potentiation of transmitter release induced by repetitive presynaptic activities in bullfrog sympathetic ganglia. **359**, 219, 1985

Membrane currents and their modification by acetylcholine in isolated single atrial cells of the guinea-pig. **359**, 485, 1985

The acetylcholine-induced current in rabbit cardiac Purkinje fibres is different from i_{K1}. **361**, 21*P*, 1985

Phorbol ester (TPA) stimulates enzyme secretion and potentiates secretagogue-evoked secretory responses in the isolated rat pancreas. **362**, 31*P*, 1985

Long-term potentiation of synaptic acetylcholine release in the superior cervical ganglion of the rat. **363**, 181, 1985

Acetylcholine-evoked potassium release in the mouse pancreas. **365**, 319, 1985

Effect of excitatory amino acids and analogues on [^{3}H]acetylcholine release from amacrine cells of the rabbit retina. **366**, 47, 1985

Role of calcium mobilization in mediation of acetylcholine-evoked chloride currents in *Xenopus laevis* oocytes. **366**, 299, 1985

Activation of acetylcholine synthesis in cat sympathetic ganglia: dependence on external choline and sodium-pump rate. With an Appendix by K. J. Worsley and R. I. Birks. **367**, 401, 1985

Cholinergic agonists suppress a potassium current in freshly dissociated smooth muscle cells of the toad. **367**, 503, 1985

Fast events in single-channel currents activated by acetylcholine and its analogues at the frog muscle end-plate. **369**, 501, 1985

Excitatory and differential disinhibitory actions of acetylcholine in the lateral geniculate nucleus of the cat. **370**, 233, 1986

Changes by acetylcholine of membrane currents in rabbit cardiac Purkinje fibres. **371**, 201, 1986

Characterization of the acetylcholine-induced potassium current in rabbit cardiac Purkinje fibres. **371**, 219, 1986

Desensitization of the acetylcholine-induced increase of potassium conductance in rabbit cardiac Purkinje fibres. **371**, 239, 1986

Control of fluid secretion by presynaptic inhibition of acetylcholine release in the isolated rabbit intestine. **371**, 139*P*, 1986

A patch-clamp study of potassium currents in resting and acetylcholine-stimulated mouse submandibular acinar cells. **373**, 379, 1986

Facilitation of transmitter action on catecholamine output by cardiac glycoside in perfused adrenal gland of guinea-pig. **374**, 475, 1986

Cyclic adenosine monophosphate, calcium, acetylcholine and the current induced by adenosine in the *Xenopus* oocyte. **374**, 551, 1986

Myoblasts and myoblast-conditioned medium attract the earliest spinal neurites from frog embryos. **375**, 39, 1986

Mechanisms of action of acetylcholine in the guinea-pig cerebral cortex *in vitro*. **375**, 169, 1986

Mechanism of action of acetylcholine on calcium current in single cells from frog ventricle. **376**, 183, 1986

Acetylcholine modulation of the conductance of intercellular junctions between rat lacrimal cells. **377**, 283, 1986

The involvement of basolateral potassium channels in the intestinal response to secretagogues in the rat. **379**, 331, 1986

Quantal release of acetylcholine evoked by focal depolarization at the *Torpedo* nerve–electroplaque junction. **379**, 461, 1986

Quantal analysis of action of hemicholinium-3 studied at a central cholinergic synapse of *Aplysia*. **380**, 209, 1986

Acetylcholine-evoked potassium, calcium and magnesium transport in the isolated rat lacrimal glands. **380**, 56*P*, 1986

Acetylcholine metabolism and choline availability at the neuromuscular junction of mature adult and aged rats. **383**, 693, 1987

Surplus acetylcholine and acetylcholine release in the rat diaphragm. **385**, 147, 1987

The chronotropic response of the isolated rabbit sinoatrial node to acetylcholine is dependent upon previous exposures to the drug. **386**, 56*P*, 1987

Comparison of effects of acetylcholine on calcium and potassium currents in frog atrium and ventricle. **389**, 411, 1987

Two types of 'slow waves' in intestinal smooth muscle of cat. **392**, 51, 1987

Actions of acetylcholine in the guinea-pig and cat medial and lateral geniculate nuclei, *in vitro*. **392**, 147, 1987

The fade of the response to acetylcholine at the rabbit isolated sino-atrial node. **393**, 171, 1987

Acetylcholine (*cont.*)
Effect of periglandular ionic composition and transport inhibitors on rhesus monkey eccrine sweat gland function *in vitro*. **393**, 195, 1987
Acetylcholine regulation of nicotinic receptor channels through a putative G protein in chick myotubes. **393**, 635, 1987
Acetylcholine channel
Influence of the *a*-adrenoceptor agonist clonidine on single acetylcholine-receptor channels in bovine chromaffin cells. **371**, 157*P*, 1986
Two types of acetylcholine receptor channels in developing *Xenopus* muscle cells in culture: further kinetic analyses. **389**, 271, 1987
Acetylcholine receptor
Acetylcholine receptors of skeletal muscle cells in cultures of rat thymus glands. **362**, 349, 1985
The role of cyclic nucleotides in modulation of the membrane potential of the Schwann cell of squid giant nerve fibre. **363**, 151, 1985
Acetylcholine receptors play a role in the regulation of chick myoblast fusion. **365**, 89*P*, 1985
The sensitivity of acetylcholine receptors during prolonged neuromuscular activity in the frog. **369**, 104*P*, 1985
Acetylcholine receptor activation by a site-selective ligand: nature of brief open and closed states in BC3H–1 cells. **370**, 357, 1986
Dose–response of acetylcholine receptor channels opened by a flash-activated agonist in voltage-clamped rat myoballs. **371**, 407, 1986
Activation of acetylcholine receptors on clonal mammalian BC3H–1 cells by low concentrations of agonist. **373**, 129, 1986
Apparent acetylcholine receptor channel conversion at individual rat soleus end-plates *in vitro*. **375**, 153, 1986
Factors affecting the expression of acetylcholine receptors on rat sensory neurones in culture. **377**, 409, 1986
Heterogeneous kinetic properties of acetylcholine receptor channels in *Xenopus* myocytes. **378**, 119, 1986
Effects of chlorpromazine and phencyclidine on mouse C2 acetylcholine receptor kinetics. **378**, 497, 1986
Activation of acetylcholine receptor channels by covalently bound agonists in cultured rat myoballs. **379**, 83, 1986
Effect of phospholipase C on the binding of *α*-bungarotoxin to isolated sarcolemma of the rat. **384**, 23*P*, 1987
Activation of acetylcholine receptors on clonal mammalian BC3H-1 cells by high concentrations of agonist. **385**, 325, 1987
Single channels activated by acetylcholine in rat superior cervical ganglion. **388**, 141, 1987
Control of end-plate channel properties by neurotrophic effects and by muscle activity in rat. **388**, 367, 1987
Two distinct kinetic phases of desensitization of acetylcholine receptors of clonal rat PC12 cells. **389**, 45, 1987
Multiple actions of substance P that regulate the functional properties of acetylcholine receptors of clonal rat PC12 cells. **389**, 69, 1987
Independent control of channel closure and block of open channels by methylxanthines at acetylcholine receptors in frog. **390**, 33, 1987
Exposure of *α*-bungarotoxin binding sites on rat sarcolemma by a substance released by nerve stimulation. **390**, 191*P*, 1987
Persistence of synaptic acetylcholine receptors following degeneration of rat soleus muscle fibres. **391**, 60*P*, 1987
Activation of the primary kinetic modes of large- and small-conductance cholinergic ion channels in *Xenopus* myocytes. **393**, 437, 1987
Muscarine induces an inward current in chicken chromaffin cells. **394**, 147*P*, 1987
Acetylcholine release
Inactivation of acetylcholine release from *Torpedo* synaptosomes in response to prolonged depolarizations. **368**, 293, 1985
Modulation of acetylcholine release from isolated rabbit small intestinal submucosa by fluoride and lidamidine. **371**, 226*P*, 1986
Potentiation by 4-aminopyridine of quantal acetylcholine release at the *Torpedo* nerve–electroplaque junction. **379**, 479, 1986
Botulinum toxin inhibits quantal acetylcholine release and energy metabolism in the *Torpedo* electric organ. **385**, 677, 1987
Antibodies of Lambert-Eaton myasthenic syndrome block voltage-dependent calcium channels in isolated bovine adrenal chromaffin cells. **391**, 75*P*, 1987
Acetylcholine sensitivity
Lack of nicotinic supersensitivity in frog sympathetic neurones following denervation. **363**, 211, 1985
Acetylcholinesterase
Differential effects of cholinergic agonists on acetylcholinesterase release from the rat substantia nigra *in vivo*. **369**, 66*P*, 1985
A fluorimetric method for the estimation of acetylcholinesterase activity in small volumes of cerebrospinal fluid using acetylcholine as substrate. **371**, 12*P*, 1986
Acid–base change
Effects of experimentally induced acid-base changes in humans on the physiological responses to exhaustive bicycle exercise at 80% of $\dot{V}_{O_2max}$. **390**, 243*P*, 1987
Acidosis
Response of the human arterial chemoreceptors to quick changes in P_{CO_2} during acute metabolic acidosis. **361**, 62*P*, 1985
Effect of ambient chloride concentration changes in the haemolymph acid-base balance of the crayfish, *Procambarus clarkii*, exposed to various environmental conditions. **371**, 87*P*, 1986
Intracellular acidosis on increasing the frequency of stimulation in isolated ferret hearts is partly attributable to increased lactic acid production. **377**, 113*P*, 1986

Action potential
Electrical properties of rat dorsal root ganglion neurones with different peripheral nerve conduction velocities. **359**, 47, 1985
Membrane currents and their modification by acetylcholine in isolated single atrial cells of the guinea-pig. **359**, 485, 1985
The slow repolarization phase of the action potential in rat heart. **360**, 13, 1985
Slow depolarizing and hyperpolarizing currents which mediate bursting in *Aplysia* neurone R15. **360**, 51, 1985
Voltage and ion dependences of the slow currents which mediate bursting in *Aplysia* neurone R15. **360**, 69, 1985
Activity dependence of action potential duration in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 429, 1985
A calcium-activated chloride current generates the after-depolarization of rat sensory neurones in culture. **364**, 217, 1985
A microcomputer simulation of the Hodgkin–Huxley model for membrane current. **364**, 23*P*, 1985
Intracellular recordings from putative lactotrophs of bovine pituitary: modulation of spontaneous action potentials by regulators of prolactin secretion. **364**, 52*P*, 1985
Relationships between action potential duration and peak change in $[Ca^{2+}]_i$ in rat sensory neurones grown in cell culture. **365**, 59*P*, 1985
Is electrical alternans ubiquitous in myocardial ischaemia? Studies in anaesthetized pig. **369**, 129*P*, 1985
Length-related changes in activation threshold and wave form of motor units in human masseter muscle. **370**, 457, 1986
The action potential and underlying ionic currents in proximal rat middle cerebral arterioles. **371**, 289, 1986
Sympathetic innervation and excitability of arterioles originating from the rat middle cerebral artery. **371**, 305, 1986
Botulinum toxin prevents stimulus-induced backfiring produced by neostigmine in the mouse phrenic nerve–diaphragm. **372**, 395, 1986
Site of pacing influences monophasic action-potential duration in porcine left ventricle *in situ*. **372**, 33*P*, 1986
Induction of action potentials by denervation of tonic fibres in rat extraocular muscles. **374**, 165, 1986
Barium ions induce prolonged plateau depolarizations in neurosecretory neurones of the adult rat supraoptic nucleus. **375**, 573, 1986
Developmental changes in the membrane currents of rat heart action potentials. **378**, 58*P*, 1986
Action potential repolarization and a fast after-hyperpolarization in rat hippocampal pyramidal cells. **385**, 733, 1987
Failure of action potentials during cyanide exposure in isolated glycogen-depleted ferret ventricular muscle. **387**, 65*P*, 1987
Electrophysiological responses to dopamine of rat hypophysial cells in lactotroph-enriched primary cultures. **390**, 1, 1987

Activation kinetics
Voltage-dependent activation of the inward-rectifier potassium channel in the ventricular cell membrane of guinea-pig heart. **366**, 365, 1985

Acuity
Function of the Y optic nerve fibres in the cat: do they contribute to acuity and ability to discriminate fast motion? **392**, 35, 1987

Acute-phase response
Fever induced in rabbits by intraventricular injection of rabbit and human serum albumin. **390**, 137, 1987
Fever and acute phase response induced in rabbits by human recombinant interferon-γ. **391**, 209, 1987
Separate mechanisms inside and outside the blood–brain barrier inducing metabolic changes in febrile rabbits. **392**, 637, 1987

Adaptation
The absence of spread of adaptation between rod photoreceptors in turtle retina. **369**, 161, 1985
Analysis of gated membrane currents and mechanisms of firing control in the rapidly adapting lobster stretch receptor neurone. **384**, 649, 1987
Genetic and phenotypic adaptation of intestinal nutrient transport to diet in fish. **393**, 261, 1987
Spatial spread of adaptation within the cone network of turtle retina. **393**, 763, 1987
Improvement in human vision under bright light: grain or gain? **394**, 41, 1987

Adenosine
The adenosine analogue 2-chloroadenosine inhibits Ba^{2+} currents in rat dorsal root ganglion neurones in culture. **365**, 86*P*, 1985
The effect of stimulation of the gracilis muscle on venous adenosine content and vascular responses in dogs. **365**, 97*P*, 1985
Adenosine actions on CA1 pyramidal neurones in rat hippocampal slices. **366**, 119, 1985
Adenosine increases synaptic facilitation in the *in vitro* rat hippocampus: evidence for a presynaptic site of action. **369**, 365, 1985
Adenosine agonists reduce voltage-dependent calcium conductance of mouse sensory neurones in cell culture. **370**, 75, 1986
Evidence for adenosine blockade of synaptic transmission by enhancement of presynaptic K conductance in guinea-pig brain slices. **371**, 63*P*, 1986
Calcium-dependent currents in cultured rat dorsal root ganglion neurones are inhibited by an adenosine analogue. **373**, 47, 1986
Effect of infused adenosine on cardiovascular and airway function in conscious man. **374**, 22*P*, 1986
Effect of adenosine infusion on resting ventilation in man. **374**, 23*P*, 1986
Renal vasoconstrictor response to hypertonic saline in the dog: effects of prostaglandins, indomethacin and theophylline. **380**, 35, 1986

Adenosine (*cont.*)
On the role, inactivation and origin of endogenous adenosine at the frog neuromuscular junction. **384**, 571, 1987
Purinergic inhibition in the small intestinal myenteric plexus of the guinea-pig. **387**, 357, 1987
Appearance of adenosine in venous blood from the contracting gracilis muscle and its role in vasodilatation in the dog. **387**, 401, 1987
Transmural coronary vasodilator reserve and flow distribution during maximal exercise in normal and splenectomized ponies. **387**, 425, 1987

Adenosine diphosphate
Responses to adenosine diphosphate in human platelets loaded with the fluorescent calcium indicator quin2. **368**, 131, 1985

Adenosine monophosphate
Synaptic block of a transmitter-induced potassium conductance in *Aplysia* neurones. **369**, 399, 1985

Adenosine triphosphatase (ATPase)
Dependence of adenosine triphosphatase activity of rabbit psoas muscle fibres and myofibrils on substrate concentration. **365**, 259, 1985
Stimulated calcium efflux from fura-2-loaded human platelets. **393**, 513, 1987

Adenosine triphosphate (ATP)
Electrical responses of smooth muscle cells of the rabbit ear artery to adenosine triphosphate. **359**, 401, 1985
Effects of calcium and substrate on force–velocity relation and energy turnover in skinned smooth muscle of the guinea-pig. **360**, 347, 1985
Properties of adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 441, 1985
Membrane current through adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 463, 1985
Time resolved X-ray diffraction measurements on *Lethocerus* fibrillar flight muscle following the photolytic release of ATP from 'caged-ATP'. **364**, 75*P*, 1985
Adenine nucleotide depletion in human muscle in response to intermittent stimulation *in situ*. **365**, 73*P*, 1985
Noradrenaline and adenosine triphosphate as co-transmitters of neurogenic vasoconstriction in rabbit mesenteric artery. **367**, 435, 1985
Effects of mono and divalent cations on total and partial reactions catalysed by pig kidney Na,K-ATPase. **375**, 1, 1986
Could adenosine triphosphate (ATP) be an effective 'co-factor' in neuromuscular transmission in the frog? **377**, 79*P*, 1986
ATP distribution in single muscle fibres before and after maximal exercise in the thoroughbred horse. **378**, 64*P*, 1986
Ionic regulation of sea urchin sperm motility, metabolism and fertilizing capacity. **379**, 347, 1986
Adenosine triphosphate inhibits the activity of the calcium-activated non-selective cation channel in a rat insulinoma cell line. **381**, 116*P*, 1986
Studies of the unitary properties of adenosine-5′-triphosphate-regulated potassium channels of frog skeletal muscle. **382**, 213, 1987
On the role, inactivation and origin of endogenous adenosine at the frog neuromuscular junction. **384**, 571, 1987
Action of externally applied adenosine triphosphate on single smooth muscle cells dispersed from rabbit ear artery. **387**, 473, 1987
Pre- and post-junctional effects of adenosine triphosphate on noradrenergic transmission in the rabbit ear artery. **389**, 423, 1987
The effects of magnesium upon adenosine triphosphate-sensitive potassium channels in a rat insulin-secreting cell line. **391**, 611, 1987
Tolbutamide, an inhibitor of ATP-sensitive K channels, excites carotid body chemoreceptors in the cat. **394**, 66*P*, 1987

Adenylate cyclase
Vasoactive intestinal polypeptide regulation of rabbit renal adenylate cyclase activity *in vitro*. **387**, 1, 1987

Adipose tissue
Multilocular adipocytes from muscovy ducklings differentiated in response to cold acclimation. **375**, 27, 1986

Adrenal cortex
Effect of field stimulation on the secretion of steroids by the perfused rat adrenal gland. **371**, 227*P*, 1986
The effect of splanchnic nerve section on the sensitivity of the adrenal cortex to adrenocorticotrophin in the calf. **390**, 23, 1987
Adrenal cortical responses to vasoactive intestinal peptide in conscious hypophysectomized calves. **391**, 441, 1987

Adrenal gland
A dopaminergic receptor modulates catecholamine release from the cat adrenal gland. **362**, 359, 1985

Adrenal medulla
Adrenomedullary function in the neonatal rat: responses to acute hypoxia. **358**, 1, 1985
Modulation by angiotensin of the output of catecholamines from the adrenal medulla and of its response to splanchnic nerve stimulation in the dog. **361**, 73*P*, 1985
The role of sensory fibres in the rat splanchnic nerve in the regulation of adrenal medullary secretion during stress. **370**, 201, 1986
Effects of the renin–angiotensin system on the reflex response of the adrenal medulla to hypotension in the dog. **373**, 343, 1986
Halothane inhibits catecholamine secretion and ion movements in isolated bovine adrenal medullary cells. **384**, 25*P*, 1987
The adrenal medulla does not mediate the stimulatory effect of caffeine on plasma corticosterone concentrations in the rat. **388**, 32*P*, 1987
Sensory fibres modulate histamine-induced catecholamine secretion from the rat adrenal medulla and sympathetic nerves. **391**, 511, 1987

Adrenalectomy
The effect of captopril on sodium appetite in adrenalectomized and deoxycorticosterone-treated rats. **365**, 1, 1985
Factors influencing the maintenance of blood pressure in salt-maintained adrenalectomized rats. **371**, 245*P*, 1986
A non-invasive method for detecting adrenocortical insufficiency in adrenalectomized Wistar rats. **378**, 53*P*, 1986

Adrenaline
The effects of adrenaline upon metabolism in man. **362**, 18*P*, 1985
Long-term potentiation of transmitter release induced by adrenaline in bull-frog sympathetic ganglia. **374**, 515, 1986
The effect of adrenaline upon the cardiovascular responses to Lower Body Subatmospheric Pressure (LBSP) in man. **378**, 52*P*, 1986
Effects of a 7-day period of underfeeding on the physiological responses to infused adrenaline in non-obese women. **394**, 81*P*, 1987

Adrenaline receptor
Inhibitory synaptic potentials resulting from α_2-adrenoceptor activation in guinea-pig submucous plexus neurones. **358**, 17, 1985
β-adrenergic receptors are increased in soleus muscle slices from dystrophic hamsters. **365**, 81*P*, 1985
The nature of the adrenoceptors in the isolated rat basilar artery during development. **365**, 95*P*, 1985
β-Adrenergic blockade restores glucose's antiketogenic activity after exercise in carbohydrate-depleted athletes. **386**, 439, 1987
The distribution of beta-adrenoceptors in the rat uterus. **386**, 72*P*, 1987
An autoradiographic investigation of β-adrenoceptor distribution in normal and ischaemic rat myocardium. **392**, 76*P*, 1987

Adrenergic innervation
Adrenergic innervation of rat jaw muscles. **391**, 114*P*, 1987
Reserpine, vagal adrenergic activity and stress-induced acute gastric mucosal injury in the rat. **392**, 363, 1987
Effects of stimulating the sympathetic innervation in bursts on submandibular vascular and secretory function in cats. **393**, 91, 1987

β-Adrenergic receptor blockade
Effects of β-adrenergic blockade on the ventilatory responses to hypoxic and hyperoxic exercise in man. **393**, 43, 1987

Adrenergic transmission
Effect of calcium antagonists on adrenergic mechanisms in canine saphenous veins. **372**, 25, 1986

β-Adrenoceptor
A physiological basis for subclassifying β-adrenoceptors examined by chemical sympathectomy of guinea-pigs. **373**, 367, 1986

Adrenocorticotrophic hormone (ACTH)
Central alpha-1 adrenoceptors stimulate ACTH secretion in man. **374**, 45*P*, 1986
Effects of synthetic adrenocorticotrophin on adrenal medullary responses to splanchnic nerve stimulation in conscious calves. **379**, 1, 1986
The effect of splanchnic nerve stimulation on adrenocortical activity in conscious calves. **382**, 385, 1987
Reduced adrenal cortical sensitivity to adrenocorticotrophin in calves with cut splanchnic nerves. **382**, 38*P*, 1987
The effect of various interleukins on the release of adrenocorticotrophin (ACTH) and luteinizing hormone (LH) from the rat anterior pituitary gland *in vitro*. **382**, 39*P*, 1987
The effect of splanchnic nerve section on the sensitivity of the adrenal cortex to adrenocorticotrophin in the calf. **390**, 23, 1987
The effect of caffeine on plasma corticosterone and pituitary adrenocorticotrophin (ACTH) release on the rat is antagonized by adenosine. **394**, 124*P*, 1987

Aequorin
An imaging photon detector for the measurement of low-intensity luminescence. **365**, 5*P*, 1985
Fluctuations in intracellular calcium concentration and their effect on tonic tension in canine cardiac Purkinje fibres. **367**, 291, 1985
Relation between sacromere length, aequorin light emission and isometric force in intact, isolated *Balanus nubilus* muscle fibres. **382**, 170*P*, 1987

Afferent discharge
Synchronous afferent discharge from a passive muscle of the cat: significance for interpreting spike-triggered averages. **365**, 77, 1985

Afferent nerve fibre
Conduction velocity is related to morphological cell type in rat dorsal root ganglion neurones. **359**, 31, 1985
Properties of a sympatho-inhibitory and vasodilator reflex evoked by superior laryngeal nerve afferents in the cat. **364**, 183, 1985
A neurophysiological analysis of the effect of kainic acid on nerve fibres and terminals in the cat spinal cord. **368**, 99, 1985
Afferent fibres in cat ventral roots: electrophysiological and histological evidence. **379**, 229, 1986
Responses to circulatory pressures, and conduction velocity, of pulmocutaneous baroreceptors in *Bufo marinus*. **388**, 41, 1987
Response characteristics of pulmocutaneous arterial baroreceptors in the toad, *Bufo marinus*. **388**, 55, 1987
Quantitative analysis of laryngeal mechanosensitivity in the cat and rabbit. **388**, 467, 1987

Afferent relay
Pathway to the cerebral cortex for impulses from tendon organs in the cat's hind limb. **369**, 115, 1985

After-contraction
The arrhythmogenic transient inward current i_{Ti} and related contraction in isolated guinea-pig ventricular myocytes. **392**, 523, 1987

After-hyperpolarization
Ionic conductance associated with electrical activity of guinea-pig red nucleus neurones *in vitro*. **362**, 161, 1985
Two calcium-sensitive spike after-hyperpolarizations in visceral sensory neurones of the rabbit. **365**, 59, 1985
Actions of noradrenaline recorded intracellularly in rat hippocampal CA1 pyramidal neurones, *in vitro*. **372**, 221, 1986
The dependence on external cation of sodium and potassium fluxes across the human red cell membrane at low temperatures. **375**, 403, 1986
Action potential repolarization and a fast after-hyperpolarization in rat hippocampal pyramidal cells. **385**, 733, 1987
Properties of two calcium-activated hyperpolarizations in rat hippocampal neurones. **389**, 187, 1987
The effects of axotomy on bullfrog sympathetic neurones. **392**, 213, 1987
Pharmacological and physiological properties of the after-hyperpolarization current of bullfrog ganglion neurones. **394**, 315, 1987
Two calcium-activated potassium conductances in a subpopulation of coeliac neurones of guinea-pig and rabbit. **394**, 331, 1987
Inhibition of calcium-dependent spike after-hyperpolarization increases excitability of rabbit visceral sensory neurones. **394**, 415, 1987

Ageing
Mechanical properties of skin and responsiveness of slowly adapting type I mechanoreceptors in rats at different ages. **371**, 329, 1986
Effects of orchidectomy on prostate gland and thymus of young adult and 18-month-old rats. **371**, 281*P*, 1986
Decision-making criteria for spatial vision in young and old observers. **373**, 39*P*, 1986
Functional capacity in the elderly. **373**, 89*P*, 1986
The effect of age on energy metabolism and resistance to ischaemic conduction failure in rat peripheral nerve. **374**, 263, 1986
Acetylcholine metabolism and choline availability at the neuromuscular junction of mature adult and aged rats. **383**, 693, 1987
The effect of glucose on insulin release and ion movements in isolated pancreatic islets of rats in old age. **384**, 347, 1987
Statistics of neuromuscular transmitter release in young and old mouse muscle. **385**, 507, 1987
A methodology for the determination of maximal aerobic power in the elderly. **386**, 96*P*, 1987
Effects of age on contractile and enzyme-histochemical properties of fast- and slow-twitch single motor units in the rat. **392**, 129, 1987

Airway
Induction of airway hyper-reactivity by platelet activating factor in the guinea-pig. **365**, 107*P*, 1985
Morphology of presumed afferent nerve fibres in the epithelium and in the smooth muscle layer of human respiratory tract. **371**, 238*P*, 1986
Calcium-activated potassium channels in canine airway smooth muscle. **372**, 113, 1986
The effect of airflow on mucus secretion into the trachea of the cat. **380**, 429, 1986
Nervous control of tracheal vascular resistance in the dog. **382**, 54*P*, 1987
Effect of ambient temperature on small-airway function in man. **391**, 65*P*, 1987
Respiratory reflexes and upper airway resistance in anaesthetized dogs. **394**, 68*P*, 1987

Alar muscle
Respiratory activation of the facial nerve and alar muscles in anaesthetized dogs. **363**, 351, 1985

Albumin
The effects of native and modified bovine serum albumin on the permeability of frog mesenteric capillaries. **360**, 333, 1985
Fever induced in rabbits by intraventricular injection of rabbit and human serum albumin. **390**, 137, 1987
Serum albumin secretion in rat milk. **391**, 419, 1987

Aldosterone
Urinary sodium excretion and the renin–aldosterone system in new-born calves. **362**, 261, 1985
Changes in salivary aldosterone (SA) concentration during dietary sodium restriction in two healthy males. **377**, 71*P*, 1986
Effects of aldosterone on sodium transport by rat colonic epithelium. **384**, 27*P*, 1987

Allostery
Cation activation of the pig kidney sodium pump: transmembrane allosteric effects of sodium. **359**, 119, 1985

Altitude
Altitude insomnia in man. **373**, 43*P*, 1986

Amacrine cell
Effect of excitatory amino acids and analogues on [^{3}H]acetylcholine release from amacrine cells of the rabbit retina. **366**, 47, 1985

Amblyopia
Human amblyopia: cortical neurones are misplaced not lost. **390**, 21*P*, 1987
Pattern electroretinogram and visual evoked response in esotropic cats. **392**, 108*P*, 1987

Amiloride
Sodium and chloride transport by the tracheal epithelium of fetal, new-born and adult sheep. **375**, 377, 1986
The role of amiloride-blockable sodium transport in adrenaline-induced lung liquid reabsorption in the fetal lamb. **376**, 321, 1986
Amiloride-induced relaxation of human resistance arterioles: evidence for a central role of Na^+/H^+ exchange in sustained smooth muscle contraction. **391**, 25*P*, 1987
Susceptibility of the developing rat gustatory system to the physiological effects of dietary sodium deprivation. **393**, 413, 1987

Amino acid
Origin and voltage dependence of asparagine-induced depolarization in intestinal cells of *Xenopus* embryo. **366**, 197, 1985

Amino acid(*cont.*)
Glutamine transport and synthesis: explanation for injury-induced loss of glutamine in isolated rat muscle. **380**, 52*P*, 1986
Which system transports alanine in rat muscle? **380**, 68*P*, 1986

Amino acid transmitter
Amino acid receptor mediated excitatory synaptic transmission in the cat red nucleus. **376**, 13, 1986

Amino acid transport
Net transfer of L-alanine across sheep and goat placental chorionic epithelium *in vitro*. **358**, 111*P*, 1985
Transport of L-phenylalanine by isolated *VERO* cells immobilized in a microcarrier perfusion column: application of a rapid paired tracer dilution technique. **360**, 71*P*, 1985
L-Glutamine transport kinetics in the isolated perfused rat exocrine pancreas: interactions between L-glutamine, L-phenylalanine and L-serine. **361**, 24*P*, 1985
A rabbit jejunal isolated enterocyte preparation suitable for transport studies. **363**, 257, 1985
Potassium movements associated with amino acid and sugar transport in enterocytes isolated from rabbit jejunum. **363**, 271, 1985
Kinetic and radiation inactivation studies of amino acid transport in erythrocytes from Przewalski's horse. **369**, 154*P*, 1985
Chloride-activated sodium-dependent taurine transport in eel (*Anguilla japonica*) erythrocytes. **371**, 162*P*, 1986
Intracellular potassium as a possible inducer of amino acid transport across hamster jejunal enterocytes. **375**, 107, 1986
Calcium dependence of insulin's stimulatory effect on amino acid transport in the isolated perfused rat exocrine pancreas. **376**, 15*P*, 1986
The study of amino acid transport in rat liver, perfused and *in vivo*. **380**, 16*P*, 1986
Trans-stimulation of tracer amino acid efflux from the rat pancreatic epithelium by vascularly injected amino acids. **381**, 76*P*, 1986
Evidence for the presence of system *asc* in erythrocytes from the pacific hagfish (*Eptatretus stouti*). **382**, 140*P*, 1987
Volume-regulatory taurine transport in flounder erythrocytes. **382**, 189*P*, 1987
Volume-sensitive taurine transport in eel and flounder erythrocytes. **382**, 200*P*, 1987
Heterogeneity of amino acid transport in horse erythrocytes: a detailed kinetic analysis of inherited transport variation. **389**, 385, 1987
L-Lysine transport in perfused rat skeletal muscle. **390**, 203*P*, 1987
A method for estimating the kinetic characteristics of glutamine transport in perfused rat skeletal muscle during non-steady-state conditions. **390**, 221*P*, 1987
Effects of insulin, phorbol ester and carbachol on amino acid uptake and amylase secretion in isolated rat pancreatic lobules. **391**, 32*P*, 1987
Characteristics of L-glutamine transport in perfused rat skeletal muscle. **393**, 283, 1987

γ-Aminobutyric acid (GABA)
Comparison of the action of baclofen with γ-aminobutyric acid on rat hippocampal pyramidal cells *in vitro*. **360**, 161, 1985
γ-Aminobutyric- acid- and pentobarbitone-gated chloride currents in internally perfused frog sensory neurones. **360**, 367, 1985
Homocarnosine may selectively activate one of two $GABA_A$ receptor subtypes on lactotrophes in the rat. **360**, 39*P*, 1985
Effect of excitatory amino acids on γ-aminobutyric acid release from frog horizontal cells. **362**, 51, 1985
Substance P provoked γ-aminobutyric acid release from the myenteric plexus of the guinea-pig small intestine. **362**, 319, 1985
Action and localization of γ-aminobutyric acid in the cat retina. **362**, 369, 1985
Excitation of motoneurones by GABA-mediated primary afferent depolarization in the mouse spinal cord *in vitro*. **364**, 45*P*, 1985
Effects on blood pressure of microinjection of a GABA antagonist into vasopressor cell groups in the rostral medulla oblongata of the rabbit. **364**, 69*P*, 1985
An intracellular analysis of γ-aminobutyric-acid-associated ion movements in rat sympathetic neurones. **365**, 41, 1985
Use of the RML microcomputer 380Z for on-line testing of primary afferent terminal excitability in the mouse spinal cord *in vitro*. **365**, 2*P*, 1985
Conductance states of γ-aminobutyric acid (GABA) and glycine-activated chloride (Cl^-) channels in rat spinal neurones in cell culture. **365**, 87*P*, 1985
Chloride currents activated by GABA in cultured bovine chromaffin cells. **365**, 90*P*, 1985
γ-Aminobutyric acid uptake and the termination of inhibitory synaptic potentials in the rat hippocampal slice. **366**, 387, 1985
Immunohistochemical evidence for GABAergic neurones in the enteric nervous system of the rat and guinea-pig. **367**, 55*P*, 1985
Pentobarbitone promotes burst-like openings of GABA-sensitive channels in the membrane of cultured mouse spinal cord neurones. **369**, 50*P*, 1985
Flunitrazepam and pentobarbital modulate GABA responses of insect neuronal somata. **371**, 273*P*, 1986
Alphaxalone potentiates GABA and stimulates the GABA receptor of bovine chromaffin cells in culture. **372**, 48*P*, 1986
Effects of inhalation anaesthetics on responses to GABA (γ-aminobutyric acid) and glutamate in rat hippocampal slices. **372**, 82*P*, 1986
γ-Aminobutyric acid hyperpolarizes rat hippocampal pyramidal cells through a calcium-dependent potassium conductance. **373**, 181, 1986
Effects of γ-aminobutyric acid on isolated cone photoreceptors of the turtle retina. **373**, 443, 1986

γ-Aminobutyric acid (GABA) (*cont.*)
Blocking effects of cobalt and related ions on the γ-aminobutyric acid-induced current in turtle retinal cones. **373**, 463, 1986
$GABA_A$ binding sites and glutamic acid decarboxylase activity in the neurointermediate lobe of Brattleboro rats. **373**, 74*P*, 1986
Miniature and evoked inhibitory junctional currents and γ-aminobutyric acid-activated current noise in locust muscle fibres. **374**, 179, 1986
The effects of anaesthetics and high pressure on the responses of the rat superior cervical ganglion *in vitro*. **374**, 387, 1986
Prolongation of calcium action potentials by γ-aminobutyric acid in primary sensory neurones of lamprey. **375**, 481, 1986
The postsynaptic actions of avermectin at locust thoracic ganglia. **376**, 43*P*, 1986
Immunochemical evidence for an endogenous benzodiazepine receptor ligand in the brain of the mouse. **377**, 32*P*, 1986
Voltage-clamp studies of the potentiation of GABA-activated chloride conductance by the steroid anaesthetic alphaxalone and a reduced metabolite of progesterone in cultured rat C.N.S. neurones. **377**, 83*P*, 1986
'Concentration-clamp' study of γ-aminobutyric-acid-induced chloride current kinetics in frog sensory neurones. **379**, 171, 1986
A γ-aminobutyric-acid-mediated baroreceptor input to supraoptic vasopressin neurones in the rat. **381**, 595, 1986
Some properties of GABA-activated chloride channels in mammalian dorsal-root ganglion neurones. **381**, 72*P*, 1986
Modulation of the $GABA_A$ receptor of bovine chromaffin cells in culture by some progesterone metabolites. **381**, 117*P*, 1986
Activation by γ-aminobutyric acid of chloride channels in isolated normal bovine lactotrophs. **382**, 131*P*, 1987
Alphaxalone potentiates GABA and activates the $GABA_A$ receptor of mouse spinal neurones in culture. **382**, 132*P*, 1987
Voltage-clamp analysis of somatic γ-aminobutyric acid responses in adult rat hippocampal CA1 neurones *in vitro*. **384**, 27, 1987
Potentiation of γ-aminobutyric-acid-activated chloride conductance by a steroid anaesthetic in cultured rat spinalneurones. **386**, 485, 1987
Actions of γ-aminobutyric acid on rat supraoptic nucleus neurosecretory neurones *in vitro*. **387**, 629, 1987
Contribution of chloride shifts to the fade of γ-aminobutyric acid-gated currents in frog dorsal root ganglion cells. **391**, 219, 1987
Sodium-dependent suppression of γ-aminobutyric-acid-gated chloride currents in internally perfused frog sensory neurones. **392**, 543, 1987
Kinetic properties of the pentobarbitone-gated chloride current in frog sensory neurones. **394**, 85, 1987
GABA receptors of isolated guinea-pig hippocampal neurones: intra- and extracellular regulatory factors. **394**, 115*P*, 1987

γ-Aminobutyric acid receptor
Baclofen reduces post-synaptic potentials of rat cortical neurones by an action other than its hyperpolarizing action. **384**, 539, 1987

***p*-Aminohippurate**
Renal extraction and clearance of *p*-aminohippurate during saline and dextrose infusion in the rat. **363**, 303, 1985
Secretion of *p*-aminohippurate by the rat epididymis. **364**, 241, 1985

Aminopyridine
4-Aminopyridine increases long-term potentiation of excitatory post-synaptic transmission in the rat hippocampal slice. **377**, 29*P*, 1986
Potentiation by 4-aminopyridine of quantal acetylcholine release at the *Torpedo* nerve–electroplaque junction. **379**, 479, 1986

Amygdala
Amygdaloid influences on brain-stem neruones in the rabbit. **381**, 135, 1986
Cardiovascular and phrenic nerve responses to stimulation of the amygdala central nucleus in the anaesthetized rabbit. **389**, 541, 1987

Amylase
On the effects of VIP and substance P on the secretion of amylase in the rat parotid gland *in vivo*. **376**, 28*P*, 1986

Anaesthesia
Alpha-2 receptor antagonists and thiopentone anaesthesia in the rat. **360**, 37*P*, 1985
Dual effects of internal *n*-alkyltrimethylammonium ions on the sodium current of the squid giant axon. **361**, 47, 1985
The physiological effects of hydrostatic pressure are not equivalent to those of helium pressure on *Rana pipiens*. **362**, 233, 1985
The effects of halothane on the withdrawal response of *Lymnaea*. **367**, 8*P*, 1985
The action of halothane on central neurones of *Lymnaea stagnalis*. **367**, 42*P*, 1985
The effect of surgical anaesthesia on gastric motility in the ferret. **367**, 56*P*, 1985
A method for the application of volatile anaesthetics to perfused isolated tissues. **367**, 89*P*, 1985
A respiratory valve unit for open-circuit anaesthesia of small animals. **371**, 3*P*, 1986
A remotely controlled revolving injection apparatus to investigate the actions of anaesthetic agents under hyperbaric conditions. **371**, 17*P*, 1986
Blood pressure effects of leptazol applied to the ventral surface of the brain stem of cats. **372**, 445, 1986
The effects of anaesthetics and high pressure on the responses of the rat superior cervical ganglion *in vitro*. **374**, 387, 1986
Rapid resetting of rabbit aortic baroreceptors and reflex heart rate responses by directional changes in blood pressure. **378**, 391, 1986
A possible anaesthetic action of clonidine. **378**, 10*P*, 1986

Anaesthesia (*cont.*)
The characteristics of evoked unit activity in rat somatosensory cortical slices and the effect of urethane. **378**, 44*P*, 1986
Interactions of ketamine with *N*-methyl-D-aspartate receptors and synaptic transmission in the rat ventrobasal thalamus. **384**, 69*P*, 1987
The effects of several general anaesthetics on nociceptive spinal reflexes of the rat. **391**, 42*P*, 1987
Inhibition of the membrane action potential of isolated rat dorsal root ganglion cells by n-hexanol: the effect of hyperpolarizing prepulses. **394**, 107*P*, 1987

Anaesthetic
The general anaesthetic urethane inhibits evoked catecholamine secretion and calcium uptake in cultured bovine adrenal medullary cells. **374**, 40*P*, 1986
A comparison of the potencies of n-alkanols and methyl carboxylic esters as general anaesthetics in *Gammarus* and as local anaesthetics in isolated axons of *Loligo*. **384**, 21*P*, 1987
Potentiation of γ-aminobutyric-acid-activated chloride conductance by a steroid anaesthetic in cultured rat spinalneurones. **386**, 485, 1987
A relationship between neuronal topography and responses to anaesthetics in *Lymnaea*. **386**, 33*P*, 1987

Anal sphincter
Discharge patterns of pudendal efferent fibres innervating the external anal sphincter of the cat. **368**, 471, 1985

Analgesia
The effects of pretectal stimulation on the responsiveness of spinal dorsal horn neurones in the rat. **371**, 52*P*, 1986
Suppression of trigeminal noxious responses by hypothalamic stimulation in conscious unrestrained rats. **372**, 21*P*, 1986
Supraspinal morphine and descending inhibitions acting on the dorsal horn of the rat. **384**, 81, 1987

Androgen
The effects of 5α-dihydrotestosterone on the acetylcholine receptor in myotubes cultured from adult male *Xenopus laevis* laryngeal muscle. **362**, 32*P*, 1985
Influence of training on sexual maturation and androgen profiles of young female albino Wistar rats. **366**, 101*P*, 1985

Angiotensin
Effects of angiotensin or carbachol on sodium intake and excretion in adrenalectomized or deoxycorticosterone-treated rats. **359**, 447, 1985
Intrarenal angiotensin II and the control of renal function in the rat. **365**, 113*P*, 1985
The effects and interactions of angiotensin and vasopressin on the heart of unanaesthetized sheep. **367**, 1, 1985
Excitatory actions of angiotensin II on sympathetic preganglionic neurones in the rat. **367**, 49*P*, 1985
The effects of arterial blood gas tensions on pressor responses to angiotensin II in the pithed rat. **372**, 437, 1986
Effects of the renin–angiotensin system on the reflex response of the adrenal medulla to hypotension in the dog. **373**, 343, 1986
Intrarenal generation of angiotensin II during an acute reduction in renal perfusion pressure below the autoregulatory range in the rat. **373**, 37*P*, 1986
Cardiovascular and dipsogenic effects of intracerebroventricular (i.c.v.) angiotensin II (AII) in Long Evans and Brattleboro rats. **387**, 62*P*, 1987
The pressor resonse to angiotensin II in the anaesthetized Brattleboro rat pretreated with 6-hydroxydopamine. **388**, 11*P*, 1987
The influence of angiotensin II on renal sympathetic nerve-mediated antinatriuresis and antidiuresis in the rat kidney. **390**, 15*P*, 1987
Angiotensin II increases the calcium current in neonatal rat single cardiac myocytes. **390**, 64*P*, 1987
The effects of frusemide, saralasin and hypotension on fetal plasma renin activity and on fetal renal function. **393**, 479, 1987

Anion
The effects of bicarbonate and foreign anions on chloride transport in smooth muscle of the guinea-pig vas deferens. **366**, 267, 1985
Electrogenic anion secretion in cultured rat epididymal epithelium. **378**, 335, 1986
Mechanisms of anion transport across the apical membrane of duodenal enterocytes of the rat. **382**, 48*P*, 1987

Anococcygeus muscle
Occurrence and distribution of neuropeptide Y (NPY)-immunoreactive nerves in rat isolated anococcygeus, and the effect of NPY on the inhibitory transmission. **391**, 112*P*, 1987

Anomalous rectification
Selective block of inward but not outward rectification in rat sensory neurones infected with herpes simplex virus. **375**, 327, 1986
Current activation by membrane hyperpolarization in the slowly adapting lobster stretch receptor neurone. **384**, 671, 1987
A hyperpolarization-activated membrane current in isolated lobster stretch receptor neurones. **390**, 228*P*, 1987

Anoxia
Calcium and long-term transmission damage following anoxia in dentate gyrus and CA1 regions of the rat hippocampal slice. **378**, 313, 1986
Mechanism of hyperpolarizing response of hippocampal cells to anoxia in isolated slices of rat hippocampus. **382**, 79*P*, 1987
Ca currents of rat hippocampal neurones in isolated slices are depressed by anoxia. **390**, 45*P*, 1987
Why does ischaemia decrease developed pressure in isolated ferret hearts? **390**, 57*P*, 1987

Antibody
The effect of myasthenic syndrome antibody on presynaptic calcium channels in the mouse. **390**, 257, 1987

Antibody (*cont.*)
The action of myasthenic syndrome antibody fragments on transmitter release in the mouse. **390**, 173*P*, 1987
Antidiuresis
Water deprivation: effects on fluid and electrolyte handling and plasma biochemistry in Long–Evans and Brattleboro rats. **385**, 35, 1987
Antidiuretic hormone (ADH), *see* Vasopressin
Antidromic mapping
Projection of pulmonary rapidly adapting receptors to the medulla of the cat: an antidromic mapping study. **373**, 63, 1986
Pulmonary stretch receptor relay neurones of the cat: location and contralateral medullary projections. **383**, 571, 1987
Antinociception
Efflux of 5-hydroxytryptamine and noradrenaline into spinal cord superfusates during stimulation of the rat medulla. **359**, 151, 1985
Antipyresis
Analysis of the antipyretic action of α-melanocyte-stimulating hormone in rabbits. **359**, 459, 1985
Antral motility
A permissive role for the vagus nerves in the genesis of antro-antral reflexes in the anaesthetized ferret. **381**, 377, 1986
Aorta
Calcium regulation of potassium fluxes in rabbit aorta during activation by noradrenaline or high potassium medium. **367**, 27, 1985
Observations on the non-linear elastic properties of the aortic wall in the anaesthetized rabbit. **369**, 141*P*, 1985
Changes in aortic function during normal human pregnancy. **371**, 254*P*, 1986
Endothelium-derived relaxing factor alters calcium fluxes in rabbit aorta: a cyclic guanosine monophosphate-mediated effect. **381**, 427, 1986
Aortic chemoreceptor
Reflex effects elicited after injecting a local anaesthetic into the pericardial sacs of cats and dogs. **358**, 125*P*, 1985
Aortic nerve
Post-synaptic activity evoked in the nucleus tractus solitarius by carotid sinus and aortic nerve afferents in the cat. **360**, 261, 1985
Amygdaloid influences on brain-stem neruones in the rabbit. **381**, 135, 1986
Apamin
Effects of apamin, quinine and neuromuscular blockers on calcium-activated potassium channels in guinea-pig hepatocytes. **358**, 373, 1985
The properties of single apamin-sensitive potassium ion channels in guinea-pig hepatocytes. **394**, 46*P*, 1987
Aplysia
Action potentials, macroscopic and single channel currents recorded from growth cones of *Aplysia* neurones in culture. **374**, 289, 1986
The extensibility of *Aplysia* nerve and the determination of true axon length. **390**, 469, 1987
The disturbance of the fast axonal transport of protein by passive stretching of an axon in *Aplysia*. **390**, 489, 1987
Apnoea
Face immersion prolongs maximal breath-holding in man. **361**, 67*P*, 1985
Apparatus
A simple chamber for the measurement of ionic activities in small samples. **360**, 10*P*, 1985
An improved low cost input stage for very high impedance microelectrode measurement. **372**, 2*P*, 1986
A miniature modular multichannel pulse generator for use in voltage-clamp and related experiments. **381**, 6*P*, 1986
Automatic D.C. level cancellation: an alternative to capacitor-coupled amplifiers. **387**, 4*P*, 1987
A two-chip video-contrast enhancer. **387**, 23*P*, 1987
A power-assisted liquid swivel for use with intracerebral dialysis in the freely moving rat. **390**, 7*P*, 1987
An air-gap suction electrode, the 'bubble electrode ' **390**, 8*P*, 1987
Apparatus for rapidly imaging fluorescence and luminescence signals from individual cells containing optically active molecules. **391**, 14*P*, 1987
A multiway tap for use with a U-tube tool. **391**, 15*P*, 1987
A device for the quantitative clinical evaluation of standing balance. **392**, 2*P*, 1987
A rapid computer-controlled binary gas-mixing system for studies in respiratory control. **394**, 7*P*, 1987
Area postrema
The effect of removing area postrema on sodium and potassium balances in the rat. **358**, 110*P*, 1985
Sprague–Dawley rats receiving angiotensin into area postrema drink more saline. **367**, 62*P*, 1985
Arousal
Habituation of the arousal response to upper airway obstruction in lambs. **371**, 234*P*, 1986
Arrhythmia
A computer method for the analysis of the timing of R-waves within breaths. **361**, 5*P*, 1985
The wave-length of the atrial impulse and re-entrant arrhythmias in the conscious dog. **366**, 37*P*, 1985
The effects of caffeine and ryanodine on the electrical activity of the canine coronary sinus. **368**, 593, 1985
The arrhythmogenic current I_{Ti} in the absence of electrogenic sodium–calcium exchange in sheep cardiac Purkinje fibres. **374**, 201, 1986
Free radical scavengers reduce the different incidences of isoprenaline induced dysrhythmia in isolated atria from rats fed lipid-supplemented diets. **386**, 93*P*, 1987
Respiratory modulation of left ventricular stroke volume in man measured using pulsed Doppler ultrasound. **393**, 499, 1987

Arsenazo III
Calcium entry into voltage-clamped presynaptic terminals of squid. **367**, 143, 1985
Calcium entry and transmitter release at voltage-clamped nerve terminals of squid. **367**, 163, 1985
Arsenazo III transients and calcium current in a normally non-spiking neuronal soma of crayfish. **374**, 571, 1986
Arterial baroreceptor
Rapid resetting of rabbit aortic baroreceptors and reflex heart rate responses by directional changes in blood pressure. **378**, 391, 1986
Arterial chemoreceptor
ICI 154,129 antagonizes [Met]enkephalin-induced depression of cat chemosensory discharge. **371**, 113*P*, 1986
The excitation of cat carotid body chemoreceptors by hyperkalaemia depends on P_{O_2} and P_{CO_2}. **374**, 25*P*, 1986
Patterns of breathing in response to alternating patterns of alveolar carbon dioxide pressures in man. **376**, 31, 1986
Review Lecture. Studies on arterial chemoreceptors in man. **384**, 1, 1987
Arterial pressure, *see* Blood pressure
Arterial smooth muscle, *see also* Smooth muscle
A23187 increases calcium permeability of store sites more than of surface membranes in the rabbit mesenteric artery. **359**, 467, 1985
A ^{31}P nuclear magnetic resonance (NMR) study of isolated rabbit arterial smooth muscle. **365**, 72*P*, 1985
Inositol 1,4,5-trisphosphate activates pharmacomechanical coupling in smooth muscle of the rabbit mesenteric artery. **370**, 605, 1986
Calcium-activated potassium channels in single smooth muscle cells of rabbit jejunum and guinea-pig mesenteric artery. **371**, 45, 1986
Species variation in basal endothelium-derived relaxant factor (EDRF) activity as measured by calcium influx in isolated vascular smooth muscle. **372**, 36*P*, 1986
The interaction between noradrenaline activation and distension activation of the rabbit ear artery. **375**, 283, 1986
Activation of skinned vascular smooth muscle by photolysis of 'caged inositol trisphosphate' to inositol 1,4,5-trisphosphate ($InsP_3$). **377**, 100*P*, 1986
Contraction of human umbilical artery, but not vein, by oxygen. **380**, 513, 1986
Comparison of the effects of BRL34915 and of acetylcholine-liberated EDRF on rat isolated aorta. **382**, 50*P*, 1987
Actions of neuropeptide Y on innervated and denervated rat tail arteries. **386**, 19, 1987
Action of externally applied adenosine triphosphate on single smooth muscle cells dispersed from rabbit ear artery. **387**, 473, 1987
Myogenic adaptation of rabbit ear arteries to pulsatile internal pressures. **391**, 313, 1987
Regulation of cell calcium and contractility in mammalian arterial smooth muscle: the role of sodium–calcium exchange. **392**, 617, 1987
Biphasic contraction to sympathetic nerve stimulation in isolated dog mesenteric artery. **392**, 46*P*, 1987
Arteriole
The action potential and underlying ionic currents in proximal rat middle cerebral arterioles. **371**, 289, 1986
Sympathetic innervation and excitability of arterioles originating from the rat middle cerebral artery. **371**, 305, 1986
Arteriovenous anastomosis
Arterial supply, venous drainage and collateral circulation in the nose of the anaesthetized dog. **391**, 57, 1987
Artery
Cholinergic mechanisms in human coronary artery preparations: implications of species differences. **358**, 509, 1985
Effect of luminal flow rate on transmural fluid flux in the perfused rabbit common carotid artery. **365**, 92*P*, 1985
Labelled albumin uptake by rabbit aorta, pulmonary artery and common carotid artery. **371**, 85*P*, 1986
Synthetic competitive antagonists of bradykinin on vascular permeability in the rabbit. **372**, 73*P*, 1986
Comparison of uptake and degradation of low-density lipoproteins by arteries and veins in rabbits. **378**, 55*P*, 1986
Presynaptic opioid δ-receptors in the rabbit mesenteric artery. **379**, 217, 1986
The effects of transmural pressure and perfusate albumin concentration on the hydraulic conductivity of the isolated rabbit common carotid artery. **387**, 68*P*, 1987
Three-dimensional wall shear stress distribution in a unilateral arterial stenosis model measured with an electrochemical technique. **388**, 19*P*, 1987
Arterial flow mapping using multigate Doppler ultrasound and phase-encoded NMR. **388**, 20*P*, 1987
The distribution volumes of albumin and EDTA in the intima, media and adventitia of isolated human mesenteric arteries. **388**, 26*P*, 1987
Articular nerve
The effects of direction and acceleration of movement of the knee joint of the dog on medial articular nerve discharge. **388**, 505, 1987
Ascorbic acid
Effects of light reversal on the circadian pattern of motor activity and voltammetric signals recorded in rat forebrain. **374**, 91, 1986
ATP, *see* Adenosine triphosphate
Atrial natriuretic peptide
Tachycardia releases immunoreactive atrial natriuretic peptide in the rabbit. **371**, 250*P*, 1986
Absence of a natriuretic response to left atrial distension in the dog after vagal cooling: evidence against a natriuretic hormonal role for atrial natriuretic peptides? **373**, 52*P*, 1986

Atrial natriuretic peptide (*cont.*)
Effect of posture on plasma atrial natriuretic peptide (ANP) and renal function in man. **373**, 73*P*, 1986
Mechanism of vasodilation induced by α-human atrial natriuretic polypeptide in rabbit and guinea-pig renal arteries. **377**, 315, 1986
Stimulation of kallikrein excretion by infusion of atrial natriuretic peptide (ANP) in rats: correlation with urine flow, sodium and potassium excretion. **377**, 52*P*, 1986
Vasomotor effects of atrial natriuretic peptides on feline pial arterioles. **380**, 45*P*, 1986
Evidence supporting the hypothesis that atrial natriuretic peptide (ANP) is a natriuretic hormone in normal man. **380**, 46*P*, 1986
Rapid degradation of ^{125}I-atrial natriuretic factor by isolated rat and rabbit ventricular myocytes. **380**, 72*P*, 1986
The influence of physiological changes in circulating atrial natriuretic peptide (ANP) on the excretion of urinary tissue kallikrein in man. **381**, 25*P*, 1986
Natriuretic response to atrial natriuretic peptide in the isolated perfused rat kidney. **381**, 26*P*, 1986
Binding of [^{125}I]atrial natriuretic peptide to monolayer cultures of bovine, canine, human and murine cell lines. **382**, 148*P*, 1987
Renal mechanisms of human α-atrial natriuretic peptide in man. **387**, 31, 1987
Stimulation of kallikrein excretion by atrial natriuretic peptide (ANP) after suppression by angiotensin or amiloride in rats. **387**, 49*P*, 1987
Effects of atrial natriuretic polypeptide on rat hypothalamic neurones *in vitro*. **389**, 717, 1987
Effects of atrial natriuretic factor on calcium current in single cells of frog heart. **390**, 65*P*, 1987
The effects of hypophysectomy on the concentration of atrial peptide (ANP) in the plasma and in the heart atrial tissue of the rat. **390**, 238*P*, 1987
Inhibition of [^{125}I]atrial natriuretic peptide degradation in rat heart, lung and kidney tissue. **392**, 97*P*, 1987
Mechanism for the release of atrial natriuretic peptide with tachycardia in the anaesthetized rabbit. **394**, 50*P*, 1987

Atrial receptor
The effects of stimulation of left atrial receptors on the activity in efferent vagal cardiac nerves in decerebrate dogs. **362**, 37*P*, 1985
Left atrial receptors and plasma renin activity in the dog. **367**, 47*P*, 1985
Effect of distension of the urinary bladder on efferent cardiac sympathetic nerves in the dog. **367**, 48*P*, 1985
The role of sympathetic nerves in renal responses to left atrial receptor stimulation in anaesthetized dogs. **376**, 30*P*, 1986
Left atrial receptors and plasma cortisol levels in the dog. **390**, 230*P*, 1987
Atrial receptor discharge in dogs with chronically induced difference in blood volume. **393**, 491, 1987

Atrium
Decreased natriuretic response to atrial natriuretic factor (ANF) in water loaded rats. **365**, 111*P*, 1985

Atropine
Effects of an intramuscular dose of atropine sulphate on visual performance in man. **380**, 27*P*, 1986
Presynaptic actions of curare and atropine on quantal acetylcholine release at a central synapse of *Aplysia*. **388**, 665, 1987
The effects of prior intramuscular injection of atropine sulphate on the changes in vision caused by physostigmine sulphate eyedrops in human subjects. **390**, 263*P*, 1987

Auditory localization
A digitally controlled vertical hoop system for the presentation of free-field auditory and visual stimuli. **382**, 21*P*, 1987

Auditory system
Slow depolarizing response from supporting cells in the goldfish saccule. **366**, 107, 1985
Neurones in the superior colliculus of the gerbil responsive to the direction of movement of an auditory stimulus in open field. **371**, 278*P*, 1986
Large departures from Weber's law in hearing of man. **391**, 54*P*, 1987
The effects of broadband noise on the rate-intensity functions of neurones in the guinea-pig inferior colliculus. **394**, 113*P*, 1987

Autacoid
Characteristics of neuro-effector transmission in the smooth muscle layer of dog bronchiole and modifications by autacoids. **370**, 551, 1986

Autonomic ganglion
Non-cholinergic transmission in a sympathetic ganglion of the guinea-pig elicited by colon distension. **374**, 315, 1986

Autonomic nervous system
The effect of autonomic agonists and nerve stimulation on protein secretion from the rat submandibular gland. **358**, 65, 1985
Cholinergic mechanisms in human coronary artery preparations: implications of species differences. **358**, 509, 1985
Pancreatic neuroendocrine responses to butyrate in conscious sheep. **364**, 281, 1985
The responses of vasoconstrictor neurones of skeletal muscle and kidney to stimulation of the medullary raphe area of the rat. **365**, 112*P*, 1985
Muscarinic m_1 and m_2 receptors mediate depolarization and presynaptic inhibition in guinea-pig enteric nervous system. **368**, 435, 1985
Autonomic control of penile erection in the dog. **384**, 525, 1987

Autonomic reflex
Venous mechanoreceptor input to neurones in the inferior mesenteric ganglion of the guinea-pig. **377**, 49, 1986

Autoradiography
Effect of starvation on the localization of valine uptake by the rat small intestine. **369**, 195*P*, 1985

Autoradiography (*cont.*)
Use of a Video Assisted Scanning Table (VAST) in autoradiographic analysis. **373**, 3*P*, 1986
Autoradiographic demonstration of an endothelium-dependent binding of corticotropin releasing factor to isolated rabbit aorta. **387**, 88*P*, 1987

Autoradiography
Autoradiographic localization of adrenergic and muscarinic cholinergic receptors in human atrial tissue. **392**, 89*P*, 1987

Autoregulation
Transient responses of coronary flow in the blood-perfused isolated rat heart submitted to changes in oxygen content. **358**, 321, 1985
Effect of pump perfusion on autoregulation in the hindleg of the cat. **366**, 49*P*, 1985
Autoregulation of hind-limb blood flow in conscious dogs. **368**, 409, 1985
Potassium transport of the frog retinal pigment epithelium: autoregulation of potassium activity in the subretinal space. **375**, 461, 1986

Avian muscle
Low frequency chronic electrical stimulation of normal and dystrophic chicken muscle. **376**, 377, 1986

Axon
Potential-dependent variations of the intracellular pressure in the intracellularly perfused squid giant axon. **369**, 229, 1985
Neural activity in the regenerating optic nerve of the goldfish. **391**, 299, 1987

Axonal transport
Fast orthograde axonal transport and nerve temperature in rats with experimental diabetes. **358**, 30*P*, 1985
Analysis of axonal transport of radiolabelled tracer molecules using a microcomputer. **361**, 10*P*, 1985
A novel preparation for the study of axonal transport *in vitro*: the chick nodose ganglion/vagus nerve preparation. **361**, 11*P*, 1985
Axonal transport of acetylcholinesterase and nerve temperature in rats with experimental diabetes. **361**, 44*P*, 1985
Impaired axonal transport of choline-containing lipids in rats with experimental diabetes mellitus and its prevention by sorbinil, an aldose reductase inhibitor. **369**, 158*P*, 1985
Axonal transport of cytoskeletal proteins in the chicken oculomotor system. **369**, 163*P*, 1985
Axonal transport of 6-phosphofructokinase in experimental diabetes: effects of aldose reductase inhibition and insulin. **382**, 34*P*, 1987
Axonal transport of substance P-like immunoreactivity in rats with long-term experimental diabetes. **387**, 39*P*, 1987
The disturbance of the fast axonal transport of protein by passive stretching of an axon in *Aplysia*. **390**, 489, 1987

Axoplasm
Calcium buffering in axons and axoplasm of *Loligo*. **383**, 369, 1987

Axotomy
The transneuronal induction of sprouting and synapse formation in intact mouse muscles. **360**, 387, 1985
Colchicine treatment is not equivalent to axotomy in inducing changes of excitability in the leech AP neurones. **369**, 162*P*, 1985
Outgoing synapses of small granule-containing cells in the rat superior cervical ganglion after post-ganglionic axotomy. **374**, 1, 1986
Incoming synapses and size of small granule-containing cells in a rat sympathetic ganglion after post-ganglionic axotomy. **374**, 33, 1986
Cell death of axotomized motoneurones in neonatal rats, and its prevention by peripheral reinnervation. **386**, 135, 1987
Synaptic loss from axotomised α- and γ-motoneurones in the cat thoracic spinal cord. **390**, 48*P*, 1987
Effects of central or peripheral axotomy on membrane properties of sensory neurones in the petrosal ganglion of the cat. **391**, 39, 1987
The effects of axotomy on bullfrog sympathetic neurones. **392**, 213, 1987

Baclofen
Comparison of the action of baclofen with γ-aminobutyric acid on rat hippocampal pyramidal cells *in vitro*. **360**, 161, 1985
Baclofen reduces post-synaptic potentials of rat cortical neurones by an action other than its hyperpolarizing action. **384**, 539, 1987
Calcium channel currents and their inhibition by (−)-baclofen in rat sensory neurones: modulation by guanine nucleotides. **386**, 1, 1987
Baclofen and velocity storage: a model of the effects of the drug on the vestibulo-ocular reflex in the rhesus monkey. **393**, 703, 1987

Barbiturate
Pentobarbitone as an excitatory amino acid antagonist in slices of rat cerebral cortex. **360**, 38*P*, 1985

Barium
The secretory action of barium chloride in rat colon. **361**, 19, 1985
Some ultrastructural evidence of barium/calcium competition for entry into smooth muscle cells of the rabbit ear artery. **366**, 79*P*, 1985
The influence of Ba^{2+} on membrane potential and K^+-induced depolarizations in isolated goldfish intestinal epithelium. **366**, 92*P*, 1985
Effects of calcium, barium and lanthanum on depolarization–contraction coupling in skeletal muscle fibres of *Rana pipens*. **370**, 39, 1986
Barium ions induce prolonged plateau depolarizations in neurosecretory neurones of the adult rat supraoptic nucleus. **375**, 573, 1986

Barnacle
Adaptation in the input–output relation of the synapse made by the barnacle's photoreceptor. **368**, 179, 1985

Baroreceptor
Sino-aortic denervation in the monkey. **360**, 423, 1985

Baroreceptor (*cont.*)
Static and dynamic responses of carotid sinus baroreceptors in dogs with chronic volume overload. **369**, 295, 1985
Hypothalamic inhibition of baroreceptor inputs in the nucleus of the tractus solitarius of the cat. **373**, 58*P*, 1986
Lack of respiratory modulation of baroreceptor inputs in the nucleus of the tractus solitarius of the cat. **376**, 33*P*, 1986
Sensitization of aortic and cardiac baroreceptors by arginine vasopressin in mammals. **377**, 251, 1986
Intracellular labelling of neurones receiving carotid sinus nerve inputs in the cat. **387**, 60*P*, 1987
Responses to circulatory pressures, and conduction velocity, of pulmocutaneous baroreceptors in *Bufo marinus*. **388**, 41, 1987
Response characteristics of pulmocutaneous arterial baroreceptors in the toad, *Bufo marinus*. **388**, 55, 1987
Chronic (16-day) effects of pulmocutaneous arterial baroreceptor denervation on blood pressure and heart rate of conscious toads. **394**, 36*P*, 1987

Baroreceptor reflex
Abdominal vascular responses to changes in carbon dioxide tension in the cephalic circulation of anaesthetized dogs. **358**, 417, 1985
Responses of skeletal muscle microcirculation of the rat to baroreceptor stimulation. **364**, 70*P*, 1985
Central cardiodeceleration and arterial blood pressure in the rabbit. **364**, 71*P*, 1985
Respiratory modulation of muscle sympathetic and vagal cardiac outflow in man. **365**, 181, 1985
Arterial pressure maintenance after haemorrhage in the pregnant rabbit. **366**, 17, 1985
Static and dynamic responses of carotid sinus baroreceptors in dogs with chronic volume overload. **369**, 295, 1985
Cardiac baroreflex sensitivities to depressor stimuli following acute and chronic arterial catheterization in Long Evans and Brattleboro rats. **372**, 76*P*, 1986
Measurement of baroreceptor-heart rate reflex sensitivity and latency in man: a comparison of two different methods. **373**, 54*P*, 1986
The diving response in man: effects on sympathetic activity in muscle and skin nerve fascicles. **377**, 429, 1986
Hypothalamic inhibition of carotid sinus and vagal nerve inputs to the nucleus tractus solitarius of the cat is GABA mediated. **384**, 50*P*, 1987
Cardiac baroreflex sensitivities in water-deprived Long Evans and Brattleboro rats. **386**, 49*P*, 1987
Measurement of baroreflex alterations using the steady-state method during reversal of two-kidney, one-clip hypertension in rats. **388**, 15*P*, 1987

Basal ganglion
The effects of dopamine loss on the output from basal ganglia in the rat. **358**, 43*P*, 1985
Aversive conditioning of feline contact placing requires basal ganglia, but not cerebellar circuitry. **382**, 92*P*, 1987
The responses of rat striatal neurones to scrotal skin temperature. **386**, 31*P*, 1987
Tilting reactions in man: involvement of the basal ganglia in labyrinth reactions (Film and Video). **392**, 13*P*, 1987

Behaviour
Reactions to hot-plate pain: effects of sex, strain, light cycle and social factors. **367**, 35*P*, 1985
Effects of illumination and detention on the exploratory behaviour of the rat. **369**, 172*P*, 1985
Neurochemical indices of the contralateral circling behaviour in the rat induced by acute unilateral intranigral infusions of *N*-methyl-4-phenyl-1,2,3,6-tetrahydropyridine. **371**, 214*P*, 1986
Diurnal- and behaviour-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 201, 1987

Benzodiazepine
The lack of benzodiazepine effects on the electroretinogram of the rat. **372**, 45*P*, 1986
Benzodiazepine action at retinal ganglion cells in the rat and cat. **377**, 43*P*, 1986

Bicarbonate
Bicarbonate ion transport across basolateral membranes of frog skin epithelium. **371**, 164*P*, 1986
Measurement of gastric bicarbonate secretion in the presence of acid secretion in the anaesthetized rat. **374**, 2*P*, 1986
Student misconceptions of the bicarbonate buffer system. **374**, 8*P*, 1986
Effect of luminal perfusion rate on the rate of duodenal alkalinization in the rat *in vivo*. **384**, 43*P*, 1987
Absence of a relationship between arterial pH and pancreatic bicarbonate secretion in the isolated perfused cat pancreas. **388**, 495, 1987
Bicarbonate secretion by rat caecum *in vitro*. **391**, 99*P*, 1987

Bicuculline
Action and localization of γ-aminobutyric acid in the cat retina. **362**, 369, 1985

Bile
Action of bile acids on intestinal kallikrein-like amidase (KLA): comparison of effects in rat stomach and colon. **386**, 108*P*, 1987

Bile secretion
The effect of aspartocholate on bile flow in the rat. **362**, 50*P*, 1985
High biliary HCO_3^- concentration and hypercholeresis induced by hyodeoxycholate in the rat. **386**, 106*P*, 1987
Effect of systemic pH- and P_{CO_2}-changes on biliary HCO_3 secretion in the pig. **390**, 169*P*, 1987
Effect of arterial P_{CO_2} (P_{a,CO_2}) on secretin-dependent biliary HCO_3^- secretion (J_{HCO_3}) and the cytoplasmic vesicle population in bile duct cells in pigs. **391**, 116*P*, 1987
Effect of carbon dioxide on pancreatic $NaHCO_3$ secretion and pancreatic duct cell ultrastructure in anaesthetized pigs. **391**, 117*P*, 1987

Binocular vision
Neither ocular vergence nor absolute disparity changes produce motion-in-depth sensation in man. **366**, 16*P*, 1985
Adaptation effect in human binocular rivalry **367**, 26*P*, 1985
The effect of hemiretinal stimulation on optokinetic asymmetries in human amblyopia. **369**, 42*P*, 1985
Dynamics of disparity-induced accommodation compared with those of blur-induced accommodation in the monkey. **369**, 43*P*, 1985
Spatial interaction in the domain of disparity signals in human stereoscopic vision. **370**, 619, 1986
Human ocular vergence movements induced by changing size and disparity. **379**, 145, 1986
Biopsy needle
A percutaneous muscle biopsy needle for simultaneous sampling at two sites. **376**, 12*P*, 1986
Bipolar cell, *see* Retinal bipolar cell
Birefringence
Change in optical activity of a lobster nerve associated with excitation. **389**, 223, 1987
Bladder, *see* Urinary bladder
Blood
Inclusion of an extracorporeal circulation in the anaesthetized rat. **387**, 5*P*, 1987
A system for serial blood sampling in conscious rats. **390**, 2*P*, 1987
Blood–brain barrier
Studies on blood–brain barrier transport in human subjects using positron emission tomography (PET). **360**, 30*P*, 1985
A calcium-dependent reversible permeability increase in microvessels in frog brain, induced by serotonin. **361**, 103, 1985
Brain vascular volume, electrolytes and blood–brain interface in the cuttlefish *Sepia officinalis* (Cephalopoda). **368**, 197, 1985
Tightness of the blood–brain barrier and evidence for brain interstitial fluid flow in the cuttlefish, *Sepia officinalis*. **368**, 213, 1985
Comparison of the effects of some thiamine analogues upon thiamine transport across the blood–brain barrier of the rat. **369**, 79, 1985
Kinetics of glucose transport at regional level in the CNS of the anaesthetized rat. **369**, 176*P*, 1985
Na^+–K^+ transport at the blood–brain barrier – a micro-electrode study in the frog. **372**, 68*P*, 1986
Hyperosmolar opening of the rat blood–brain barrier in the absence of energy-producing metabolism. **374**, 19*P*, 1986
The effect of capsaicin on blood–brain barrier permeability in the rat. **374**, 20*P*, 1986
A micro-electrode study of K^+ transport at the dogfish glial blood–brain barrier. **374**, 29*P*, 1986
Permeability of the dogfish glial blood–brain barrier to ions and small molecules. **377**, 103*P*, 1986
Glucose transport across the glial blood–brain barrier of the cuttlefish *Sepia*. **377**, 104*P*, 1986
Failure of low pH to open the blood–brain barrier of the rat in the presence of an inhibitor of energy-yielding metabolism. **381**, 53*P*, 1986
Blood–brain and blood–c.s.f. barriers to protein in pouch young of tammar wallaby (*M. eugenii*). **382**, 99*P*, 1987
Brain uptake of bilirubin in the rat studied using a single-pass tissue sampling technique. **382**, 100*P*, 1987
Evidence for separate mechanisms of induction of biphasic fever inside and outside the blood–brain barrier in rabbits. **383**, 629, 1987
Permeability of the blood–brain barrier to free bilirubin studied in the rat using an *in situ* brain perfusion technique. **390**, 92*P*, 1987
A preparation for the study of glial transport: the glial blood–brain barrier of the dogfish *Scyliorhinus canicula*. **394**, 91*P*, 1987
Blood flow
Measurement of resting and reactive hyperaemic flow in the human superficial femoral artery. **358**, 118*P*, 1985
The effect of recumbency on human superficial femoral arterial flow and diameter. **361**, 71*P*, 1985
Time course of blood flow in the human femoral artery during and following rhythmic contractions of the quadriceps muscle group. **361**, 72*P*, 1985
Naloxone increases blood flow in the human hand. **363**, 315, 1985
Coeliac axis blood flow in man during digestion. **365**, 94*P*, 1985
Maximal perfusion of skeletal muscle in man. **366**, 233, 1985
Autoregulation of hind-limb blood flow in conscious dogs. **368**, 409, 1985
Skin colour, temperature and blood flow in response to vasodilators in human skin. **372**, 8*P*, 1986
A method for the measurement of total hepatic blood flow in the anaesthetized rabbit. **374**, 6*P*, 1986
Postural changes in pelvic blood flow in women. **374**, 9*P*, 1986
Changes of erythrocyte deformability during cardiac by-pass surgery in man. **374**, 50*P*, 1986
Blood flow to the respiratory and limb muscles and to abdominal organs during maximal exertion in ponies. **377**, 25, 1986
Abolition of flow through the vascular bed of an experimental rat glioma following saline perfusion. **377**, 18*P*, 1986
The effect of feeding and sham feeding on the superior mesenteric artery blood flow in man. **377**, 59*P*, 1986
Quantitative assessment of pharmacologically induced erythema in man. **380**, 10*P*, 1986
Whole-body and skeletal muscle energy expenditure and regional blood flow in endotoxaemic rats. **380**, 70*P*, 1986
Reflex changes in human finger tip blood flow in relation to age. **380**, 79*P*, 1986
Respiratory responses to a sustained increase in cardiac output during rhythmic arm exercise in man. **382**, 63*P*, 1987

Blood flow (*cont.*)
Changes in blood flow to the foot during isometric handgrip exercise in man. **384**, 56*P*, 1987
Dynamics of medullary hydrogen ion and respiratory responses to square-wave change of arterial carbon dioxide in cats. **385**, 627, 1987
The effect of lumbar epidural anaesthesia on subcutaneous P_{O_2} measurements in the arm and leg in man: a preliminary report. **387**, 2*P*, 1987
Investigation of repeatability of pulsed Doppler ultrasound measurements of arterial blood velocity in a normal human subject. **388**, 21*P*, 1987
Multichannel Doppler ultrasound study of the effects of cigarette smoking on arterial haemodynamics in normal subjects. **388**, 24*P*, 1987
The role of myogenic relaxation, adenosine and prostaglandins in human forearm reactive hyperaemia. **389**, 147, 1987
Haemodynamic effects of atriopeptin II in anaesthetized rats. **390**, 239*P*, 1987
Arterial supply, venous drainage and collateral circulation in the nose of the anaesthetized dog. **391**, 57, 1987
The effects of exercise on the pulsatility index in the femoral, carotid and brachial arteries in man. **391**, 109*P*, 1987
Changes in the pulsatility index of the femoral artery of the lamb after close intra-arterial administration of vasoactive drugs. **391**, 110*P*, 1987

Blood pressure
Sodium excretion and the control of arterial blood pressure. **358**, 119*P*, 1985
Oral glucose, but not oral xylose, substantially lowers blood pressure in autonomic failure. **358**, 123*P*, 1985
Sino-aortic denervation in the monkey. **360**, 423, 1985
Properties of a sympatho-inhibitory and vasodilator reflex evoked by superior laryngeal nerve afferents in the cat. **364**, 183, 1985
Non-invasive, continuous, calibrated blood pressure by the method of Peñáz. **366**, 6*P*, 1985
Factors influencing B.P. in rats with streptozotocin-induced diabetes mellitus. **369**, 125*P*, 1985
Exogenous insulin lowers blood pressure in autonomic failure. **369**, 132*P*, 1985
Blood pressure response evoked by ventral root afferent fibres in the cat. **370**, 255, 1986
Blood pressure effects of leptazol applied to the ventral surface of the brain stem of cats. **372**, 445, 1986
The influence of β-adrenoceptor antagonism on B.P. following administration of prazosin and idazoxan to conscious, Long Evans rats. **377**, 60*P*, 1986
The pattern of sympathetic neurone activity during expiration in the cat. **378**, 375, 1986
Time of day affects the B.P. response to haemorrhage in rats with adrenal regeneration hypertension. **378**, 54*P*, 1986
Investigation of the cardiovascular effects of central α_1-adrenoceptor stimulation in conscious Long Evans and Brattelboro rats. **382**, 114*P*, 1987
Cardiovascular responses at the onset of exercise with partial neuromuscular blockade in cat and man. **384**, 39, 1987
Finger sphygmomanometry (FS). **384**, 15*P*, 1987
In the presence of phenoxybenzamine, peripheral, but not central, administration of idazoxan to conscious Long Evans rats induces B.P. instability. **384**, 47*P*, 1987
Properties of the inspiration-related activity of sympathetic preganglionic neurones of the cervical trunk in the cat. **385**, 545, 1987
Blood pressure (B.P.) recovery following haemorrhage in rats treated with streptozotocin. **386**, 50*P*, 1987
Human ambulatory venous pressure measurement in the assessment of calf-muscle pump function in limbs with chronic venous ulceration. **387**, 21*P*, 1987
Differential control of cardiac and vasomotor activity by neurones in nucleus paragigantocellularis lateralis in the cat. **389**, 23, 1987
Cardiovascular responses to administration of prazosin and idazoxan in conscious, adrenal demedullated Long Evans rats. **390**, 187*P*, 1987

Blood–retinal barrier
Quantitative assessment of the permeability of the rat blood–retinal barrier to small water-soluble non-electrolytes. **389**, 483, 1987

Blood vessel
Electrophysiological analysis of cholinergic vasodilatation in the isolated rabbit lingual artery. **372**, 75*P*, 1986
Receptors in three different muscular layers of blood vessels in the umbilical cord of sei whale. **390**, 234*P*, 1987
Optimization of conditions for the demonstration of the influence of endothelium derived relaxing factor on rings of blood vessels. **392**, 21*P*, 1987
Changes in endothelial morphology of brain vasculature after controlled angular acceleration of the subhuman primate head. **392**, 88*P*, 1987
Vascular volume and vessel recruitment in *Sepia* tissues. **394**, 165*P*, 1987

Blood volume
Atrial receptor discharge in dogs with chronically induced difference in blood volume. **393**, 491, 1987

Body temperature
Radiotelemetry of deep body temperature from one piglet within a group. **371**, 8*P*, 1986
Irregularity of rest and activity: studies on circadian rhythmicity in man. **381**, 279, 1986

Bombesin
Tachykinins and bombesin excite non-pyramidal neurones in rat hippocampus. **379**, 417, 1986
Bombesin reactivates growth in quiescent chick embryo otocysts in culture. **394**, 126*P*, 1987

Bone
Dietary lead inhibits avian bone fracture healing. **371**, 223*P*, 1986

Botulinum toxin
Botulinum toxin type D blocks catecholamine secretion from isolated bovine adrenal medullary cells. **371**, 155*P*, 1986

Botulinum toxin (*cont.*)
Botulinum toxin prevents stimulus-induced back-firing produced by neostigmine in the mouse phrenic nerve–diaphragm. **372**, 395, 1986
Acetylcholine receptors and sodium channels in denervated and botulinum-toxin-treated adult rat muscle. **382**, 69, 1987
Botulinum toxin inhibits quantal acetylcholine release and energy metabolism in the *Torpedo* electric organ. **385**, 677, 1987
The effects of *in vitro* application of purified botulinum neurotoxin at mouse motor nerve terminals. **386**, 475, 1987
Does botulinum toxin type D inhibit exocytosis by ADP-ribosylation? **394**, 96*P*, 1987
Bradykinin
Vasodilator actions of acetylcholine, A23187 and bradykinin in the guinea-pig isolated perfused heart: possible relationship to endothelium-derived relaxing factor. **384**, 54*P*, 1987
Selective responsiveness of polymodal nociceptors of the rabbit ear to capsaicin, bradykinin and ultra-violet irradiation. **388**, 9, 1987
The half-life of endothelium-derived relaxing factor released from bovine aortic endothelial cells in culture. **388**, 71, 1987
Effects of bradykinin on the membrane currents of rat sensory neurones in tissue culture. **390**, 74*P*, 1987
Synthetic competitive antagonists of bradykinin on vasodilator responses in the cat and rabbit. **391**, 68*P*, 1987
Bradykinin stimulates ion transport in rat isolated colon epithelium by a biphasic neural and non-neural mechanism. **391**, 103*P*, 1987
Brain
Regulation of brain intracellular pH during hypocapnia and hypercapnia studied by phosphorus NMR spectroscopy in the new-born lamb. **358**, 99*P*, 1985
Changes in brain phosphorus metabolites during the post-natal development of the rat. **359**, 417, 1985
Synaptic inhibition of sympathetic preganglionic neurones induced by the stimulation of the aortic nerve in the cat. **360**, 45*P*, 1985
Increase in intramammary pressure following stimulation of fetal brain tissue transplants in lactating rats. **361**, 31*P*, 1985
A simple direct method for measuring concentrations of phosphorus-containing metabolites *in vitro* using nuclear magnetic resonance (NMR). **365**, 12*P*, 1985
The space constant for glial potassium buffering in the isolated frog brain. **365**, 52*P*, 1985
The effect of small unilateral frontoparietal cortical lesions on digit tremor in man. **367**, 41*P*, 1985
Comparison of the effects of some thiamine analogues upon thiamine transport across the blood–brain barrier of the rat. **369**, 79, 1985
Size of extracellular space in isolated brain of cuttlefish *Sepia* and squid *Alloteuthis*. **369**, 57*P*, 1985
Measurement of brain histidine *in vivo* by ^{1}H-NMR spectroscopy in the mutant histidinaemic mouse. **369**, 65*P*, 1985
An effect of unilateral frontoparietal cortical lesions on ipsilateral as well as contralateral digit tremor in man. **371**, 53*P*, 1986
An effect of unilateral cerebellar lesions involving past pointing on fine finger tremor in man. **372**, 16*P*, 1986
The effect of variable gain visual feedback on the stability of finger positioning during an isometric hold test in normal man and patients without peripheral feedback. **373**, 12*P*, 1986
Observations on a man without large myelinated fibre sensory input from below the neck. **376**, 47*P*, 1986
Fast frequency (9–11.5 Hz) tremor associated with brain-stem lesions in man. **377**, 19*P*, 1986
Transport of L-phenylalanine and related amino acids at the blood–brain barrier in the lamb studied by the single-pass multiple tracer dilution technique. **377**, 102*P*, 1986
Magnetic stimulator for the human motor cortex. **381**, 10*P*, 1986
Brain intracellular pH and metabolism during hypercapnia and hypocapnia in the new-born lamb. **382**, 1, 1987
Observations on the sense of effort in a man without large myelinated cutaneous and proprioceptive sensory fibres below the neck. **382**, 80*P*, 1987
Banding of tremor frequencies in a finger-holding task in patients with reduced pyramidal or segmental motor outflow. **382**, 81*P*, 1987
Blockade of prostaglandin E_1 hyperthermia by sodium salicylate given into the ventral septal area of the rat brain. **384**, 223, 1987
Imprinting: localized changes in *N*-methyl-D-aspartate (NMDA) receptors in chick brain. **384**, 76*P*, 1987
^{203}Pb uptake into different regions of rat brain, perfused *in situ*. **390**, 91*P*, 1987
The effect of fatigue of finger flexors on the small perturbations in finger movement during an isometric task. **390**, 215*P*, 1987
Chick forebrain slices: correlation between electrophysiological observations and anatomical studies. **391**, 5*P*, 1987
Uptake of [^{14}C]deoxyglucose into brain of rats with congenital hydrocephalus. **392**, 55*P*, 1987
Post-contraction errors in human force production are reduced by muscle stretch. **393**, 247, 1987
Brain slice
Current and voltage responses from human neocortical neurones *in vitro*. **369**, 49*P*, 1985
Electrophysiological characteristics of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 129, 1986
Properties of rat medial septal neurones recorded *in vitro*. **379**, 309, 1986
Organization of synaptic transmission in the mammalian solitary complex, studied *in vitro*. **381**, 551, 1986
Synaptic activation of slow depolarization in rat supraoptic nucleus neurones *in vitro*. **387**, 273, 1987

Brain slice (*cont.*)
Some useful properties of *in vitro* slices from the rat's forebrain. **391**, 7*P*, 1987
Optical recording of electrical activity from parallel fibres and other cell types in skate cerebellar slices *in vitro*. **393**, 681, 1987
Brain stem
Pyramidal effects in dorsal neck motoneurones of the cat. **363**, 287, 1985
The topographical organization of brain-stem efferent neurones innervating the inner ear and lateral line of the eel, *Anguilla anguilla*. **366**, 98*P*, 1985
Neurones in the brain stem of the cat excited by vagal afferent fibres from the heart and lungs. **369**, 1, 1985
Blood pressure effects of leptazol applied to the ventral surface of the brain stem of cats. **372**, 445, 1986
A search for brain stem cell groups integrating the defence reaction in the rat. **378**, 213, 1986
Immunohistochemical localization of peptides and amines in the brain stem of the cat. **386**, 103*P*, 1987
Brattleboro rat
Cardiovascular effects of α-methyl-DL-*p*-tyrosine in Long Evans and Brattleboro rats. **394**, 38*P*, 1987
Breath-holding
Ventilatory drive during face immersion in man. **370**, 13, 1986
Breathing, *see also* Respiration, Ventilation
The effect of exercise on heart rate in man during breath-hold submersion. **373**, 41*P*, 1986
Effects of apomorphine and haloperidol in fetal lambs. **377**, 37, 1986
Effects of the α_2-adrenergic agonist clonidine and its antagonist idazoxan on the fetal lamb. **381**, 29, 1986
A pseudo-rebreathing technique for assessing the ventilatory response to carbon dioxide in cats. **381**, 483, 1986
Lesions in the upper lateral pons abolish the hypoxic depression of breathing in unanaesthetized fetal lambs *in utero*. **382**, 373, 1987
A computerized system for recording and analysis of breathing and other physiological variables in man. **387**, 26*P*, 1987
Breathing patterns during relaxed wakefulness and stage-4 sleep in human recipients of combined heart-lung transplants compared with matched recipients of heart transplants and matched normal controls. **387**, 59*P*, 1987
Do human adult identical twins have similar breathing patterns at rest? **394**, 55*P*, 1987
Dynamics of ventilation following sudden isocapnic changes in end-tidal O_2 in cats. **394**, 59*P*, 1987
Breathing pattern, *see* Ventilation pattern
Bromosulphthalein
The removal of bromosulphthalein from plasma in conscious sheep: the effect of fasting and refeeding. **380**, 32*P*, 1986
Bronchiole
Characteristics of neuro-effector transmission in the smooth muscle layer of dog bronchiole and modifications by autacoids. **370**, 551, 1986
Bronchoconstriction
The role of neural control and prostaglandin release in limited bronchoconstriction to methacholine in healthy humans. **366**, 106*P*, 1985
Limited bronchoconstriction to methacholine using partial flow-volume curves in healthy humans. **366**, 107*P*, 1985
A technique to study the activity of vagal preganglionic neurones innervating the lungs of the cat. **376**, 4*P*, 1986
The bronchoconstrictor response to hypocapnic hyperventilation in man: a non-cholinergic mechanism. **387**, 58*P*, 1987
Bronchus
Nervous control of mucin secretion into human bronchi. **365**, 297, 1985
Brown adipose tissue
Chronic *in vivo* noradrenaline infusion mimics cold adaptation in brown adipose tissue in the guinea pig. **380**, 49*P*, 1986
A role for brown adipose tissue (BAT) in the biphasic ventilatory response of the newborn rat to hypoxia. **386**, 70*P*, 1987
Brush border
The uptake of uric acid by brush border membrane vesicles and rings of mouse small intestine *in vitro*. **369**, 153*P*, 1985
Effect of trypsin on rabbit small-intestinal brush-border membrane vesicles. **378**, 29*P*, 1986
Passive permeation of ions in isolated rat duodenal brush border membranes. **384**, 39*P*, 1987
The influence of membrane fluidity on resistance to attack by trypsin in rabbit duodenal brush-border membrane vesicles. **392**, 27*P*, 1987
Bulbospinal connection
The distribution of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 63, 1985
Bungarotoxin
Influence of divalent cations on the phospholipase-independent action of β-bungarotoxin at frog neuromuscular junctions. **363**, 169, 1985
C fibre
Extravasation of the knee induced by antidromic stimulation of articular C fibre afferents of the anaesthetized cat. **379**, 407, 1986
Characteristics of C fibre baroreceptors in the carotid sinus of dogs. **394**, 291, 1987
Cable property
Interaction between the soma and the axon terminal of retinal horizontal cells in *Cyprinus carpio*. **375**, 121, 1986
Some membrane electrical properties of rat trigeminal motoneurones. **378**, 46*P*, 1986
Electrical constants from arterially perfused rabbit papillary muscle. **378**, 108*P*, 1986
Passive cable properties and morphological correlates of neurones in the lateral geniculate nucleus of the cat. **383**, 653, 1987
Electrical constants of arterially perfused rabbit papillary muscle. **385**, 307, 1987

Caesium
Extracellular caesium ions (Cs^+) activate a chloride (Cl^-) permeability in rat cultured spinal cord neurones. **367**, 68*P*, 1985
Inward rectification in freshly isolated single smooth muscle cells of the rabbit jejunum. **383**, 461, 1987
Caesium ions activate chloride channels in rat cultured spinal cord neurones. **392**, 231, 1987

Caffeine
The mechanism of the increase of tonic tension produced by caffeine in sheep cardiac Purkinje fibres. **364**, 313, 1985
Change in intracellular calcium ion concentration induced by caffeine and rapid cooling in frog skeletal muscle fibres. **365**, 131, 1985
The effects of caffeine and ryanodine on the electrical activity of the canine coronary sinus. **368**, 593, 1985
Caffeine potentiation of calcium release in frog skeletal muscle fibres. **375**, 535, 1986
The differential effects of twitch potentiators on charge movements in frog skeletal muscle. **380**, 17, 1986
Effects of caffeine on intracellular calcium concentration in frog skeletal muscle fibres. **383**, 269, 1987

Calcitonin
The effect of human calcitonin gene-related peptide (CGRP) on the pig coronary circulation. **371**, 67*P*, 1986
On the presence of a potent vasodilator calcitonin gene-related peptide (CGRP) in rat plasma. **376**, 25*P*, 1986

Calcium, *see also* Intracellular calcium
A mechanical study of regulation in the striated adductor muscle of the scallop. **358**, 47, 1985
Some properties of the circular myometrium of the sheep throughout pregnancy and during labour. **359**, 1, 1985
Temperature-dependent calcium sensitivity changes in skinned muscle fibres of rat and toad. **360**, 1, 1985
The secretory action of barium chloride in rat colon. **361**, 19, 1985
Membrane current noise in toad retinal rods exposed to low external calcium. **361**, 205, 1985
Calcium-activated chloride current in rat dorsal root ganglion neurones. **361**, 22*P*, 1985
Calcium-dependent inward current in *Aplysia* bursting pace-maker neurones. **362**, 107, 1985
Single Ca^{2+}-activated K^+ channels recorded from cultured rat sympathetic neurones. **362**, 46*P*, 1985
Regulation of cytosolic calcium concentration in presynaptic nerve endings isolated from rat brain. **363**, 87, 1985
Modulation of slow response excitability by calcium in rabbit atrial trabeculae. **363**, 237, 1985
The effect of vitamin D deficiency on secretion of saliva by rat parotid gland *in vivo*. **363**, 323, 1985
Calcium-activated potassium channels in rat muscle inactivate from a short-duration open state. **363**, 501, 1985
Effects of thyroid hormone on calcium handling in cultured chick ventricular cells. **364**, 131, 1985
The relationship between intracellular calcium and contraction in calcium-overloaded ferret papillary muscles. **364**, 169, 1985
The mechanism of the increase of tonic tension produced by caffeine in sheep cardiac Purkinje fibres. **364**, 313, 1985
Calcium ion, an intracellular messenger of light adaptation, also participates in excitation of *Limulus* photoreceptors. **364**, 381, 1985
The effects of extracellular calcium concentration on axonal coupling in rat peripheral nerves. **364**, 21*P*, 1985
Change in intracellular calcium ion concentration induced by caffeine and rapid cooling in frog skeletal muscle fibres. **365**, 131, 1985
Calcium release by noradrenaline from central sarcoplasmic reticulum in rabbit main pulmonary artery smooth muscle. **366**, 153, 1985
Role of calcium mobilization in mediation of acetylcholine-evoked chloride currents in *Xenopus laevis* oocytes. **366**, 299, 1985
Intracellular free calcium measurements by fluorescence microscopy on single Quin 2-loaded cultured human monocytes. **366**, 7*P*, 1985
Variability of systolic intracellular calcium concentration in calcium-overloaded isolated sheep Purkinje fibres. **366**, 81*P*, 1985
Fluctuations in intracellular calcium concentration and their effect on tonic tension in canine cardiac Purkinje fibres. **367**, 291, 1985
Use of the new fluorescent Ca^{2+} indicator fura-2 to detect Ca^{2+} concentration changes in electrically stimulated *Balanus* muscle fibres. **367**, 64*P*, 1985
Responses to adenosine diphosphate in human platelets loaded with the fluorescent calcium indicator quin2. **368**, 131, 1985
Calcium content and calcium exchange in dark-adapted toad rods. **368**, 641, 1985
The role of patterned burst and interburst interval on the excitation-coupling mechanism in the isolated rat neural lobe. **369**, 45, 1985
Calcium–force relationships as detected with aequorin in two different vascular smooth muscles of the ferret. **369**, 269, 1985
Mechanism of action of extracellular calcium on isoprenaline-evoked amylase secretion from isolated rat parotid glands. **369**, 337, 1985
Synaptic block of a calcium-activated potassium conductance in *Aplysia* neurones. **369**, 439, 1985
The effects of membrane potential on intracellular Ca concentration in voltage-clamped sheep cardiac Purkinje fibres in Na-free solutions. **369**, 90*P*, 1985
Stopped-flow fluorescence measurements of fura-2 loaded human platelets. **369**, 115*P*, 1985
Effects of calcium, barium and lanthanum on depolarization–contraction coupling in skeletal muscle fibres of *Rana pipens*. **370**, 39, 1986

Calcium (*cont.*)

A fast-activated inward calcium current in twitch muscle fibres of the frog (*Rana montezume*). **370**, 151, 1986

Transport of calcium by the placenta of the rat. **371**, 1, 1986

The effect of D600 and Ca^{2+} deprivation on force kinetics in short toe muscle fibres of the frog. **371**, 170*P*, 1986

Slow inward current and intracellular calcium mediate subsidiary atrial pacemaker automaticity in the cat. **371**, 193*P*, 1986

Subcellular calcium inhomogeneity indicated by fura-2 develops with calcium overload in single rat heart cells. **371**, 200*P*, 1986

Increase in free Ca in rabbit nerve axons during electrical activity measured by quin 2. **371**, 266*P*, 1986

The removal of myoplasmic free calcium following calcium release in frog skeletal muscle. **372**, 261, 1986

Incorporation of calcium buffers into salamander retinal rods: a rejection of the calcium hypothesis of phototransduction. **372**, 315, 1986

A study of intracellular calcium oscillations in sheep cardiac Purkinje fibres measured at the single cell level. **372**, 539, 1986

Transfer of excess calcium through the isolated perfused choroid plexus of the sheep. **372**, 4*P*, 1986

Muscarinic modulation of a transient outward current in *Xenopus* oocytes. **372**, 51*P*, 1986

Effects of procaine on calcium accumulation by the sarcoplasmic reticulum of mechanically disrupted rat cardiac muscle. **373**, 195, 1986

Lanthanum as a surrogate for calcium in transmitter release at mouse motor nerve terminals. **373**, 243, 1986

Calcium and strontium activation of single skinned muscle fibres of normal and dystrophic mice. **373**, 513, 1986

Temporal changes in myocardial and serum calcium with thyroid dysfunction in the rat. **373**, 38*P*, 1986

Measurement of intracellular calcium during the development and relaxation of tonic tension in sheep Purkinje fibres. **375**, 269, 1986

Tubocurarine suppresses slow calcium-dependent after-hyperpolarization in guinea-pig inferior mesenteric ganglion cells. **375**, 499, 1986

Calcium levels measured in a presynaptic neurone of *Aplysia* under conditions that modulate transmitter release. **375**, 625, 1986

Mechanism of action of acetylcholine on calcium current in single cells from frog ventricle. **376**, 183, 1986

Effects of external calcium on potassium contractures in tonic muscle fibres of the frog (*Rana pipiens*). **376**, 219, 1986

Synaptic transmission in amphibian retinae during conditions unfavourable for calcium entry into presynaptic terminals. **376**, 411, 1986

Intracellular calcium transients underlying the short-term force–interval relationship in ferret ventricular myocardium. **376**, 507, 1986

Effects of calcium and magnesium on transmitter release at Ia synapses of rat spinal motoneurones *in vitro*. **376**, 543,

The effects of the timing of a calcium oscillation on the subsequent systolic Ca transients in isolated ferret ventricular muscle. **376**, 40*P*, 1986

Periodic increase of cytoplasmic free calcium in fertilized hamster eggs measured with calcium-sensitive electrodes. **377**, 193, 1986

Effects on shortening velocity of rabbit skeletal muscle due to variations in the level of thin-filament activation. **377**, 487, 1986

An inexpensive microprocessor-based system for the measurement of cytoplasmic free calcium concentration in single cells using the calcium-sensitive indicator dye, fura-2. **377**, 12*P*, 1986

The role of calcium in the control of microtubule based pronuclear movement in sea-urchin eggs. **377**, 49*P*, 1986

Elevation of cytoplasmic calcium concentration in human umbilical vein endothelial cells by thrombin. **377**, 122*P*, 1986

Homogeneity of ADP- and thrombin-stimulated rises in $[Ca^{2+}]_i$ in fura 2-loaded human platelet populations revealed by fluorescence ratio image processing. **377**, 123*P*, 1986

Calcium and long-term transmission damage following anoxia in dentate gyrus and CA1 regions of the rat hippocampal slice. **378**, 313, 1986

Calcium mobilization in stimulus-secretion coupling in rat small intestine *in vitro*. **378**, 33*P*, 1986

Calcium stimulates glycolysis in lysates of human red cells. **378**, 76*P*, 1986

Kidney function in rats with corticomedullary nephrocalcinosis: effects of alterations in dietary calcium and magnesium. **380**, 405, 1986

Effects of membrane potential on intracellular calcium concentration in sheep Purkinje fibres in sodium-free solutions. **381**, 193, 1986

Effect of calcium and other divalent cations on intracellular pH regulation of frog skeletal muscle. **381**, 221, 1986

Fluid and electrolyte handling in Long Evans and Brattleboro rat following injection of polyethylene glycol. **381**, 407, 1986

In vitro study of the relationship between whole blood Ca^{2+} ion activity (a_{Ca}) and total plasma calcium concentration in rabbit and man. **381**, 21*P*, 1986

Compartmentation of fura2 in cultured embryonic chick heart cells. **382**, 107*P*, 1987

The effects of rapid reduction of extracellular calcium concentration on isolated ferret papillary muscle. **382**, 110*P*, 1987

The effects of hypertonicity on tension and intracellular calcium concentration in ferret ventricular muscle. **383**, 425, 1987

The role of the sarcoplasmic reticulum in the response of ferret and rat heart muscle to acidosis. **384**, 431, 1987

Calcium (*cont.*)
Do agonist-evoked rises in cytoplasmic calcium concentration cause prostacyclin production from human umbilical vein endothelial cells? **384**, 58*P*, 1987
Effects of carbachol on cytosolic free [Ca^{2+}] in fura-2-loaded rat parotid acinar cells. **384**, 59*P*, 1987
Alterations in cytoplasmic calcium sensitivity during porcine coronary artery contractions as detected by aequorin. **385**, 437, 1987
Plasma calcium in anephric fetal lambs and maternal food intake. **386**, 23*P*, 1987
Arterial pressure and plasma calcium in anephric fetal lambs. **386**, 24*P*, 1987
The role of the parathyroid glands in fetal calcium homeostasis in the sheep. **386**, 27*P*, 1987
Comparison of the new calcium buffers BAPTA and Di-Bromo-BAPTA with EGTA: evaluation of purity and sensitivity to temperature and ionic strength. **386**, 58*P*, 1987
Regulation of ion permeability in frog brain venules. Significance of calcium, cyclic nucleotides and protein kinase C. **387**, 59, 1987
Co-operative action of calcium ions in dopamine release from rat brain synaptosomes. **387**, 415, 1987
Internal recirculation of activator calcium in guinea-pig isolated papillary muscle. **387**, 19*P*, 1987
Calcium-stimulated sodium efflux from rabbit vascular smooth muscle. **388**, 245, 1987
Vasoactive intestinal polypeptide stimulates the secretion of catecholamines from the rat adrenal gland. **388**, 285, 1987
Mapping calcium transients in the dendrites of Purkinje cells from the guinea-pig cerebellum *in vitro*. **389**, 319, 1987
Calcium in dark-adapted toad rods: evidence for pooling and cyclic-guanosine-3′-5′-monophosphate-dependent release. **389**, 361, 1987
Factors influencing the ascending limb of the sarcomere length–tension relationship in rabbit skinned muscle fibres. **390**, 119, 1987
Subcellular inhomogeneity of intracellular calcium in calcium overloaded single rat cardiac cells. **390**, 63*P*, 1987
Activation of sea-urchin eggs by inositol (1,4,5)-trisphosphate is independent of external calcium ions. **390**, 139*P*, 1987
Effects of D600 on the voltage sensor for Ca release in skeletal muscle fibres of the frog. **390**, 151*P*, 1987
Biphasic Ca^{2+} effect on the ATP–ADP exchange catalysed by the Ca^{2+} pump of human red cells. **391**, 19*P*, 1987
Release and reloading of intracellular calcium stores following cholinergic stimulation of isolated rabbit gastric parietal cells. **391**, 76*P*, 1987
Factors affecting calcium-sensitivity and the restoration of desensitized responses in the isolated perfused rat tail artery. **392**, 45*P*, 1987
Calcium-sensitivity and temperature effects on the desensitization of responses in different blood vessels isolated from the rat, rabbit and cat. **392**, 87*P*, 1987
K^+ and Ca^{2+} extracellular ionic concentrations following cardiopulmonary bypass surgery in man. **392**, 90*P*, 1987
Modulation of calcium channels of twitch skeletal muscle fibres of the frog by adrenaline and cyclic adenosine monophosphate. **393**, 307, 1987
Stimulated calcium efflux from fura-2-loaded human platelets. **393**, 513, 1987
Calcium-activated chloride current in cultured sensory and parasympathetic quail neurones. **394**, 125, 1987
Permeation and block of *N*-methyl-D-aspartic acid receptor channels by divalent cations in mouse cultured central neurones. **394**, 501, 1987

Calcium action potential
Ionic conductance associated with electrical activity of guinea-pig red nucleus neurones *in vitro*. **362**, 161, 1985
Effect of Ca antagonists on axonal Ca/Ba spikes in slices of guinea-pig brain. **362**, 35*P*, 1985
Calcium-dependent action potentials in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 419, 1985
Prolongation of calcium action potentials by γ-aminobutyric acid in primary sensory neurones of lamprey. **375**, 481, 1986
Calcium action potential and its use for measurement of reversal potentials of horizontal cell responses in carp retina. **386**, 165, 1987

Calcium-activated current
The arrhythmogenic current I_{Ti} in the absence of electrogenic sodium–calcium exchange in sheep cardiac Purkinje fibres. **374**, 201, 1986
Inward current related to contraction in guinea-pig ventricular myocytes. **385**, 565, 1987
Calcium current and calcium-activated inward current in the oocyte of the starfish *Leptasterias hexactis*. **390**, 397, 1987

Calcium-activated ion channel
A calcium-activated sodium conductance produces a long-duration action potential in the egg of a nemertean worm. **381**, 263, 1986

Calcium-activated potassium channel
Contribution of the apamin-sensitive Ca^{2+}-activated K^+ current in the 'apparent' inactivation of the Ca^{2+} current in mammalian skeletal muscle. **371**, 263*P*, 1986
A calcium-activated non-selective cation channel in a rat insulinoma cell line. **380**, 23*P*, 1986
Spontaneous transient outward currents in single visceral and vascular smooth muscle cells of the rabbit. **381**, 385, 1986
Persistent calcium-sensitive potassium current and the resting properties of guinea-pig myenteric neurones. **386**, 333, 1987
Characterization of a toxin from scorpion (*Leiurus quinquestriatus*) venom that blocks *in vitro* both large (BK) K^+-channels in rabbit vascular smooth muscle and intermediate (IK) conductance Ca^{2+}-activated K^+ channels in human red cells. **387**, 32*P*, 1987

Calcium-activated potassium channel (*cont.*)
Properties of two calcium-activated hyperpolarizations in rat hippocampal neurones. **389**, 187, 1987
Single calcium-activated potassium channels recorded from cultured rat sympathetic neurones. **389**, 337, 1987
Ouabain augments calcium-dependent potassium conductance in visceral primary afferent neurones of the rabbit. **389**, 629, 1987
Characterization and reconstitution of Ca^{2+}-activated K^+ channel from outer renal medulla in the pig. **390**, 71*P*, 1987
Two calcium-activated potassium conductances in a subpopulation of coeliac neurones of guinea-pig and rabbit. **394**, 331, 1987

Calcium antagonist
Effect of calcium antagonists on adrenergic mechanisms in canine saphenous veins. **372**, 25, 1986
Effects of the calcium antagonist gallopamil (D600) upon excitation–contraction coupling in toe muscle fibres of the frog. **385**, 693, 1987

Calcium buffering
Potassium channels in cultured bovine adrenal chromaffin cells. **367**, 117, 1985
Calcium buffering in axons and axoplasm of *Loligo*. **383**, 369, 1987

Calcium channel
Modulation of the gating properties of single calcium channels by D600 in guinea-pig ventricular myocytes. **358**, 59*P*, 1985
Blockade of single cardiac calcium channels by Mg^{2+}, Cd^{2+} and Ca^{2+} in guinea-pig ventricular cells. **358**, 61*P*, 1985
Does the dihydropyridine CGP-28-392 activate bovine chromaffin cell calcium channels? **358**, 64*P*, 1985
Two types of calcium channels in the somatic membrane of new-born rat dorsal root ganglion neurones. **359**, 431, 1985
Binding of dihydropyridines to frog sartorius muscle is voltage-dependent, but most binding sites are not functional Ca channels. **360**, 64*P*, 1985
Calcium channels and intracellular calcium release are pharmacologically different in frog skeletal muscle. **361**, 231, 1985
The early time course of potassium-stimulated calcium uptake in presynaptic nerve terminals isolated from rat brain. **361**, 251, 1985
The reduction of calcium current associated with early differentiation of the murine embryo. **363**, 71, 1985
Slow inactivation of the calcium current of *Paramecium* is dependent on voltage and not internal calcium. **365**, 165, 1985
Gadolinium ions inhibit basal and electrically evoked ^{45}calcium overflow from isolated superfused neural lobes of the rat pituitary gland. **365**, 50*P*, 1985
Single channels permeable to calcium ions in *Aplysia* neurones. **365**, 83*P*, 1985
Kinetic properties and selectivity of calcium-permeable single channels in *Aplysia* neurones. **367**, 457, 1985
Pb movements through Ca channels in bovine adrenal medullary cells. **367**, 67*P*, 1985
Inactivation of acetylcholine release from *Torpedo* synaptosomes in response to prolonged depolarizations. **368**, 293, 1985
Effect of Lambert-Eaton myasthenic syndrome antibody on mouse ventricular muscle. **369**, 94*P*, 1985
A fast-activated inward calcium current in twitch muscle fibres of the frog (*Rana montezume*). **370**, 151, 1986
Different types of voltage-dependent calcium channels in rat skeletal muscle cells in culture: electrophysiological and pharmacological properties. **371**, 264*P*, 1986
Actions of external and internal D-890 and TMB-8 on Ca channel currents in single barnacle muscle fibres. **371**, 265*P*, 1986
Organic Ca-channel blockers are without effects on synaptic transmission in slices of guinea-pig olfactory cortex. **371**, 271*P*, 1986
Calcium channels expressed in *Xenopus* oocytes by mRNA from rat brain. **374**, 38*P*, 1986
Effect of metal cations on the release of ^{86}Rb from rat erythrocytes. **376**, 44*P*, 1986
Noradrenaline modulates calcium channels in avian dorsal root ganglion cells through tight receptor–channel coupling. **379**, 131, 1986
Inactivation of calcium channel current in rat uterine smooth muscle: evidence for calcium- and voltage-mediated mechanisms. **380**, 111, 1986
Voltage dependence of two inward currents carried by calcium and barium in the ciliate *Stylonychia mytilus*. **380**, 551, 1986
Calcium dependence of presynaptic calcium current and post-synaptic response at the squid giant synapse. **381**, 619, 1986
Incorporation of several calcium channels from sheep and rabbit heart into planar lipid bilayers. **381**, 115*P*, 1986
Protein kinase C has inverse effects on LHRH- and depolarization-induced $^{45}Ca^{2+}$ influx into rat anterior pituitary tissue *in vitro*. **382**, 31*P*, 1987
Characterization of two types of calcium channels in mouse neuroblastoma cells. **383**, 231, 1987
Antagonism of pentobarbitone and midazolam general anaesthesia in mice, by the calcium channel activator BAY K 8644. **384**, 18*P*, 1987
Single low-voltage-activated calcium channels in chick and rat sensory neurones. **386**, 571, 1987
Proton-induced transformation of calcium channel in chick dorsal root ganglion cells. **386**, 603, 1987
Nimodipine block of calcium channels in rat anterior pituitary cells. **387**, 195, 1987
Effects of verapamil, diltiazem and nifedipine on influx of Ca^{2+}, Na^+ and K^+ into rat isolated ileum. **387**, 87*P*, 1987
An intrinsic potential-dependent inactivation mechanism associated with calcium channels in guinea-pig myocytes. **389**, 205, 1987
The effect of myasthenic syndrome antibody on presynaptic calcium channels in the mouse. **390**, 257, 1987

Calcium channel (*cont.*)
A complex new gating pattern detected in L-type calcium channels from guinea-pig ventricular myocytes and mouse 3T3 fibroblasts. **390**, 80*P*, 1987
Two types of calcium channels from rabbit fast skeletal muscle transverse tubules in lipid bilayers: differences in conductance, gating behaviour and chemical modulation. **390**, 82*P*, 1987
The mechanism of modulation of Ba^{2+} currents by D600, nifedipine or BAY K 8644 in single smooth-muscle cells of rabbit ear artery studied using a new concentration-jump technique. **390**, 83*P*, 1987
Noradrenaline inhibits N-type Ca channels in isolated frog sympathetic neurones. **390**, 84*P*, 1987
Calcium current in isolated neonatal rat ventricular myocytes. **391**, 169, 1987
The calcium channel current of pregnant rat single myometrial cells in short-term primary culture. **392**, 253, 1987
Existence of calcium channels and intercellular couplings in the testosterone-secreting cells of the mouse. **393**, 647, 1987
Single-channel recordings of three types of calcium channels in chick sensory neurones. **394**, 173, 1987
Selective action of Lambert-Eaton myasthenic syndrome antibodies on Ca^{2+} channels in the neuroblastoma × glioma hybrid cell line NG108 15. **394**, 43*P*, 1987
A diacylglycerol analogue enhances voltage-activated Ca^{2+} current in freshly dissociated smooth muscle cells from the stomach of the toad. **394**, 44*P*, 1987

Calcium channel antagonist
Tetrodotoxin-sensitive and -insensitive relaxations in the rat oesophageal tunica muscularis mucosae. **381**, 49, 1986

Calcium channel selectivity
Selectivity of calcium channels in rat uterine smooth muscle: interactions between sodium, calcium and barium ions. **384**, 247, 1987

Calcium conductance
Effects of readmission of substrate on the membrane potential in glycogen-depleted guinea-pig taenia coli. **362**, 39, 1985
Adenosine agonists reduce voltage-dependent calcium conductance of mouse sensory neurones in cell culture. **370**, 75, 1986
Inward rectification and low threshold calcium conductance in rat cerebellar Purkinje cells. An *in vitro* study. **372**, 1, 1986
Alpha-adrenergic inhibition of a low-threshold calcium conductance and of a calcium-dependent potassium current in rat cerebellar Purkinje cells *in vitro*. **372**, 52*P*, 1986
Dynorphin A decreases voltage-dependent calcium conductance of mouse dorsal root ganglion neurones. **377**, 237, 1986
Development of dendritic calcium currents in ganglion cells of the rat lower lumbar sympathetic chain. **377**, 349, 1986

Calcium current
Identification of delayed potassium and calcium currents in the rat sympathetic neurone under voltage clamp. **358**, 109, 1985
Calcium currents of smooth muscle cells isolated from the urinary bladder of the guinea-pig: inactivation, conductance and selectivity is controlled by micromolar amounts of $[Ca]_o$ **358**, 60*P*, 1985
Depolarization slightly above resting potential elicits a transient Ca current in rat cranial sensory neurones. **358**, 72*P*, 1985
Membrane currents and their modification by acetylcholine in isolated single atrial cells of the guinea-pig. **359**, 485, 1985
Voltage and ion dependences of the slow currents which mediate bursting in *Aplysia* neurone R15. **360**, 69, 1985
The calcium current in a myenteric neurone of the guinea-pig ileum. **361**, 297, 1985
Calcium-induced inactivation of calcium current causes the inter-burst hyperpolarization of *Aplysia* bursting neurones. **362**, 131, 1985
Influence of a change in stimulation rate on action potentials, currents and contractions in rat ventricular cells. **364**, 113, 1985
Inactivation of calcium channels in mammalian heart cells: joint dependence on membrane potential and intracellular calcium. **364**, 395, 1985
Slow inactivation of the calcium current of *Paramecium* is dependent on voltage and not internal calcium. **365**, 165, 1985
Calcium entry into voltage-clamped presynaptic terminals of squid. **367**, 143, 1985
Calcium entry and transmitter release at voltage-clamped nerve terminals of squid. **367**, 163, 1985
Actions of 1,4-dihydropyridines on voltage-sensitive calcium current in neuroblastoma × glioma hybrid NG108 15 cells. **369**, 69*P*, 1985
A dual effect of cardiac glycosides on Ca current in frog ventricular myocytes. **369**, 91*P*, 1985
Voltage-activated Ca^{2+}-currents in an insulin-secreting cell line from rat. **369**, 98*P*, 1985
Intracellular factors for the maintenance of calcium currents in perfused neurones from the snail, *Lymnaea stagnalis*. **370**, 631, 1986
The action potential and underlying ionic currents in proximal rat middle cerebral arterioles. **371**, 289, 1986
Sympathetic innervation and excitability of arterioles originating from the rat middle cerebral artery. **371**, 305, 1986
Calcium action potentials and calcium currents in tonic muscle fibres of the frog (*Rana pipiens*). **372**, 293, 1986
Calcium-dependent currents in cultured rat dorsal root ganglion neurones are inhibited by an adenosine analogue. **373**, 47, 1986
Calcium and delayed potassium currents in mouse pancreatic β-cells under voltage-clamp conditions. **374**, 531, 1986

Calcium current (*cont.*)
Arsenazo III transients and calcium current in a normally non-spiking neuronal soma of crayfish. **374**, 571, 1986
Inactivation of the low-threshold transient calcium current in rat sensory neurones: evidence for a dual process. **376**, 341, 1986
Development of dendritic calcium currents in ganglion cells of the rat lower lumbar sympathetic chain. **377**, 349, 1986
A guanine neucleotide analogue blocks a calcium current in rat sensory neurones, and enhances inhibition by baclofen. **377**, 81*P*, 1986
An enzymatic mechanism for calcium current inactivation in dialysed *Helix* neurones. **378**, 31, 1986
Dual effects of dihydropyridines on whole cell and unitary calcium currents in single ventricular cells of guinea-pig. **379**, 495, 1986
Potential-dependent calcium inward current in a single isolated smooth muscle cell of the guinea-pig taenia caeci. **380**, 1, 1986
Inactivation of calcium channel current in rat uterine smooth muscle: evidence for calcium- and voltage-mediated mechanisms. **380**, 111, 1986
Voltage dependence of two inward currents carried by calcium and barium in the ciliate *Stylonychia mytilus*. **380**, 551, 1986
Different properties of two voltage-dependent inward currents of the ciliate *Stylonchia mytilus*. **381**, 1, 1986
Afferent axons of the guinea-pig olfactory cortex show Ca-mediated tails. **381**, 65*P*, 1986
Gadolinium specifically blocks a component of voltage-sensitive Ca current in neuroblastoma × glioma hybrid (NG108 15) cells. **381**, 69*P*, 1986
Separation of calcium and $[Ca]_i$-activated current in guinea-pig and rabbit ventricular cells. **381**, 94*P*, 1986
Transient-type calcium current contributes to the pacemaker potential in isolated rabbit sino-atrial node cells. **382**, 104*P*, 1987
Calcium currents in cultured neurones of the leech. **382**, 123*P*, 1987
Proton-induced transformation of Ca^{2+} channels in cultured chick and rat sensory neurones. **382**, 125*P*, 1987
Endogenous bursting by rat supraoptic neuroendocrine cells is calcium dependent. **384**, 451, 1987
Isoperiodic bursting by magnocellular neuroendocrine cells in the rat hypothalamic slice. **384**, 467, 1987
Calcium channel currents and their inhibition by (−)-baclofen in rat sensory neurones: modulation by guanine nucleotides. **386**, 1, 1987
Kinetics and selectivity of a low-voltage-activated calcium current in chick and rat sensory neurones. **386**, 547, 1987
Cyclic guanosine 3′,5′-monophosphate regulates the calcium current in single cells from frog ventricle. **387**, 453, 1987
Suppression of calcium current by an endogenous neuropeptide in neurones of *Aplysia californica*. **388**, 565, 1987
Comparison of effects of acetylcholine on calcium and potassium currents in frog atrium and ventricle. **389**, 411, 1987
Calcium current and calcium-activated inward current in the oocyte of the starfish *Leptasterias hexactis*. **390**, 397, 1987
Calcium current inactivation in cultured mouse pancreatic islet cells is calcium-dependent. **390**, 86*P*, 1987
Electrical activity and contraction in cells isolated from rat and guinea-pig ventricular muscle: a comparative study. **391**, 527, 1987
Calcium-activated inward current and contraction in rat and guinea-pig ventricular myocytes. **391**, 545, 1987
The calcium current of mouse egg measured in physiological calcium and temperature conditions. **391**, 573, 1987
Beat-to-beat changes in the calcium current (i_{Ca}) during calcium overload in mammalian ventricular myocytes. **391**, 44*P*, 1987
Calcium-dependent inactivation of potential-dependent calcium inward current in an isolated guinea-pig smooth muscle cell. **392**, 431, 1987
Calcium current activation kinetics in isolated pyramidal neurones of the CA1 region of the mature guinea-pig hippocampus. **392**, 603, 1987
T, N and L calcium currents in rat sensory neurones and the actions of baclofen. **392**, 32*P*, 1987
A comparison of the effect of some molluscan (FMRFamide-like) peptides on the calcium current of a snail neurone. **392**, 33*P*, 1987
Calcium currents, charge movement and dihydropyridine binding in fast- and slow-twitch muscles of rat and rabbit. **393**, 595, 1987
Changes in sodium, calcium and potassium currents during early embryonic development of the ascidian *Boltenia villosa*. **393**, 619, 1987
Kinetic and pharmacological properties distinguishing three types of calcium currents in chick sensory neurones. **394**, 149, 1987
Single-channel recordings of three types of calcium channels in chick sensory neurones. **394**, 173, 1987
Inhibitory effects of Bay K 8644 on Ca channels in isolated guinea-pig myocytes. **394**, 29*P*, 1987

Calcium dependence
Dependence on calcium of potassium- and agonist-induced changes in potassium permeability of rabbit ear artery. **364**, 151, 1985
A calcium-activated chloride current generates the after-depolarization of rat sensory neurones in culture. **364**, 217, 1985
Carnosine and other natural imidazoles enhance muscle Ca sensitivity and are mimicked by caffeine and AR-L 115BS. **371**, 197*P*, 1986
Calcium-dependent chloride currents in isolated cells from rat lacrimal glands. **378**, 437, 1986
Gradual and stepwise changes in the membrane capacitance of rat peritoneal mast cells. **386**, 205, 1987
The effects of calcium on potassium transport in ferret red cells. **386**, 407, 1987

Calcium dependence (*cont.*)
Kinetics and selectivity of a low-voltage-activated calcium current in chick and rat sensory neurones. **386**, 547, 1987
Calcium-dependent potassium conductance in guinea-pig olfactory cortex neurones *in vitro*. **387**, 173, 1987
Calcium-dependent inactivation of potential-dependent calcium inward current in an isolated guinea-pig smooth muscle cell. **392**, 431, 1987
Tonic contraction of canine gastric muscle during long-lasting calcium removal and its dependence on magnesium. **393**, 375, 1987

Calcium depletion
Extracellular calcium depletion in frog ventricular myocardium. **358**, 57*P*, 1985

Calcium efflux
Influence of membrane potential on calcium efflux from giant axons of *Loligo*. **378**, 77, 1986

Calcium excretion
Effects of magnesium infusion on renal calcium excretion in rats. **358**, 108*P*, 1985
Renal electrolyte excretion and renin release during calcium and parathormone infusions in conscious rabbits. **373**, 329, 1986
An investigation into the neural regulation of calcium excretion by the rat kidney. **383**, 745, 1987

Calcium flux
Endothelium and calcium flux in rabbit aortic preparations. **360**, 63*P*, 1985
The early time course of potassium-stimulated calcium uptake in presynaptic nerve terminals isolated from rat brain. **361**, 251, 1985
Calcium fluxes in skeletal muscle from dystrophic mice (129/ReJ strain). **371**, 147*P*, 1986
Endothelium-derived relaxing factor alters calcium fluxes in rabbit aorta: a cyclic guanosine monophosphate-mediated effect. **381**, 427, 1986
Transmural calcium fluxes and role of mucins as cellular calcium-transport vehicles in chicken trachea *in vitro*. **388**, 121, 1987
Non-mitochondrial Ca^{2+} exchange in isolated rat ventricular myocytes. **391**, 45*P*, 1987

Calcium influx
Post-synaptic calcium influx at the giant synapse of the squid during activation by glutamate. **369**, 183, 1985
Three components of voltage-dependent calcium influx in mouse neuroblastoma cells. **387**, 31*P*, 1987

Calcium ionophore
A23187 increases calcium permeability of store sites more than of surface membranes in the rabbit mesenteric artery. **359**, 467, 1985

Calcium permeability
A23187 increases calcium permeability of store sites more than of surface membranes in the rabbit mesenteric artery. **359**, 467, 1985

Calcium potential
Calcium action potentials and calcium currents in tonic muscle fibres of the frog (*Rana pipiens*). **372**, 293, 1986

Calcium pump
Effects of readmission of substrate on the membrane potential in glycogen-depleted guinea-pig taenia coli. **362**, 39, 1985
The effects of phosphodiesterase inhibitors and lanthanum ions on the light-sensitive current of toad retinal rods. **370**, 91, 1986
ATP–ADP exchange catalysed by the Ca pump of human red cells: effects of lanthanum and calmodulin. **377**, 85*P*, 1986
Residual Ca pump activity in vanadate-inhibited and in ATP-depleted human red cells. **390**, 95*P*, 1987

Calcium regulation
The regulation of cytosolic calcium in rat brain synaptosomes by sodium-dependent calcium efflux. **381**, 17, 1986

Calcium release
Benzocaine, a neutral local anaesthetic, inhibits calcium release from the sarcoplasmic reticulum of barnacle muscle. **358**, 63*P*, 1985
Inositol-(1,4,5)-trisphosphate and calcium release at fertilization in sea-urchin eggs. **365**, 61*P*, 1985
Ca release from SR activates two different currents in cultured atrial myocytes from hearts of adult guinea-pigs. **366**, 80*P*, 1985
Effects of protonophores and of changes in solution pH at constant pCa on calcium release from the sarcoplasmic reticulum (SR) of barnacle muscle. **367**, 63*P*, 1985
Inositol 1,4,5-trisphosphate activates pharmacomechanical coupling in smooth muscle of the rabbit mesenteric artery. **370**, 605, 1986
Multifocal spontaneous Ca^{2+} release can trigger a spontaneous action potential in single rat cardiac myocytes. **371**, 196*P*, 1986
Some properties of the contractile system and sarcoplasmic reticulum of skinned slow fibres from *Xenopus* muscle. **373**, 1, 1986
Intramembrane charge movement and calcium release in frog skeletal muscle. **373**, 481, 1986
Calcium mobilization by inositol-1,4,5-trisphosphate in chicken enterocytes. **378**, 77*P*, 1986
Ca-dependent inactivation of Ca current causes apparent reversal of transient inward current in single cardiac myocytes. **381**, 92*P*, 1986
Depletion of calcium from the sarcoplasmic reticulum during calcium release in frog skeletal muscle. **392**, 167, 1987
The involvement of inositol 1,4,5-trisphosphate and calcium in the two-component response to acetylcholine in *Xenopus* oocytes. **392**, 349, 1987

Calcium transient
Simulation of extracellular Ca transients in rabbit cardiac muscle. **371**, 195*P*, 1986
Optical recording of Ca transients following impulses in identified leech neurones in culture. **372**, 55*P*, 1986
How caffeine modifies calcium redistribution during contractile activation in frog skeletal muscle fibres. **382**, 164*P*, 1987
Calcium transients obtained from barnacle myofibrillar bundles using aequorin. **382**, 194*P*, 1987

Calcium transient (*cont.*)
Effects of hypertonic solutions on calcium transients in frog twitch muscle fibres. **383**, 615, 1987
Influence of fura-2 concentration on Ca_i^{2+}-transients in cardiac myocytes from euthyroid and hyperthyroid rats. **387**, 66*P*, 1987
Perchlorate and the relationship between charge movement and contractile activation in frog skeletal muscle fibres. **390**, 213, 1987

Calcium transport
Exocytosis as an export route for calcium from bovine chromaffin cells. **358**, 66*P*, 1985
Ca transport by pigeon red blood cell mitochondria. **365**, 16*P*, 1985
Uptake of Ca^{2+} by isolated rabbit small intestinal cells with highly permeable plasma membrane. **367**, 58*P*, 1985
Transport of calcium by the placenta of the rat. **371**, 1, 1986
Calcium transport across the isolated dually perfused human placental lobule. **382**, 397, 1987
The receptor-regulated calcium influx in mouse submandibular acinar cells is sodium dependent: a patch-clamp study. **384**, 119, 1987
Identification of sodium–calcium exchange current in single ventricular cells of guinea-pig. **384**, 199, 1987
Effect of dinitrophenol on calcium transfer across the dually perfused human placental lobule. **386**, 21*P*, 1987
Regulation of cell calcium and contractility in mammalian arterial smooth muscle: the role of sodium–calcium exchange. **392**, 617, 1987

Calcium uptake
Failure of glucose to affect ^{86}rubidium efflux and ^{45}calcium uptake of fetal rat pancreatic islets. **358**, 365, 1985
Calcium uptake of rat brain synaptosomes as a function of membrane potential under different depolarizing conditions. **372**, 363, 1986
Effect of verapamil on uptake of calcium in the absence and presence of sodium and potassium ion channel blockers in rat isolated ileum. **380**, 73*P*, 1986

Calmodulin
Effect of trifluoperazine on rabbit cortical collecting tubular response to vasopressin. **372**, 41, 1986
Iodide transport in rat small intestine: dependence on calcium. **393**, 19, 1987

Capacitance
Capacitance of the rabbit portal vein and inferior vena cava. **381**, 417, 1986

Capillary
The effects of native and modified bovine serum albumin on the permeability of frog mesenteric capillaries. **360**, 333, 1985
Changes in capillary distribution in rat fast muscles following nerve crush and reinnervation. **362**, 13, 1985
The effect of long-term bradycardial pacing on left ventricular capillary density and performance in vascularly compromised rabbit hearts. **374**, 32*P*, 1986
A new approach to the measurement of capillary surface area. **387**, 17*P*, 1987
Densitometric assessment of the fluid fluxes across the fenestrated capillaries of submandibular glands in the anaesthetized rabbit *in vivo*. **387**, 18*P*, 1987
Capillary hypertension during Valsalva manoeuvre in man. **387**, 72*P*, 1987
Steady-state fluid filtration at different capillary pressures in perfused frog mesenteric capillaries. **388**, 421, 1987
The postural changes in capillary blood flow of the toe nailfold assessed by laser Doppler flowmetry and capillary microscopy during indirect heating in man. **388**, 25*P*, 1987
Quantitative assessment of the permeability of the rat blood–retinal barrier to small water-soluble non-electrolytes. **389**, 483, 1987

Capillary permeability
Filtration coefficient of blood–brain barrier (BBB) capillaries in the frog. **358**, 115*P*, 1985
The effects of serum albumin on the effective osmotic pressures exerted by myoglobin solutions across the walls of single frog mesenteric capillaries. **358**, 116*P*, 1985
The effects of native and modified bovine serum albumin on the permeability of frog mesenteric capillaries. **360**, 333, 1985
A calcium-dependent reversible permeability increase in microvessels in frog brain, induced by serotonin. **361**, 103, 1985
Fluid filtration with increments of venous pressure in the feet and forearms of human subjects. **362**, 38*P*, 1985
Brain vascular volume, electrolytes and blood–brain interface in the cuttlefish *Sepia officinalis* (Cephalopoda). **368**, 197, 1985
Fluid filtration into the feet of human subjects during quiet sitting. **371**, 74*P*, 1986
Three-dimensional organization of the plasmalemmal vesicular system in directly frozen, freeze-substituted frog mesenteric capillaries. **371**, 84*P*, 1986
Comparisons between the hydraulic conductance of the walls of single frog capillaries and the ultrastructure of the intercellular clefts. **374**, 12*P*, 1986
Effects of chemical fixation on the permeability of frog mesenteric capillaries. **374**, 18*P*, 1986
The dimensions of the intercellular clefts in the walls of frog mesenteric capillaries of known hydraulic conductance. **377**, 54*P*, 1986
The ultrastructure of frog capillaries following perfusion with the ionophore A23187. **381**, 17*P*, 1986
Permeability of the retinal capillaries to mannitol and sucrose. **382**, 150*P*, 1987
Regulation of ion permeability in frog brain venules. Significance of calcium, cyclic nucleotides and protein kinase C. **387**, 59, 1987
Effect of albumin on the osmotic pressure exerted by myoglobin across capillary walls in frog mesentery. **387**, 69, 1987

Capillary permeability
The effects of plasmin on the permeability of single frog mesenteric capillaries. **387**, 69*P*, 1987
^{67}Gallium as a potential marker for aluminium transport in rat brain. **391**, 34*P*, 1987
The effects of chemical fixation on the permeability of frog mesenteric capillaries. **392**, 463, 1987
Capsaicin
Stimulus-response properties of SAI mechanoreceptors (touch corpuscles) in rats neonatally treated with capsaicin. **358**, 26*P*, 1985
Hypothalamic thermosensitivity in capsaicin-desensitized rats. **363**, 227, 1985
C-fibre excitation and tonic descending inhibition of dorsal horn neurones in adult rats treated at birth with capsaicin. **365**, 223, 1985
The role of sensory fibres in the rat splanchnic nerve in the regulation of adrenal medullary secretion during stress. **370**, 201, 1986
Stimulation of pulmonary C fibres decreases coronary arterial resistance in dogs. **371**, 277, 1986
Autonomic mechanisms underlying capsaicin induced oral sensations and salivation in man. **373**, 87, 1986
Selective responsiveness of polymodal nociceptors of the rabbit ear to capsaicin, bradykinin and ultra-violet irradiation. **388**, 9, 1987
Release of substance P from the cat spinal cord. **391**, 141, 1987
Sensory fibres modulate histamine-induced catecholamine secretion from the rat adrenal medulla and sympathetic nerves. **391**, 511, 1987
Perineural capsaicin treatment of the sciatic nerve in adult rats causes transganglionic changes in the spinal cord dorsal horn. **394**, 109*P*, 1987
Captopril
The effect of captopril on sodium appetite in adrenalectomized and deoxycorticosterone-treated rats. **365**, 1, 1985
Effects of papaverine on blood pressure and drinking rates in the lesser spotted dogfish *Scyliorhinus canicula*. **391**, 53*P*, 1987
Carbachol
Effects of angiotensin or carbachol on sodium intake and excretion in adrenalectomized or deoxycorticosterone-treated rats. **359**, 447, 1985
Acceleration of desensitization by agonist pretreatment in the snake. **391**, 109, 1987
Carbon dioxide
Effect of cephalic carbon dioxide tension on the cardiac inotropic response to carotid chemoreceptor stimulation in dogs. **358**, 405, 1985
Abdominal vascular responses to changes in carbon dioxide tension in the cephalic circulation of anaesthetized dogs. **358**, 417, 1985
The CO_2 threshold for ventilation during hypocapnic hypoxia in man. **361**, 63*P*, 1985
The rate of rise of alveolar CO_2 in expiration breath by breath – preliminary studies using constant expiratory flows. **362**, 11*P*, 1985
Differential effects of carbon dioxide and pH on central chemoreceptors in the rat *in vitro*. **368**, 679, 1985
Cardiovascular responses evoked by systemic hypercapnia in the rat. **371**, 75*P*, 1986
Ventilatory responses to CO_2 inhaled through an isolated upper airway in conscious dogs. **371**, 235*P*, 1986
Patterns of breathing in response to alternating patterns of alveolar carbon dioxide pressures in man. **376**, 31, 1986
The effect of small changes in arterial carbon dioxide tension on carotid chemoreceptor activity in the cat. **380**, 415, 1986
A pseudo-rebreathing technique for assessing the ventilatory response to carbon dioxide in cats. **381**, 483, 1986
Effects of carbon dioxide on mental activity in man. **384**, 75*P*, 1987
Haemodynamic effects of CO_2 inhalation in conscious man measured using pulsed Doppler ultrasound. **390**, 242*P*, 1987
CO_2 content of whole blood. **391**, 66*P*, 1987
Comparison of transient, steady state and rebreathing methods of measuring the ventilatory response to carbon dioxide in man. **394**, 58*P*, 1987
Investigation of the mechanisms involved in the ventilatory responses to intraperitoneal administration of CO_2 in the anaesthetized cat. **394**, 62*P*, 1987
Carbonic anhydrase
Effects of inhibiting carbonic anhydrase on isometric contraction of frog skeletal muscle. **361**, 91, 1985
Carbonic anhydrase in the sarcoplasmic reticulum of rabbit skeletal muscle. **371**, 351, 1986
Graded inhibition of intracellular carbonic anhydrase activity in human red blood cells. **371**, 159*P*, 1986
Cardiac -, *see also* Heart
Cardiac action potential
Influence of a change in stimulation rate on action potentials, currents and contractions in rat ventricular cells. **364**, 113, 1985
The effects of caffeine and ryanodine on the electrical activity of the canine coronary sinus. **368**, 593, 1985
Calcium-activated inward current and contraction in rat and guinea-pig ventricular myocytes. **391**, 545, 1987
Cardiac arrhythmia, *see* Arrhythmia
Cardiac cell
Effects of α_1-adrenergic stimulation on the Ca current in single ventricular frog cells. **390**, 66*P*, 1987
Calcium current in isolated neonatal rat ventricular myocytes. **391**, 169, 1987
Sodium current in single cells from bullfrog atrium: voltage dependence and ion transfer properties. **391**, 235, 1987
Cardiac function
Effect of cephalic carbon dioxide tension on the cardiac inotropic response to carotid chemoreceptor stimulation in dogs. **358**, 405, 1985
E_{max} for the dog left ventricle *in situ* is influenced by muscle shortening. **366**, 68*P*, 1985

Cardiac function (*cont.*)
The effects and interactions of angiotensin and vasopressin on the heart of unanaesthetized sheep. **367**, 1, 1985
A new ^{99m}Tc–phosphine–isocyanide complex for radionuclide ventriculography in man. **384**, 53*P*, 1987

Cardiac glycoside, *see also* Ouabain
Effects of sodium substitutes on transient inward current and tension in guinea-pig and ferret papillary muscle. **360**, 105, 1985
Relation of sodium pump inhibition to positive inotropy at low concentrations of ouabain in rat heart muscle. **360**, 149, 1985
The effects of an extract of the foxglove (*Digitalis purpurea*) on tension and intracellular calcium concentration in ferret papillary muscle. **365**, 55*P*, 1985
Dissociation between force and intracellular sodium activity with strophanthidin in isolated sheep Purkinje fibres. **381**, 311, 1986
Properties of an electrogenic sodium–potassium pump in isolated canine Purkinje myocytes. **383**, 251, 1987
Recovery of intracellular sodium activity (a^i_{Na}) after exposing isolated sheep Purkinje fibres to different cardiac glycosides. **386**, 55*P*, 1987

Cardiac muscle
Simultaneous measurement of tension, membrane current and intracellular calcium oscillations in sheep cardiac Purkinje fibres. **358**, 74*P*, 1985
Effects of inorganic phosphate on the force-[Ca^{2+}] relationship of skinned muscles from rat ventricle. **358**, 75*P*, 1985
The slow repolarization phase of the action potential in rat heart. **360**, 13, 1985
Relaxation of tonic tension and $[Ca^{2+}]_i$ in voltage-clamped sheep cardiac Purkinje fibres. **360**, 61*P*, 1985
A nuclear magnetic resonance study of metabolism in the ferret heart during hypoxia and inhibition of glycolysis. **361**, 185, 1985
Intracellular calcium and tension in ferret ventricular muscle exposed to hypertonic solutions. **362**, 33*P*, 1985
The relationship between intracellular calcium and contraction in calcium-overloaded ferret papillary muscles. **364**, 169, 1985
The mechanism of the increase of tonic tension produced by caffeine in sheep cardiac Purkinje fibres. **364**, 313, 1985
Inactivation of calcium channels in mammalian heart cells: joint dependence on membrane potential and intracellular calcium. **364**, 395, 1985
Creatine phosphate sensitivity of rigor tension in Triton 'skinned' rat ventricular trabeculae. **364**, 77*P*, 1985
Sodium-induced calcium release in chemically skinned rat cardiac fibres. **364**, 79*P*, 1985
Heart muscle from senescent rats has a prolonged calcium transient. **365**, 58*P*, 1985
Electric current flow in cell pairs isolated from adult rat hearts. **366**, 177, 1985
Effect of atrial fibrillation on left ventricular behaviour. An echocardiographic study in man. **366**, 46*P*, 1985
The effects of length changes on the myoplasmic calcium concentration in skinned ferret ventricular muscle. **366**, 67*P*, 1985
High-energy phosphate metabolism and force production in normoxic and ischaemic rat cardiac trabeculae and papillary muscle. **366**, 73*P*, 1985
Synchronization behaviour of rat heart cell pairs in tissue culture. **366**, 87*P*, 1985
Interaction between isoprenaline and Ca^{2+} antagonists in rat heart muscle. **366**, 116*P*, 1985
Fluctuations in intracellular calcium concentration and their effect on tonic tension in canine cardiac Purkinje fibres. **367**, 291, 1985
A transient outward current in isolated cells from the crista terminalis of rabbit heart. **368**, 243, 1985
Regulation of twitch tension in sheep cardiac Purkinje fibres in calcium overload conditions. **369**, 82*P*, 1985
Electrical and mechanical restitution in rat isolated cardiac papillary muscle during postnatal growth. **369**, 83*P*, 1985
Caffeine block of length-dependent activation in the isovolumic isolated dog heart. **369**, 85*P*, 1985
Two components of 'second inward current' in ferret papillary muscle. **369**, 88*P*, 1985
Block of 'creep currents' in single frog atrial cells by vesicular Na/Ca-exchange inhibitors. **369**, 89*P*, 1985
Cumulative extracellular Ca^{2+} depletions in ventricular muscle of rabbit heart. **369**, 93*P*, 1985
Multiple conducting states in the K^+ channel of rabbit cardiac muscle sarcoplasmic reticulum (SR); effect of block by a bis quaternary ammonium compound. **369**, 183*P*, 1985
Electrical properties of the nexal membrane studied in rat ventricular cell pairs. **370**, 267, 1986
Relationship between the transient inward current and slow inward currents in the sino-atrial node of the rabbit. **370**, 299, 1986
A study of intracellular calcium oscillations in sheep cardiac Purkinje fibres measured at the single cell level. **372**, 539, 1986
The effects of isoprenaline on tension repriming and post-extrasystolic potentiation in isolated adult and neonatal mammalian atrium. **372**, 34*P*, 1986
Effects of procaine on calcium accumulation by the sarcoplasmic reticulum of mechanically disrupted rat cardiac muscle. **373**, 195, 1986
Measurement of intracellular calcium during the development and relaxation of tonic tension in sheep Purkinje fibres. **375**, 269, 1986
Tubocurarine suppresses slow calcium-dependent after-hyperpolarization in guinea-pig inferior mesenteric ganglion cells. **375**, 499, 1986
Metabolic consequences of increasing intracellular calcium and force production in perfused ferret hearts. **376**, 121, 1986

Cardiac muscle (*cont.*)
Intracellular calcium transients underlying the short-term force–interval relationship in ferret ventricular myocardium. **376**, 507, 1986
Acidosis exacerbates oscillations of intracellular Ca^{2+} in isolated mammalian ventricular muscle. **377**, 112*P*, 1986
Laser-flash photolysis of caged-ATP induces rapid contraction and relaxation in isolated cardiac muscle fibres of the guinea-pig. **377**, 116*P*, 1986
Electromechanical effects of okadiac acid isolated from black sponge in guinea-pig ventricular muscles. **378**, 359, 1986
Dual effects of dihydropyridines on whole cell and unitary calcium currents in single ventricular cells of guinea-pig. **379**, 495, 1986
Effects of membrane potential on intracellular calcium concentration in sheep Purkinje fibres in sodium-free solutions. **381**, 193, 1986
Contractile effects of calcium, sodium and veratridine on embryonic chick heart. **381**, 90*P*, 1986
Effect of voltage-clamp duration on force production of successive twitches in isolated ferret and guinea-pig papillary muscle. **381**, 95*P*, 1986
Dependence of junctional conductance on proton, calcium and magnesium ions in cardiac paired cells of guinea-pig. **382**, 193, 1987
The effects of hypertonicity on tension and intracellular calcium concentration in ferret ventricular muscle. **383**, 425, 1987
Factors affecting intracellular sodium during repetitive activity in isolated sheep Purkinje fibres. **384**, 405, 1987
The role of the sarcoplasmic reticulum in the response of ferret and rat heart muscle to acidosis. **384**, 431, 1987
Effect of sodium–potassium pump inhibition and low sodium on membrane potential in cultured embryonic chick heart cells. **387**, 549, 1987
Electrogenic sodium–calcium exchange in cultured embryonic chick heart cells. **387**, 567, 1987
Effects of repetitive activity on developed force and intracellular sodium in isolated sheep and dog Purkinje fibres. **388**, 295, 1987
Ryanodine releases calcium from sarcoplasmic reticulum in calcium-tolerant rat cardiac myocytes. **390**, 453, 1987
The inhibitory actions of acidosis and inorganic phosphate on the Ca^{2+}-regulated force production of rat cardiac myofibrils. **390**, 59*P*, 1987
Time course of recovery heat production in isolated rabbit papillary muscle. **390**, 69*P*, 1987
Mechanical properties of skinned fibres from hypertrophied rat and guinea-pig hearts. **390**, 143*P*, 1987
The effect of acidosis on the relationship between Ca^{2+} and force in isolated ferret cardiac muscle. **391**, 48*P*, 1987
Cardiac muscle magnesium regulation during chronic dietary potassium depletion in rabbits. **391**, 70*P*, 1987
Oscillations in selectively chemically skinned rat cardiac muscle. **392**, 14*P*, 1987
A model of propagation of spontaneous contractions in rat cardiac muscle based upon calcium-induced calcium release and calcium diffusion. **392**, 40*P*, 1987
Is the stimulation of guanylate cyclase by nitrogen(II) oxide responsible for the negative inotropic effect of 'nitroprusside' on frog ventricular trabeculae? **392**, 42*P*, 1987
Differential pH sensitivity of Ca^{2+}-activated force production in myofibrils from adult and neonatal rat hearts. **394**, 39*P*, 1987
The metabolic effects of acidosis in isolated ferret hearts. **394**, 40*P*, 1987

Cardiac myocyte
Sarcoplasmic reticulum contributes to spontaneous automaticity in partially depolarized human atrial fibres. **366**, 82*P*, 1985
Separation of different Ca^{2+} exchange processes in isolated rat ventricular myocytes. **372**, 6*P*, 1986
The use of very rapid drug application to single cardiac cells to separate components of ionic current. **382**, 19*P*, 1987
Voltage dependence of the transient inward current and related contraction in isolated guinea-pig ventricular myocytes. **382**, 102*P*, 1987
Voltage-dependence of the Ca_i^{2+} transient in rat cardiac ventricular cells measured with fura2. **382**, 108*P*, 1987
X-ray microprobe analysis of the elemental distribution applied to isolated guinea-pig ventricular myocytes shock-frozen under voltage clamp conditions. **390**, 54*P*, 1987
A methodology for longitudinal spectrophotometric measurements in single myocytes: extracellular calcium transients. **394**, 31*P*, 1987
Mechanical and electrical responses of isolated rat cardiac myocytes to metabolic blockade. **394**, 34*P*, 1987
Ouabain-sensitive K^+ uptake in isolated rat and guinea-pig ventricular myocytes *in vitro*. **394**, 138*P*, 1987

Cardiac output
The circulatory response to voluntary and electrically induced exercise in man. **365**, 99*P*, 1985
Ventilation and cardiac output during the onset of exercise, and during voluntary hyperventilation, in humans. **370**, 567, 1986
Synthetic (23-amino acid) atrial natriuretic peptide lowers cardiac output in conscious sheep and constricts coronary arteries in isolated guinea-pig hearts. **371**, 82*P*, 1986
Measurement of stroke volume by an impedance method in resting and exercising man without breath-holding. **377**, 8*P*, 1986
Haemodynamic responses to stimulation of the splanchnic and cardiac sympathetic nerves in the anaesthetized cat. **378**, 417, 1986
Immediate ventilatory response to sudden changes in venous return in humans. **380**, 45, 1986
Cardiac output during hypoxia in the anaesthetized cat. **381**, 2*P*, 1986
The effect of respiration on left ventricular stroke volume **382**, 62*P*, 1987

Cardiac output (*cont.*)
The early circulatory and ventilatory response to voluntary and electrically induced exercise in man. **383**, 19, 1987
Cardiac output as related to muscle blood flow during and following rhythmic exercise in humans. **390**, 121*P*, 1987
Cardiac Purkinje fibre
Frequency-dependent changes of the transient inward current, TI, of sheep cardiac Purkinje fibres. **358**, 54*P*, 1985
Sodium-dependent control of intracellular pH in Purkinje fibres of sheep heart. **359**, 81, 1985
Large changes in a^i_{Na} and a^i_K induced in isolated sheep Purkinje fibres by Na-pump inhibition and activation in the absence of external divalent cations. **364**, 78*P*, 1985
Cardiac glycoside inotropy dissociated from intracellular Na^+ activity (a^i_{Na}) in isolated cardiac Purkinje fibres of the sheep. **365**, 66*P*, 1985
The role of the intracellular sodium activity (a^i_{Na}) in the force staircase in isolated sheep Purkinje fibres. **366**, 85*P*, 1985
The pacemaker current increases the intracellular Na activity in isolated, sheep cardiac Purkinje fibres. **366**, 86*P*, 1985
Simultaneous measurement of intracellular ion activities and tension in voltage-clamped sheep cardiac Purkinje fibres. **369**, 9*P*, 1985
Biphasic changes of intracellular Na^+ activity (a^i_{Na}) in isolated sheep and dog Purkinje fibres. **369**, 86*P*, 1985
Effects of thallium on membrane currents at diastolic potentials in canine cardiac Purkinje strands. **370**, 285, 1986
Changes by acetylcholine of membrane currents in rabbit cardiac Purkinje fibres. **371**, 201, 1986
Characterization of the acetylcholine-induced potassium current in rabbit cardiac Purkinje fibres. **371**, 219, 1986
Dissociation between force and intracellular Na activity (a^i_{Na}) caused by strophanthidin and bathing K^+ in isolated voltage-clamped sheep Purkinje fibres. **371**, 262*P*, 1986
A study of intracellular calcium oscillations in sheep cardiac Purkinje fibres measured at the single cell level. **372**, 539, 1986
The effects of isoprenaline on Ca^{2+}-dependent oscillations in isolated sheep cardiac Purkinje fibres. **372**, 35*P*, 1986
Dissociation between active force and intracellular sodium activity (a^i_{Na}) during the force staircase in isolated sheep Purkinje fibres. **374**, 37*P*, 1986
Dissociation between force and intracellular sodium activity with strophanthidin in isolated sheep Purkinje fibres. **381**, 311, 1986
Intracellular pH in sheep Purkinje fibres and ferret papillary muscles during hypoxia and recovery. **383**, 125, 1987
Properties of an electrogenic sodium–potassium pump in isolated canine Purkinje myocytes. **383**, 251, 1987
Effect of prolonged depolarizations on twitch tension and intracellular sodium activity in sheep cardiac Purkinje fibres. **384**, 355, 1987
Factors affecting intracellular sodium during repetitive activity in isolated sheep Purkinje fibres. **384**, 405, 1987
Effects of repetitive activity on developed force and intracellular sodium in isolated sheep and dog Purkinje fibres. **388**, 295, 1987
Influence of sodium–hydrogen exchange on intracellular pH, sodium and tension in sheep cardiac Purkinje fibres. **390**, 93, 1987
Cardiac receptor
Hind-limb vascular responses to changes in left ventricular pressure in dogs. **369**, 135*P*, 1985
Cardiac reflex
Abdominal vascular reponses to intracoronary injections of veratridine in anaesthetized dogs. **362**, 39*P*, 1985
Potentiation by bicuculline of the reflex inhibition of sympathetic nerve activity in response to stimulation of carotid sinus baroreceptors and cardiac and pulmonary vagal receptors in the anaesthetized, decerebrate cat. **367**, 50*P*, 1985
Cardiac vagal motoneurone
The inhibitory actions of GABA on cardiac vagal motoneurones in the cat. **361**, 49*P*, 1985
Cardiac ventricle
Increased afterload reduces monophasic action potential duration in porcine left ventricle *in situ*. **365**, 62*P*, 1985
Investigations on ventriculo-aortic interaction in the awake dog. **366**, 38*P*, 1985
Volume changes and the active state in isolated rabbit left ventricles. **366**, 70*P*, 1985
The influence of the ejection timing upon the relaxation of the rabbit isolated left ventricle. **366**, 110*P*, 1985
The end-ejection pressure-length relationship: hysteresis after acute increases in afterload in the intact canine heart. **371**, 65*P*, 1986
The effect of heart rate on *in utero* left ventricular output in the fetal sheep. **372**, 557, 1986
Resistance and capacitance responses to changes in left ventricular pressure in anaesthetized dogs. **382**, 115*P*, 1987
In utero ventilation with oxygen augments left ventricular stroke volume in lambs. **383**, 413, 1987
Cardiac ventricular muscle
The influence of 'diastolic' length on the contractility of isolated cat papillary muscle. **361**, 269, 1985
Effects of rapid cooling on mechanical and electrical responses in ventricular muscle of guinea-pig. **361**, 361, 1985
Influence of a change in stimulation rate on action potentials, currents and contractions in rat ventricular cells. **364**, 113, 1985
Relationship between intracellular pH and contractility in guinea-pig papillary muscles. **365**, 63*P*, 1985
Diastolic volume loading and the inotropic state of *in vivo* left ventricles in dogs. **366**, 48*P*, 1985

Cardiac ventricular muscle (*cont.*)
Length-dependence of activation in the isovolumically beating dog heart. **366**, 71*P*, 1985
Inward current and contraction in mammalian cardiac cells: interventions that augment or reduce current staircases. **366**, 84*P*, 1985
Increase and decline of pressure enhancement during velocity-controlled stretches in the isolated contracting rabbit left ventricle. **366**, 111*P*, 1985
The effect of amplitude, velocity and time of volume decrease on pressure development in activated isolated rabbit left ventricle. **366**, 112*P*, 1985
Simultaneous recording of transient inward current and contraction in single guinea-pig ventricular cells. **366**, 119*P*, 1985
The effects of inorganic phosphate and creatine phosphate on force production in skinned muscles from rat ventricle. **370**, 585, 1986
Electrophysiological effects of tetracaine in single guinea-pig ventricular myocytes. **376**, 143, 1986
The reaction of ouabain with the sodium pump of guinea-pig myocardium in relation to its inotropic effect. **379**, 187, 1986
Laser-induced photolysis of nitroprusside: response of isolated frog ventricular trabeculae to photodegradation products. **380**, 37*P*, 1986
Influence of halothane on calcium currents in single cells isolated from guinea-pig ventricular muscle. **381**, 122*P*, 1986
Identification of sodium–calcium exchange current in single ventricular cells of guinea-pig. **384**, 199, 1987
Intracellular sodium–calcium dissociation in early contractile failure in hypoxic ferret papillary muscles. **388**, 449, 1987
An intrinsic potential-dependent inactivation mechanism associated with calcium channels in guinea-pig myocytes. **389**, 205, 1987
Influence of halothane on inward currents and contraction in ventricular myocytes isolated from guinea-pig. **390**, 211*P*, 1987
Calcium current in isolated neonatal rat ventricular myocytes. **391**, 169, 1987
Electrical activity and contraction in cells isolated from rat and guinea-pig ventricular muscle: a comparative study. **391**, 527, 1987
Calcium-activated inward current and contraction in rat and guinea-pig ventricular myocytes. **391**, 545, 1987
Mechanisms of calcium entry at positive potentials in cells isolated from guinea-pig ventricular muscle. **392**, 35*P*, 1987
Effects of isoflurane on action potentials, membrane currents and contractions in cells isolated from guinea-pig ventricular muscle. **394**, 171*P*, 1987

Cardiorespiratory reflex
Neural respiratory and circulatory interaction during chemoreceptor stimulation and cooling of ventral medulla in cats. **370**, 217, 1986
Respiratory responses to right-ventricular pressure changes in anaesthetized dogs. **391**, 67*P*, 1987

Cardiovascular function
The cardiovascular responses to upright tilting and lower body negative pressure in man. **369**, 188*P*, 1985
Absence of cardiovascular effects during the inclusion of an extracorporeal circulation in the anaesthetized rat. **381**, 119*P*, 1986
A system for the study of cardiovascular control in humans. **386**, 10*P*, 1987
Cardiovascular responses to upright tilting in human subjects of various ages. **386**, 104*P*, 1987
Cardiovascular responses in humans to baroreceptor stimulation. **386**, 105*P*, 1987
Assessment of cardiovascular control in human subjects. **387**, 82*P*, 1987
Abnormal cardio-respiratory activity in the infant – a possible basis for sudden infant death? **388**, 27*P*, 1987
Cardiovascular responses evoked from the fastigial region of the cerebellum in anaesthetized and decerebrate rabbits. **392**, 475, 1987

Cardiovascular monitoring
Cardiovascular monitoring in conscious unrestrained rats: a harness assembly for the protection of catheters and attachment of pulsed Doppler flow probe connectors. **372**, 7*P*, 1986

Cardiovascular reflex
The cardiovascular responses elicited from the posterior cerebellar cortex in the anaesthetized and decerebrate rabbit. **383**, 537, 1987
Cardiovascular and phrenic nerve responses to stimulation of the amygdala central nucleus in the anaesthetized rabbit. **389**, 541, 1987
Modifications by changes in respiration of the cardiac and hind-limb vascular responses to stimulation of cardiac receptors in the cat. **390**, 114*P*, 1987
Direction of the heart-rate response to acute volume loading in dogs. **390**, 233*P*, 1987
Analysis of cardiovascular responses evoked following changes in peripheral chemoreceptor activity in the rat. **394**, 393, 1987

Cardiovascular regulation
Cardiovascular responses evoked by electrical stimulation of the posterior cerebellar cortex in the anaesthetized and decerebrate cat. **388**, 29*P*, 1987
Differential control of cardiac and vasomotor activity by neurones in nucleus paragigantocellularis lateralis in the cat. **389**, 23, 1987
Changes in renal sympathetic nerve activity, heart rate and arterial blood pressure associated with eating in cats. **390**, 229, 1987
A γ-aminobutyric-acid-mediated inhibition of neurones in the nucleus tractus solitarius of the cat. **392**, 417, 1987
Cardiovascular and respiratory responses evoked from the posterior cerebellar cortex and fastigial nucleus in the cat. **393**, 107, 1987
Cardiovascular responses to stimulation of the anterior insular cortex in rabbits occur only in association with muscle activity. **394**, 100*P*, 1987

Cardiovascular system
Partial neuromuscular blockade and cardiovascular responses to static exercise in man. **359**, 365, 1985
The cardiovascular effects of vasopressin after haemorrhage in anaesthetized rats. **375**, 421, 1986

Carotid body
Respiratory effects of sectioning the carotid sinus glossopharyngeal and abdominal vagal nerves in the awake rat. **361**, 35, 1985
Comparison of responses of cat carotid body chemoreceptors to oscillations of P_{CO_2}, P_{O_2} and asphyxia. **369**, 146*P*, 1985
Effects of oligomycin upon carotid body chemoreceptors of the cat and rabbit. **371**, 112*P*, 1986
Stimulation of carotid chemoreceptors by infusion of KCl in the anaesthetized cat. **372**, 71*P*, 1986
Sodium cyanide (CN^-) and hypercapnia inhibit the rabbit carotid body discharge in severe hypoxia. **377**, 66*P*, 1986
Division of Type 1 cells in the rat carotid body during hypoxia. **378**, 70*P*, 1986
Effects of high potassium on the release of [^{3}H]dopamine from the cat carotid body *in vitro*. **379**, 293, 1986
Restoration of hypoxic respiratory responses in the awake rat after carotid body denervation by sinus nerve section. **380**, 61, 1986
Influence of inspired oxygen concentration on the dynamics of the exercise hyperpnoea in man. **380**, 387, 1986
The effects of almitrine on the excitation of carotid body chemoreceptor discharge by hypoxia and hypercapnia in the cat. **381**, 16*P*, 1986
Light reduces carotid body chemoreceptor discharge in the cat after infusion of almitrine bismesylate. **382**, 58*P*, 1987
Method for structural analysis of cat and rat carotid body using an image processor. **387**, 11*P*, 1987

Carotid body chemoreceptor
Effects of acetylcholine and dopamine infusions on the carotid body chemoreceptor discharge in the rabbit. **358**, 98*P*, 1985
Effects of selective β-adrenergic antagonists on the response of carotid chemoreceptors to hypoxia in anaesthetized cats. **365**, 102*P*, 1985
Influence of domperidone on respiratory responses to dopamine and hypoxia in rats anaesthetized with halothane. **365**, 103*P*, 1985
Renal response to carotid chemoreceptor stimulation in anaesthetized dogs. **365**, 114*P*, 1985
Ventilation in intact and glossopharyngeal nerve sectioned anaesthetized rats exposed to oxygen at high pressure. **370**, 489, 1986
Modification by lung inflation of the vascular responses from the carotid body chemoreceptors and other receptors in dogs. **378**, 13, 1986
The effect of small changes in arterial carbon dioxide tension on carotid chemoreceptor activity in the cat. **380**, 415, 1986
Dopamine and hypoxia modify the response of rabbit carotid body chemoreceptors to KCl. **384**, 49*P*, 1987
Effect of naloxone on responsiveness of cat carotid chemoreceptors to almitrine. **384**, 51*P*, 1987
The effect of hyperkalaemia on the activity of pulmonary stretch receptors in the cat. **391**, 64*P*, 1987
Characterization of tachykinin receptors in the cat carotid body. **392**, 81*P*, 1987
Involvement of arterial chemoreceptors in salicylate-induced hyperventilation in anaesthetized rats. **392**, 98*P*, 1987
The interaction of hypoxia and K^+ on the carotid chemoreceptor in anaesthetized cats. **394**, 65*P*, 1987
The effect of beta adrenergic blockade on the carotid body responses to hyperkalaemia in the cat. **394**, 67*P*, 1987

Carotid sinus
Carotid sinus cardiovascular reflexes and their modification by a calcium channel blocker in the rabbit. **382**, 60*P*, 1987

Carotid sinus baroreceptor
Static and dynamic responses of carotid sinus baroreceptors in dogs with chronic volume overload. **369**, 295, 1985
Characteristics of C fibre baroreceptors in the carotid sinus of dogs. **394**, 291, 1987

Carotid sinus nerve
Post-synaptic activity evoked in the nucleus tractus solitarius by carotid sinus and aortic nerve afferents in the cat. **360**, 261, 1985
Carotid sinus nerve afferent discharges in the anaesthesized cat. **360**, 44*P*, 1985
Ventilatory effects of carotid sinus-nerve stimulation with a sinusoidally modulated pulse frequency. **366**, 62*P*, 1985
Afferent activity in the regenerated sinus nerve of the rabbit. **366**, 63*P*, 1985

Castration
Effects of tail docking and castration on behaviour and plasma cortisol concentrations in young lambs. **386**, 74*P*, 1987

Cat
Relations between spinocervical and post-synaptic dorsal column neurones in the cat. **381**, 333, 1986
The organization and post-natal development of area 18 of the cat's visual cortex. **384**, 263, 1987

Catechol
Catechol: a potent and specific inhibitor of the fast potassium channel in frog primary afferent neurones. **373**, 115, 1986

Catecholamine
Effect of monoamine oxidase inhibitors on thiopentone anaesthesia in the rat. **358**, 23*P*, 1985
Plasma catecholamine levels in man during water immersion. **358**, 120*P*, 1985
The effect of adrenaline upon thermoregulation in man. **361**, 74*P*, 1985
A dopaminergic receptor modulates catecholamine release from the cat adrenal gland. **362**, 359, 1985
Lack of effect of intravenously infused glucose on cardiovascular variables or plasma catecholamines in man. **364**, 72*P*, 1985

Catecholamine (*cont.*)
The effect of forskolin on catecholamine release and intracellular free calcium in bovine adrenal chromaffin cells. **369**, 99*P*, 1985
Catecholamine secretion and adrenal nerve activity in response to movements of normal and inflamed knee joints in cats. **375**, 611, 1986
Effects of synthetic adrenocorticotrophin on adrenal medullary responses to splanchnic nerve stimulation in conscious calves. **379**, 1, 1986
The effect of splanchnic nerve stimulation on adrenocortical activity in conscious calves. **382**, 385, 1987
Non-cholinergic component of rat splanchnic nerves predominates at low neuronal activity and is eliminated by naloxone. **383**, 639, 1987
Isoprenaline activates a $[Na]_o$-dependent inward current in single guinea-pig ventricular myocytes. **388**, 35*P*, 1987
Cardiovascular, ventilatory and catecholamine responses to maximal dynamic exercise in partially curarized man. **389**, 557, 1987
Role of hypoxia per se on hormonal responses to dynamic exercise at simulated high altitude in trained and untrained man. **390**, 126*P*, 1987
Modulation of calcium channels of twitch skeletal muscle fibres of the frog by adrenaline and cyclic adenosine monophosphate. **393**, 307, 1987
Evidence for a $[cAMP]_i$-dependent mechanism underlying the isoprenaline-induced depolarization of guinea-pig ventricular myocytes. **394**, 32*P*, 1987

Cation
Cation activation of the pig kidney sodium pump: transmembrane allosteric effects of sodium. **359**, 119, 1985

Cation transport
The use of transformed human lymphocytes to study cation transport and β-adrenoceptor function in manic depressive psychosis. **367**, 4*P*, 1985
The serum stimulation of ion fluxes in cultured mouse (3T3) and human (HeLa) cells is not due to an increased sodium entry. **367**, 70*P*, 1985

Caudate nucleus
A calcium-dependent inward current in voltage-clamped rat caudate neurones *in vitro*. **377**, 88*P*, 1986
Regulation of Nerve Growth Factor-dependent growth of peripheral axons in the Japanese quail *in vitro* by α-melanotropin and its derivatives. **381**, 56*P*, 1986
Modulatory effects of NMDA agonists on cortically evoked e.p.s.p.s in cat caudate nucleus are dependent on stimulus frequency. **381**, 57*P*, 1986

Cell coupling
Electric current flow in cell pairs isolated from adult rat hearts. **366**, 177, 1985
Electrical properties of the nexal membrane studied in rat ventricular cell pairs. **370**, 267, 1986
Electrical coupling studied in cell pairs isolated from adult rat liver. **372**, 46*P*, 1986

Cell culture
Isolation of HeLa plasma membranes on microcarrier beads. **367**, 3*P*, 1985
Temperature-controlled perfusion chamber suited for mounting on microscope stages. **378**, 90*P*, 1986

Cell junction
Cell pairs isolated from adult guinea-pig heart: interventions aimed at modifying the nexal membrane resistance. **378**, 57*P*, 1986

Cell volume
Taurine transport associated with cell volume regulation in flounder erythrocytes under anisosmotic conditions. **374**, 245, 1986
Control of cell volume and ion transport by β-adrenergic catecholamines in erythrocytes of rainbow trout, *Salmo gairdneri*. **382**, 123, 1987
Ion movements and volume changes induced by catecholamines in erythrocytes of rainbow trout: effect of pH. **382**, 145, 1987
Ouabain-induced volume changes in cultured embryonic chick heart cells. **382**, 105*P*, 1987
Are ninhydrin-positive substances volume-regulatory osmolytes in rat renal papillary cells? **386**, 45, 1987
Control of cell volume in rat renal slices following cold preservation. **387**, 48*P*, 1987
Effects of cell volume changes on membrane ionic permeabilities and sodium transport in frog skin (*Rana ridibunda*). **393**, 1, 1987

Central gating
Continuous electrical stimulation of adjacent fingers reduces the cutaneomuscular reflex response in human first dorsal interosseous muscle. **387**, 53*P*, 1987

Cephalopod
Brain vascular volume, electrolytes and blood–brain interface in the cuttlefish *Sepia officinalis* (Cephalopoda). **368**, 197, 1985
Tightness of the blood–brain barrier and evidence for brain interstitial fluid flow in the cuttlefish, *Sepia officinalis*. **368**, 213, 1985

Cerebellar fastigial nucleus, *see* Fastigial nucleus

Cerebellar flocculus
Mossy fibres sending retinal-slip, eye, and head velocity signals to the flocculus of the monkey. **379**, 39, 1986
Responses of Purkinje cells and mossy fibres in the flocculus of the monkey during sinusoidal movements of a visual pattern. **387**, 611, 1987

Cerebellar Purkinje cell, *see* Purkinje cell

Cerebellum
Discharges of putative Golgi cells in the cerebellar cortex during locomotion in the cat. **364**, 29*P*, 1985
The corticonuclear projection of the *x* zone in lobule V B/C of the cat cerebellum – a combined electrophysiological and autoradiographic study. **364**, 30*P*, 1985
Pharmacological evidence for L-aspartate as the neurotransmitter of cerebellar climbing fibres in the guinea-pig. **365**, 103, 1985
Cardiovascular responses to stimulation of the posterior cerebellum in anaesthetized rabbits. **369**, 130*P*, 1985

Cerebellum (*cont.*)
Modulation by applied electric fields of Purkinje and stellate cell activity in the isolated turtle cerebellum. **371**, 89, 1986
Parallel-fibre- and mossy-fibre-mediated synaptic transmission in rat cerebellar slices monitored using a 'grease-gap' method. **371**, 16*P*, 1986
Electrophysiological characteristics of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 129, 1986
Extracellular activation and membrane conductances of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 149, 1986
Glomerular potentials in the cerebellar cortex of the ferret. **372**, 13*P*, 1986
Cardiovascular responses to stimulation of the posterior cerebellum in the decerebrate rabbit. **373**, 57*P*, 1986
Effect of small doses of anaesthetics on cardiovascular changes evoked from the posterior cerebellum in the decerebrate rabbit. **376**, 31*P*, 1986
The secondary spikes of climbing fibre responses recorded from Purkinje cell somata in cat cerebellum. **377**, 207, 1986
The secondary spikes of climbing fibre responses recorded from Purkinje cell axons in cat cerebellum. **377**, 225, 1986
Cardiovascular responses elicited from the fastigial nucleus in the anaesthetized and decerebrate rabbit. **378**, 51*P*, 1986
The cardiovascular responses elicited from the posterior cerebellar cortex in the anaesthetized and decerebrate rabbit. **383**, 537, 1987
Post-natal development of the retinal and cerebellar projections onto the lateral suprasylvian area in the cat. **383**, 729, 1987
Climbing fibres projecting to cat cerebellar anterior lobe activated by cutaneous A and C fibres. **386**, 529, 1987
Stimulation of cat cutaneous nociceptive C fibres causing tonicand synchronous activity in climbing fibres. **386**, 539, 1987
The discharges of cerebellar Golgi cells during locomotion in the cat. **392**, 315, 1987
Cardiovascular and respiratory responses evoked from the posterior cerebellar cortex and fastigial nucleus in the cat. **393**, 107, 1987
Optical recording of electrical activity from parallel fibres and other cell types in skate cerebellar slices *in vitro*. **393**, 681, 1987
Cerebellar neuronal activity related to arm movements in trained rhesus monkeys. **394**, 351, 1987
Saccadic eye movements evoked by microstimulation of lobule VII of the cerebellar vermis of macaque monkeys. **394**, 573, 1987

Cerebral blood flow
Effect of moderate hypertension induced by dopamine or noradrenaline on local cerebral blood flow in the rat. **360**, 28*P*, 1985
The effect of diazepam on cerebral blood flow in the hypercapnic rat and the action of the benzodiazepine antagonist Ro15-1788. **361**, 52*P*, 1985
Effect of blood gases on input resistance of the canine cerebral and cephalic circulation. **367**, 44*P*, 1985
Impairment of feline cerebral oxygenation by presumed airway closure after fluid aspiration. **371**, 124*P*, 1986
The effect of anaemia on fetal cerebral blood flow and oxygenation. **371**, 280*P*, 1986
A modification of the method for the measurement of cerebral blood flow using [^{14}C]iodoantipyrine in the rat. **373**, 87*P*, 1986
Effect of leukotriene D4 (LTD4) on resistance of the canine cerebral and cephalic circulation. **377**, 17*P*, 1986
Changes in pyramidal tract conduction with brainstem ischaemia in baboons. **380**, 57*P*, 1986
Role of large arteries in regulation of blood flow to brain stem in cats. **387**, 115, 1987
Spectral analysis of aortic blood pressure and cerebral blood flow velocity in premature infants. **390**, 213*P*, 1987
Methods for making simultaneous and continuous records of the effects of drugs upon neural activity in the cerebral cortex and the diameter of pial blood vessels in rats anaesthetized with urethane. **391**, 6*P*, 1987
Uncoupling of blood flow and metabolism in the inner and outer layers of the cerebral mantle in experimental hydrocephalus in the rat. **392**, 54*P*, 1987
Measurement of regional cerebral blood flow in Alzheimer-type dementia using a novel approach. **392**, 78*P*, 1987

Cerebral cortex
Sensory specification and laminar localization of distinct neuronal classes in rat Sm1 neocortex. **361**, 46*P*, 1985
Pyramidal effects in dorsal neck motoneurones of the cat. **363**, 287, 1985
A comparison of the effect of urethane on spontaneously active cells in the rat somatosensory cortex *in vivo* and *in vitro*. **364**, 33*P*, 1985
Intracellular measurements of the electrical properties of neurones in the cerebral cortex of the rat: comparative data from slices *in vitro* and from the anaesthetized animal. **365**, 15*P*, 1985
The effect of benzodiazepines upon transmission of somatosensory information in the urethane-anaesthetized rat. **366**, 26*P*, 1985
Responses of precentral cells during cooling of postcentral cortex in conscious monkeys. **368**, 611, 1985
A magnesium-sensitive post-synaptic potential in rat cerebral cortex resembles neuronal responses to *N*-methylaspartate. **370**, 531, 1986
Myoblasts and myoblast-conditioned medium attract the earliest spinal neurites from frog embryos. **375**, 39, 1986
Mechanisms of action of acetylcholine in the guinea-pig cerebral cortex *in vitro*. **375**, 169, 1986
Cerebral cortical responses to contralateral transcranial stimulation in humans. **377**, 25*P*, 1986

Cerebral cortex (*cont.*)
Evidence that the thalamic reticular nucleus regulates cerebral cortical dopamine function via the mediodorsal thalamus in the rat. **378**, 43*P*, 1986
Continuous measurement of cerebral blood flow in the rabbit by laser Doppler spectroscopy. **382**, 64*P*, 1987
NMA receptors and different types of epileptiform activity in rat cortical slices. **382**, 86*P*, 1987
Laminar organization of the cortex in the posteromedial barrel field of rats. **388**, 42*P*, 1987
Short-latency responses to vibrissa stimulation from layer Vb neurones in the rat barrel-field. **388**, 43*P*, 1987
Intracranial and extracranial measurement of changes in cerebral impedance in the anaesthetized rat. **390**, 9*P*, 1987
Post-natal development of electrophysiological properties of rat cerebral cortical pyramidal neurones. **393**, 743, 1987

Cerebrospinal fluid
The transport of sugars across the perfused choroid plexus of the sheep. **362**, 245, 1985
Effect of ventricular tonicity upon cerebrospinal fluid production in rabbits. **362**, 273, 1985
The control of potassium concentration in the cerebrospinal fluid of developing rats. **362**, 22*P*, 1985
A method of withdrawal of c.s.f. or infusion of substances into the lateral cerebral ventricles of conscious pigs and sheep. **371**, 9*P*, 1986
One hundred per cent inhibition of cerebrospinal fluid (c.s.f.) secretion by 10 mM-$AlCl_3$ in the rabbit. An artefact. **381**, 54*P*, 1986
Bulk flow of c.s.f. into brain in response to acute hyperosomotic stress in the rat. **382**, 101*P*, 1987
The control of potassium concentration in the cerebrospinal fluid and brain interstitial fluid of developing rats. **383**, 441, 1987
Changes in plasma and brain fluid calcium in the developing rat. **392**, 64*P*, 1987
Changes in intracranial c.s.f. volume during hypercapnia and hypocapnia in man. **392**, 85*P*, 1987

Channel blockade
Single channels activated by acetylcholine in rat superior cervical ganglion. **388**, 141, 1987

Channel kinetics
Acetylcholine receptor activation by a site-selective ligand: nature of brief open and closed states in BC3H–1 cells. **370**, 357, 1986
Activation of acetylcholine receptors on clonal mammalian BC3H–1 cells by low concentrations of agonist. **373**, 129, 1986
Activation of acetylcholine receptors on clonal mammalian BC3H-1 cells by high concentrations of agonist. **385**, 325, 1987
Two types of acetylcholine receptor channels in developing *Xenopus* muscle cells in culture: further kinetic analyses. **389**, 271, 1987

Charge movement
Excitation–contraction coupling and charge movement in denervated rat extensor digitorum longus and soleus muscles. **358**, 75, 1985
Intramembrane charge movement and calcium release in frog skeletal muscle. **373**, 481, 1986
Asymmetric charge movement in contracting muscle fibres in the rabbit. **376**, 63, 1986
Components of charge movement in rabbit skeletal muscle: the effect of tetracaine and nifedipine. **376**, 85, 1986
The differential effects of twitch potentiators on charge movements in frog skeletal muscle. **380**, 17, 1986
Charge movement components and calcium transients in isolated frog skeletal muscle fibres. **382**, 165*P*, 1987
Asymmetric charge movement in polarized and depolarized muscle fibres of the rabbit. **383**, 349, 1987
'Off' tails of intramembrane charge movements in frog skeletal muscle in perchlorate-containing solutions. **384**, 491, 1987
Intramembrane charge movement in frog skeletal muscle fibres. Properties of charge 2. **387**, 489, 1987
Perchlorate and the relationship between charge movement and contractile activation in frog skeletal muscle fibres. **390**, 213, 1987
Calcium currents, charge movement and dihydropyridine binding in fast- and slow-twitch muscles of rat and rabbit. **393**, 595, 1987

Chemical sympathectomy
A physiological basis for subclassifying β-adrenoceptors examined by chemical sympathectomy of guinea-pigs. **373**, 367, 1986

Chemoreceptor
Respiratory responses to medullary hydrogen ion changes in cats: different effects of respiratory and metabolic acidoses. **358**, 285, 1985
Oxygen toxicity attenuates cat carotid body chemoreceptor responses to acute hypoxia but not to hypercapnia. **358**, 93*P*, 1985
Respiratory effects of sectioning the carotid sinus glossopharyngeal and abdominal vagal nerves in the awake rat. **361**, 35, 1985
Central stimulation of breathing movements in fetal lambs by prostaglandin synthetase inhibitors. **362**, 455, 1985
Almitrine bismesylate enhances sensitivity to carbon dioxide of peripheral chemoreceptors during normoxia in the cat. **366**, 105*P*, 1985
Intrapulmonary chemoreceptor responses to static P_{CO_2} following acute metabolic alkalosis in the Pekin duck (*Anas platyrhynchos*). **371**, 108*P*, 1986
Carotid body chemoreceptor stimulation in rats activates large areas of the forebrain but not the hypothalamus. **371**, 114*P*, 1986
Intracisternal diethylpyrocarbonate (an imidazole binding agent) inhibits central ventilatory chemosensitivity in the rabbit. **371**, 236*P*, 1986
Unilateral changes in cerebral blood flow following single-sided carotid body chemoreceptor stimulation in rats. **373**, 51*P*, 1986
Restoration of hypoxic respiratory responses in the awake rat after carotid body denervation by sinus nerve section. **380**, 61, 1986

Chemoreceptor (*cont.*)
Influence of inspired oxygen concentration on the dynamics of the exercise hyperpnoea in man. **380**, 387, 1986
The effect of potassium on carotid body chemoreceptor discharge in the anaesthetized cat. **381**, 39, 1986
The effect of exercise on the central-chemoreceptor threshold in man. **383**, 9, 1987
Rabbit carotid chemoreceptors *in vitro*: interactions of dopamine and K^+. **390**, 184*P*, 1987
Maturation of the respiratory response to acute hypoxia in the newborn rat. **392**, 1, 1987
The effects of stimulating carotid chemoreceptors on renal haemodynamics and function in dogs. **392**, 451, 1987
Preparation and identification of freshly dissociated cells from the rabbit carotid body for electrophysiological study. **392**, 11*P*, 1987
Electrophysiological characterization of freshly dissociated type I cells from the rabbit carotid body. **392**, 36*P*, 1987

Chemoreceptor reflex
Effect of cephalic carbon dioxide tension on the cardiac inotropic response to carotid chemoreceptor stimulation in dogs. **358**, 405, 1985
CO_2 and H^+ effects on the ventilatory response to peripheral chemoreceptor stimulation in cats. **366**, 57*P*, 1985
Contractile effect of short-chain fatty acids on the isolated colon of the rat. **368**, 667, 1985
Neural respiratory and circulatory interaction during chemoreceptor stimulation and cooling of ventral medulla in cats. **370**, 217, 1986
Ventilatory response to pulses of inhaled CO_2 during exercise in man. **382**, 51*P*, 1987
Analysis of cardiovascular responses evoked following changes in peripheral chemoreceptor activity in the rat. **394**, 393, 1987

Chemosensory transduction
Passive and active membrane properties of mudpuppy taste receptor cells. **383**, 601, 1987

Chick
Latency jumps and variable latencies of antidromically identified magnocellular neurones in the chicken embryo. **361**, 27*P*, 1985

Chloride
Calcium-dependent chloride secretion in rat colon epithelium. **361**, 1, 1985
Quantitative description of three modes of activity of fast chloride channels from rat skeletal muscle. **378**, 141, 1986
An investigation of chloride–bicarbonate exchange in the sheep cardiac Purkinje fibre. **379**, 377, 1986
Effect of chloride ions on giant miniature end-plate potentials at the frog neuromuscular junction. **383**, 143, 1987
Influence of chloride concentration and pH on the ^{36}Cl efflux from depolarized skeletal muscle of *Rana temporaria*. **385**, 49, 1987
Cell and luminal activities of chloride, potassium, sodium and protons in the late distal tubule of *Necturus* kidney. **393**, 73, 1987

Chloride–bicarbonate exchange
The effects of bicarbonate and foreign anions on chloride transport in smooth muscle of the guinea-pig vas deferens. **366**, 267, 1985
Acid secretion through the *Rana esculenta* skin: involvement of an anion-exchange mechanism at the basolateral membrane. **378**, 195, 1986
Properties of the intracellular pH-regulating systems of frog skeletal muscle. **381**, 205, 1986

Chloride conductance
γ-Aminobutyric- acid- and pentobarbitone-gated chloride currents in internally perfused frog sensory neurones. **360**, 367, 1985
A calcium-activated chloride current generates the after-depolarization of rat sensory neurones in culture. **364**, 217, 1985
Propagating potassium and chloride conductances during activation and fertilization of the egg of the frog, *Rana pipiens*. **368**, 227, 1985
Effects of γ-aminobutyric acid on isolated cone photoreceptors of the turtle retina. **373**, 443, 1986
Quantitative description of three modes of activity of fast chloride channels from rat skeletal muscle. **378**, 141, 1986
Mechanism of anion permeation through channels gated by glycine and γ-aminobutyric acid in mouse cultured spinal neurones. **385**, 243, 1987
Action of noradrenaline on single smooth muscle cells freshly dispersed from the rat anococcygeus muscle. **389**, 513, 1987
Caesium ions activate chloride channels in rat cultured spinal cord neurones. **392**, 231, 1987

Chloride current
Calcium-dependent chloride currents in isolated cells from rat lacrimal glands. **378**, 437, 1986
'Concentration-clamp' study of γ-aminobutyric-acid-induced chloride current kinetics in frog sensory neurones. **379**, 171, 1986
Oscillatory chloride current evoked by temperature jumps during muscarinic and serotonergic activation in *Xenopus* oocyte. **383**, 213, 1987
Contribution of chloride shifts to the fade of γ-aminobutyric acid-gated currents in frog dorsal root ganglion cells. **391**, 219, 1987
The effects of strychnine and bicuculline on caesium-activated chloride currents in rat cultured spinal cord neurones. **391**, 81*P*, 1987
Sodium-dependent suppression of γ-aminobutyric-acid-gated chloride currents in internally perfused frog sensory neurones. **392**, 543, 1987
Kinetic properties of the pentobarbitone-gated chloride current in frog sensory neurones. **394**, 85, 1987
Calcium-activated chloride current in cultured sensory and parasympathetic quail neurones. **394**, 125, 1987

Chloride secretion
Characterization of the Na^+/Cl^- co-transport process involved in chloride secretion in guinea-pig gastric mucosa. **391**, 27*P*, 1987

Chloride transport
Transport of sodium and chloride across rat gastric mucosa *in vitro*. **360**, 293, 1985

Chloride transport (*cont.*)
Oxygen consumption and active sodium and chloride transport in bovine tracheal epithelium. **372**, 51, 1986
Interaction between sodium and chloride transport in bovine tracheal epithelium. **376**, 299, 1986
Steady-state analysis of ion fluxes in *Necturus* gall-bladder epithelial cells. **382**, 15, 1987
Transepithelial Cl^- exchange in salmon: effect of adrenaline, acetazolamide and adrenergic antagonists. **382**, 138*P*, 1987
Activation of the volume- or ionophore A23187 plus Ca^{2+}-induced Cl^- transport pathway in Ehrlich mouse ascites tumour cells is mediated via leukotriene-D_4. **394**, 85*P*, 1987

Chlorpromazine
Effects of chlorpromazine and phencyclidine on mouse C2 acetylcholine receptor kinetics. **378**, 497, 1986

Cholecystokinin
Activation of enteric nerve pathways in the guinea-pig duodenum by cholecystokinin octapeptide and pentagastrin. **364**, 31, 1985
Lorazepam inhibits the effects of cholecystokinin octapeptide on guinea-pig ileum but not on guinea-pig gall-bladder. **371**, 140*P*, 1986
Development of cholecystokinin receptors and suppression of ingestion and gastric emptying in the rat. **387**, 93*P*, 1987
Autoradiographic localization of 'peripheral' type CCK binding sites in rat brain. **390**, 22*P*, 1987
In vivo modulation of dopamine release during perfusion of cholecystokinin peptide fragments in the striatum of the rat. **390**, 198*P*, 1987
Pressure changes in canine gall-bladder associated with emptying. **393**, 545, 1987
The localization of cholecystokinin (CCK) binding sites on fetal striatal neurones grafted in the ibotenic acid-lesioned rat striatum. **394**, 159*P*, 1987

Cholesterol
Individuality of the response in man and rabbit of serum cholesterol to dietary cholesterol and to dietary fatty acids. **366**, 103*P*, 1985

Choline transport
Characterization of choline transport at maternal and fetal interfaces of the perfused guinea-pig placenta. **366**, 251, 1985

Cholinergic neurone
Membrane currents underlying the cholinergic slow excitatory post-synaptic potential in the rat sympathetic ganglion. **365**, 365, 1985
Dendrites of immunocytochemically identified cholinergic neurones in ferret brain display intense staining for acetylcholinesterase along the plasma membrane· an indication of the dendritic release of acetylcholine? **394**, 97*P*, 1987

Cholinesterase
Surplus acetylcholine and acetylcholine release in the rat diaphragm. **385**, 147, 1987

Choroid plexus
The transport of sugars across the perfused choroid plexus of the sheep. **362**, 245, 1985
Effect of ventricular tonicity upon cerebrospinal fluid production in rabbits. **362**, 273, 1985
Morphometric changes in the choroid plexus apical microvilli and mitochondria during development in the rat. **369**, 175*P*, 1985
Identification of Ca^{2+}-activated K^+ currents in *Necturus* choroid plexus. **390**, 70*P*, 1987

Chromaffin cell
Dynamics of strychnine block of single sodium channels in bovine chromaffin cells. **370**, 395, 1986
Facilitation of transmitter action on catecholamine output by cardiac glycoside in perfused adrenal gland of guinea-pig. **374**, 475, 1986

Ciliary bundle
The mechanical properties of ciliary bundles of turtle cochlear hair cells. **364**, 359, 1985

Ciliary ganglion
Innervation of the iris by individual parasympathetic axons in the adult mouse. **378**, 485, 1986

Ciliate
Voltage dependence of two inward currents carried by calcium and barium in the ciliate *Stylonychia mytilus*. **380**, 551, 1986

Cilium
Characterization of metachronal wave of beating cilia on frog's palate epithelium in tissue culture. **388**, 1, 1987

Circadian rhythm
Individual differences in the human circadian system. **366**, 11*P*, 1985
The central control of circadian rhythmicity in food intake in the rat; the use of long-term recording techniques. **366**, 12*P*, 1985
Circadian control of behaviour modified by chronic application of metamphetamine in the rat. **366**, 27*P*, 1985
Control of the rabbit's food-intake pattern by two circadian oscillators. **366**, 28*P*, 1985
Preparation of brain slices from the suprachiasmatic nuclei of rat can reset the circadian clock. **369**, 55*P*, 1985
Prevention of circadian disruption following surgery using caffeine as a cue. **371**, 224*P*, 1986
Effects of light reversal on the circadian pattern of motor activity and voltammetric signals recorded in rat forebrain. **374**, 91, 1986
Circadian variation in sensitivity of suprachiasmatic and lateral geniculate neurones to 5-hydroxytryptamine in the rat. **377**, 1, 1986
Irregularity of rest and activity: studies on circadian rhythmicity in man. **381**, 279, 1986
Circadian variation in rectal temperature, oxygen consumption and peripheral blood flow in man. **390**, 120*P*, 1987
Does the single-breath carbon monoxide transfer factor estimated during submaximal exercise in man exhibit a circadian rhythm? **394**, 127*P*, 1987

Climbing fibre
Pharmacological evidence for L-aspartate as the neurotransmitter of cerebellar climbing fibres in the guinea-pig. **365**, 103, 1985

Climbing fibre (*cont.*)
The secondary spikes of climbing fibre responses recorded from Purkinje cell somata in cat cerebellum. **377**, 207, 1986
The secondary spikes of climbing fibre responses recorded from Purkinje cell axons in cat cerebellum. **377**, 225, 1986
Complex spikes in Purkinje cells in the lateral vermis (b zone) of the cat cerebellum during locomotion. **385**, 107, 1987
Climbing fibres projecting to cat cerebellar anterior lobe activated by cutaneous A and C fibres. **386**, 529, 1987
Synaptic modification of parallel fibre–Purkinje cell transmission in *in vitro* guinea-pig cerebellar slices. **394**, 463, 1987

Clonidine
Effects of the α_2-adrenergic agonist clonidine and its antagonist idazoxan on the fetal lamb. **381**, 29, 1986
α-Adrenergic inhibition of rat cerebellar Purkinje cells *in vitro*: a voltage-clamp study. **383**, 487, 1987

Cobalt
Intracellular cobalt buffering by intact human red cells – evidence for time-dependent and metabolism-dependent changes. **361**, 26*P*, 1985
Blocking effects of cobalt and related ions on the γ-aminobutyric acid-induced current in turtle retinal cones. **373**, 463, 1986

Cocaine
Presence of a noradrenaline uptake system on a ligated cat sympathetic nerve. **372**, 351, 1986

Cochlea
Measurement of hair cell movements using a linear position detector. **364**, 4*P*, 1985
Three distinct potassium channels in outer hair cells isolated from the guinea-pig cochlea. **371**, 29*P*, 1986
A model of the generation of the cochlear microphonic with nonlinear hair cell transduction and nonlinear basilar membrane vibration. **371**, 32*P*, 1986
Chloramphenicol increases the risk of noise-induced hearing loss in the guinea-pig. **382**, 121*P*, 1987
The responses of hair cells in the basal turn of the guinea-pig cochlea to tones. **383**, 551, 1987
A fast motile response in guinea-pig outer hair cells: the cellular basis of the cochlear amplifier. **388**, 323, 1987

Cold exposure
Effects of thermoregulatory adjustments to mild cooling on circulating blood platelets and red cells in man. **360**, 73*P*, 1985
Sympathetic modulation of cold-receptive neurones in the trigeminal system of the rat. **366**, 315, 1985
Peroxisome and light mitochondrion biogenesis during cold adaptation. **369**, 193*P*, 1985
Multilocular adipocytes from muscovy ducklings differentiated in response to cold acclimation. **375**, 27, 1986
Hyperventilation and swim failure in man in cold water. **378**, 94*P*, 1986
Exercise during intermittent cold exposure prevents acclimation to cold in rats. **390**, 45, 1987
Experimental non-freezing cold injury in the tibial nerve of the rabbit. **390**, 37*P*, 1987
Cold stimulation of teeth: a comparison between the responses of cat intradental Aδ and C fibres and human sensation. **391**, 193, 1987

Collagen
Collagen metabolism during muscle growth in the chicken: evidence for increased collagen deposition associated with a decreased degradation of newly synthesized collagen as well as an increased systhesis rate. **364**, 80*P*, 1985

Collecting tubule
Effect of trifluoperazine on rabbit cortical collecting tubular response to vasopressin. **372**, 41, 1986

Colon
Three serial neurones in the innervation of the colon by the sacral parasympathetic nerve of the dog. **362**, 69, 1985
Myoelectrical activity and propulsion in the large intestine of fed and fasted rats. **362**, 93, 1985
Submucosal plexus and electrolyte transport across rat colonic mucosa. **364**, 301, 1985
Mucosal plexus and electrolyte transport across the rat colonic mucosa. **376**, 531, 1986
Enteric neural regulation of slow waves in circular muscle of the canine proximal colon. **377**, 297, 1986
Magnetic stimulation of the human brain: the effects of voluntary muscle activity. **378**, 37*P*, 1986
In vitro effects of dexamethasone on sodium transport across rat colon. **383**, 69, 1987
Spinal cord influences on the colonic myoelectrical activity of fed and fasted rats. **383**, 395, 1987
Intracellular recordings from myenteric neurones in the human colon. **390**, 305, 1987
Myogenic electrical control activity in longitudinal muscle of human and dog colon. **392**, 21, 1987
The electrophysiological effects of vasoactive intestinal polypeptide in the guinea-pig inferior mesenteric ganglion. **394**, 67, 1987

Colour vision
The contrast sensitivity of human colour vision to red–green and blue–yellow chromatic gratings. **359**, 381, 1985
Colour and luminance sensitivity in human optic neuritis. **360**, 23*P*, 1985
Electroretinograms evoked by sinusoidal excitation of human cones. **363**, 135, 1985
Quasi-independence of opponent-colour processes under chromatic adaptation in man. **377**, 42*P*, 1986
Functional isolation of normal human opponent-colour processes at increment threshold. **377**, 44*P*, 1986
Anomalous loss in blue–green hue discrimination in very brief monochromatic stimuli presented to the normal human eye. **381**, 64*P*, 1986
Photopic spectral sensitivity of the cat. **382**, 537, 1987
Functional mapping of stimulus colour in a human subject suffering a central visual defect. **388**, 44*P*, 1987

Colour vision (*cont.*)
Human occipital potentials evoked by achromatic or chromatic checkerboards and gratings. **388**, 45*P*, 1987
Spectral sensitivity of cones of the monkey *Macaca fascicularis*. **390**, 145, 1987
Induced colours in normal and dichoptic stimulation in man. **390**, 29*P*, 1987
Thresholds to chromatic spots of cells in the macaque geniculate nucleus as compared to detection sensitivity in man. **392**, 193, 1987
Complement
Tubings for extracorporeal circulation activate human complement *in vitro*. **390**, 178*P*, 1987
Computer, *see also* Microcomputer
Use of a small computer for on-line measurement of regional cerebral blood flow in the rat. **360**, 2*P*, 1985
A method for measuring facial asymmetry. **364**, 20*P*, 1985
An interactive computer model for simulation and analysis of stochastic behaviour of ionic channels. **366**, 9*P*, 1985
Use of the BBC microcomputer as a digital storage oscilloscope. **367**, 11*P*, 1985
A dual-channel system for recording spike trains onto magnetic disks using the BBC microcomputer. **369**, 13*P*, 1985
Linking an averager unit to a BBC microcomputer. **369**, 15*P*, 1985
A communication system for the disabled using the electro-oculogram and the BBC microcomputer. **371**, 21*P*, 1986
Independent binocular displays on a microcomputer screen. **371**, 23*P*, 1986
Rotatable, three-dimensional computer reconstruction of the macaque monkey brain. **371**, 25*P*, 1986
Two versatile laboratory interfaces for multichannel data acquisition and analysis, using the BBC microcomputer. **372**, 3*P*, 1986
3-Dimensional reconstruction of serial brain sections containing labelled cells. **376**, 5*P*, 1986
On-line measurement of action potentials. **376**, 10*P*, 1986
Computer-assisted teaching of physiology at Sheffield University using the Acorn Econet System. **378**, 6*P*, 1986
The use of the author language Microtext in teaching physiology and medicine. **378**, 7*P*, 1986
Computer-aided design software suitable for physiology teaching and research. **380**, 20*P*, 1986
Computer interface for a pulsed-wavelength spectrophotometer suitable for use with fluorescent indicators. **382**, 15*P*, 1987
A data acquisition and analysis package for empirical waveforms. **386**, 2*P*, 1987
Computer analysis of electromechanical signals recorded from the epicardium of the anaesthetized pig. **387**, 12*P*, 1987
Measurement of simple-reaction time and choice-reaction time using a BBC computer. **394**, 5*P*, 1987
Three-dimensional reconstruction of rat cortical neurones using image-processing techniques. **394**, 10*P*, 1987
Computer simulation
Simulation of single ion-channel activity on the BBC-microcomputer. **367**, 12*P*, 1985
Effects of changes in excitability and intercellular coupling on synchronization in the rabbit sino-atrial node. **370**, 127, 1986
Computing
Colour topographic display of human visual evoked potentials. **360**, 4*P*, 1985
D.A.M.N.: A data analysis monitor for neurophysiology. **364**, 2*P*, 1985
Use of microcomputers in undergraduate laboratory classes. **364**, 5*P*, 1985
A low-cost system for on-line pulse generation, patch-clamp current sampling and analysis. **371**, 13*P*, 1986
The application of partial coherence to the analysis of the association between spike trains. **392**, 9*P*, 1987
Conduction block
The effects of menthol on peripheral nerve conduction in the rat. **364**, 22*P*, 1985
Selective degeneration of optic nerve fibres in the cat produced by a pressure block. **376**, 461, 1986
Conduction block silences parts of a chemical synapse in the leech central nervous system. **387**, 649, 1987
Conduction velocity
Conduction velocity is related to morphological cell type in rat dorsal root ganglion neurones. **359**, 31, 1985
Electrical properties of rat dorsal root ganglion neurones with different peripheral nerve conduction velocities. **359**, 47, 1985
Electrical constants of arterially perfused rabbit papillary muscle. **385**, 307, 1987
The conduction velocity in the mouse skeletal muscle studied at a range of temperatures and with different developmental ages. **390**, 226*P*, 1987
Cone, *see* Retinal cone
Connectivity
Structural and topographical influences on functional connectivity in spinal monosynaptic reflex arcs in the cat. **358**, 483, 1985
Contractility
In vivo evaluation in anaesthetized dogs, of a simple systolic time interval, the QA-interval, to assess changes in cardiac contractility. **358**, 126*P*, 1985
The influence of 'diastolic' length on the contractility of isolated cat papillary muscle. **361**, 269, 1985
Electromechanical effects of okadiac acid isolated from black sponge in guinea-pig ventricular muscles. **378**, 359, 1986
The influence of rapid changes in diastolic filling on the contractility of the left ventricle in the conscious dog. **390**, 113*P*, 1987
Stable maintenance heat rate and contractile properties of different single muscle fibres from *Xenopus laevis* at 20 °C. **393**, 399, 1987

Contraction
Effects of rapid cooling on mechanical and electrical responses in ventricular muscle of guinea-pig. **361**, 361, 1985
Adaptation of mechanical properties of muscle to high force training in man. **365**, 277, 1985
Sodium/calcium exchange and intracellular calcium buffering in ferret myocardium: an ion-sensitive micro-electrode study. **373**, 163, 1986
Has IMP a regulatory role during fatiguing contraction? IMP-binding sites on the myosin complex of rat muscle. **381**, 85*P*, 1986
Contractile effects of perivascularly applied vasopressin on the pial artery of the cat brain. **387**, 441, 1987
The contribution of intracellular acidosis to the decline of developed pressure in ferret hearts exposed to cyanide. **391**, 99, 1987
A prolonged contraction at the end-plate region of the diaphragm of rats and mice after anticholinesterases *in vitro*. **391**, 429, 1987
The effects of cyanide on membrane potential, contraction and intracellular pH in isolated rat myocytes. **394**, 136*P*, 1987

Contrast sensitivity
The contrast sensitivity of human colour vision to red–green and blue–yellow chromatic gratings. **359**, 381, 1985

Copper
Copper activates a unique inward current in molluscan neurones. **394**, 429, 1987

Cornea
A difference between net bicarbonate flux and short circuit current across rabbit corneal endothelium. **369**, 111*P*, 1985
A method for the collection of human corneal-derived lactate *in vivo*. **371**, 166*P*, 1986
Paracellular ionic and transcellular water diffusions across rabbit corneal endothelium. **385**, 89, 1987
The apparent reflexion coefficient of the leaky corneal endothelium to sodium chloride is about one in the rabbit. **385**, 97, 1987
A source of error in measuring membrane potentials in small cells from the ox corneal epithelium. **390**, 47*P*, 1987

Coronary artery
A phorbol ester has dual actions on the mechanical response in the rabbit mesenteric and porcine coronary arteries. **375**, 515, 1986
Effect of lignocaine on responses of isolated bovine coronary artery to acetylcholine, noradrenaline and 5-hydroxytryptamine. **378**, 92*P*, 1986

Coronary blood flow
A versatile perfusion system for coronary artery perfusion in dog and goat. **366**, 10*P*, 1985
Re-examination of the Gregg effect in the dog and goat. **380**, 36*P*, 1986

Coronary circulation
Cholinergic mechanisms in human coronary artery preparations: implications of species differences. **358**, 509, 1985
Critical test of two predictive hypotheses (oxygen- and adenosine-based) for coronary vascular control in the goat and dog. **366**, 44*P*, 1985
Gradients in epicardial shortening and transmural blood flow from ischaemic towards normal left ventricular myocardium in the dog. **366**, 50*P*, 1985
Underperfusion across the left ventricular wall in relation to the duration of ischaemia and the level of post-stenotic pressure in dogs. **366**, 113*P*, 1985
Lognormal distribution of capillary domains in the rat myocardium. **366**, 114*P*, 1985
Stimulation of pulmonary C fibres decreases coronary arterial resistance in dogs. **371**, 277, 1986
Effects of alpha$_1$ adrenoceptor blockade on the coronary haemodynamic responses to atrial pacing in patients with coronary artery disease. **374**, 31*P*, 1986

Corpus callosum
The role of the corpus callosum in recovery of function following unilateral anteromedial cortex damage in rat. **367**, 37*P*, 1985
The transfer of visual information across the corpus callosum: spatial and temporal properties in the cat. **384**, 619, 1987
Interhemispheric transfer of visual information in humans: spatial characteristics. **384**, 633, 1987

Correlation technique, *see also* Cross-correlation
Comparative analysis of measures of association between spike trains. **377**, 14*P*, 1986

Cortical evoked potential
Local CNVs for different phases of a cognitive task in man. **367**, 24*P*, 1985
Cortical potential shifts preceding voluntary self-paced finger extension in young, old and Parkinsonian subjects. **367**, 40*P*, 1985
Cortical evoked responses during changes in electrocortical activity in the rat. **371**, 45*P*, 1986

Cortical neurone
Responses of precentral cells during cooling of postcentral cortex in conscious monkeys. **368**, 611, 1985
Baclofen reduces post-synaptic potentials of rat cortical neurones by an action other than its hyperpolarizing action. **384**, 539, 1987
Glutamate-receptor-mediated e.p.s.p.s in layer V neurones in rat neocortical slices. **394**, 117*P*, 1987

Cortical stimulation
Proprioceptive facilitation of muscular responses elicited by cortical stimulation in man. **382**, 73*P*, 1987
Responses in small hand muscles from magnetic stimulation of the human brain. **388**, 397, 1987
Temporary interruption of brain processing by an electrical or magnetic cortical shock in man. **390**, 197*P*, 1987

Corticosteroid
Characteristics of [^{3}H] corticosterone binding to rat anterior pituitary and hippocampal cytosols. **372**, 61*P*, 1986

Corticotrophin
Inhibitory influence of corticotrophin releasing factor on sexual behaviour in the male rat. **381**, 79*P*, 1986

Corticotrophin-releasing homone
Corticotrophin-releasing hormone (CRH) and arginine vasopressin (AVP) in hypophysial portal vessel blood. **382**, 42*P*, 1987
Co-transmitter
Non-cholinergic component of rat splanchnic nerves predominates at low neuronal activity and is eliminated by naloxone. **383**, 639, 1987
Co-transport
Influence of loop diuretics and anions on passive potassium influx into human red cells. **369**, 61, 1985
Phosphate transport in brush-border membranes from control and rachitic pig kidney and small intestine. **384**, 479, 1987
Characteristics of transmural potential changes associated with the proton–peptide co-transport in toad small intestine. **394**, 481, 1987
Crayfish
Ionic permeabilities of the gill lamina cuticle of the crayfish, *Astacus leptodactylus* (E). **363**, 377, 1985
Comparative ultrastructure of identified electrical synapses in the crayfish. **367**, 87*P*, 1985
Voltage-clamp analysis of a crayfish rectifying synapse. **386**, 91, 1987
Creatine phosphate
The effects of inorganic phosphate and creatine phosphate on force production in skinned muscles from rat ventricle. **370**, 585, 1986
Cross-bridge
Lateral filamentary spacing in chemically skinned murine muscles during contraction. **360**, 135, 1985
Movements of cross-bridges during and after slow length changes in active frog skeletal muscle. **361**, 151, 1985
The initial burst of impulses in responses of toad muscle spindles during stretch. **368**, 1, 1985
Short-range elasticity and resting tension of relaxed human lower leg muscles. **391**, 451, 1987
Transient tension changes initiated by laser temperature jumps in rabbit psoas muscle fibres. **392**, 71, 1987
Cross-correlation
The detection of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 33, 1985
The distribution of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 63, 1985
Quantitative assessment of the degree of synchrony between the discharges of neurones. **390**, 10*P*, 1987
Cross-innervation
Electromyographic activity in the cross-reinnervated soleus muscle of unrestrained cats. **365**, 13, 1985
Crustacea
Enzyme activities in single electrophysiologically identified crab muscle fibres. **371**, 191, 1986
A functional analysis of pulmonary, cutaneous and branchial gas exchange in the Trinidad mountain crab: a comparison with other land crabs. **373**, 46*P*, 1986
The pulmonary, cutaneous and branchial gas exchange organs of the Trinidad mountain crab. **373**, 84*P*, 1986
Respiratory responses of the lobster (*Homarus gammarus*) to prolonged periods of aerial exposure during commercial shipment. **394**, 162*P*, 1987
Culture
Proliferation of human and rat gastrointestinal epithelial cells *in vitro*. **378**, 99*P*, 1986
Culture of smooth muscle cells from human aortic biopsies. **387**, 20*P*, 1987
Cultured epithelium
Electrogenic anion secretion in cultured rat epididymal epithelium. **378**, 335, 1986
Cultured neurone
Effects of thyroid hormone on calcium handling in cultured chick ventricular cells. **364**, 131, 1985
An extracellular matrix factor mediates rapid outgrowth of identified leech neurones in culture. **381**, 55*P*, 1986
The action of excitatory amino acids on chick spinal cord neurones in culture. **386**, 425, 1987
Curare
Heart rate at the onset of static exercise in man with partial neuromuscular blockade. **368**, 481, 1985
The dependence on external cation of sodium and potassium fluxes across the human red cell membrane at low temperatures. **375**, 403, 1986
Presynaptic actions of curare and atropine on quantal acetylcholine release at a central synapse of *Aplysia*. **388**, 665, 1987
Cardiovascular, ventilatory and catecholamine responses to maximal dynamic exercise in partially curarized man. **389**, 557, 1987
Cutaneous afferent nerve
Cutaneous electrical stimulation and reductions in spinal spasticity in man. **367**, 86*P*, 1985
Cutaneous afferent nerve fibre
Long-term block of afferent C-fibres following capsaicin treatment in the rat. **362**, 19*P*, 1985
Actions on γ-motoneurones elicited by electrical stimulation of cutaneous afferent fibres in the hind limb of the cat. **366**, 343, 1985
Reflex responses in human forearm finger flexor and extensor muscles produced by digital nerve stimulation. **369**, 31*P*, 1985
The terminal arborization patterns of cutaneous low threshold mechanoreceptive afferents innervating the rat hind limb **377**, 48*P*, 1986
Climbing fibres projecting to cat cerebellar anterior lobe activated by cutaneous A and C fibres. **386**, 529, 1987
Cutaneous mechanoreceptor
Ultrastructure of Merkel cells and adjoining nerve terminals in touch corpuscles of vitamin-A-deficient rats. **362**, 28*P*, 1985
Mechanical properties of skin and responsiveness of slowly adapting type I mechanoreceptors in rats at different ages. **371**, 329, 1986
Responsiveness and ultrastructure of slowly adapting type I cutaneous mechanoreceptors in vitamin A deficient rats. **371**, 339, 1986

Cutaneous mechanoreceptor (*cont.*)
Ultrastructure of s.a.I receptors in the skin of the cat following close arterial infusion of neomycin. **377**, 4*P*, 1986

Cutaneous receptor
Cutaneous primary afferent properties in the hind limb of the neonatal rat. **383**, 79, 1987

Cutaneous reflex
Task-dependent changes in the cutaneomuscular reflex response in human first dorsal interosseous muscle. **381**, 47*P*, 1986

Cyanide
The decrease of pressure produced by cyanide in isolated ferret hearts is *not* due to intracellular acidosis. **382**, 111*P*, 1987

Cyclic adenosine monophosphate (cyclic AMP)
The role of cyclic nucleotides in modulation of the membrane potential of the Schwann cell of squid giant nerve fibre. **363**, 151, 1985
Regional differences in responsiveness to octopamine within a locust skeletal muscle. **366**, 331, 1985
Serum and culture density related alterations in the levels of 3′,5′-cAMP, rotenone-insensitive NADH ferricyanide reductase and monoamine oxidase in mouse fibroblasts grown in culture. **367**, 94*P*, 1985
Phorbol ester augmentation of luteinizing hormone-releasing hormone (LHRH)-induced secretion. **371**, 275*P*, 1986
Cyclic adenosine 3′,5′-monophosphate mediates β-receptor actions of noradrenaline in rat hippocampal pyramidal cells. **372**, 245, 1986
Cyclic adenosine monophosphate, calcium, acetylcholine and the current induced by adenosine in the *Xenopus* oocyte. **374**, 551, 1986
Mechanism of action of acetylcholine on calcium current in single cells from frog ventricle. **376**, 183, 1986
Effects of forskolin on electrical behaviour of myenteric neurones in guinea-pig small intestine. **376**, 439, 1986
Elevation of adenosine 3′,5′-phosphate mimics slow synaptic excitation in myenteric neurones of the guinea-pig. **376**, 451, 1986
Synaptic correlates of a Na-dependent current induced by a cyclic nucleotide (cyclic AMP) in *Aplysia* neurones. **377**, 34*P*, 1986
Cyclic adenosine monophosphate differently affects the response of mouse pancreatic β-cells to various amino acids. **381**, 77, 1986
Purinergic inhibition in the small intestinal myenteric plexus of the guinea-pig. **387**, 357, 1987
Cyclic guanosine 3′,5′-monophosphate regulates the calcium current in single cells from frog ventricle. **387**, 453, 1987
Micro-electrode studies on the effects of exogenous cyclic adenosine monophosphate on active sodium transport in frog skin. **388**, 547, 1987
Cyclic AMP activates apical Cl conductance in *Necturus* enterocytes *in vitro*. **391**, 28*P*, 1987
Calcium dependence of voltage sensitivity in adenosine 3′,5′-cyclic phosphate-stimulated sodium current in *Pleurobranchaea*. **393**, 233, 1987

Cyclic guanosine monophosphate (cyclic GMP)
Atrial natriuretic factor stimulates cGMP production in rabbit ventricular myocytes. **367**, 101*P*, 1985
Cyclic guanosine 3′,5′-monophosphate regulates the calcium current in single cells from frog ventricle. **387**, 453, 1987
Precise measurement of cyclic GMP-activated currents in membrane 'patches' from salamander rod outer segments. **394**, 8*P*, 1987

Cyclic nucleotide
Mechanism of action of insulin on acetylcholine-evoked amylase secretion in the mouse pancreas. **358**, 469, 1985
cAMP reduces Ca^{2+} affinity of platelet secretory mechanism. **369**, 114*P*, 1985

Dantrolene sodium
The effects of dantrolene sodium on reflex activity in the decerebrate cat. **373**, 76*P*, 1986

Data analysis
A set of 'BASIC' programs for the on-line analysis of neuronal spike-firing data. **364**, 7*P*, 1985
On-line acquisition, analysis, display and storage of analogue or digital electrophysiological data with the BBC microcomputer. **371**, 14*P*, 1986

Deactivation
A velocity-dependent shortening depression in the development of the force–velocity relation in frog muscle fibres. **380**, 227, 1986

Decamethonium
Heart rate at the onset of static exercise in man with partial neuromuscular blockade. **368**, 481, 1985

Decompression
The effect of elevated inspired carbon dioxide concentration on some decompression parameters in man. **362**, 9*P*, 1985

Defecation
Three serial neurones in the innervation of the colon by the sacral parasympathetic nerve of the dog. **362**, 69, 1985

Defence reaction
Neurotransmitters and the defence reaction: a preliminary study of the mid-brain periaqueductal grey matter in the rat. **373**, 25*P*, 1986
Blood pressure and heart-rate responses to long-term stimulation of the hypothalamic defence area in the rat. **373**, 85*P*, 1986
A search for brain stem cell groups integrating the defence reaction in the rat. **378**, 213, 1986
Are the defence areas involved in the response to systemic hypoxia in the rat? **386**, 69*P*, 1987

Dehydration
Effects of dehydration and heat stress on brain and body temperature in the camel. **388**, 28*P*, 1987

Demyelination
An increase in axoplasmic flow precedes demyelination of optic nerve fibres in mice infected with Semliki Forest Virus. **360**, 17*P*, 1985
Semliki Forest Virus induced demyelination in mice: some pathological observations and a growth study. **362**, 44*P*, 1985

Demyelination (*cont.*)
Activity-dependent excitability changes in normal and demyelinated rat spinal root axons. **365**, 239, 1985
Fast axonal transport in the optic nerves of conventional and *nu/nu* (athymic) mice infected with Semliki Forest Virus. **372**, 58*P*, 1986
Properties of potassium and sodium channels in frog internode. **381**, 119, 1986
Sodium and potassium currents in acutely demyelinated internodes of rabbit sciatic nerves. **391**, 631, 1987
The distribution of sodium and potassium channels in single demyelinated axons of the frog. **392**, 587, 1987

Dendrite
Distal and proximal dendritic synapses elicit action potentials at different thresholds in CA1 pyramidal cells in the rat hippocampus *in vitro*. **365**, 46*P*, 1985
A program to aid the investigation of the branching properties of dendrites. **369**, 5*P*, 1985
Measurement of the surface area and volume of the dendrites from a 3-dimensional reconstruction of a neurone. **382**, 9*P*, 1987
Dendritic activities of spinal motoneurones in pigs and rabbits enhanced through chronic stimulation of a dorsal root. **383**, 171, 1987
Thresholds of action potentials evoked by synapses on the dendrites of pyramidal cells in the rat hippocampus *in vitro*. **383**, 509, 1987
Mapping calcium transients in the dendrites of Purkinje cells from the guinea-pig cerebellum *in vitro*. **389**, 319, 1987

Denervation
Excitation–contraction coupling and charge movement in denervated rat extensor digitorum longus and soleus muscles. **358**, 75, 1985
Lack of nicotinic supersensitivity in frog sympathetic neurones following denervation. **363**, 211, 1985
Intracellular sodium and potassium activities in normal denervated rat skeletal muscles. **371**, 148*P*, 1986
Effects of vagal deafferentation on oesophageal motility and transit in the sheep. **372**, 425, 1986
Effect of denervation on a steady electric current generated at the end-plate region of rat skeletal muscle. **373**, 97, 1986
Effects of partial denervation of rat soleus muscles on the size of its motor units. **373**, 14*P*, 1986
Induction of action potentials by denervation of tonic fibres in rat extraocular muscles. **374**, 165, 1986
Acetylcholine receptors and sodium channels in denervated and botulinum-toxin-treated adult rat muscle. **382**, 69, 1987
External calcium and contraction in denervated rat twitch muscles. **382**, 195*P*, 1987
Response of fast- and slow twitch-muscles to two methods of denervation in rat. **391**, 57*P*, 1987
Role of sodium and potassium permeabilities in the depolarization of denervated rat muscle fibres. **392**, 301, 1987
The role of frequency in the effects of long-term intermittent stimulation of denervated slow-twitch muscle in the rat. **392**, 377, 1987
Clonidine induces differential changes in innervated and denervated limbs of humans with unilateral brachial plexus injury. **394**, 76*P*, 1987

Dentine
An electrophysiological and morphological study of the innervation and reinnervation of cat dentine. **386**, 31, 1987

Depolarization
Calcium uptake of rat brain synaptosomes as a function of membrane potential under different depolarizing conditions. **372**, 363, 1986
Asymmetric charge movement in polarized and depolarized muscle fibres of the rabbit. **383**, 349, 1987

Depolarizing potential
Non-synaptic depolarizing potentials in rat supraoptic neurones recorded *in vitro*. **376**, 493, 1986

Desensitization
Two distinct kinetic phases of desensitization of acetylcholine receptors of clonal rat PC12 cells. **389**, 45, 1987
Multiple actions of substance P that regulate the functional properties of acetylcholine receptors of clonal rat PC12 cells. **389**, 69, 1987
Acceleration of desensitization by agonist pretreatment in the snake. **391**, 109, 1987

Development, *see also* Differentiation, Muscle development, Nerve development, Visual development
Development of the cerebral cortical plate in the tammar wallaby (*Macropus eugenii*) is entirely post-natal. **358**, 41*P*, 1985
The structure of the terminal arborizations of physiologically identified retinal ganglion cell Y axons in the kitten. **359**, 293, 1985
Changes in brain phosphorus metabolites during the post-natal development of the rat. **359**, 417, 1985
Post-natal development of pyramidal tract neurones in kittens. **363**, 481, 1985
The post-natal development of cutaneous afferent fibre input and receptive field organization in the rat dorsal horn. **364**, 1, 1985
The effects of denervation on post-natal changes in the isotonic shortening velocity of rat fast and slow-twitch muscles. **364**, 40*P*, 1985
Responses of muscle receptors in the kitten. **366**, 27, 1985
Optical studies of excitation–contraction coupling in the early embryonic chick heart. **366**, 89, 1985
Voltage-dependent potassium currents in developing neurones from quail mesencephalic neural crest. **366**, 129, 1985
Noradrenaline and functional plasticity in kitten visual cortex: a re-examination. **367**, 73, 1985
The effect of altered peripheral field on motoneurone function in developing rat soleus muscles. **368**, 513, 1985
Development of the monosynaptic stretch reflex in the rat: an *in vitro* study. **369**, 127, 1985

Development (*cont.*)
Differentiation of voltage-gated potassium current and modulation of excitability in cultured amphibian spinal neurones. **375**, 229, 1986
Topographical projections of segmental nerves to the frog glutaeus muscle during loss of polyneuronal innervation. **375**, 303, 1986
Activation patterns of embryonic chick hind-limb muscles following blockade of activity and motoneurone cell death. **380**, 157, 1986
A retino-retinal projection cannot account for high optic axon numbers during development in the marsupial *Setonix brachyurus*, quokka. **381**, 61*P*, 1986
Differentiation of isolated mouse skeletal muscle fibres cultured on a laminin substratum. **382**, 162*P*, 1987
Postnatal elimination of dopaminergic innervation on feline retinal ganglion cells? **382**, 174*P*, 1987
Cutaneous primary afferent properties in the hind limb of the neonatal rat. **383**, 79, 1987
The organization and post-natal development of area 18 of the cat's visual cortex. **384**, 263, 1987
Effects of dark-rearing on the development of area 18 of the cat's visual cortex. **384**, 293, 1987
Development of postural and locomotor EMG pattern in rat hind-limb muscles is not affected by neonatal 6-OHDA treatment. **384**, 36*P*, 1987
Development of ionic channels and cell-surface antigens in the cleavage-arrested one-cell embryo of an ascidian. **386**, 113, 1987
Motor units in a skeletal muscle of neonatal rat: mechanical properties and weak neuromuscular transmission. **386**, 355, 1987
The non-selective innervation of muscle fibres and mixed composition of motor units in a muscle of neonatal rat. **386**, 377, 1987
Rat muscle during post-natal development: evidence in favour of no interconversion between fast- and slow-twitch fibres. **386**, 395, 1987
Control of end-plate channel properties by neurotrophic effects and by muscle activity in rat. **388**, 367, 1987
Two types of acetylcholine receptor channels in developing *Xenopus* muscle cells in culture: further kinetic analyses. **389**, 271, 1987
Morphological and physiological studies of development of the monosynaptic reflex pathway in the rat lumbar spinal cord. **389**, 441, 1987
Activation patterns of embryonic chick lumbrosacral motoneurones following large spinal cord reversals. **389**, 491, 1987
Rat jejunal disaccharidase activity increases biphasically during early post-natal development. **391**, 487, 1987
Susceptibility of the developing rat gustatory system to the physiological effects of dietary sodium deprivation. **393**, 413, 1987
Changes in sodium, calcium and potassium currents during early embryonic development of the ascidian *Boltenia villosa*. **393**, 619, 1987
Post-natal development of electrophysiological properties of rat cerebral cortical pyramidal neurones. **393**, 743, 1987

Diabetes mellitus
Fluid and electrolyte status in Wistar rats following I.P. injection of streptozotocin. **364**, 74*P*, 1985
Streptozotocin-induced diabetes in Sprague–Dawley rats during pregnancy. **373**, 32*P*, 1986
Insulin reversal of the abnormal recovery of blood pressure following acute hypotension in rats made diabetic with streptozotocin. **376**, 35*P*, 1986
The relation between non-enzymatic glycosylation of proteins and conduction velocity in rats with diabetes mellitus following streptozotocin (STZ) treatment. **377**, 72*P*, 1986
Streptozotocin-induced diabetes increases opiate receptor density in the rat small intestine. **378**, 98*P*, 1986
Adrenergic, cholinergic and peptidergic stimulation of parotid secretion in streptozotocin-diabetic rats. **381**, 34*P*, 1986
Decrease in lymphocytes in the blood of diabetic rats. **381**, 81*P*, 1986
Effects of polyol accumulation on water content in nerves of experimentally diabetic or galactose-fed rats. **382**, 35*P*, 1987
Pressor sensitivities to vasopressin and angiotensin II in rats with streptozocin-induced diabetes mellitus. **382**, 113*P*, 1987
Alterations in the concentration of potassium in pyknotic thymocytes of diabetic rats. **387**, 40*P*, 1987
Effects of experimental diabetes on contractile properties of skeletal muscles of the rat and the effect of treatment with the aldose reductase inhibitor Statil (ICI 128436). **387**, 43*P*, 1987
Effects of experimental diabetes on conduction velocity in branches of the rat sciatic nerve and the effects of treatment with the aldose reductase inhibitor Statil (ICI 128436). **387**, 86*P*, 1987
Effects of insulin and aldose reductase inhibitor treatment on contractile properties of rat skeletal muscles with long-term experimental diabetes. **391**, 83*P*, 1987
Effects of experimental diabetes on contractile properties of skeletal muscles of the mouse. **392**, 99*P*, 1987

Diaphragm
Activation of the human diaphragm during maximal static efforts. **367**, 45, 1985
Post-inspiratory diaphragm activity in rabbits after block of slowly adapting stretch receptors in all thoracic airways or in bronchi alone. **369**, 190*P*, 1985
Activation of the human diaphragm from the motor cortex. **384**, 109, 1987
Role of medullary inspiratory neurones in the control of the diaphragm during oesophageal stimulation in cats. **391**, 289, 1987

Diet
Effects of dietary manipulation on acid-base status and the performance of maximal exercise in man. **373**, 45*P*, 1986

Differentiation, *see also* Development
The reduction of calcium current associated with early differentiation of the murine embryo. **363**, 71, 1985

Differentiation (*cont.*)
Selective effects of Epidermal Growth Factor on enterocyte differentiation in neonatal piglet intestine. **387**, 41*P*, 1987
The leech as a preparation for studying the lineage and differentiation of nerve cells during embryogenesis. **392**, 5*P*, 1987
Diffusion
Passive ion diffusion across ox corneal endothelium through the paracellular route. **371**, 165*P*, 1986
August Krogh and *K* for crab chitin. **378**, 74*P*, 1986
Dihydropyridine
Dual effects of dihydropyridines on whole cell and unitary calcium currents in single ventricular cells of guinea-pig. **379**, 495, 1986
Calcium currents, charge movement and dihydropyridine binding in fast- and slow-twitch muscles of rat and rabbit. **393**, 595, 1987
Dinitrophenol
Dinitrophenol effect on proximal tubular acidification in the rat. **368**, 89, 1985
Diphenylhydantoin
Effects of stimulation and diphenylhydantoin on the intracellular sodium activity in Purkinje fibres of sheep heart. **362**, 331, 1985
Dissociated cell
Outward currents of single hippocampal cells obtained from the adult guinea-pig. **393**, 331, 1987
Distension activation
Myogenic adaptation of rabbit ear arteries to pulsatile internal pressures. **391**, 313, 1987
Diuresis
Signals from the oropharynx may contribute to the diuresis which occurs in man to drinking isotonic fluids. **363**, 21, 1985
Interaction of blood volume expansion and atrial peptide in producing diuresis and natriuresis in the rat. **371**, 248*P*, 1986
A class experiment on 'water diuresis' in man after ingestion of isotonic saline. **382**, 147*P*, 1987
A comparison of the diuresis in man to drinking Tyrode and a bowel lavage solution. **390**, 205*P*, 1987
Recumbency induces diuresis in human subjects with autonomic failure and tetraplegia. **390**, 206*P*, 1987
Diuretic
An investigation of [^{3}H]bumetanide uptake in intact cultured renal epithelial cells of canine origin (MDCK). **367**, 72*P*, 1985
Divalent cation
Influence of divalent cations on the phospholipase-independent action of β-bungarotoxin at frog neuromuscular junctions. **363**, 169, 1985
Kinetic properties and selectivity of calcium-permeable single channels in *Aplysia* neurones. **367**, 457, 1985
Activation of the contractile apparatus of skinned fibres of frog by the divalent cations barium, cadmium and nickel. **380**, 75, 1986
Effect of calcium and other divalent cations on intracellular pH regulation of frog skeletal muscle. **381**, 221, 1986
Diving
Depression of ventilation in man by face immersion. **358**, 96*P*, 1985
Ventilatory response to carbon dioxide following simulated saturation diving in man. **362**, 10*P*, 1985
Ventilatory drive during face immersion in man. **370**, 13, 1986
Variability of the heart rate response during voluntary diving in the tufted duck, *Aythya fuligula*. **371**, 69*P*, 1986
Psychogenic influences on the cardiac response of the duck (*Anas platyrhynchos*) to forced submersion. **371**, 71*P*, 1986
The diving response in man: effects on sympathetic activity in muscle and skin nerve fascicles. **377**, 429, 1986
Dogfish
Vagal preganglionic efferent innervation of the gut in the lesser spotted dogfish, *Scyliorhinus canicula* L.: a neuroanatomical study. **394**, 99*P*, 1987
Dopamine
The delayed effect of stress on Dopamine synthesis in rat frontal cortex. **358**, 47*P*, 1985
The parafascicular thalamus and rat forebrain dopamine utilization. **358**, 48*P*, 1985
Dopaminergic modulation of neuromuscular transmission in the prawn. **363**, 363, 1985
A selective antinociceptive effect of the diencephalic dopamine-containing cell group, A11, on dorsal horn neurones in the rat. **364**, 47*P*, 1985
Selective modulation of cerebral cortical dopamine utilization by the mediodorsal nucleus of the rat thalamus. **364**, 62*P*, 1985
Ethanol administration stimulates both the spontaneous and the K^+-induced release of endogenous dopamine from rat striatum *in vitro*. **364**, 63*P*, 1985
Circadian changes in rat motor activity and forebrain dopamine release: effect of light reversal. **364**, 64*P*, 1985
Electrically evoked dopamine (DA) release from the neuro-intermediate lobe (NIL) of the rat hypophysis is increased after dehydration. **365**, 48*P*, 1985
The effects of drugs on Dopamine synthesis in rat striatal synaptosomes. **369**, 168*P*, 1985
The hypothalamo-hypophyseal rat explant *in vitro*: endocrinological studies of the pars intermedia dopaminergic neural input. **370**, 381, 1986
Perfused pre-nodal lymphatic vessels in the canine forelimb constrict in response to dopamine. **371**, 83*P*, 1986
Electrically evoked release of 5-hydroxytryptamine (5-HT) from the neurointermediate lobe (NIL) of the isolated rat hypophysis is inhibited by concomitant dopamine (DA) release. **371**, 186*P*, 1986
Iontophoretically applied dopamine actions at the retinal ganglion cells reflect the spatial distribution of the rods in the cat retina. **372**, 59*P*, 1986

Dopamine (*cont.*)
Dopamine-induced vasodilatation in the human forearm is not mediated by β-adrenoceptors. **374**, 27*P*, 1986
Dopamine, noradrenaline and isoprenaline: secretory and electrophysiological effects *in vitro* on mouse pancreas. **376**, 359, 1986
Effects of apomorphine and haloperidol in fetal lambs. **377**, 37, 1986
Effects of high potassium on the release of [^{3}H]dopamine from the cat carotid body *in vitro*. **379**, 293, 1986
CCK stimulates dopamine synthesis in rat striatum by a cAMP-dependent mechanism. **381**, 50*P*, 1986
Dopamine hyperpolarizes neurones in the rat substantia nigra zona compacta *in vitro* by increasing potassium conductance. **381**, 51*P*, 1986
Modification of retinal dopamine receptor binding by lesions of the tecto-retinal pathway in the rat. **381**, 52*P*, 1986
Catecholamines release mediators in the opossum oesophageal circular smooth muscle. **382**, 489, 1987
Inhibition by sulpiride of dopamine-induced pulmonary vasodilatation in the ferret. **382**, 56*P*, 1987
An *in vivo* technique for studying D2 dopamine receptors in humans. **384**, 14*P*, 1987
Effects of dopamine on prefrontal cortical neurones in the rat: an electrophysiological study *in vitro*. **390**, 195*P*, 1987
Dopamine acts on D_2 receptors to increase potassium conductance in neurones of the rat substantia nigra zona compacta. **392**, 397, 1987
In vivo release of dopamine during perfusion of *N*-methyl-4-phenylpyridine (MPP^+) in the striatum of the rat: mediation via the dopamine uptake system. **394**, 120*P*, 1987
Mechanism of action of *N*-methyl-4-phenylpyridine (MPP^+) on the *in vivo* release of dopamine in the striatum of the rat: dependence on sodium but not calcium ions. **394**, 154*P*, 1987

Dopamine receptor
A dopaminergic receptor modulates catecholamine release from the cat adrenal gland. **362**, 359, 1985

Doppler ultrasound
The time course and magnitude of blood flow changes in the human quadriceps muscles following isometric contraction. **377**, 445, 1986

Dorsal column
The effects of spinal dorsal column stimulation on cells of the anterior pretectal nucleus in the rat. **390**, 40*P*, 1987

Dorsal column nucleus
Temporal patterning in the responses of gracile and cuneate neurones in the cat to cutaneous vibration. **386**, 277, 1987
Actions of single sensory fibres on cat dorsal column nuclei neurones: vibratory signalling in a one-to-one linkage. **386**, 293, 1987
Integrative processing of vibratory information in cat dorsal column nuclei neurones driven by identified sensory fibres. **386**, 311, 1987

Dorsal horn
The post-natal development of cutaneous afferent fibre input and receptive field organization in the rat dorsal horn. **364**, 1, 1985
Peripheral and central inputs to dorsal-horn neurones in the rat. **364**, 3*P*, 1985
C-fibre excitation and tonic descending inhibition of dorsal horn neurones in adult rats treated at birth with capsaicin. **365**, 223, 1985
Effects of tachykinins on sensory processing in the superficial dorsal horn of the cat. **382**, 67*P*, 1987
Somatic and visceral inputs to the thoracic spinal cord of the cat: marginal zone (lamina I) of the dorsal horn. **388**, 383, 1987
Slow depolarizing potentials recorded from glial cells in the rat superficial dorsal horn. **388**, 597, 1987
Heterotopic activation of Aδ and C fibres triggers inhibition of trigeminal and spinal convergent neurones in the rat. **389**, 301, 1987

Dorsal root
Kainate sensitivity of C fibres in rat dorsal roots. **358**, 42*P*, 1985
Afferent fibres in cat ventral roots: electrophysiological and histological evidence. **379**, 229, 1986

Dorsal root ganglion
Conduction velocity is related to morphological cell type in rat dorsal root ganglion neurones. **359**, 31, 1985
Electrical properties of rat dorsal root ganglion neurones with different peripheral nerve conduction velocities. **359**, 47, 1985
Intracellular recordings from rat primary afferent neurones with known peripheral and central conduction velocities *in vitro*. **364**, 13*P*, 1985
The antibody RT97 distinguishes between sensory cell bodies with myelinated and unmyelinated peripheral processes in the rat. **371**, 59*P*, 1986
Calcium-dependent currents in cultured rat dorsal root ganglion neurones are inhibited by an adenosine analogue. **373**, 47, 1986
Postnatal changes in active membrane properties of rat dorsal root ganglion neurones. **377**, 80*P*, 1986
Noradrenaline modulates calcium channels in avian dorsal root ganglion cells through tight receptor–channel coupling. **379**, 131, 1986
Proton-induced transformation of calcium channel in chick dorsal root ganglion cells. **386**, 603, 1987
Barium-activated tail currents in cultured rat dorsal root ganglion neurones are modified by GTP-γ-S and BAY K 8644. **390**, 87*P*, 1987
Kinetic and pharmacological properties distinguishing three types of calcium currents in chick sensory neurones. **394**, 149, 1987
Development of inward rectification in A cells of isolated rat dorsal root ganglia. **394**, 150*P*, 1987

Dorsal root ganglion neurone
Adenosine agonists reduce voltage-dependent calcium conductance of mouse sensory neurones in cell culture. **370**, 75, 1986

Dorsal root ganglion neurone (*cont.*)
Dynorphin A decreases voltage-dependent calcium conductance of mouse dorsal root ganglion neurones. **377**, 237, 1986
Drinking
Water and salt intake of wild rabbits (*Oryctolagus cuniculus* (L)) following dipsogenic stimuli. **362**, 285, 1985
Signals from the oropharynx may contribute to the diuresis which occurs in man to drinking isotonic fluids. **363**, 21, 1985
Hypertonic saline drinking affects seminal vesicle weight in rats. **364**, 65*P*, 1985
Method for recording patterns of drinking in the conscious rat. **369**, 17*P*, 1985
Changes in plasma volume and vasopressin in humans drinking fluids isosmotic with plasma. **371**, 88*P*, 1986
Plasma expansion does not precipitate the fall in plasma vasopressin in humans drinking isotonic fluids. **376**, 429, 1986
Feeding- and chemical-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 221, 1987
Duodenum
Activation of enteric nerve pathways in the guinea-pig duodenum by cholecystokinin octapeptide and pentagastrin. **364**, 31, 1985
Duodenal alkalinization in a rat isolated duodenum preparation. **374**, 3*P*, 1986
Duodenal mucosal cell replication rates in duodenitis and duodenal ulcer – experiments in mastomys (*Praomys natalensis*). **387**, 22*P*, 1987
Bicarbonate secretion by duodenum in the rabbit *in vivo*. **391**, 22*P*, 1987
Reflex activation of the sympatho-adrenergic system decreases duodenal HCO_3^- secretion in the rat. **391**, 23*P*, 1987
Dye
Calcium-dependent chloride secretion in rat colon epithelium. **361**, 1, 1985
Electrophysiological and dye-coupling studies on secretory, myoepithelial and duct cells in human eccrine sweat glands. **389**, 461, 1987
Dynamometer
A new portable strain-gauged hand-grip dynamometer. **373**, 6*P*, 1986
Calibration of an isometric hand-grip dynamometer using a platform weighing machine. **373**, 7*P*, 1986
Collection, storage and analysis of data from an isokinetic dynamometer using a BBC microcomputer. **378**, 4*P*, 1986
Efferent inhibition
Efferent modulation of hair cell tuning in the cochlea of the turtle. **360**, 397, 1985
Efferent nerve fibre
Blood glucose levels modulate efferent activity in the vagal supply to the rat liver. **364**, 105, 1985
Efferent discharges recorded from single skeletomotor and fusimotor fibres in man. **375**, 251, 1986
Egg cell, *see* Oocyte
Electric field stimulation
Nervous control of mucin secretion into human bronchi. **365**, 297, 1985
Modulation by applied electric fields of Purkinje and stellate cell activity in the isolated turtle cerebellum. **371**, 89, 1986
Electric organ
Quantal release of acetylcholine evoked by focal depolarization at the *Torpedo* nerve–electroplaque junction. **379**, 461, 1986
Potentiation by 4-aminopyridine of quantal acetylcholine release at the *Torpedo* nerve–electroplaque junction. **379**, 479, 1986
Conductances and channels in fused synaptic vesicles from *Torpedo* electric organ. **386**, 84*P*, 1987
Electrical activity
Simultaneous monitoring of electrical and secretory activity in peptidergic neurosecretory terminals of the crab. **359**, 163, 1985
Early events in development of electrical activity and contraction in embryonic rat heart assessed by optical recording. **369**, 209, 1985
Mapping of early development of electrical activity in the embryonic chick heart using multiple-site optical recording. **383**, 711, 1987
Effects of morphine on electrical activity of the rectum in man. **388**, 153, 1987
Electrical coupling
Ionic and electrophysiological properties of retinal Müller (glial) cells of the turtle. **362**, 79, 1985
The electrotonic location of low-resistance intercellular junctions between a pair of giant neurones in the snail *Lymnaea*. **370**, 111, 1986
Electrical properties of the nexal membrane studied in rat ventricular cell pairs. **370**, 267, 1986
Oscillatory properties of guinea-pig inferior olivary neurones and their pharmacological modulation: an *in vitro* study. **376**, 163, 1986
Electrophysiological properties of ependymal cells (radial glia) in dorsal cortex of the turtle, *Pseudemys scripta*. **385**, 287, 1987
Electrical field
Dynamic aspects of amphibian neurite growth and the effects of an applied electric field. **375**, 55, 1986
Electrical noise
The transduction channel of hair cells from the bullfrog characterized by noise analysis. **375**, 195, 1986
The conductance and density of sodium channels in the cut-open squid giant axon. **377**, 463, 1986
Electrical resonance
Efferent modulation of hair cell tuning in the cochlea of the turtle. **360**, 397, 1985
Electrical response
Electrical responses of smooth muscle cells of the rabbit ear artery to adenosine triphosphate. **359**, 401, 1985
Electrical stimulation
Method for chronic stimulation of denervated muscle in the rat. **364**, 10*P*, 1985

Electrical simulation (*cont.*)
Skeletal muscle metabolism, contraction force and glycogen utilization during prolonged electrical stimulation in humans. **374**, 493, 1986
Low frequency chronic electrical stimulation of normal and dystrophic chicken muscle. **376**, 377, 1986
The effect of percutaneous motor cortex stimulation on H reflexes in muscles of the arm and leg in intact man. **377**, 333, 1986
A hybrid orthosis incorporating artificial reflexes for spinal-cord-damaged patients. **380**, 19*P*, 1986
Fibre sizes and histochemical staining characteristics in normal and chronically stimulated fast muscle of cat. **382**, 237, 1987
Relationship between mitochondria and oxygen consumption in isolated cat muscles. **385**, 661, 1987
The role of frequency in the effects of long-term intermittent stimulation of denervated slow-twitch muscle in the rat. **392**, 377, 1987

Electrocardiogram
Ambulatory monitoring of customary physical activity using a body-borne tape-recorder. **361**, 8*P*, 1985
The temporovectorcardiogram (TVCG)—a new electrocardiographic technique. **365**, 18*P*, 1985
The BBC microcomputer programmed as an e.c.g. display monitor. **367**, 13*P*, 1985

Electrocorticogram
An electrophysiological study on the central action of yohimbine in the rat. **392**, 58*P*, 1987

Electrode
An improved current electrode/injection capillary for large cell voltage clamp. **365**, 8*P*, 1985
Intracellular free magnesium in frog skeletal muscle fibres measured with ion-selective micro-electrodes. **378**, 461, 1986

Electroencephalogram
Is there a difference in human male and female brain activity? **366**, 18*P*, 1985

Electrogenic pump
Modulation of an electrogenic pump as a mechanism of synaptic plasticity in leech ganglia. **369**, 110*P*, 1985

Electromyogram
On-line 'turns' analysis of the human electromyogram. **360**, 3*P*, 1985
Quantitative analysis of the surface electromyogram in humans. **360**, 6*P*, 1985
The use of current-mode amplifiers for e.m.g. recordings in electrically noisy environments. **360**, 7*P*, 1985
The respiratory activity of human levator costae muscles and its modification by posture. **362**, 189, 1985
Quantal response behaviour of the human surface electromyogram. **362**, 3*P*, 1985
Electromyographic activity in the cross-reinnervated soleus muscle of unrestrained cats. **365**, 13, 1985
Electromyographic responses evoked in muscles of the forelimb by intracortical stimulation in the cat. **367**, 309, 1985
Forelimb electromyographic responses to motor cortex stimulation during locomotion in the cat. **367**, 327, 1985
Analysis of evoked electromyographic activity using the BBC microcomputer. **378**, 3*P*, 1986
Correlation of expelled semen volume with the electromyographic activity of the bulbocavernosus and ischiocavernosus muscles during ejaculation in man. **390**, 137*P*, 1987
A simple function test for studies of back pain in humans. **390**, 262*P*, 1987
Electromyographic responses of a nasal muscle to stimulation of the nasal vestibule in the cat. **391**, 25, 1987
Difference in the amplitude of the human soleus H reflex during walking and running. **392**, 513, 1987

Electron probe microanalysis
Diffusible sodium, potassium, magnesium, calcium and phosphorus in frog skeletal muscle. **368**, 545, 1985

Electronic equipment
A digital tape-recorder suitable for fast physiological signals. **360**, 5*P*, 1985
An economical solution to positional measurement in video images. **362**, 2*P*, 1985
High-current discharge circuit for electromagnetic stimulation of the brain in man. **391**, 3*P*, 1987
Blocking of transmission of stimulus-related electrical interference to inputs of high-gain a.c. preamplifiers used for neurophysiological measurement. **391**, 4*P*, 1987

Electrophysiology
Modulation of slow response excitability by calcium in rabbit atrial trabeculae. **363**, 237, 1985
Slow wave heterogeneity within the circular muscle of the canine gastric antrum. **366**, 221, 1985
A computerized method of cardiac action-potential duration analysis. **366**, 118*P*, 1985
Electrophysiological characteristics of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 129, 1986
Characteristics of phasic and tonic sympathetic ganglion cells of the guinea-pig. **372**, 457, 1986
Sensory receptors in the bill of the platypus (*Ornithorhynchus anatinus*). **382**, 120*P*, 1987
Passive and active membrane properties of mudpuppy taste receptor cells. **383**, 601, 1987
Endogenous bursting by rat supraoptic neuroendocrine cells is calcium dependent. **384**, 451, 1987
Isoperiodic bursting by magnocellular neuroendocrine cells in the rat hypothalamic slice. **384**, 467, 1987
Intracellular and transepithelial electrical measurements on microperfused ducts from human eccrine sweat glands. **386**, 81*P*, 1987
Action of externally applied adenosine triphosphate on single smooth muscle cells dispersed from rabbit ear artery. **387**, 473, 1987
Intracellular studies of the electrophysiological properties of cultured intracardiac neurones of the guinea-pig. **388**, 349, 1987

Electrophysiology (*cont.*)
Electrophysiological and dye-coupling studies on secretory, myoepithelial and duct cells in human eccrine sweat glands. **389**, 461, 1987
Myogenic electrical control activity in longitudinal muscle of human and dog colon. **392**, 21, 1987
A range of computer programs for electrophysiological signal analysis using the IBM PC AT. **392**, 20*P*, 1987

Electroreceptor
Transient measurement of the membrane potential of receptor cells of an ampullary electroreceptor in the transparent catfish. **366**, 17*P*, 1985

Electroretinogram
Electroretinograms evoked by sinusoidal excitation of human cones. **363**, 135, 1985
The luminance origin of the pattern electroretinogram in man. **363**, 191, 1985
Electrophysiological optometry using Scheiner's principle in the pigeon eye. **369**, 17, 1985
Do horizontal cell responses contribute to the electroretinogram (ERG) in dogfish? **381**, 113*P*, 1986

Embryo
Epidermal growth factor receptors in pig extra-embryonic membrane. **371**, 207*P*, 1986
Dynamic aspects of amphibian neurite growth and the effects of an applied electric field. **375**, 55, 1986
Regulation of interstitial pH in the early chick embryo. **380**, 25*P*, 1986
Ionic basis of membrane potential in developing ectoderm of the *Xenopus* blastula. **393**, 525, 1987
Measurements of interstitial K^+ and Ca^{2+} ion concentrations in the early chick embryo. **394**, 82*P*, 1987

Embryonic heart
Optical studies of excitation–contraction coupling in the early embryonic chick heart. **366**, 89, 1985
Early events in development of electrical activity and contraction in embryonic rat heart assessed by optical recording. **369**, 209, 1985
Mapping of early development of electrical activity in the embryonic chick heart using multiple-site optical recording. **383**, 711, 1987

Embryonic neurone
Differentiation of voltage-gated potassium current and modulation of excitability in cultured amphibian spinal neurones. **375**, 229, 1986

Emesis
The effect of abdominal visceral nerve lesions and a novel 5HT-M receptor antagonist on cytotoxic and radiation-induced emesis in the ferret. **382**, 47*P*, 1987

Endocrine pancreas, *see also* Pancreas
The role of the sympathetic system in the control of insulin release in response to hyperglycaemia in conscious calves. **362**, 311, 1985
Pancreatic neuroendocrine responses to butyrate in conscious sheep. **364**, 281, 1985

Endocytosis
Membrane retrieval following stimulation of exocytosis in cultured bovine adrenal medullary cells: lack of effect of extracellular Ca **371**, 156*P*, 1986

Endometrium
Role of bicarbonate and chloride ions in rat endometrial electrogenic secretory activity. **391**, 21*P*, 1987

Endothelial cell
The role of hyperpolarization in the relaxation of smooth muscle of monkey coronary artery. **371**, 257, 1986

Endothelium
Effect of fluid pressure on the hydraulic conductance of interstitium and fenestrated endothelium in the rabbit knee. **360**, 311, 1985
Hypoxia releases a vasoconstrictor substance from the canine vascular endothelium. **364**, 45, 1985
Pulmonary endothelial cells in culture produce a vascular smooth-muscle cell mitogen(s) in response to hypoxia. **371**, 241*P*, 1986
Regulation of ion permeability in frog brain venules. Significance of calcium, cyclic nucleotides and protein kinase C. **387**, 59, 1987
Structure and permeability properties of interendothelial junctions in capillaries of the isolated perfused rat heart. **387**, 79*P*, 1987
The half-life of endothelium-derived relaxing factor released from bovine aortic endothelial cells in culture. **388**, 71, 1987
Cholesterol feeding impairs production of endothelium-dependent relaxation factor (EDRF) in rabbit aorta. **390**, 212*P*, 1987
The effects of chemical fixation on the permeability of frog mesenteric capillaries. **392**, 463, 1987
Inward rectifying K^+ channels and thrombin-activated cation channels in cultured endothelial cells from bovine pulmonary artery. **394**, 45*P*, 1987
The electrogenic sodium pump in guinea-pig coronary endothelial cells. **394**, 90*P*, 1987

End-plate, *see also* Neuromuscular junction
Effect of denervation on a steady electric current generated at the end-plate region of rat skeletal muscle. **373**, 97, 1986
Effect of phorbol ester and diacylglycerol on the endplate responses of the mouse diaphragm. **373**, 64*P*, 1986
The role of the sodium pump during prolonged end-plate currents in guinea-pig diaphragm. **384**, 377, 1987
A prolonged contraction at the end-plate region of the diaphragm of rats and mice after anticholinesterases *in vitro*. **391**, 429, 1987

End-plate current
Effect of change in spatial distribution of vesicular release on the variability of miniature end-plate currents in the frog. **358**, 85*P*, 1985
Independent control of channel closure and block of open channels by methylxanthines at acetylcholine receptors in frog. **390**, 33, 1987

Energy
Exercise during intermittent cold exposure prevents acclimation to cold in rats. **390**, 45, 1987

Energy balance
Effects of subdiaphragmatic vagotomy on energy balance and thermogenesis in the rat. **362**, 1, 1985
Energy balance in food-restricted rats treated with progesterone. **367**, 54*P*, 1985
Effects of meal frequency on energy expenditure and body weight in adult rats. **386**, 62*P*, 1987
Enkephalin
Effects of synthetic adrenocorticotrophin on adrenal medullary responses to splanchnic nerve stimulation in conscious calves. **379**, 1, 1986
The effect of splanchnic nerve stimulation on adrenocortical activity in conscious calves. **382**, 385, 1987
Enteric ganglion
Effects of forskolin on electrical behaviour of myenteric neurones in guinea-pig small intestine. **376**, 439, 1986
Elevation of adenosine 3′,5′-phosphate mimics slow synaptic excitation in myenteric neurones of the guinea-pig. **376**, 451, 1986
A non-adrenergic, non-cholinergic slow inhibitory post-synaptic potential in neurones of the guinea-pig submucous plexus. **390**, 357, 1987
Enteric nervous system
Electrophysiological analysis of projections of enteric inhibitory motoneurones in the guinea-pig small intestine. **370**, 61, 1986
A permissive role for the vagus nerves in the genesis of antro-antral reflexes in the anaesthetized ferret. **381**, 377, 1986
Synaptic inputs to immunohistochemically identified neurones in the submucous plexus of the guinea-pig small intestine. **381**, 465, 1986
Enteric neurone
Inhibitory synaptic potentials resulting from α_2-adrenoceptor activation in guinea-pig submucous plexus neurones. **358**, 17, 1985
Enterocyte
A rabbit jejunal isolated enterocyte preparation suitable for transport studies. **363**, 257, 1985
Potassium movements associated with amino acid and sugar transport in enterocytes isolated from rabbit jejunum. **363**, 271, 1985
Site of action and binding characteristics of triiodothyronine in adult rat jejunal enterocytes. **364**, 83*P*, 1985
Lymphocyte-induced changes in disaccharidase expression by neonatal mouse enterocytes. **364**, 84*P*, 1985
Diet- and temperature-induced changes in enterocyte membrane potential and K^+ activities in hamster jejunum. **369**, 150*P*, 1985
Induction of glucose transporter by hyperglycaemia in rat enterocyte basolateral membranes. **369**, 152*P*, 1985
Intracellular potassium as a possible inducer of amino acid transport across hamster jejunal enterocytes. **375**, 107, 1986
Binding of triiodothyronine by fully differentiated rat enterocytes. **376**, 267, 1986
Enterocyte development
Thyroid hormone effects on lactase expression by rat enterocytes. **376**, 253, 1986
Simultaneous appearance of α-glucosidase activity in enterocytes of all ages during normal development in neonatal mice. **378**, 80*P*, 1986
Enterocyte differentiation
The effects of fasting and refeeding on hexose uptake in enterocytes sequentially isolated from different segments of rat small intestine. **376**, 37*P*, 1986
Intestinal resection changes brush-border hydrolase expression by rat ileal enterocytes. **378**, 26*P*, 1986
Metabolic properties of enterocytes sequentially isolated from different segments of rat small intestine. **378**, 28*P*, 1986
Rat jejunal disaccharidase activity increases biphasically during early post-natal development. **391**, 487, 1987
Dexamethasone selectively increases sodium-dependent alanine transport across neonatal piglet intestine. **393**, 569, 1987
Epidermal growth factor selectively increases maltase and sucrase activities in neonatal piglet intestine. **393**, 583, 1987
Entrainment
Effects of changes in excitability and intercellular coupling on synchronization in the rabbit sinoatrial node. **370**, 127, 1986
Enzyme activity
Enzyme activities in single electrophysiologically identified crab muscle fibres. **371**, 191, 1986
Epidermal growth factor
Inhibition of acid formation by epidermal growth factor in the isolated rabbit gastric glands. **378**, 347, 1986
Epididymis
Secretion of *p*-aminohippurate by the rat epididymis. **364**, 241, 1985
Electrogenic anion secretion in cultured rat epididymal epithelium. **378**, 335, 1986
Epilepsy
Penicillin epileptogenesis in the motor cortex of the rat. **358**, 38*P*, 1985
Indomethacin and pencillin epileptogenesis in the rat. **360**, 26*P*, 1985
Long-term depression of CA3 hippocampal pyramidal neurones following intrahippocampal injection of tetanus toxin in rats. **360**, 33*P*, 1985
Picrotoxin-induced epileptiform discharge in slices of rat cerebral cortex is not blocked by NMA antagonists. **364**, 31*P*, 1985
Prostaglandins and focal epileptiform discharges in rats. **372**, 12*P*, 1986
D-2-amino 5-phosphonovalerate (D-APV) reduces epileptiform activity in slices of the kainic acid lesioned rat hippocampus. **373**, 23*P*, 1986
Tetanus toxin chronic epileptic foci in rat hippocampal slices. **373**, 24*P*, 1986
Enchancement by penicillin of cortical potentials evoked by direct stimulation in rats. **377**, 20*P*, 1986
Involvement of *N*-methyl-D-aspartate receptors in epileptiform bursting in the rat hippocampal slice. **380**, 175, 1986

Epilepsy (*cont.*)
N-methyl-D-aspartate receptors and the enhancement of somatosensory evoked potentials in penicillin epileptogenesis in rats. **390**, 19*P*, 1987
Penicillin epilepsy and potentials evoked by direct cortical stimulation in the rat. **392**, 57*P*, 1987
Epithelial transport
Anisotonic fluid transport across rabbit gallbladder epithelium *in vitro*. **358**, 114*P*, 1985
Secretion of *p*-aminohippurate by the rat epididymis. **364**, 241, 1985
Changes in elemental concentrations of rat parotid acinar cells following pilocarpine stimulation. **381**, 297, 1986
Micro-electrode studies on the effects of exogenous cyclic adenosine monophosphate on active sodium transport in frog skin. **388**, 547, 1987
Transepithelial Na^+ exchange in salmon: seasonal seaward migration may be caused by osmoregulatory stress. **390**, 90*P*, 1987
Effects of cell volume changes on membrane ionic permeabilities and sodium transport in frog skin (*Rana ridibunda*). **393**, 1, 1987
Epithelium
Apical membrane potassium and chloride permeabilities in surface cells of rabbit descending colon epithelium. **358**, 433, 1985
The mudpuppy lung epithelium: a preparation for the study of lung electrolyte and fluid transport. **358**, 113*P*, 1985
A method for studying the electrophysiology of isolated epithelial cells. **362**, 6*P*, 1985
Transepithelial potential and resistance in the otic vesicle of the chick embryo. **365**, 53*P*, 1985
The electrophysiology of cultured human lens epithelial cells. **377**, 39*P*, 1986
Significance of active ion transport in transalveolar water absorption: a study on isolated rat lung. **384**, 311, 1987
Fluid absorption by rat lung *in situ*: pathways for sodium entry in the luminal membrane of alveolar epithelium. **384**, 325, 1987
Transepithelial transport of labelled sodium against a concentration gradient in fluid-filled rat lungs. **394**, 83*P*, 1987
Ergometry
An easily adjustable upper body ergometry system. **373**, 5*P*, 1986
Erythrocyte
N-Methyl-D-glucamine as a cation replacement for human red-cell transport studies. **358**, 90*P*, 1985
Na and K flux ratios in human RBC. **358**, 91*P*, 1985
Plasma-dependent ion fluxes in the plaice erythrocyte. **360**, 68*P*, 1985
Estimation of transit times in capillaries supplying rat glycolytic muscle. **361**, 70*P*, 1985
The effects of high hydrostatic pressure on volume-sensitive cation transport in human red cells. **362**, 15*P*, 1985
K and Na fluxes across the human red cell membrane at 0 °C. **362**, 16*P*, 1985
Influence of loop diuretics and anions on passive potassium influx into human red cells. **369**, 61, 1985
Applications of fluorescent Ca^{2+} indicators for the measurement of cytoplasmic free Ca^{2+} concentrations in platelets and lymphocytes. **369**, 23*P*, 1985
Irradiation of cryopreserved red cells for membrane transport studies. **371**, 20*P*, 1986
Potassium–potassium exchange as part of the overall reaction mechanism of the sodium pump of the human red blood cell. **374**, 221, 1986
Taurine transport associated with cell volume regulation in flounder erythrocytes under anisosmotic conditions. **374**, 245, 1986
The erythrocyte settling rate (ESR). **374**, 5*P*, 1986
Volume-sensitive KCl transport in human red cells. **374**, 33*P*, 1986
K influxes in red cells from two primate species. **374**, 34*P*, 1986
Passive transport and binding of lead by human red blood cells. **378**, 267, 1986
The role of anion transport in the passive movement of lead across the human red cell membrane. **378**, 287, 1986
(Na+K) co-transport in human red cells: kinetic interactions between external K and piretanide. **380**, 53*P*, 1986
(Na+K) Co-transport in human red cells increases with cell age. **380**, 67*P*, 1986
The order of addition of sodium and release of potassium at the inside of the sodium pump of the human red cell. **381**, 149, 1986
Comparison of sodium–lithium countertransport in HK and LK red cells of sheep. **381**, 118*P*, 1986
Control of cell volume and ion transport by β-adrenergic catecholamines in erythrocytes of rainbow trout, *Salmo gairdneri*. **382**, 123, 1987
Ion movements and volume changes induced by catecholamines in erythrocytes of rainbow trout: effect of pH. **382**, 145, 1987
Oxygen controls Na^+/H^+ exchange in trout red cells, but not via metabolism. **382**, 139*P*, 1987
Inverse relationship between bumetanide-sensitive and bumetanide-insensitive K influxes in human red cells from different normal donors. **382**, 141*P*, 1987
Differential effects of high hydrostatic pressure on membrane transport in sheep erythrocytes. **384**, 64*P*, 1987
The effects of calcium on potassium transport in ferret red cells. **386**, 407, 1987
(Na+K) co-transport in human red cells: evidence for binding of Cl before K. **386**, 78*P*, 1987
Deformability of human red cell ghosts determined by filtration. **386**, 109*P*, 1987
Photoelectric recording of the time course of blood filtration – an index of red cell deformability. **388**, 6*P*, 1987
Heterogeneity of amino acid transport in horse erythrocytes: a detailed kinetic analysis of inherited transport variation. **389**, 385, 1987

Erythrocyte (*cont.*)
Some properties of a system for sodium-dependent outward movement of magnesium from metabolizing human red blood cells. **390**, 367, 1987
Noradrenaline uptake by human red blood cell ghosts. **391**, 106*P*, 1987
Evidence that stimulation of glycolysis by calcium in human red cells requires calcium-pump turnover. **394**, 88*P*, 1987

Ethanol
The effects of ethanol on intracellular calcium binding in isolated electropermeabilized rat hepatocytes. **376**, 39*P*, 1986
Effects of ethanol and carbachol on amino acid uptake and amylase secretion in rat pancreatic lobules *in vitro*. **384**, 45*P*, 1987

Evoked potential
Localization of visually evoked cortical activity in humans. **360**, 233, 1985
Localization of cortical activity associated with visual recognition in humans. **360**, 247, 1985
Differentiation between locally generated and far-field components of the somatosensory evoked response using selective ischaemic lesions in the baboon brain. **360**, 8*P*, 1985
Effect of ischaemia on evoked electrical activity in man. **360**, 29*P*, 1985
Visuomotor integration reflected in the source-density pattern of human scalp potentials. **360**, 31*P*, 1985
Augmenting responses evoked in area 17 of the cat by intracortical axon collaterals of cortico-geniculate cells. **367**, 217, 1985
Inhibitory interactions in the human vision system revealed in pattern-evoked potentials. **389**, 1, 1987
Excitatory amino acid receptor-mediated transmission of somatosensory evoked potentials in the rat thalamus. **394**, 445, 1987

Excitability
Comparison of the after-effects of impulse conduction on threshold at nodes of Ranvier along single frog sciaticaxons. **386**, 503, 1987

Excitation
Calcium ion, an intracellular messenger of light adaptation, also participates in excitation of *Limulus* photoreceptors. **364**, 381, 1985
Excitatory synaptic interactions between CA3 neurones in the guinea-pig hippocampus. **373**, 397, 1986

Excitation–contraction coupling
The slow repolarization phase of the action potential in rat heart. **360**, 13, 1985
Calcium channels and intracellular calcium release are pharmacologically different in frog skeletal muscle. **361**, 231, 1985
The relationship between intracellular calcium and contraction in calcium-overloaded ferret papillary muscles. **364**, 169, 1985
Optical studies of excitation–contraction coupling in the early embryonic chick heart. **366**, 89, 1985
Calcium release by noradrenaline from central sarcoplasmic reticulum in rabbit main pulmonary artery smooth muscle. **366**, 153, 1985
Calcium–force relationships as detected with aequorin in two different vascular smooth muscles of the ferret. **369**, 269, 1985
Gradient in excitation–contraction coupling in canine gastric antral circular muscle. **369**, 283, 1985
Effect of potassium and acetylcholine on canine intestinal smooth muscle. **372**, 521, 1986
Contractile activation in myotomes from developing larvae of *Xenopus laevis*. **375**, 391, 1986
Caffeine potentiation of calcium release in frog skeletal muscle fibres. **375**, 535, 1986
Intracellular calcium transients underlying the short-term force–interval relationship in ferret ventricular myocardium. **376**, 507, 1986
Changes in elemental concentrations of rat parotid acinar cells following pilocarpine stimulation. **381**, 297, 1986
Effects of hypertonic solutions on calcium transients in frog twitch muscle fibres. **383**, 615, 1987
'Off' tails of intramembrane charge movements in frog skeletal muscle in perchlorate-containing solutions. **384**, 491, 1987
Alterations in cytoplasmic calcium sensitivity during porcine coronary artery contractions as detected by aequorin. **385**, 437, 1987
Effects of the calcium antagonist gallopamil (D600) upon excitation–contraction coupling in toe muscle fibres of the frog. **385**, 693, 1987
Intramembrane charge movement in frog skeletal muscle fibres. Properties of charge 2. **387**, 489, 1987
Electrical activity and contraction in cells isolated from rat and guinea-pig ventricular muscle: a comparative study. **391**, 527, 1987

Excitatory amino acid
Excitation of frog motoneurones *in vitro* by the glutamate analogue AMPA: a pharmacological study using amino acid antagonists. **360**, 65*P*, 1985
The action of *N*-methyl-D-aspartic acid on mouse spinal neurones in culture. **361**, 65, 1985
Dual-component amino-acid-mediated synaptic potentials: excitatory drive for swimming in *Xenopus* embryos. **363**, 35, 1985
Ketamine and *N*-allylnormetazocine selectively inhibit an *N*-methyl-*D*-aspartate-receptor mediated component of synaptic transmission in rat hippocampal slices. **364**, 32*P*, 1985
Excitatory amino acid receptors and neurotransmission in the cat red nucleus. **365**, 33*P*, 1985
Mechanisms of amino acid-evoked excitation of rat CA1 pyramidal neurones in hippocampal slices. **371**, 272*P*, 1986
Synaptic excitation in cultures of mouse spinal cord neurones: receptor pharmacology and behaviour of synaptic currents. **372**, 169, 1986
The influence of pentobarbitone on the actions of excitatory amino acids: measurements on horizontal cells of the isolated fish (roach) retina. **372**, 44*P*, 1986
Mediation of responses of rat ventrobasal thalamus neurones to sensory afferent stimulation by two or more excitatory amino acid receptors. **373**, 26*P*, 1986

Excitatory amino acid (*cont.*)
A search for brain stem cell groups integrating the defence reaction in the rat. **378**, 213, 1986
Effects of excitatory amino acid antagonists on evoked and spontaneous excitatory potentials in guinea-pig hippocampus. **378**, 403, 1986
On the excitatory post-synaptic potential evoked by stimulation of the optic tract in the rat lateral geniculate nucleus. **384**, 603, 1987
Amino-acid-mediated projection from ventromedial hypothalamus (VMH) to periaqueductal grey (PAG) in the rat: autoradiographic and electrophysiological evidence. **384**, 70*P*, 1987
The role of *N*-methylaspartate receptors in mediating responses of rat and cat spinal neurones to defined sensory stimuli. **385**, 169, 1987
The action of excitatory amino acids on chick spinal cord neurones in culture. **386**, 425, 1987
Physiologically evoked sensory input mediated by non-NMDA excitatory amino-acid receptors in the rat ventrobasal thalamus (VB). **390**, 52*P*, 1987
Excitatory amino acid receptors and synaptic transmission in the rat ventrobasal thalamus. **391**, 499, 1987
Excitatory amino acid receptor-mediated transmission of somatosensory evoked potentials in the rat thalamus. **394**, 445, 1987
Permeation and block of *N*-methyl-D-aspartic acid receptor channels by divalent cations in mouse cultured central neurones. **394**, 501, 1987
Release of endogenous excitatory amino acids from slices of rat neocortex and their modulation by ventromedial thalamic lesions and 2-chloroadenosine. **394**, 112*P*, 1987
N-Methyl-D-aspartate antagonists reduce the responses of rat thalamic neurones to noxious stimulation. **394**, 114*P*, 1987

Excitatory amino acid receptor
Amino acid receptor mediated excitatory synaptic transmission in the cat red nucleus. **376**, 13, 1986

Excitatory junction potential
Pre- and post-junctional effects of adenosine triphosphate on noradrenergic transmission in the rabbit ear artery. **389**, 423, 1987

Excitatory postsynaptic potential, *see also* Postsynaptic potential
Demonstration of a phencyclidine-sensitive *N*-methyl-D-aspartate-receptor-mediated component of an e.p.s.p. in rat hippocampal slices. **365**, 45*P*, 1985
Partitioning of monosynaptic Ia excitatory postsynaptic potentials in the motor nucleus of the cat semimembranosus muscle. **369**, 379, 1985
Ia afferent excitation of motoneurones in the *in vitro* new-born rat spinal cord is selectively antagonized by kynurenate. **370**, 515, 1986

Exercise
Post-exercise ketosis in post-prandial exercise: effect of glucose and alanine ingestion in humans. **358**, 395, 1985
Partial neuromuscular blockade and cardiovascular responses to static exercise in man. **359**, 365, 1985
Force, speed and power of seated, horizontal pulls at three heights. **360**, 79*P*, 1985
The measurement of power output during simulated rowing. **361**, 3*P*, 1985
The two-phase response of end-tidal P_{CO_2} during constant load exercise in man. **361**, 64*P*, 1985
Effect of an external resistance upon breathlessness during exercise in healthy subjects. **361**, 65*P*, 1985
Comparison of graphical estimates of the mean alveolar P_{CO_2} with the arterial P_{CO_2} during exercise in man. **361**, 66*P*, 1985
The influence of endurance training on asthmatic adults. **361**, 78*P*, 1985
Blood pH and blood lactate concentration following maximal treadmill sprinting in man. **361**, 79*P*, 1985
Catecholamine responses to brief maximum exercise in man. **361**, 80*P*, 1985
Endurance training and the catecholamine response to brief maximum exercise in man. **361**, 81*P*, 1985
Voluntary strength increases more markedly than maximal tetanic force following strength training in man. **361**, 82*P*, 1985
Determinants of isometric endurance capacity in man. **361**, 83*P*, 1985
Rebreathing measurements of pulmonary volumes, diffusion and cardiac output during exercise in man. **362**, 12*P*, 1985
Adaptation of mechanical properties of muscle to high force training in man. **365**, 277, 1985
Maximal perfusion of skeletal muscle in man. **366**, 233, 1985
Autoregulation of hind-limb blood flow in conscious dogs. **368**, 409, 1985
Heart rate at the onset of static exercise in man with partial neuromuscular blockade. **368**, 481, 1985
Post-exercise changes in blood pressure and baroreflex sensitivity in man. **369**, 136*P*, 1985
Dynamics of the early ventilatory and circulatory responses to voluntary and electrically-induced exercise in man. **369**, 142*P*, 1985
Ventilation and cardiac output during the onset of exercise, and during voluntary hyperventilation, in humans. **370**, 567, 1986
Effects of training on cardiovascular function in the American Quarter horse. **371**, 78*P*, 1986
Continuous arterial pH measurement during exercise in patients with arteriovenous shunts. **371**, 122*P*, 1986
Isokinetic strength and endurance and the operation of foot pedals in man. **374**, 51*P*, 1986
Experimental human muscle damage: morphological changes in relation to other indices of damage. **375**, 435, 1986
Alterations in plasma potassium concentrations during and following short-term strenuous exercise in the horse. **376**, 46*P*, 1986

Exercise (*cont.*)
Blood flow to the respiratory and limb muscles and to abdominal organs during maximal exertion in ponies. **377**, 25, 1986
Measurement of efficiency in swimming man. **377**, 3*P*, 1986
The β-endorphin response to brief maximal exercise in man. **377**, 106*P*, 1986
Change of $\dot{V}_{O_2,max}$ in boys and girls from 12 to 23 years of age. **377**, 107*P*, 1986
Effect of pedalling rate on the muscle force required during cycling exercise in man. **377**, 109*P*, 1986
Redox state changes in human skeletal muscle after isometric contraction. **380**, 441, 1986
A method for the collection of samples of water lost as sweat in exercising human subjects. **380**, 13*P*, 1986
Dietary induced alterations in acid-base status and the performance of high-intensity exercise in man. **380**, 42*P*, 1986
Effects of oral administration of glucose polymer or glucose/electrolyte solutions during exercise in man. **380**, 43*P*, 1986
An exercise testing system designed for student use. **381**, 12*P*, 1986
Does posture influence upper body anaerobic power in man? **382**, 156*P*, 1987
Gradually increasing dynamic work mimics prolonged steady-state exercise in man – ^{31}P magenetic resonance spectroscopy (m.r.s.) study. **382**, 168*P*, 1987
The effect of exercise on the central-chemoreceptor threshold in man. **383**, 9, 1987
The early circulatory and ventilatory response to voluntary and electrically induced exercise in man. **383**, 19, 1987
The relationship between ventilation and oxygen consumption in man is the same during both moderate exercise and shivering. **383**, 455, 1987
Cardiovascular responses at the onset of exercise with partial neuromuscular blockade in cat and man. **384**, 39, 1987
Effect of sprint training on muscle metabolism during treadmill sprinting in man. **384**, 31*P*, 1987
β-Adrenergic blockade restores glucose's antiketogenic activity after exercise in carbohydrate-depleted athletes. **386**, 439, 1987
Respiratory alkalosis and the performance of high-intensity exercise in man. **386**, 68*P*, 1987
Sustained operations and upper-body physical fitness. **386**, 92*P*, 1987
Human exercise in cold and wind: the physiological consequence of wet clothes. **386**, 97*P*, 1987
Changes in ascorbic acid content of plasma and lymphocytes following exercise in man. **386**, 98*P*, 1987
Transmural coronary vasodilator reserve and flow distribution during maximal exercise in normal and splenectomized ponies. **387**, 425, 1987
Cardiovascular, ventilatory and catecholamine responses to maximal dynamic exercise in partially curarized man. **389**, 557, 1987
Exercise during intermittent cold exposure prevents acclimation to cold in rats. **390**, 45, 1987
Muscle pain and enzyme release after repeated maximal eccentric exercise of human elbow flexors. **390**, 124*P*, 1987
Influence of one week of single-leg training on physiological responses to exercise in man. **390**, 127*P*, 1987
Effect of sprint training on muscle metabolism during high-intensity treadmill running in man. **390**, 128*P*, 1987
Fasting and metabolic control in human skeletal muscle during low-level exercise. **390**, 129*P*, 1987
Is the blood-lactate concentration an accurate measure of anaerobic metabolism during exercise in man? **390**, 134*P*, 1987
Regulation of skeletal muscle glucose uptake during dynamic exercise in man; role of muscle mass. **390**, 157*P*, 1987
The effect of liver glycogen content on glucose production in running rats. **390**, 168*P*, 1987
Components of oxygen debt in man analysed on the basis of its dependence on exercise duration. **390**, 182*P*, 1987
Effect of carbohydrate feeding on human muscle substrate use. **390**, 250*P*, 1987
The effect of nutritional status on circulating concentrations of amino acids and urea during prolonged strenuous exercise in man. **390**, 251*P*, 1987
Human muscle strength training: the effects of three different regimes and the nature of the resultant changes. **391**, 1, 1987
The effect of treadmill speed on ventilation at the start of exercise in man. **391**, 13, 1987
Diet, acid-base status and the metabolic response to exercise in man. **391**, 93*P*, 1987
Delayed-onset rise in serum lipid peroxide concentration following eccentric exercise in man. **392**, 51*P*, 1987
Fasting and high-intensity exercise performance in man. **392**, 52*P*, 1987
Effects of β-adrenergic blockade on the ventilatory responses to hypoxic and hyperoxic exercise in man. **393**, 43, 1987
Changes in human blood lactate concentration early in light steady exercise. **394**, 57*P*, 1987
The effects of acid-base disturbances on the metabolic response to high-intensity exercise in man. **394**, 73*P*, 1987
Systemic and forearm vascular resistance after acute leg exercise in man. **394**, 75*P*, 1987
Changes in human upper-body physical fitness during recovery from sustained military operations. **394**, 77*P*, 1987
Optimized and non-optimized peak power output in 11- to 13-year-old boys. **394**, 166*P*, 1987

Exocrine gland
Protein kinase C activators inhibit the inositol trisphosphate-mediated muscarinic current responses in rat lacrimal cells. **394**, 239, 1987

Exocrine pancreas, *see also* Pancreas
Effects of ouabain, monesin and low potassium on neutral amino acid transport in the isolated perfused rat exocrine pancreas. **371**, 132*P*, 1986
Selectivity of amino acid exchange mechanisms at the basolateral border of the epithelium in the isolated perfused rat pancreas. **391**, 31*P*, 1987
Exocytosis
Profiles of evoked release along the length of frog motor nerve terminals. **359**, 235, 1985
Calcium-dependent polyphosphoinositide hydrolysis during exocytotic secretion in bovine adrenal medullary cells permeabilized by application of electric fields. **365**, 60*P*, 1985
Gadolinium ions inhibit exocytotic vasopressin release from the rat neurohypophysis. **367**, 419, 1985
Ca^{2+}-induced membrane capacity changes in rat peritoneal mast cells. **369**, 95*P*, 1985
Differential control of azurophilic and specific granule exocytosis in Sendai-virus-permeabilized rabbit neutrophils. **383**, 115, 1987
Vasoactive intestinal polypeptide stimulates the secretion of catecholamines from the rat adrenal gland. **388**, 285, 1987
Inhibition of secretory granule discharge during exocytosis in sea urchin eggs by polymer solutions. **389**, 527, 1987
Expiratory neurone
Caudal medullary expiratory neurone and internal intercostal nerve discharges in the cat: effects of lung inflation. **368**, 147, 1985
Extracellular space
Assessment of [^{51}Cr] ethylenediaminetetraacetate as a marker of extracellular volume in the rat. **387**, 91*P*, 1987
Extraocular muscle
Afferent signals from the extraocular muscles reach the vestibular nuclei and cerebellum in the trout. **376**, 56*P*, 1986
Input from extraocular muscle afferents to oculomotor nuclei in the trout. **382**, 74*P*, 1987
Fibre types in the extra-ocular muscles of the dogfish. **391**, 87*P*, 1987
Extrinsic gastric nerve
Gastric tone modifies the responses to extrinsic neural stimuli in the anaesthetized ferret. **366**, 1, 1985
Eye
Physiological optics of some Amazon rodents with contrasting life style. **367**, 18*P*, 1985
Electrophysiological optometry using Scheiner's principle in the pigeon eye. **369**, 17, 1985
Refractive sectors in the visual field of the pigeon eye. **369**, 33, 1985
Eye-ground and refraction in central serous retinopathy in man. **387**, 50*P*, 1987
Eye movement
Dynamics of movements of the cat's eye. **358**, 40*P*, 1985
The performance of the smooth pursuit eye movements system during passive and self-generated stimulus motion. **366**, 19*P*, 1985
Pattern of saccadic eye-movement responses associated with midbrain projections in human vision. **367**, 38*P*, 1985
Vergence eye movements in normal and dyslexic children. **369**, 41*P*, 1985
Characteristics of the combination of the vestibulo- and cervico-ocular reflexes in the control of rabbit eye movements. **369**, 47*P*, 1985
Facilitation of vergence changes by saccades: influences of misfocused images and of disparity stimuli in man. **371**, 69, 1986
Red nucleus inputs to retractor bulbi motoneurones in the cat. **371**, 317, 1986
The vestibulo-ocular reflex during human saccadic eye movements. **373**, 209, 1986
The predictability of a visual pursuit stimulus in man is dependent on the highest frequency component of target movement. **377**, 46*P*, 1986
Human fixation and pursuit in normal and open-loop conditions: effects of central and peripheral retinal targets. **379**, 109, 1986
Human ocular vergence movements induced by changing size and disparity. **379**, 145, 1986
Predictive velocity estimation in the ocular pursuit reflex of man. **382**, 85*P*, 1987
Differences in the accuracy of human saccades in the left and right visual fields. **382**, 98*P*, 1987
Predictive velocity estimation in the pursuit reflex response to pseudo-random and step displacement stimuli in man. **389**, 111, 1987
Characteristic features of the ocular pursuit response to an unpredictable target motion stimulus in man. **394**, 79*P*, 1987
Eye muscle
Input from extraocular muscle afferents to the vestibular nuclear complex and the medullary reticular formation of the cat. **369**, 46*P*, 1985
Facial nerve
Respiratory activation of the facial nerve and alar muscles in anaesthetized dogs. **363**, 351, 1985
Facilitation
The role of patterned burst and interburst interval on the excitation-coupling mechanism in the isolated rat neural lobe. **369**, 45, 1985
Fastigial nucleus
Mediation of the fastigial pressor response and a somatosympathetic reflex by ventral medullary neurones in the cat. **368**, 423, 1985
Cardiovascular responses evoked from the fastigial region of the cerebellum in anaesthetized and decerebrate rabbits. **392**, 475, 1987
Fasting
The role of alanine as a source of liver glycogen in fasting rats. **390**, 241*P*, 1987
Fat
Distribution and quantitation of human body fat using nuclear magnetic resonance (NMR) imaging: comparison with a skinfold calliper method. **369**, 160*P*, 1985
Correction of underwater weighing of animal carcasses for trapped air. **372**, 10*P*, 1986
The influence of intestinal infusion of fats on small intestinal motility and digesta transit in pigs. **379**, 27, 1986

Fat (*cont.*)
A comparison of magnetic resonance imaging, ultrasound and skinfold caliper techniques to measure subcutaneous fat thickness in humans. **380**, 61*P*, 1986
The influence of gastrointestinal infusion of fats on regulation of food intake in pigs. **385**, 471, 1987

Fatigue, *see* Muscle fatigue

Fatty acid
Contractile effect of short-chain fatty acids on the isolated colon of the rat. **368**, 667, 1985
Inhibition of reticulo-ruminal motility by volatile fatty acids and lactic acid in sheep. **382**, 355, 1987

Feeding
An automatic feeder for sheep. **371**, 7*P*, 1986
Jejunal myoelectrical activity in the conscious neonatal pig. **374**, 349, 1986
Automated feeding of rats by gastric cannula. **381**, 5*P*, 1986
The influence of gastrointestinal infusion of fats on regulation of food intake in pigs. **385**, 471, 1987
Automatic monitoring of the feeding behaviour of cattle. **386**, 5*P*, 1987
Additive effects of acetate, propionate and distension of the rumen on hay intake by lactating cows. **386**, 61*P*, 1987
Delayed gastric emptying in patients with anorexia nervosa. **387**, 92*P*, 1987
Changes in renal sympathetic nerve activity, heart rate and arterial blood pressure associated with eating in cats. **390**, 229, 1987
Pressure changes in canine gall-bladder associated with emptying. **393**, 545, 1987
Feeding- and chemical-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 221, 1987
Disruption of the jejunal migrating motor complex by gastric distension and feeding in the dog. **394**, 381, 1987

Fertilization
Fertilization-induced ionic conductances in eggs of the frog, *Rana pipiens*. **358**, 299, 1985
Propagating potassium and chloride conductances during activation and fertilization of the egg of the frog, *Rana pipiens*. **368**, 227, 1985
Neomycin prevents the fertilization calcium transient and exocytosis in sea-urchin eggs. **377**, 50*P*, 1986
Neomycin prevents the fusion of sperm with sea-urchin eggs but not the early electrical events of fertilization. **390**, 140*P*, 1987

Fetal brain
mRNA expression and localization of plasma proteins in human fetal brain. **365**, 54*P*, 1985

Fetal lung
The role of amiloride-blockable sodium transport in adrenaline-induced lung liquid reabsorption in the fetal lamb. **376**, 321, 1986
Maturation of the adrenaline-induced reabsorption of lung liquid in the fetal sheep is inhibited by fetal thyroidectomy. **392**, 84*P*, 1987

Fetal respiration
Changes in human fetal heart rate with fetal breathing movements as an indicator of fetal condition. **373**, 59*P*, 1986
Chronic recording from the phrenic nerve in fetal sheep *in utero*. **394**, 4*P*, 1987

Fetuin
α_2HS glycoprotein: the human equivalent of the fetal protein fetuin. **381**, 82*P*, 1986

Fetus
Plasma insulin and arterial pressure in intact and nephrectomized fetal lambs. **358**, 128*P*, 1985
Measurement of net transplacental transfer of fluid to the fetal sheep. **364**, 289, 1985
Flow through the foramen ovale of the fetal and new-born lamb. **365**, 29, 1985
Metabolic and cardiovascular effects on fetal sheep of sustained reduction of uterine blood flow. **368**, 109, 1985
The effect of heart rate on *in utero* left ventricular output in the fetal sheep. **372**, 557, 1986
Effects of apomorphine and haloperidol in fetal lambs. **377**, 37, 1986
Effects of the α_2-adrenergic agonist clonidine and its antagonist idazoxan on the fetal lamb. **381**, 29, 1986
The effect of food withdrawal on myometrial electromyographic (e.m.g.) activity and maternal plasma concentrations of 13,14-dihydro-15-keto prostaglandin $F_{2\alpha}$ (PGFM) and oestrone sulphate in the pregnant ewe at 122 to 127 days gestation (d G.A.). **381**, 40*P*, 1986
The effect of propranolol treatment on fetal plasma renin concentration during the last third of gestation in the guinea-pig. **381**, 111*P*, 1986
In utero ventilation with oxygen augments left ventricular stroke volume in lambs. **383**, 413, 1987
Restoration of lung liquid volume following its acute alteration in fetal sheep. **385**, 531, 1987
In utero right ventricular output in the fetal lamb: the effect of heart rate. **387**, 297, 1987
The effects of frusemide, saralasin and hypotension on fetal plasma renin activity and on fetal renal function. **393**, 479, 1987
Stimulation of fetal breathing movements during hypoxia by L-5-hydroxytryptophan in sheep. **394**, 169*P*, 1987

Fever
Analysis of the antipyretic action of α-melanocyte-stimulating hormone in rabbits. **359**, 459, 1985
Brain temperature in hyperthermic sheep during upper respiratory bypass. **367**, 52*P*, 1985
Evidence for the involvement of the organum vasculosum laminae terminalis in the febrile response of rabbits and rats. **368**, 501, 1985
The effects of low ambient temperature on the febrile responses of rats to endogenous pyrogen and prostaglandin E. **371**, 221*P*, 1986
Evidence for separate mechanisms of induction of biphasic fever inside and outside the blood–brain barrier in rabbits. **383**, 629, 1987

Fever (*cont.*)
Blockade of prostaglandin E_1 hyperthermia by sodium salicylate given into the ventral septal area of the rat brain. **384**, 223, 1987
Evidence supporting a role for endogenous vasopressin in fever suppression in the rat. **387**, 163, 1987
Fever induced in rabbits by intraventricular injection of rabbit and human serum albumin. **390**, 137, 1987
Fever and acute phase response induced in rabbits by human recombinant interferon-γ. **391**, 209, 1987
Separate mechanisms inside and outside the blood–brain barrier inducing metabolic changes in febrile rabbits. **392**, 637, 1987
The effects of the calcium-channel-blocking agent verapamil on the pyrogenic response to the interferon inducer polyinosinic polycytidylic acid and the hyperthermic response to intraventricular prostaglandin E_2 in the rabbit. **394**, 133*P*, 1987

Fibrillation
Comparison of the dominant frequency of ventricular fibrillation, induced under different conditions in the anaesthetized dog. **381**, 24*P*, 1986
Effects of anti-arrhythmic drugs on established ventricular fibrillation in the anaesthetized dog. **392**, 79*P*, 1987

Field potential
Field potentials generated by group II muscle afferents in the middle lumbar segments of the cat spinal cord. **385**, 393, 1987

Filament spacing
The stiffness of frog skinned muscle fibres at altered lateral filament spacing. **378**, 175, 1986

Fish
Effects of phosphate on the contractile properties of fast and slow muscle fibres from an Antarctic fish. **368**, 491, 1985
The use of hyperbaric nitrous oxide to induce triploidy in fish eggs. **384**, 38*P*, 1987
Effects of gill carbonic anhydrase (CA) inhibition on recovery from respiratory and metabolic acidosis in the dogfish, *Squalus acanthias*. **391**, 63*P*, 1987

Fixation
Human fixation and pursuit in normal and open-loop conditions: effects of central and peripheral retinal targets. **379**, 109, 1986

Flexion reflex
Cutaneous receptive field and morphological properties of hamstring flexor α-motoneurones in the rat. **364**, 249, 1985
The synchronized firing of alpha and gamma motoneurones co-activated during the flexion reflex in the cat. **364**, 48*P*, 1985
The degree of short-term synchrony between α- and γ-motoneurones coactivated during the flexion reflex in the cat. **376**, 47, 1986

Fluid pressure
Effect of fluid pressure on the hydraulic conductance of interstitium and fenestrated endothelium in the rabbit knee. **360**, 311, 1985

Fluid reabsorption
Fluid reabsorption by the proximal convoluted tubule of the kidney in lactating rats. **371**, 267, 1986

Fluid transport
The roles of paracellular and transcellular pathways and submucosal space in isotonic water absorption by rabbit ileum. **370**, 409, 1986
The standing-gradient model applied to fluid reabsorption in the renal proximal tubule. **371**, 101*P*, 1986
The rat alveolar membrane – an epithelium performing sodium-coupled water absorption. **371**, 168*P*, 1986
Fluid transport across the lung epithelium from the mudpuppy, *Necturus maculosus*, *in vitro*. **380**, 71*P*, 1986
Prevention of carbachol-induced fluid secretion in isolated rabbit ileum by dopamine. **381**, 78*P*, 1986
Significance of active ion transport in transalveolar water absorption: a study on isolated rat lung. **384**, 311, 1987
Fluid absorption by rat lung *in situ*: pathways for sodium entry in the luminal membrane of alveolar epithelium. **384**, 325, 1987

5-Fluorouracil
The transport of pyrimidines into tissue rings cut from rat small intestine. **382**, 475, 1987

FMRFamide
Modulation of potassium conductances by an endogenous neuropeptide in neurones of *Aplysia californica*. **382**, 267, 1987
Suppression of calcium current by an endogenous neuropeptide in neurones of *Aplysia californica*. **388**, 565, 1987

Force–velocity relation
A velocity-dependent shortening depression in the development of the force–velocity relation in frog muscle fibres. **380**, 227, 1986

Fracture
A system for studying the effect of intermittent local heating on fracture healing in the rabbit. **384**, 12*P*, 1987

Frog
Lidocaine blockage of basolateral potassium channels in the amphibian urinary bladder. **381**, 575, 1986

Frog heart
Photochemical degradation of nitroprusside in relation to its negative inotropic action on frog heart. **367**, 80*P*, 1985
A comparative study of the actions of serum and serum protein fractions on the isolated hypodynamic frog heart. **380**, 38*P*, 1986
The development of the hypodynamic state of the isolated spontaneously beating frog heart. **390**, 229*P*, 1987

Frog neurone
Catechol: a potent and specific inhibitor of the fast potassium channel in frog primary afferent neurones. **373**, 115, 1986

Frog skin
Electrogenic active proton pump in *Rana esculenta* skin and its role in sodium ion transport. **359**, 331, 1985
Acid secretion through the *Rana esculenta* skin: involvement of an anion-exchange mechanism at the basolateral membrane. **378**, 195, 1986
Frusemide
Do cystic fibrotic nasal cells have an abnormal frusemide-sensitive transport pathway? **377**, 86*P*, 1986
Fusimotor neurone
Fusimotor after-effects on responses of primary endings to test dynamic stimuli in cat muscle spindles. **360**, 187, 1985
Effects of stretch on dynamic fusimotor after-effects in cat muscle spindles. **360**, 201, 1985
Ultrastructure of gamma motoneurones in the cat thoracic spinal cord. **360**, 46*P*, 1985
Actions on γ-motoneurones elicited by electrical stimulation of cutaneous afferent fibres in the hind limb of the cat. **366**, 343, 1985
The influence of red nucleus stimulation on fusimotor activity to jaw muscles of the cat. **372**, 25*P*, 1986
Intramuscular organization of the monkey skeletofusimotor system. **372**, 30*P*, 1986
Fusimotor reflexes in triceps surae muscle elicited by stretch of muscles in the contralateral hind limb of the cat. **373**, 419, 1986
Gamma loop contributing to high motor unit firing rates in maximal voluntary contractions in man. **373**, 15*P*, 1986
Actions on γ-motoneurones elicited by electrical stimulation of joint afferent fibres in the hind limb of the cat. **375**, 137, 1986
Efferent discharges recorded from single skeletomotor and fusimotor fibres in man. **375**, 251, 1986
γ Loop contributing to maximal voluntary contractions in man. **380**, 575, 1986
G protein
Acetylcholine regulation of nicotinic receptor channels through a putative G protein in chick myotubes. **393**, 635, 1987
GABA, *see* γ-Aminobutyric acid
Gadolinium ion
Gadolinium ions inhibit exocytotic vasopressin release from the rat neurohypophysis. **367**, 419, 1985
Gall-bladder
Gall-bladder contraction in conscious dogs. **358**, 106*P*, 1985
Use of different inhibitors to study the co-transport systems of sodium chloride in the apical membrane of rabbit gall-bladder epithelial cells. **369**, 182*P*, 1985
Non-steady-state tracer fluxes across rabbit gall-bladder epithelium *in vitro*. **378**, 48*P*, 1986
Steady-state analysis of ion fluxes in *Necturus* gall-bladder epithelial cells. **382**, 15, 1987
Transcellular sodium fluxes and pump activity in *Necturus* gall-bladder epithelial cells. **382**, 35, 1987
Pressure changes in canine gall-bladder associated with emptying. **393**, 545, 1987
Ganglion
Ganglionic depolarization and enhancement of muscarinic ganglionic excitatory mechanisms in the cat by vasoactive intestinal polypeptide. **364**, 41*P*, 1985
Intracellular studies of the electrophysiological properties of cultured intracardiac neurones of the guinea-pig. **388**, 349, 1987
Single calcium-activated potassium channels recorded from cultured rat sympathetic neurones. **389**, 337, 1987
Gap junction
Acetylcholine modulation of the conductance of intercellular junctions between rat lacrimal cells. **377**, 283, 1986
Dependence of junctional conductance on proton, calcium and magnesium ions in cardiac paired cells of guinea-pig. **382**, 193, 1987
The conductance of single gap junctional channels between cultured rat neonatal heart cells. **382**, 134*P*, 1987
Voltage-clamp analysis of a crayfish rectifying synapse. **386**, 91, 1987
Existence of calcium channels and intercellular couplings in the testosterone-secreting cells of the mouse. **393**, 647, 1987
Gas exchange
The on-line measurement of oxygen consumption and carbon dioxide excretion in man. **361**, 2*P*, 1985
The effects of histamine-induced bronchoconstriction on gas exchange in mild asthmatics. **371**, 239*P*, 1986
Breath-by-breath measurement of alveolar gas exchange? **378**, 67*P*, 1986
Effects of *in vivo* inhibition of red-cell anion exchange and Haldane effect on carbon dioxide output ($\dot{V}_{CO_2}$) in the dog lung. **390**, 245*P*, 1987
Gastric acid secretion
Canine bombesin-like gastrin releasing peptides stimulate gastrin release and acid secretion in the dog. **365**, 121, 1985
Gastrin response to a meal before and after cutting the extrinsic nerves of the stomach in the dog. **369**, 355, 1985
The effect of distension of the colon on gastric acid secretion in the anaesthetized rat. **378**, 21*P*, 1986
Does the vagus contain nerve fibres that inhibit gastric acid secretion in the rat? **381**, 105*P*, 1986
Release of 5-hydroxytryptamine by pentagastrin and its role in the 'fade' of stimulated gastric secretion in cats. **383**, 499, 1987
Gastric corpus
Characteristics of the vagally driven non-adrenergic, non-cholinergic inhibitory innervation of ferret gastric corpus. **363**, 1, 1985
Gastric emptying
Applied potential tomography – a new, non-invasive technique for measuring gastric emptying in man. **378**, 9*P*, 1986

Gastric emptying (*cont.*)
Isolated pyloric contractions (IPC) in man – a resistance to gastric emptying. **378**, 13*P*, 1986
The role of stomach emptying in short-term control of food intake in pigs. **378**, 25*P*, 1986
Regulation of gastric emptying by ileal nutrients in man. **378**, 110*P*, 1986
Gastric motility
Gastric tone modifies the responses to extrinsic neural stimuli in the anaesthetized ferret. **366**, 1, 1985
Neural control of electrical gastric activity in response to inflation of the antrum in the rabbit. **367**, 13, 1985
Effects of frequency on the wave form of propagated slow waves in canine gastric antral muscle. **371**, 179, 1986
Fasting motility in the divided stomach of the conscious dog. **378**, 22*P*, 1986
Modulation of the vagal drive to the intramural cholinergic and non-cholinergic neurones in the ferret stomach by baclofen. **388**, 25, 1987
Gastric mucosa
Transport of sodium and chloride across rat gastric mucosa *in vitro*. **360**, 293, 1985
Orientation of $(H^+ + K^+)$-ATPase membrane vesicles from rabbit resting and stimulated gastric mucosa. **371**, 136*P*, 1986
Potassium transport by bullfrog gastric mucosa. **371**, 137*P*, 1986
Preparation of isolated cells from rat gastric mucosa. **374**, 4*P*, 1986
Measurement of thromboxane release from rat isolated gastric mucosal cells. **374**, 46*P*, 1986
The effect of adrenergic, cholinergic and peptidergic salivary stimulants on gastric mucosal integrity in the rat. **380**, 329, 1986
The effects of omeprazole, an H^+/K^+-ATPase inhibitor, on ion transport in guinea-pig isolated gastric mucosa. **381**, 77*P*, 1986
Gastric mucosal blood flow
An autoradiographic technique for the focal measurement of gastric mucosal blood flow in the rat. **387**, 74*P*, 1987
Gastric secretion
Inhibition of acid formation by epidermal growth factor in the isolated rabbit gastric glands. **378**, 347, 1986
The effects of diphenylamine-2-carboxylate, a chloride channel blocker, on ion transport in guinea-pig isolated gastric mucosa. **378**, 75*P*, 1986
Gastric tone
Gastric tone modifies the responses to extrinsic neural stimuli in the anaesthetized ferret. **366**, 1, 1985
Importance of vagal input in maintaining gastric tone in the dog. **384**, 511, 1987
Gastrin
Canine bombesin-like gastrin releasing peptides stimulate gastrin release and acid secretion in the dog. **365**, 121, 1985
Gastrin response to a meal before and after cutting the extrinsic nerves of the stomach in the dog. **369**, 355, 1985
Gastrocnemius muscle
Competition between segmental nerves at end-plates in rat gastrocnemius muscle during loss of polyneuronal innervation. **381**, 351, 1986
Gastrointestinal hormone
Gastrin response to a meal before and after cutting the extrinsic nerves of the stomach in the dog. **369**, 355, 1985
Gastrointestinal motility
Slow wave heterogeneity within the circular muscle of the canine gastric antrum. **366**, 221, 1985
Gradient in excitation–contraction coupling in canine gastric antral circular muscle. **369**, 283, 1985
An Apple microcomputer counts and displays canine gastrointestinal spike potentials. **376**, 6*P*, 1986
Enteric neural regulation of slow waves in circular muscle of the canine proximal colon. **377**, 297, 1986
Interdigestive gastrointestinal motility in dogs. **378**, 2*P*, 1986
Motoneurones of the submucous plexus regulate electrical activity of the circular muscle of canine proximal colon. **380**, 293, 1986
A study of the effects of atropine and metoclopramide on erythromycin-induced gastrointestinal motility changes and emesis in the dog. **382**, 45*P*, 1987
Disruption of the jejunal migrating motor complex by gastric distension and feeding in the dog. **394**, 381, 1987
Gastrointestinal tract
Characteristics of the vagally driven non-adrenergic, non-cholinergic inhibitory innervation of ferret gastric corpus. **363**, 1, 1985
Discharge patterns of pudendal efferent fibres innervating the external anal sphincter of the cat. **368**, 471, 1985
Effect of 16,16-dimethyl prostaglandin E_2 on the myoelectric activity of the gastrointestinal tract of the opossum. **377**, 421, 1986
An animal model for investigating the effect of infused nutrients into the ileum, on stomach to caecum transit time (SCTT) using the rat. **378**, 14*P*, 1986
Responses of vagal efferent units modulated by gastrointestinal stimuli to central vagal stimulation in the ferret. **378**, 17*P*, 1986
The influence of intestinal infusion of fats on small intestinal motility and digesta transit in pigs. **379**, 27, 1986
The influence of gastrointestinal infusion of fats on regulation of food intake in pigs. **385**, 471, 1987
Non-cholinergic transmission in the guinea-pig inferior mesenteric ganglion (IMG) *in vitro* mediates a viscero-visceral reflex. **391**, 113*P*, 1987
Gating current
Gating current in giant barnacle (*Balanus nubilus*) muscle fibres. **371**, 268*P*, 1986
Effects of chemical modification of carboxyl groups on the gating current of the frog node of Ranvier. **394**, 48*P*, 1987

Giant axon, *see also* Squid axon
The admittance of the squid giant axon at radio frequencies and its relation to membrane structure. **360**, 275, 1985
Dual effects of internal *n*-alkyltrimethylammonium ions on the sodium current of the squid giant axon. **361**, 47, 1985
A giant axon preparation for the study of periaxonal ion regulation *in situ*; the squid *Alloteuthis*. **369**, 164*P*, 1985
The conductance and density of sodium channels in the cut-open squid giant axon. **377**, 463, 1986
Peptidergic modulation of the membrane potential of the Schwann cell of the squid giant nerve fibre. **379**, 61, 1986
Some properties of a serotonin-sensitive adenylate cyclase studied in the perfused squid axon. **382**, 144*P*, 1987
Calcium buffering in axons and axoplasm of *Loligo*. **383**, 369, 1987

Gill
Ionic permeabilities of the gill lamina cuticle of the crayfish, *Astacus leptodactylus* (E). **363**, 377, 1985

Glial cell
Ionic and electrophysiological properties of retinal Müller (glial) cells of the turtle. **362**, 79, 1985
Changes in sodium activity during light stimulation in photoreceptors, glia and extracellular space in drone retina. **362**, 415, 1985
The role of cyclic nucleotides in modulation of the membrane potential of the Schwann cell of squid giant nerve fibre. **363**, 151, 1985
Slow depolarizing response from supporting cells in the goldfish saccule. **366**, 107, 1985
Sequential activation of membrane ion-transporting systems during the response of glial cells to hyperosmotic solutions. **382**, 204*P*, 1987
Electrophysiological properties of ependymal cells (radial glia) in dorsal cortex of the turtle, *Pseudemys scripta*. **385**, 287, 1987
Sodium currents in axon-associated Schwann cells from adult rabbits. **386**, 181, 1987
The regulation of intracellular pH by identified glial cells and neurones in the central nervous system of the leech. **388**, 261, 1987
Slow depolarizing potentials recorded from glial cells in the rat superficial dorsal horn. **388**, 597, 1987
A monoclonal antibody that recognises a cell-surface antigen of neural crest-derived glial cells in the chick. **391**, 59*P*, 1987

Globulin
Binding of [^{51}Cr]ethylenediaminetetraacetate to proteins of human plasma. **374**, 117, 1986

Glomerular filtration rate
Glomerular filtration rate and plasma amino nitrogen in the conscious dog. **366**, 53*P*, 1985
Measurement of glomerular filtration rate in conscious rats: assessment of the osmotic minipump method. **387**, 13*P*, 1987

Glucagon
Effects of certain metabolites on pancreatic endocrine responses to stimulation of the vagus nerves in conscious calves. **362**, 303, 1985
Glucagon-like peptide 2 (GLP-2) in the porcine and human intestinal mucosa. **390**, 254*P*, 1987
Possible vagal control of enteroglucagon release in man. **391**, 85*P*, 1987

Glucocorticoid
The effect of 17α-hydroxyprogesterone and 11-epicortisol on the negative feedback effects of glucocorticoids in the rat. **376**, 17*P*, 1986
Effect of dexamethasone on quinine aversion in the Brattleboro rat. **387**, 78*P*, 1987
Adrenal cortical responses to vasoactive intestinal peptide in conscious hypophysectomized calves. **391**, 441, 1987

Gluconeogenesis
The effects of post-exercise glucose and alanine ingestion on plasma carnitine and ketosis in humans. **390**, 295, 1987

Glucose
Failure of glucose to affect ^{86}rubidium efflux and ^{45}calcium uptake of fetal rat pancreatic islets. **358**, 365, 1985
Post-exercise ketosis in post-prandial exercise: effect of glucose and alanine ingestion in humans. **358**, 395, 1985
Electrophysiological properties and glucose responsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 127, 1986
An amperometric enzyme electrode for measuring changes in brain glucose in the rat. **382**, 93*P*, 1987
Post-exercise glucose metabolism in human muscle during intravenous and oral glucose intake. **390**, 155*P*, 1987
The effects of oral glucose on cardiovascular responses to upright tilting in humans. **390**, 235*P*, 1987
Factors affecting the microclimate pH in rat jejunum. **392**, 113, 1987

Glucose transport
Redistribution of components of the hexose transfer system in erythrocytes with one-sided inhibition. **360**, 72*P*, 1985
Glucose transport in resealed human red cell ghosts. **390**, 202*P*, 1987

Glutaeus muscle
Topographical projections of segmental nerves to the frog glutaeus muscle during loss of polyneuronal innervation. **375**, 303, 1986

Glutamate
Permeability changes induced by L-glutamate in solitary retinal horizontal cells isolated from *Carassius auratus*. **358**, 153, 1985
Effects of L-glutamate on the anomalous rectifier potassium current in horizontal cells of *Carassius auratus* retina. **358**, 169, 1985
Clustering of single glutamate receptor-channel openings recorded from locust (*Schistocera gregaria*) muscle. **360**, 66*P*, 1985
Correlation between release of endogenous glutamate and long-term potentiation in the dentate gyrus of anaesthetized rats. **361**, 50*P*, 1985
Effect of excitatory amino acids on γ-aminobutyric acid release from frog horizontal cells. **362**, 51, 1985

Glutamate (*cont.*)
Post-synaptic calcium influx at the giant synapse of the squid during activation by glutamate. **369**, 183, 1985
Inhibition of Na-dependent glutamate uptake into barnacle muscle by glutamate analogues and guanidinium. **371**, 163*P*, 1986
Aspects of glutamate metabolism in late pregnancy and in labour in humans. **372**, 78*P*, 1986
Correlation between long-term potentiation and release of endogenous amino acids from dentate gyrus of anaesthetized rats. **377**, 391, 1986
Calcium permeability of the channels activated by *N*-methyl-D-aspartate (NMDA) in isolated mouse central neurones. **377**, 35*P*, 1986
Effects of excitatory amino acid antagonists on evoked and spontaneous excitatory potentials in guinea-pig hippocampus. **378**, 403, 1986
Neurotransmitter-induced currents in retinal bipolar cells of the axolotl, *Ambystoma mexicanum*. **387**, 125, 1987
A glutamate-activated carrier in glial cells isolated from the axolotl retina. **387**, 35*P*, 1987
Excitation of barnacle muscle by glutamate analogues and proctolin. **394**, 20*P*, 1987

Glutamate receptor
Giga-ohm recordings of glutamate receptor-gated channels from locust muscle *in vitro*. **361**, 16*P*, 1985
Correlating some biochemical, pharmacological and behavioural properties of dissociative anaesthetics and sigma opiates in the rat and cat. **364**, 34*P*, 1985
Differential effects of a spider toxin on glutamate receptors of rod on-bipolar cells and horizontal cells in dogfish retinal slice. **377**, 45*P*, 1986
Involvement of *N*-methyl-D-aspartate receptors in epileptiform bursting in the rat hippocampal slice. **380**, 175, 1986
Ion channels activated by excitatory amino acids in rat cultured cerebellar granule neurones. **390**, 75*P*, 1987

Glutamine
Glutamine transport in perfused liver of post-absorptive rats. **378**, 50*P*, 1986
Glutamine transport across the blood-facing membrane of perfused rat jejunum. **391**, 98*P*, 1987

Glycine
Action and localization of glycine and taurine in the cat retina. **362**, 395, 1985
Interactions of glycine receptor ligands in the normal mouse spinal cord. **373**, 21*P*, 1986
Voltage dependence of human brain glycine receptor-channels in *Xenopus* oocytes. **377**, 40*P*, 1986
Localization of glycine in spinal cord interneurones of *Xenopus* embryos. **377**, 87*P*, 1986
Synaptic physiology of spinal motoneurones of normal and *spastic* mice: an *in vitro* study. **379**, 275, 1986
Ionic and pharmacological properties of reciprocal inhibition in *Xenopus* embryo motoneurones. **382**, 463, 1987
Dual actions of glycine on dissociated mouse spinal neurones. **382**, 133*P*, 1987
The effects of glycine on interneurones in the nucleus tractus solitarius activated following electrical stimulation of cardiac and pulmonary vagal branches of the cat. **386**, 101*P*, 1987
Hypoglossal motoneurones in slices from guinea-pigs have both depolarizing and hyperpolarizing responses to glycine. **390**, 17*P*, 1987
Strychnine-like immunoreactivity in glutaraldehyde-fixed sections of mouse central nervous system. **390**, 23*P*, 1987

Glycogen
Control of the mobilization of fat-body glycogen as a fuel for locust flight. **366**, 122*P*, 1985
Regulation of glycogenolysis in flight muscle of the migratory locust. **366**, 123*P*, 1985
Opioid-noradrenergic interactions and the regulation of oxytocin secretion in the rat neurohypophysis. **382**, 182*P*, 1987
Changes in the amount of glycogen in the livers of fasted rats. **382**, 185*P*, 1987
The role of lactate as a source of liver glycogen in fasting. **384**, 30*P*, 1987
Development of fatigue and relative fibre glycogen content in rat skeletal muscle. **390**, 147*P*, 1987
The loss of glycogen from denervated muscle. **394**, 143*P*, 1987

Glycogenolysis
Skeletal muscle metabolism, contraction force and glycogen utilization during prolonged electrical stimulation in humans. **374**, 493, 1986

Glycolysis
Glycolysis and oxidative phosphorylation during activation of the sodium pump in the taenia from guinea-pig caecum. **381**, 65, 1986

Glycosaminoglycan
Studies of capsule and capsular space of cat muscle spindles. **376**, 281, 1986

Gonadotrophin
Augmented release of LH from gonadotrophs of androgen insensitive *tfm* mice. **371**, 180*P*, 1986
Neonatal naloxone or gonadotrophin releasing hormone treatment accelerates the onset of puberty in female rats. **386**, 76*P*, 1987

Gonadotrophin-releasing hormone
Rabbit preoptic neurones and luteinizing hormone release. **364**, 50*P*, 1985

Growth
Electrophysiological recording of ion channels in the growth cones of adult rat primary afferent neurones maintained in cell culture. **390**, 192*P*, 1987
Early post-natal growth of the intestine in the fieldfare (*Turdus pilaris*) and the quail (*Coturnix coturnix Japonica*). **390**, 253*P*, 1987

Growth hormone
Growth hormone releasing factor (GRF) in mice of the mutant 'Little' strain. **364**, 60*P*, 1985
The effect of thyroxine and human growth hormone on muscle and bone growth in the Snell dwarf mouse. **380**, 78*P*, 1986
The inhibition of growth hormone (GH) release by exogenous GH in the rat. **382**, 32*P*, 1987

Growth hormone (*cont.*)
Growth hormone (GH) and body growth responses to intermittent somatostatin (SS) infusions in the rat. **382**, 33*P*, 1987
Guanidinium
Interactions of guanidinium ions with sodium channels in frog myelinated nerve fibre. **391**, 85, 1987
Guanine nucleotide
Calcium channel currents and their inhibition by (−)-baclofen in rat sensory neurones: modulation by guanine nucleotides. **386**, 1, 1987
Guinea-pig
Angiotensin converting enzyme inhibition during the last quarter of gestation in the guinea-pig. **382**, 41*P*, 1987
The role of the sodium pump during prolonged end-plate currents in guinea-pig diaphragm. **384**, 377, 1987
H reflex
The effect of percutaneous motor cortex stimulation on H reflexes in muscles of the arm and leg in intact man. **377**, 333, 1986
Reflex excitability of human soleus motoneurones during voluntary shortening or lengthening contractions. **390**, 271, 1987
Evidence favouring presynaptic inhibition between antagonist muscle afferents in the human forearm. **391**, 71, 1987
Difference in the amplitude of the human soleus H reflex during walking and running. **392**, 513, 1987
Haemodynamics
Effect of isosorbide dinitrate on arterial haemodynamics in man. **365**, 93*P*, 1985
Blood flow to the respiratory and limb muscles and to abdominal organs during maximal exertion in ponies. **377**, 25, 1986
Haemoglobin
Direct and indirect determination of the CO_2 Bohr effect in human whole blood. **366**, 56*P*, 1985
A model of the H^+ and CO_2 Bohr and Haldane effects and their interactions in human haemoglobin. **366**, 108*P*, 1985
Changes in peripheral haematocrit and haemoglobin during water immersion in man. **371**, 70*P*, 1986
Haemoglobin substitution and oxygen-carrying capacity in the chloralose-anaesthetized dog. **380**, 39*P*, 1986
In vivo determination of changes in cerebral haemoglobin and cytochrome aa_3 oxygenation in rats by near infrared transmission spectrophotometry. **381**, 15*P*, 1986
A method of estimating the saturation of venous haemoglobin in man using an ear oximeter. **382**, 20*P*, 1987
Haemorrhage
Arterial pressure maintenance after haemorrhage in the pregnant rabbit. **366**, 17, 1985
Changes in vascular resistance following haemorrhage in the rat. **369**, 133*P*, 1985
The effect of pregnancy on the changes in hind-limb vascular resistance following haemorrhage in the rabbit. **372**, 63, 1986
Redistribution of [^{125}I] serum albumin and fluid in rats in haemorrhagic shock. **372**, 74*P*, 1986
Cardiovascular response to haemorrhage in anaesthetized Brattleboro rats infused with vasopressin. **373**, 70*P*, 1986
The cardiovascular effects of vasopressin after haemorrhage in anaesthetized rats. **375**, 421, 1986
The hypercoagulable response to haemorrhage in rabbits. **387**, 73*P*, 1987
The cardiovascular effects of haemorrhage in the anaesthetized rat linked to an extracorporeal circulation. **387**, 77*P*, 1987
Effect of prior treatment with naloxone on cardiovascular responses to acute haemorrhage in the conscious rabbit. **390**, 123*P*, 1987
Alkalosis and not acidosis accompanies early hyperkalaemia during haemorrhagic shock in cats. **392**, 95*P*, 1987
Haemostasis
Prolongation of bleeding time in rats by ADP receptor antagonists. **381**, 22*P*, 1986
Some very old experiments: the discovery of fibrinogen. **392**, 7*P*, 1987
Hair cell
Mechano-electrical transduction currents in isolated vestibular hair cells of the chick. **359**, 189, 1985
Efferent modulation of hair cell tuning in the cochlea of the turtle. **360**, 397, 1985
The mechanical properties of ciliary bundles of turtle cochlear hair cells. **364**, 359, 1985
Evidence for electrical resonant tuning in hair cells of the frog amphibian papilla. **364**, 39*P*, 1985
A method for measuring cellular movements less than the wavelength of light. **371**, 18*P*, 1986
Voltage oscillations and ionic currents in hair cells isolated from the apex of the chick's cochlea. **371**, 31*P*, 1986
The transduction channel of hair cells from the bull-frog characterized by noise analysis. **375**, 195, 1986
Kilohertz movements induced by electrical stimulation in outer hair cells isolated from the guinea-pig cochlea. **377**, 41*P*, 1986
The responses of hair cells in the basal turn of the guinea-pig cochlea to tones. **383**, 551, 1987
Variation of membrane properties in hair cells isolated from the turtle cochlea. **385**, 207, 1987
Gating properties of the mechano-electrical transducer channel in the dissociated vestibular hair cell of the chick. **387**, 589, 1987
A fast motile response in guinea-pig outer hair cells: the cellular basis of the cochlear amplifier. **388**, 323, 1987
A mechanically evoked current in outer hair cells isolated from the guinea-pig cochlea. **392**, 37*P*, 1987
Hair follicle afferent fibre
Excitatory actions of single impulses in single hair follicle afferent fibres on spinocervical tract neurones in the cat. **382**, 291, 1987

Hair follicle afferent fibre (*cont.*)
Actions of trains and pairs of impulses from single primary afferent fibres on single spinocervical tract cells in cat. **382**, 313, 1987
An intracellular study of spinocervical tract cell responses to natural stimuli and single hair afferent fibres in cats. **382**, 331, 1987
Hair growth
Hair-growth-promoting properties of dermal papilla cells in the rat. **380**, 48*P*, 1986
Hand
Discharge in muscle spindle afferents related to direction of slow precision movements in man. **362**, 437, 1985
Naloxone increases blood flow in the human hand. **363**, 315, 1985
Head
The sagittal vestibulocollic reflex and its interaction with neck proprioceptive afferents in the decerebrate cat. **359**, 17, 1985
Hearing, *see also* Auditory -
AM modulation rate discrimination in human hearing. **358**, 32*P*, 1985
Amplitude-modulation rate discrimination in human hearing: at 250 Hz and compared with other carrier frequencies. **365**, 41*P*, 1985
Human detectability of simple non-sinusoidal frequency modulations (FM) and amplitude modulations (AM) of sounds. **371**, 40*P*, 1986
A fast motile response in guinea-pig outer hair cells: the cellular basis of the cochlear amplifier. **388**, 323, 1987
Heart, *see also* Cardiac -
Transient responses of coronary flow in the blood-perfused isolated rat heart submitted to changes in oxygen content. **358**, 321, 1985
Time-dependent activation of the potassium inward rectifier I_{K1} on isolated guinea-pig cardiac cells. **358**, 52*P*, 1985
Estimation of baroreflex sensitivity in the conscious rat: the influence of recording site. **358**, 122*P*, 1985
Pressure development in isolated rat and rabbit left ventricle during and after controlled volume stretches during systole. **360**, 62*P*, 1985
The effect of long-term bradycardial pacing on maximal oxygen consumption and volume density of mitochondria in isolated rabbit hearts. **361**, 76*P*, 1985
Modulation of slow response excitability by calcium in rabbit atrial trabeculae. **363**, 237, 1985
Does left ventricular pressure influence the coronary pressure-flow relation in the cat? **366**, 42*P*, 1985
Coronary venous P_{O_2} and oxygen tissue distribution in a network model of the microcirculation. **366**, 45*P*, 1985
Inhibition by aspirin of bradykinin-induced prostacyclin production in man. **366**, 54*P*, 1985
Some functional and structural changes in hypertrophied myocardium of trained rats. **366**, 72*P*, 1985
Serum increases contractile force in the isolated frog ventricle and the rat heart. **367**, 81*P*, 1985
Neurones in the brain stem of the cat excited by vagal afferent fibres from the heart and lungs. **369**, 1, 1985
The effects of creatine phosphate, ATP and ADP on mechanical properties of chemically 'skinned' rat papillary muscles. **369**, 76*P*, 1985
Effects of hexanol on electrical and mechanical activities of the frog atrium. **369**, 77*P*, 1985
Cutaneous vasomotor reflexes following spinal cord injury in man. **369**, 134*P*, 1985
Effect of thyroid state on the heart mitochondria in the rat. **369**, 187*P*, 1985
Extravascular shunting of oxygen in the isolated saline-perfused rabbit heart. **371**, 68*P*, 1986
Early cardiovascular stress irreversibly alters heart structure and function in the rat. **371**, 76*P*, 1986
Cardiac effects of chronic ethanol ingestion in the ageing rat. **371**, 81*P*, 1986
Qualitative differences in atrial and ventricular inotropic responses to cholinergic stimulation in the dog. **371**, 252*P*, 1986
Effect of β-adrenergic blockade on shortening of 'marginally ischaemic' myocardium during classical appetitive conditioning in baboon. **371**, 253*P*, 1986
Sodium/calcium exchange and intracellular calcium buffering in ferret myocardium: an ion-sensitive micro-electrode study. **373**, 163, 1986
Spontaneous activity in isolated hearts of deep sea fish from 900 and 4000 m depths, 90 and 400 atm pressure: preliminary results of *Challenger* Cruise 6B/85. **377**, 115*P*, 1986
Reversible MM-creatine kinase binding to Triton-treated isolated rat papillary muscles. **377**, 117*P*, 1986
Sustained heart function at low ATP and PCr levels: a ^{31}P-NMR study in isolated perfused rat heart. **377**, 118*P*, 1986
An investigation of chloride–bicarbonate exchange in the sheep cardiac Purkinje fibre. **379**, 377, 1986
Accumulation of inositol phosphates in isolated rat heart following α_1-adrenergic, muscarinic and electrical stimulation. **381**, 93*P*, 1986
A miniature detector for long term on-line studies of left ventricular function. **384**, 8*P*, 1987
In utero right ventricular output in the fetal lamb: the effect of heart rate. **387**, 297, 1987
Increased afterload shortens the absolute refractory period of the *in situ* left ventricle of the anaesthetized pig. **387**, 7*P*, 1987
Influence of calcium and adrenaline on post-extrasystolic potentiation in human and guinea-pig isolated ventricular muscle. **387**, 80*P*, 1987
The detection of Coxsackie B virus in human myocardial biopsy samples by molecular hybridization. **387**, 81*P*, 1987
Intracellular studies of the electrophysiological properties of cultured intracardiac neurones of the guinea-pig. **388**, 349, 1987
Phorbol esters increase the rate of spontaneous beating in cultured neonatal rat cardiac myocytes. **390**, 67*P*, 1987

Heart (*cont.*)
Different haemodynamic responses to inotropic stimulation of the right and the left side of the pig heart. **390**, 115*P*, 1987
The sensitivity of thallium exercise scintigraphy in coronary artery disease in man. **390**, 117*P*, 1987
The contribution of intracellular acidosis to the decline of developed pressure in ferret hearts exposed to cyanide. **391**, 99, 1987
Enzymic release of hypotensive and spasmogenic activity in dog hearts. **392**, 93*P*, 1987
The fade of the response to acetylcholine at the rabbit isolated sino-atrial node. **393**, 171, 1987
Isovolumic contraction produces different electrical restitution curves from different areas of the intact isolated rabbit ventricle. **394**, 35*P*, 1987
The effect of acetylcholine (ACh) on isolated ferret ventricular muscle preparations. **394**, 41*P*, 1987
Electromechanical alternans in isolated Langendorf perfused rabbit heart. **394**, 139*P*, 1987

Heart rate
Heart-rate pattern in man is not just determined by mean heart rate. **358**, 127*P*, 1985
Effect of autacoid antagonists on vagal cardio-acceleration in the dog. **366**, 39*P*, 1985
Maximum functional heart rate during exercise and its prediction from the respiratory exchange ratio. **367**, 51*P*, 1985
An autoradiographic and ionophoretic study of muscarinic receptors in the dorsomedial medulla of the rabbit. **371**, 119*P*, 1986
The effect of heart rate on *in utero* left ventricular output in the fetal sheep. **372**, 557, 1986
The contribution of cardiac contractile frequency to cardiac pumping performance during right ventricular pacing in man. **373**, 49*P*, 1986
The role of the reflex increase in heart rate in the reflex natriuresis and diuresis to stimulation of atrial receptors in dogs with different blood volumes. **373**, 53*P*, 1986
The effects of electrical stimulation of myelinated and non-myelinated vagal fibres on heart rate in the rabbit. **380**, 341, 1986
Triggered activity in atrial fibres of canine coronary sinus: role of extracellular potassium accumulation and depletion. **383**, 191, 1987
Cardiovascular responses at the onset of exercise with partial neuromuscular blockade in cat and man. **384**, 39, 1987
Respiratory sinus arrhythmia in new-born infants. **385**, 1, 1987
In utero right ventricular output in the fetal lamb: the effect of heart rate. **387**, 297, 1987
Epidural anaesthesia and cardiovascular responses to dynamic exercise in man. **390**, 112*P*, 1987
Thermal adaptation of cardiac tissue in carp (*Cyprinus carpio*). **392**, 114*P*, 1987

Heart rate reflex
Rapid resetting of rabbit aortic baroreceptors and reflex heart rate responses by directional changes in blood pressure. **378**, 391, 1986

Heat production, *see* Thermogenesis

Helium pressure
The physiological effects of hydrostatic pressure are not equivalent to those of helium pressure on *Rana pipiens*. **362**, 233, 1985

Hemicholinium-3
Characterization of choline transport at maternal and fetal interfaces of the perfused guinea-pig placenta. **366**, 251, 1985
Quantal analysis of action of hemicholinium-3 studied at a central cholinergic synapse of *Aplysia*. **380**, 209, 1986

Hemilabyrinthectomy
Vestibular control of neck muscles in acute and chronic hemilabyrinthectomized cats. **366**, 281, 1985

Hepatic blood flow
Hepatic blood flow and oxygen consumption in the sheep during fetal, neonatal and adult life. **374**, 28*P*, 1986
Capacitance of the rabbit portal vein and inferior vena cava. **381**, 417, 1986

Hering–Breuer reflex
The effects of expiratory pressure, hypoxia and hypercapnia on respiratory muscle activity in response to positive pressure inflation in lambs – Hering & Breuer reflexes revisited. **371**, 106*P*, 1986

High pressure, *see also* Pressure
Does decompression cause the hyperbaric-induced subfertility observed in male mice? **369**, 120*P*, 1985
The effect of kynurenic acid on the high-pressure neurological syndrome in the rat. **371**, 64*P*, 1986
The use of strychnine as a model for the design of drugs to combat the action of pressure on mice. **381**, 101*P*, 1986
A method for studying the high pressure neurological syndrome in the baboon. **384**, 11*P*, 1987
The effect of increased ambient pressure on motoneurone excitability in the rat. **394**, 104*P*, 1987

Hippocampus
GABA responses in CA1 pyramidal neurones in slices of the kainic acid (KA) lesioned rat hippocampus. **358**, 21*P*, 1985
Modulation of hippocampal CA1 pyramidal cell activity by mesencephalic brain areas A9 and A10 in the rat. **358**, 44*P*, 1985
Septo-temporal distribution of medial and lateral perforant path innervation of rat hippocampus and capacity to support long-term potentiation (LTP). **358**, 45*P*, 1985
Comparison of the action of baclofen with γ-aminobutyric acid on rat hippocampal pyramidal cells *in vitro*. **360**, 161, 1985
Enhancement of long-term potentiation in the rat dentate gyrus by post-trial stimulation of the reticular formation. **360**, 215, 1985
Cholinergic innervation of rat hippocampal slice cultures by co-cultured septum. **360**, 34*P*, 1985
Components of Ca-activated K current in rat hippocampal neurones *in vitro*. **362**, 23*P*, 1985
Heterosynaptic changes accompany long-term but not short-term potentiation of the perforant path in the anaesthetized rat. **363**, 335, 1985

Hippocampus (*cont.*)
Adenosine actions on CA1 pyramidal neurones in rat hippocampal slices. **366**, 119, 1985
γ-Aminobutyric acid uptake and the termination of inhibitory synaptic potentials in the rat hippocampal slice. **366**, 387, 1985
Selective impairment of learning and blockade of long-term potentiation in rats by an *N*-methyl-D-aspartate receptor antagonist, APV-5. **367**, 31*P*, 1985
Long-term changes in hippocampal physiology and learning ability of rats after intrahippocampal tetanus toxin. **368**, 343, 1985
Adenosine increases synaptic facilitation in the *in vitro* rat hippocampus: evidence for a presynaptic site of action. **369**, 365, 1985
A high-resolution data-capture and analysis system applied to intracellularly recorded synaptic potentials. **369**, 6*P*, 1985
An automated system for the analysis of evoked extracellular potentials recorded from the hippocampus. **369**, 7*P*, 1985
Synaptic organization of the longitudinal association path of the guinea-pig hippocampus. **369**, 54*P*, 1985
Tachykinins excite non-pyramidal neurones in rat hippocampus. **371**, 50*P*, 1986
Actions of noradrenaline recorded intracellularly in rat hippocampal CA1 pyramidal neurones, *in vitro*. **372**, 221, 1986
Cyclic adenosine 3′,5′-monophosphate mediates β-receptor actions of noradrenaline in rat hippocampal pyramidal cells. **372**, 245, 1986
γ-Aminobutyric acid hyperpolarizes rat hippocampal pyramidal cells through a calcium-dependent potassium conductance. **373**, 181, 1986
Excitatory synaptic interactions between CA3 neurones in the guinea-pig hippocampus. **373**, 397, 1986
Demonstration of a NMDA receptor-mediated component of synaptic transmisssion during tetanic stimulation in isolated rat hippocampal slices. **374**, 41*P*, 1986
Correlation between long-term potentiation and release of endogenous amino acids from dentate gyrus of anaesthetized rats. **377**, 391, 1986
Calcium and long-term transmission damage following anoxia in dentate gyrus and CA1 regions of the rat hippocampal slice. **378**, 313, 1986
Tachykinins and bombesin excite non-pyramidal neurones in rat hippocampus. **379**, 417, 1986
Involvement of *N*-methyl-D-aspartate receptors in epileptiform bursting in the rat hippocampal slice. **380**, 175, 1986
Evidence for the cholecystokinin (CCK) fragments CCK-8S, CCK-4 and pentagastrin sharing a common site of action on rat hippocampal CA1 neurones *in vitro*. **381**, 48*P*, 1986
Effects of D-2-amino-5-phosphonovalerate (D-APV) on bursting activity recorded intracellularly from the kainic acid lesioned rat hippocampus *in vitro*. **382**, 77*P*, 1987
Non-dopaminergic projections from the substantia nigra and the ventral tegmental area to the hippocampus in the rat. **382**, 172*P*, 1987
Presynaptic action of neuropeptide Y in area CA1 of the rat hippocampal slice. **383**, 285, 1987
Thresholds of action potentials evoked by synapses on the dendrites of pyramidal cells in the rat hippocampus *in vitro*. **383**, 509, 1987
Voltage-clamp analysis of somatic γ-aminobutyric acid responses in adult rat hippocampal CA1 neurones *in vitro*. **384**, 27, 1987
Effects of hypoxia on rat hippocampal neurones *in vitro*. **384**, 131, 1987
The action of ketamine on excitatory synaptic transmission in the dentate gyrus of the guinea-pig maintained *in vitro*. **384**, 71*P*, 1987
Action potential repolarization and a fast after-hyperpolarization in rat hippocampal pyramidal cells. **385**, 733, 1987
Chemical and post-synaptic modulation of the induction of synaptic potentiation in guinea-pig hippocampus *in vitro*. **386**, 29*P*, 1987
Inhibitory control of local excitatory circuits in the guinea-pig hippocampus. **388**, 611, 1987
Long-lasting induction of an evoked network burst in rat hippocampal CA3 neurones *in vitro*. **388**, 50*P*, 1987
Properties of two calcium-activated hyperpolarizations in rat hippocampal neurones. **389**, 187, 1987
Injection of protein kinase C in rat hippocampal pyramidal cells *in vitro* induces plastic changes similar to long-term potentiation. **390**, 18*P*, 1987
Calcium current activation kinetics in isolated pyramidal neurones of the CA1 region of the mature guinea-pig hippocampus. **392**, 603, 1987
Outward currents of single hippocampal cells obtained from the adult guinea-pig. **393**, 331, 1987
Pharmacologically distinct actions of serotonin on single pyramidal neurones of the rat hippocampus recorded *in vitro*. **394**, 99, 1987
Long-term potentiation involves enhanced synaptic excitation relative to synaptic inhibition in guinea-pig hippocampus. **394**, 367, 1987
Properties of a frequency-dependent NMDA receptor-mediated synaptic potential in rat hippocampus *in vitro*. **394**, 116*P*, 1987
NMDA receptor involvement in synaptic potentials evoked by low-frequency stimulation in rat hippocampus *in vitro*. **394**, 151*P*, 1987
Functional feed-forward synaptic inhibition of CA1 pyramidal cells in the rat hippocampus *in vitro*. **394**, 157*P*, 1987

Histamine
The release of histamine by parasympathetic stimulation in guinea-pig auricle and rat ileum. **371**, 29, 1986
Inhibition of acid formation by epidermal growth factor in the isolated rabbit gastric glands. **378**, 347, 1986
The secretory actions of histamine in rat small intestine. **388**, 521, 1987

Histamine secretion
Some characteristics of histamine secretion from rat peritoneal mast cells stimulated with nerve growth factor. **372**, 379, 1986
History
Bayliss–Starling Memorial Lecture (1985). Reminiscences of a physiologist, 50 years after. **370**, 1, 1986
St Thomas's and 'The Headquarters of the Physiologists': a brief history of the Brown Animal Sanatory Institution. **372**, 11*P*, 1986
Sir Henry Wellcome, FRS (1853–1936): aspects of his life. **382**, 2*P*, 1987
Sir Henry Dale: a filmed interview. **382**, 3*P*, 1987
Fifty years after Loewi and Dale's Nobel prize: illustrations of Loewi's fundamental discovery of 'Vagusstoff' release in the frog's heart. **382**, 4*P*, 1987
Studies on the autonomic innervation of the viscera of fishes. **382**, 6*P*, 1987
Studies of muscle and nerve 1957–1960 with an electron microscope provided by the Wellcome Trust at the Physiological Laboratory, University of Cambridge. **382**, 7*P*, 1987
The first Wellcome medical trustees: Dale and Elliott and their early collaboration. **382**, 29*P*, 1987
Homovanillic acid
Effects of light reversal on the circadian pattern of motor activity and voltammetric signals recorded in rat forebrain. **374**, 91, 1986
Horizontal cell, *see* Retinal horizontal cell
Hormone receptor
Binding of triiodothyronine by fully differentiated rat enterocytes. **376**, 267, 1986
Horseradish peroxidase
Afferent and efferent connexions of the uvula in the rabbit. **369**, 178*P*, 1985
Lamina VIII interneurones interposed in crossed reflex pathways in the cat. **371**, 147, 1986
Post-natal development of the retinal and cerebellar projections onto the lateral suprasylvian area in the cat. **383**, 729, 1987
Human
Activation of the human diaphragm from the motor cortex. **384**, 109, 1987
Human skin
Direct evidence of neurally mediated vasodilatation in hairy skin of the human foot. **382**, 105, 1987
Huntington's disease
Reduced pyruvate and 2-oxoglutarate dehydrogenase activity in the Huntington's disease putamen. **358**, 37*P*, 1985
Hydraulic conductance
Effect of fluid pressure on the hydraulic conductance of interstitium and fenestrated endothelium in the rabbit knee. **360**, 311, 1985
Hydrocarbon
The actions of some general anaesthetics on the potassium current of the squid giant axon. **373**, 311, 1986
Hydrogen ion, *see also* Intracellular pH, pH
Respiratory responses to medullary hydrogen ion changes in cats: different effects of respiratory and metabolic acidoses. **358**, 285, 1985
Sodium-dependent control of intracellular pH in Purkinje fibres of sheep heart. **359**, 81, 1985
Ambulatory monitoring of gastro-intestinal pH in man using a radiotelemetry capsule and new solid-state recorder. **361**, 4*P*, 1985
Long-term gastric pH profiles in ambulatory human subjects and the effects of gastric acid inhibitors. **361**, 54*P*, 1985
Mechanotransducer ion channels in chick skeletal muscle: the effects of extracellular pH. **363**, 119, 1985
A dual mechanism for intracellular pH regulation by leech neurones. **364**, 327, 1985
Correlation of tissue pH and neuronal excitability during respiratory acidosis and alkalosis in the hippocampal formation of rats. **366**, 60*P*, 1985
The effect of amiloride on intracellular sodium, intracellular pH and tension in voltage-clamped sheep cardiac Purkinje fibres. **369**, 78*P*, 1985
Regulation of alkali excretion in the turtle. **371**, 100*P*, 1986
Cytosolic pH regulation of the resting and stimulated isolated gastric parietal cell from the rabbit. **371**, 151*P*, 1986
Inhibition of Na/H exchange by external divalent cations in frog skeletal muscle. **371**, 152*P*, 1986
Calculation of steady-state pH_i from pH_i changes caused by weak acids and bases in snail neurones. **371**, 153*P*, 1986
Measurement of intracellular pH in identified leech glial cells using double-barrelled micro-electrodes. **371**, 154*P*, 1986
The effect of stimulation frequency upon intracellular pH, intracellular sodium and tension in sheep cardiac Purkinje fibres. **371**, 171*P*, 1986
The regulation of intracellular pH in rat superior cervical ganglion cells grown in tissue culture. **376**, 38*P*, 1986
A Ca-antagonist inhibits the intracellular acidification observed during stimulation of isolated sheep cardiac Purkinje fibres. **377**, 114*P*, 1986
On the mechanism by which changes in extracellular pH affect the electrical activity of the rabbit sino-atrial node. **381**, 181, 1986
Brain intracellular pH and metabolism during hypercapnia and hypocapnia in the new-born lamb. **382**, 1, 1987
The influence of pH_i on twitch tension in isolated guinea-pig papillary muscle. **382**, 109*P*, 1987
The effect of zinc on calcium and hydrogen ion currents in snail neurones. **382**, 129*P*, 1987
The effect of depolarization and external buffers on the surface pH of voltage-clamped snail neurones. **382**, 130*P*, 1987
Phosphate transport in brush-border membranes from control and rachitic pig kidney and small intestine. **384**, 479, 1987
Dynamics of medullary hydrogen ion and respiratory responses to square-wave change of arterial carbon dioxide in cats. **385**, 627, 1987

Hydrogen ion (*cont.*)
Proton-induced transformation of calcium channel in chick dorsal root ganglion cells. **386**, 603, 1987
Influence of sodium–hydrogen exchange on intracellular pH, sodium and tension in sheep cardiac Purkinje fibres. **390**, 93, 1987
Voltage-dependent intracellular pH in *Helix aspersa* neurones. **390**, 433, 1987
Procaine and 4-aminopyridine increase both pH_i and intracellular buffering power in snail neurones. **391**, 79*P*, 1987
Greater hydrogen ion-induced depression of tension and velocity in skinned single fibres of rat fast than slow muscles. **393**, 727, 1987
Intracellular pH and calcium effects on sodium conductance and transport in isolated frog skin epithelium. **394**, 92*P*, 1987
Any parameter which is affected by intracellular pH can be used to measure the absolute level of pH_i. **394**, 137*P*, 1987

Hydrogen ion transport
Regulation of intracellular pH in reticulospinal neurones of the lamprey, *Petromyzon marinus*. **381**, 241, 1986

Hydrostatic pressure
The physiological effects of hydrostatic pressure are not equivalent to those of helium pressure on *Rana pipiens*. **362**, 233, 1985

5-Hydroxytryptamine
A calcium-dependent reversible permeability increase in microvessels in frog brain, induced by serotonin. **361**, 103, 1985
Intracerebral dialysis of the rat frontal cortex. **361**, 14*P*, 1985
The central location of the sympathc-inhibitory action of 5-hydroxytryptamine given intracerebroventricularly (i.c.v.) in the cat. **365**, 29*P*, 1985
The action of cobalt ions on the response of the C1 neurone of *Helix aspersa* to 5-hydroxytryptamine. **365**, 84*P*, 1985
The lack of effect of 5-hydroxytryptamine on unitary calcium currents recorded from the C1 neurone of *Helix aspersa*. **367**, 65*P*, 1985
Effect of 5-hydroxytryptamine on oxytocin release in anaesthetized lactating rats. **369**, 128*P*, 1985
Cellular localization of serotonin by glyoxylic acid condensation in *Lymnaea*. **369**, 169*P*, 1985
Co-existence of 5-hydroxytryptamine (5-HT) and a substance P-like peptide in nerve terminals in the heart of *Helix aspersa*, and the actions of 5-HT and substance P (SP) on cAMP production in the heart. **369**, 170*P*, 1985
Effect of serotonin on the *in vitro* cardiac performance in *Octopus vulgaris*. **369**, 186*P*, 1985
Voltage dependence of 5-hydroxytryptamine release at a synapse between identified leech neurones in culture. **372**, 191, 1986
Oscillatory properties of guinea-pig inferior olivary neurones and their pharmacological modulation: an *in vitro* study. **376**, 163, 1986
Does endogenous neuronal 5-hydroxytryptamine influence canine intestinal motility? **376**, 49*P*, 1986
Circadian variation in sensitivity of suprachiasmatic and lateral geniculate neurones to 5-hydroxytryptamine in the rat. **377**, 1, 1986
5-Hydroxytryptamine decreases the sensitivity of nicotinic acetylcholine receptor in bull-frog sympathetic ganglion cells. **380**, 93, 1986
Stimulation of raphe (obscurus) nucleus causes long-term potentiation of phrenic nerve activity in cat. **381**, 169, 1986
Cholinergic modulation of the spontaneous release of 5-hydroxytryptamine (5-HT) from the enterochromaffin cells of the *in vitro* vascularly perfused guinea-pig ileum. **381**, 104*P*, 1986
Effects of serotonin in rat hippocampus *in vitro*: differential responsiveness of CA_1 neurones along the septo-temporal axis. **381**, 112*P*, 1986
Release of 5-hydroxytryptamine by pentagastrin and its role in the 'fade' of stimulated gastric secretion in cats. **383**, 499, 1987
Serotonin simultaneously induces and inhibits separate K-conductances in rat hippocampal neurones *in vitro*. **384**, 19*P*, 1987
The effects of photoperiod on the sensitivity of rat hippocampal neurones to iontophoresed 5-HT. **384**, 72*P*, 1987
Effects of 5-hydroxytryptamine (5-HT) in the isolated, hemisected spinal cord of the neonate rate. **390**, 44*P*, 1987
5-Hydroxytryptamine (5-HT) responses in adult rat dorsal root ganglion (DRG) neurones *in vitro*. **390**, 256*P*, 1987
The role of membrane depolarization in the contractile response of the rabbit basilar artery to 5-hydroxytryptamine. **392**, 333, 1987
Pharmacologically distinct actions of serotonin on single pyramidal neurones of the rat hippocampus recorded *in vitro*. **394**, 99, 1987

Hyperaemia
The time course and magnitude of blood flow changes in the human quadriceps muscles following isometric contraction. **377**, 445, 1986
Appearance of adenosine in venous blood from the contracting gracilis muscle and its role in vasodilatation in the dog. **387**, 401, 1987

Hypercapnia
Enlargement of the rat carotid body in chronic hypercapnia. **364**, 67*P*, 1985
Effects of hypercapnia and hypoxia on nasal vasculature and airflow resistance in the anaesthetized dog. **373**, 261, 1986
Role of large arteries in regulation of blood flow to brain stem in cats. **387**, 115, 1987

Hyperglycaemia
Phentolamine hyperglycaemia in cats. **366**, 25*P*, 1985
Hyperglycaemia and glucose transport across the rat small intestine. An *in vitro* and *in vivo* study. **376**, 36*P*, 1986
Do drugs causing catalepsy on injection into the cerebral ventricles also cause hyperglycaemia? **378**, 81*P*, 1986

Hyperglycaemia (*cont.*)
Ethyl chloride hyperglycaemia in the cat. **390**, 190*P*, 1987

Hyperosmolarity
Calcium and hypertonicity on m.e.p.p. frequency and distribution in time. **369**, 165*P*, 1985

Hypertension
Sino-aortic denervation in the monkey. **360**, 423, 1985
Daily variations in B.P. during adrenal regeneration in rats. **371**, 93*P*, 1986
Effects of lesions of the mid-brain periaqueductal grey matter on the development of hypertension in spontaneously hypertensive rats. **373**, 92*P*, 1986
Altered electrical parameters of isolated human nasal cells in essential hypertension. **384**, 60*P*, 1987
Effect of sequential α_1- and α_2-adrenoceptor antagonism on blood pressure (B.P.) in rats with adrenal regeneration hypertension. **386**, 51*P*, 1987

Hypertonicity
Changes in miniature end-plate potentials due to moderate hypertonicity at the frog neuromuscular junction. **376**, 1, 1986
The effects of hypertonicity on tension and intracellular calcium concentration in ferret ventricular muscle. **383**, 425, 1987

Hypertrophy
Biochemical changes in the right ventricle resulting from bleomycin-induced lung fibrosis in the rabbit: a model of cardiac hypertrophy. **371**, 28*P*, 1986
Human muscle strength training: the effects of three different regimes and the nature of the resultant changes. **391**, 1, 1987

Hypoglycaemia
The effect of insulin-induced hypoglycaemia on gastrointestinal motility in man. **373**, 33*P*, 1986
An investigation of the thresholds for hypoglycaemic responses in normal man. **382**, 184*P*, 1987

Hypotension
Effects of the renin–angiotensin system on the reflex response of the adrenal medulla to hypotension in the dog. **373**, 343, 1986
Cardiovascular effects of lipid and protein meals in autonomic failure. **377**, 62*P*, 1986
Insulin-induced hypotension in autonomic failure during euglycaemia in man. **382**, 36*P*, 1987

Hypothalamic neurone
An analysis of the discharge patterns of rat diencephalic neurones. **376**, 54*P*, 1986
Diurnal- and behaviour-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 201, 1987
Feeding- and chemical-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 221, 1987

Hypothalamus
A mechanism attenuating hypothalamic-induced sympatho-excitatory pressor effect in cat. **358**, 124*P*, 1985
Synaptic excitation and inhibition in the lateral hypothalamus following stimulation of the neural stalk in the rat. **361**, 30*P*, 1985
Presynaptic autoreceptors inhibit [^{3}H]GABA release from neurone terminals in the median eminence of the rat. **362**, 24*P*, 1985
Hypothalamic thermosensitivity in capsaicin-desensitized rats. **363**, 227, 1985
Neonatal exposure to testosterone potentiates electrically stimulated gonadotrophin secretion in adult female rats. **364**, 53*P*, 1985
Hypothalamic oestradiol and progesterone receptors in Zucker rats. **365**, 115*P*, 1985
Hypothalan e obesity: normal satiety signals but permanent dysfunction of CNS control of gastric emptying. **367**, 57*P*, 1985
Effects of hypothalamic lesions upon proceptivity and sexual receptivity in female marmosets (*Callithrix jacchus*). **369**, 118*P*, 1985
A method for recording single-unit neuronal activity in conscious sheep. **371**, 10*P*, 1986
A method for neurochemical sampling, using intracranial dialysis, in the conscious sheep. **371**, 11*P*, 1986
The effect of fasting in female rats on the electrical activity of preoptic and anterior hypothalamic (PO/AH) neurones and their response to ventral noradrenergic tract (VNAT) stimulation. **371**, 187*P*, 1986
Opioid binding in the rat hypothalamus is sexually differentiated. **371**, 212*P*, 1986
Intracellular analysis of control of rat supraoptic neurone (SON) activity *in vitro* by acetylcholine (ACh). **371**, 216*P*, 1986

Hypothalamus
Local synaptic networks involved in neuronal thermosensitivity in hypothalamic tissue slices. **371**, 279*P*, 1986
Projections of oestrogen-sensitive neurones from the ventromedial hypothalamic nucleus of the female rat. **372**, 207, 1986
An *in vitro* preparation of rat perfused/perifused hypothalamus for studying the secretion of various hypothalamic releasing and inhibiting hormones. **372**, 65*P*, 1986
Iontophoretic application of naloxone in female rats changes the response of neurones in the medial preoptic area (MPOA) to stimulation of the ventral noradrenergic tract (VNAT). **378**, 47*P*, 1986
An electrophysiological study of arcuate neurones activated by carotid body chemoreceptor stimulation in the anaesthetized rat. **378**, 71*P*, 1986
Suppression of non-shivering thermogenesis in the rat by heat-seeking behaviour during cold exposure. **380**, 541, 1986
Voltage-activated sodium and calcium currents recorded from cultured neurones of the supraoptic area of the rat hypothalamus. **382**, 126*P*, 1987
Endogenous bursting by rat supraoptic neuroendocrine cells is calcium dependent. **384**, 451, 1987

Hypothalamus (*cont.*)
Isoperiodic bursting by magnocellular neuroendocrine cells in the rat hypothalamic slice. **384**, 467, 1987
Reserpine, vagal adrenergic activity and stress-induced acute gastric mucosal injury in the rat. **392**, 363, 1987

Hypothermia
Effects of fluctuating skin temperature on thermoregulatory responses in man. **378**, 241, 1986
Human thermal responses during leg-only exercise in cold water. **391**, 399, 1987

Hypothyroidism
Capillarity, oxidative capacity and fibre composition of the soleus and gastrocnemius muscles of rats in hypothyroidism. **361**, 281, 1985

Hypovolaemia
The influence of polyethylene glycol-induced hypovolaemia on inulin and p-aminohippurate clearances in conscious Brattleboro rats. **360**, 57*P*, 1985
Factors affecting the maintenance of blood pressure in Long Evans rats made hypovolaemic by subcutaneous injection of polyethylene glycol. **369**, 124*P*, 1985

Hypoxia
Adrenomedullary function in the neonatal rat: responses to acute hypoxia. **358**, 1, 1985
Respiratory effects of sectioning the carotid sinus glossopharyngeal and abdominal vagal nerves in the awake rat. **361**, 35, 1985
A nuclear magnetic resonance study of metabolism in the ferret heart during hypoxia and inhibition of glycolysis. **361**, 185, 1985
Hypoxia releases a vasoconstrictor substance from the canine vascular endothelium. **364**, 45, 1985
The effect of hypoxia from birth on the biphasic respiratory response of the new-born rat to acute hypoxia. **366**, 59*P*, 1985
The effect of hypoxaemia on scalp blood flow in the fetal lamb measured by the laser Doppler technique. **366**, 115*P*, 1985
Determinants of human maximal exercise at extreme altitudes. **371**, 123*P*, 1986
The changes in intracellular milieu accompanying fatigue or hypoxia depress the contractile machinery of rabbit skeletal and guinea-pig cardiac muscle fibres. **371**, 174*P*, 1986
The effect of hypoxia on temperature regulation: a comparative study. **371**, 222*P*, 1986
The changes of intracellular pH during hypoxia and recovery from hypoxia in cardiac tissue from ferret and sheep. **371**, 255*P*, 1986
Factors influencing an increase in spontaneous transmitter release by hypoxia at the mouse neuromuscular junction. **372**, 303, 1986
Effects of hypercapnia and hypoxia on nasal vasculature and airflow resistance in the anaesthetized dog. **373**, 261, 1986
Cardiovascular changes associated with augmented breaths during normoxia and hypoxia in the rat. **373**, 77*P*, 1986
The ventilatory effects of hypoxia and almitrine: a comparison in anaesthetized rats. **378**, 69*P*, 1986
Restoration of hypoxic respiratory responses in the awake rat after carotid body denervation by sinus nerve section. **380**, 61, 1986
Lesions in the upper lateral pons abolish the hypoxic depression of breathing in unanaesthetized fetal lambs *in utero*. **382**, 373, 1987
The effects of blockade of pulmonary stretch receptors by sulphur dioxide on the cardiovascular system of the rat in normoxia and hypoxia. **382**, 53*P*, 1987
Intracellular pH in sheep Purkinje fibres and ferret papillary muscles during hypoxia and recovery. **383**, 125, 1987
Effects of hypoxia on rat hippocampal neurones *in vitro*. **384**, 131, 1987
Effect of decreased oxygen delivery on steady-state total renal ATP, sodium excretion and cell morphology in the isolated perfused rat kidney. **384**, 41*P*, 1987
Heart-rate changes during hypoxia in the anaesthetized cat. **386**, 71*P*, 1987
The influence on the response to systemic hypoxia of the accompanying hypocapnia in the rat. **390**, 183*P*, 1987
Respiratory limitation of the aerobic capacity of man exposed to acute hypoxia. **390**, 244*P*, 1987
The contribution of intracellular acidosis to the decline of developed pressure in ferret hearts exposed to cyanide. **391**, 99, 1987
Maturation of the respiratory response to acute hypoxia in the newborn rat. **392**, 1, 1987
Effects of chronic hypoxia from birth on the ventilatory response to acute hypoxia in the newborn rat. **392**, 11, 1987
Bay K 8644 does not prevent or reverse hypoxic vasodilatation of the isolated rat portal vein. **392**, 44*P*, 1987
The cardiovascular response to systemic hypoxia in the cat as compared with the rat. **392**, 77*P*, 1987
Analysis of cardiovascular responses evoked following changes in peripheral chemoreceptor activity in the rat. **394**, 393, 1987
Contraction of capacitance vessels during hypoxia in the isocapnic, anaesthetized cat. **394**, 37*P*, 1987
Acetazolamide increases steady-state hypercapnic ventilatory response in hypoxia in humans. **394**, 128*P*, 1987

Identified neurone
Visualization of electrophysiologically characterized cells using the dyes ethidium bromide and Lucifer yellow in the frog, rat and crayfish. **390**, 261*P*, 1987

Ileum
Non-cholinergic excitatory and inhibitory junction potentials in the circular smooth muscle of the guinea-pig ileum. **374**, 153, 1986
Electrophysiological response to secretagogues of crypt and villus enterocytes in rat ileum *in vitro*. **382**, 49*P*, 1987

Image analysis
Assessment of foot pressure patterns from a pedobarograph using image analysis techniques. **384**, 7*P*, 1987

Image and analysis (*cont.*)
The design of a microcomputer-based densitometry system allowing identification of a defined area for analysis. **392**, 3*P*, 1987
The analysis of gut motility by image analysis. **392**, 17*P*, 1987
Computer-aided image reconstruction in microscopy. **392**, 18*P*, 1987
Coordination of muscle movements in the isolated rabbit small intestine. **392**, 48*P*, 1987
Immunochemistry
An alternative method for visualization of immunohistochemical reactions in HRP-labelled neurones. **382**, 179*P*, 1987
Immunofluorescence
Electrophysiology and morphology of vasoactive-intestinal-peptide-immuoreactive neurones of the guinea-pig ileum. **378**, 1, 1986
Implant
Cell–cell interactions associated with blastocyst implantation in equids. **371**, 204*P*, 1986
Inactivation
Calcium-activated potassium channels in rat muscle inactivate from a short-duration open state. **363**, 501, 1985
Inactivation of the low-threshold transient calcium current in rat sensory neurones: evidence for a dual process. **376**, 341, 1986
Transient outward currents and changes of their gating properties after cell activation in thrombocytes of the newt. **385**, 189, 1987
Inferior mesenteric ganglion
The electrophysiological effects of vasoactive intestinal polypeptide in the guinea-pig inferior mesenteric ganglion. **394**, 67, 1987
Inferior olive
Oscillatory properties of guinea-pig inferior olivary neurones and their pharmacological modulation: an *in vitro* study. **376**, 163, 1986
Stimulation of cat cutaneous nociceptive C fibres causing tonicand synchronous activity in climbing fibres. **386**, 539, 1987
Inflammation
Extravasation of the knee induced by antidromic stimulation of articular C fibre afferents of the anaesthetized cat. **379**, 407, 1986
Inhibition
Selective block of Y optic nerve fibres in the cat and the occurrence of inhibition in the lateral geniculate nucleus. **364**, 81, 1985
C-fibre excitation and tonic descending inhibition of dorsal horn neurones in adult rats treated at birth with capsaicin. **365**, 223, 1985
Excitatory and differential disinhibitory actions of acetylcholine in the lateral geniculate nucleus of the cat. **370**, 233, 1986
β-Adrenergic inhibition of bovine mesenteric lymphatics. **374**, 401, 1986
Ionic and pharmacological properties of reciprocal inhibition in *Xenopus* embryo motoneurones. **382**, 463, 1987
Inhibition of monosynaptic reflexes in the human lower limb. **385**, 69, 1987
Inhibitory connections of ipsilateral semicircular canal afferents onto Renshaw cells in the lumbar spinal cord of the cat. **388**, 83, 1987
Contributions of inhibitory mechanisms to the shift responses of X and Y cells in the cat lateral geniculate nucleus. **388**, 199, 1987
Inhibitory interactions in the human vision system revealed in pattern-evoked potentials. **389**, 1, 1987
Short-latency inhibitory reflexes evoked between muscles of the shoulder in normal human subjects. **391**, 41*P*, 1987
A γ-aminobutyric-acid-mediated inhibition of neurones in the nucleus tractus solitarius of the cat. **392**, 417, 1987
Inhibitory innervation
Characteristics of the vagally driven non-adrenergic, non-cholinergic inhibitory innervation of ferret gastric corpus. **363**, 1, 1985
Inhibitory junction potential
Electrophysiological analysis of projections of enteric inhibitory motoneurones in the guinea-pig small intestine. **370**, 61, 1986
Inhibitory postsynaptic potential, *see also* Postsynaptic potential
Inhibitory synaptic potentials resulting from α_2-adrenoceptor activation in guinea-pig submucous plexus neurones. **358**, 17, 1985
γ-Aminobutyric acid uptake and the termination of inhibitory synaptic potentials in the rat hippocampal slice. **366**, 387, 1985
Synaptic inputs to immunohistochemically identified neurones in the submucous plexus of the guinea-pig small intestine. **381**, 465, 1986
Innervation
The multiple innervation of muscle fibres in teleost fish changes during growth. **366**, 121*P*, 1985
Neural control of electrical gastric activity in response to inflation of the antrum in the rabbit. **367**, 13, 1985
The neural and non-neural mechanisms involved in urethral activity in rabbits. **367**, 57, 1985
Innervation of ciliated cells and mucus-containing cells in *Lymnaea*. **386**, 32*P*, 1987
Properties of motor units in the transversus abdominis muscle of the garter snake. **393**, 355, 1987
Inositol 1,4,5-trisphosphate
Inositol 1,4,5-trisphosphate activates pharmacomechanical coupling in smooth muscle of the rabbit mesenteric artery. **370**, 605, 1986
Inhibition by extracellular K^+ (K_o) on the rate of PI turnover in the 5-HT-stimulated blow fly salivary gland. **371**, 225*P*, 1986
Oscillatory chloride current evoked by temperature jumps during muscarinic and serotonergic activation in *Xenopus* oocyte. **383**, 213, 1987
The involvement of inositol 1,4,5-trisphosphate and calcium in the two-component response to acetylcholine in *Xenopus* oocytes. **392**, 349, 1987
Inositol 1,4,5-trisphosphate causes calcium release in frog skeletal muscle only when transverse tubules have been interrupted. **394**, 23*P*, 1987

Inotropic effect
Relation of sodium pump inhibition to positive inotropy at low concentrations of ouabain in rat heart muscle. **360**, 149, 1985
The influence of 'diastolic' length on the contractility of isolated cat papillary muscle. **361**, 269, 1985

Insect
Unitary currents recorded from the soma of identified cockroach neurones using the patch clamp technique. **367**, 88*P*, 1985

Insulin
Mechanism of action of insulin on acetylcholine-evoked amylase secretion in the mouse pancreas. **358**, 469, 1985
Effects of certain metabolites on pancreatic endocrine responses to stimulation of the vagus nerves in conscious calves. **362**, 303, 1985
Pancreatic neuroendocrine responses to butyrate in conscious sheep. **364**, 281, 1985
Insulin and the renal response to volume expansion in man. **364**, 66*P*, 1985
Insulin responsiveness of human erythrocyte plasma membrane. **369**, 112*P*, 1985
Autoradiographic localization of [^{125}I] insulin-binding sites in peripheral tissues of the rat. **390**, 240*P*, 1987

Insulin release
Cyclic adenosine monophosphate differently affects the response of mouse pancreatic β-cells to various amino acids. **381**, 77, 1986
Effects of 2-ketoisocaproate on insulin release and single potassium channel activity in dispersed rat pancreatic β-cells. **385**, 517, 1987

Intercostal muscle
Monosynaptic excitation of thoracic motoneurones by inspiratory neurones of the nucleus tractus solitarius in the cat. **390**, 415, 1987

Interferon
Fever and acute phase response induced in rabbits by human recombinant interferon-γ. **391**, 209, 1987

Interneurone, *see also* Spinal interneurone
Synaptic interactions of interneurones in the feeding system of the pond snail *Lymnaea stagnalis*. **360**, 67*P*, 1985
Sources of input to interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. **361**, 379, 1985
Organization of input to the interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. With an Appendix by P. J. HARRISON. **361**, 403, 1985
Transsynaptic labelling of trigeminal interneurones by WGA-HRP in the rat. **369**, 64*P*, 1985
Glycine-mediated phase-dependent gating of sensory input during swimming in *Xenopus* embryos. **382**, 181*P*, 1987
Interactions between spiking and non-spiking local interneurones underlie local reflexes of locust legs. **390**, 225*P*, 1987
Long-term potentiation involves enhanced synaptic excitation relative to synaptic inhibition in guinea-pig hippocampus. **394**, 367, 1987

Interstitial fluid
Tightness of the blood–brain barrier and evidence for brain interstitial fluid flow in the cuttlefish, *Sepia officinalis*. **368**, 213, 1985
The control of potassium concentration in the cerebrospinal fluid and brain interstitial fluid of developing rats. **383**, 441, 1987

Intestinal absorption
Evidence for Ca^{2+}-activated K^+-channels in the basolateral membrane of the vascularly perfused frog small intestine. **358**, 77*P*, 1985
The effect of pH on butyrate absorption kinetics in vascularly perfused anuran small intestine. **367**, 59*P*, 1985
The roles of paracellular and transcellular pathways and submucosal space in isotonic water absorption by rabbit ileum. **370**, 409, 1986
Absorption of hydrophilic solutes from the rat small intestine. **371**, 138*P*, 1986

Intestinal adaptation
Genetic and phenotypic adaptation of intestinal nutrient transport to diet in fish. **393**, 261, 1987

Intestinal epithelium
Chloride activity in *Necturus* enterocytes. **380**, 26*P*, 1986
Characteristics of transmural potential changes associated with the proton–peptide co-transport in toad small intestine. **394**, 481, 1987

Intestinal fluid transport
Passive water flows driven across the isolated rabbit ileum by osmotic, hydrostatic and electrical gradients. **360**, 27, 1985
Fluid response to osmotic agents and calcium in the isolated rabbit intestinal loop. **371**, 230*P*, 1986

Intestinal motility
Reproducibility of 24-hour colonic motility patterns in human subjects using a pressure-sensitive radiotelemetry capsule (RTC). **361**, 55*P*, 1985
The role of extrinsic and intrinsic nerves in the relationship between motility and transmural potential difference in the jejunum of the anaesthetized ferret. **362**, 21*P*, 1985
The effect of intraluminal tryptophan and phenylalanine on small intestinal motility in the conscious dog. **367**, 353, 1985
Jejunal myoelectrical activity in the conscious neonatal pig. **374**, 349, 1986
The effect of ileal infusion of lipid on the motility pattern in humans after ingestion of a viscous, non-nutrient meal. **378**, 12*P*, 1986
Changes in jejunal transmural potential difference induced by vagal efferent nerve stimulation in the anaesthetized ferret. **378**, 20*P*, 1986
The influence of intestinal infusion of fats on small intestinal motility and digesta transit in pigs. **379**, 27, 1986
Small intestinal motility and transit by electromyography and radiology in the fasted and fed pig. **379**, 245, 1986
Two types of 'slow waves' in intestinal smooth muscle of cat. **392**, 51, 1987

Intestinal mucosa
The effect of forskolin, cholera toxin, theophylline and *E. coli* STa analogues on mucosal surface pH of rat small intestine *in vivo*. **392**, 26*P*, 1987
Intestinal potential
Effect of hyperglucagonaemia on membrane potential difference and autoradiographic localization of nutrient uptake by rat jejunum. **364**, 81*P*, 1985
Intestinal reabsorption
The effect of *E. coli* STa enterotoxin on the intestinal absorption of chloroquine in the rat. **392**, 25*P*, 1987
Intestinal secretion
Auranofin stimulates intestinal secretion in the rat. **378**, 27*P*, 1986
The involvement of basolateral potassium channels in the intestinal response to secretagogues in the rat. **379**, 331, 1986
Starvation and ileal secretion in the rat. **386**, 63*P*, 1987
The effects of sympathetic nerve stimulation on transepithelial potential difference and short-circuit current in rat jejunum, *in vivo* and *in vitro*. **386**, 79*P*, 1987
The secretory actions of histamine in rat small intestine. **388**, 521, 1987
Iodide transport in rat small intestine: dependence on calcium. **393**, 19, 1987
Intestinal transport
Effects of Na^+ replacement by Li^+ on intestinal transport of glycylsarcosine by hamster jejunum rings. **360**, 70*P*, 1985
Mucosal responses evoked by stimulation of ganglion cell somas in the submucosal plexus of the guinea-pig ileum. **364**, 69, 1985
Effect of chronic ethanol ingestion on galactose absorption and enterocyte turnover in rat jejunum. **364**, 82*P*, 1985
The influence of age on D-glucose transport in rat jejunum. **369**, 151*P*, 1985
D-Galactc e transport in rat intestinal brush border membrane vesicles studied with a molecular-sieve technique. **375**, 71, 1986
Uptake and metabolism of uracil by mouse small intestine *in vitro*. **376**, 48*P*, 1986
The transport of uric acid across mouse small intestine *in vitro*. **378**, 229, 1986
The effect of luminal tonicity on water absorption from a segment of the intact human jejunum. **378**, 95*P*, 1986
Improved reproducibility in measurement of jejunal absorption rates *in vivo* in man. **380**, 11*P*, 1986
The transport of pyrimidines into tissue rings cut from rat small intestine. **382**, 475, 1987
Differential changes in glucose and galactose absorption across the rat jejunum *in vivo* following both acute and chronic exposure to ethanol. **390**, 93*P*, 1987
Changes *in vivo* in rat ileal fluid uptake and mucosal volume induced by changes in the tonicity of the luminal perfusion fluid. **391**, 29*P*, 1987
Intestine
Substance P provoked γ-aminobutyric acid release from the myenteric plexus of the guinea-pig small intestine. **362**, 319, 1985
Dexamethasone effects on glucose stimulated electrogenic ion transfer across isolated sections of rat intestine. **364**, 85*P*, 1985
Intestinal lactase activity in Hong Kong Chinese. **365**, 108*P*, 1985
Electrophysiological analysis of projections of enteric inhibitory motoneurones in the guinea-pig small intestine. **370**, 61, 1986
Effect of potassium and acetylcholine on canine intestinal smooth muscle. **372**, 521, 1986
Intracellular potassium as a possible inducer of amino acid transport across hamster jejunal enterocytes. **375**, 107, 1986
Mechanical and chemical sensitivity of intestinal afferent fibres in the rat. **378**, 41*P*, 1986
The influence of continued feeding of physiological amounts of lactose on rat intestinal lactase activity. **386**, 64*P*, 1987
Pig enterocytes preferentially acquire an Na^+-dependent transport system for neutral amino acids during early neonatal development. **387**, 36*P*, 1987
Rat jejunal disaccharidase activity increases biphasically during early post-natal development. **391**, 487, 1987
Assessment of sugar absorption and small-intestinal transit time by breath hydrogen measurement in medical students. **391**, 13*P*, 1987
Dexamethasone selectively increases sodium-dependent alanine transport across neonatal piglet intestine. **393**, 569, 1987
Epidermal growth factor selectively increases maltase and sucrase activities in neonatal piglet intestine. **393**, 583, 1987
Intra-articular pressure
The interrelation of neural discharge, intra-articular pressure, and joint angle in the knee of the dog. **373**, 353, 1986
Intracellular calcium
Calcium-dependent chloride secretion in rat colon epithelium. **361**, 1, 1985
Effects of rapid cooling on mechanical and electrical responses in ventricular muscle of guinea-pig. **361**, 361, 1985
The use of aequorin to measure intracellular calcium in voltage-clamped cardiac Purkinje fibres. **365**, 7*P*, 1985
Measurement of intracellular Ca oscillations from one cell in a sheep isolated Purkinje fibre. **365**, 56*P*, 1985
The effect of diastolic length on calcium transients in isolated ferret ventricular muscle. **365**, 57*P*, 1985
The first calcium transient following shortening in isolated ferret ventricular muscle. **366**, 83*P*, 1985
Intracellular calcium in metabolically-depleted ferret ventricular muscle during exposure to cyanide and its removal. **369**, 92*P*, 1985
Metabolic consequences of increasing intracellular calcium and force production in perfused ferret hearts. **376**, 121, 1986

Intracellular calcium (*cont.*)
Effect of tetanus duration on the free calcium during the relaxation of frog skeletal muscle fibres. **376**, 203, 1986
Spontaneous transient outward currents in single visceral and vascular smooth muscle cells of the rabbit. **381**, 385, 1986
Effects of caffeine on intracellular calcium concentration in frog skeletal muscle fibres. **383**, 269, 1987
The inhibition by sodium nitroprusside of ADP-induced calcium influx and calcium mobilization in human platelets. **387**, 89*P*, 1987
Intracellular sodium–calcium dissociation in early contractile failure in hypoxic ferret papillary muscles. **388**, 449, 1987
Hyperpolarization-activated current is regulated by an intracellular Ca in rabbit sino-atrial node cells. **394**, 30*P*, 1987

Intracellular fluid
Diffusible sodium, potassium, magnesium, calcium and phosphorus in frog skeletal muscle. **368**, 545, 1985

Intracellular ion activity
Sodium/calcium exchange and intracellular calcium buffering in ferret myocardium: an ion-sensitive micro-electrode study. **373**, 163, 1986
Ion activities and potassium uptake mechanisms of glial cells in guinea-pig olfactory cortex slices. **382**, 159, 1987
Cell and luminal activities of chloride, potassium, sodium and protons in the late distal tubule of *Necturus* kidney. **393**, 73, 1987

Intracellular magnesium
Free intracellular Mg^{2+} in relaxed and contracted isolated porcine carotid arteries. **371**, 161*P*, 1986

Intracellular pH
Sodium-dependent control of intracellular pH in Purkinje fibres of sheep heart. **359**, 81, 1985
Intracellular pH of isolated frog muscle as a function of temperature: a ^{31}P nuclear magnetic resonance study. **360**, 59*P*, 1985
Intracellular pH regulation in the sensory neurone of the stretch receptor of the crayfish (*Astacus fluviatilis*). **362**, 23, 1985
The ionic mechanism of intracellular pH regulation in crayfish muscle fibres. **374**, 137, 1986
Membrane currents of internally perfused neurones of the snail, *Lymnaea stagnalis*, at low intracellular pH. **376**, 477, 1986
Effect of lowering intracellular pH on the maintenance heat of isolated frog skeletal muscle. **377**, 98*P*, 1986
Ionic regulation of sea urchin sperm motility, metabolism and fertilizing capacity. **379**, 347, 1986
Properties of the intracellular pH-regulating systems of frog skeletal muscle. **381**, 205, 1986
Effect of calcium and other divalent cations on intracellular pH regulation of frog skeletal muscle. **381**, 221, 1986
Regulation of intracellular pH in reticulospinal neurones of the lamprey, *Petromyzon marinus*. **381**, 241, 1986
Acid–base disturbances, potassium conductance and transcellular cross-talk in the isolated epithelium of frog skin. **381**, 31*P*, 1986
pH regulation in cultured rat calvarial osteoblasts: its sensitivity to parathormone and insulin. **381**, 73*P*, 1986
Changes in a^i_{Na} and pH_i in isolated ferret ventricular muscle on repletion of the bathing Ca following a period of Ca-deprivation. **381**, 120*P*, 1986
The coexistence of two pH_i-regulating mechanisms on promyelocytic U937 cells. **382**, 203*P*, 1987
Intracellular pH in sheep Purkinje fibres and ferret papillary muscles during hypoxia and recovery. **383**, 125, 1987
The regulation of intracellular pH by identified glial cells and neurones in the central nervous system of the leech. **388**, 261, 1987
Voltage-dependent intracellular pH in *Helix aspersa* neurones. **390**, 433, 1987
Effect of intracellular pH on sodium transport in rabbit cardiac Purkinje fibres. **390**, 55*P*, 1987
Comparison of micro-electrode measurement of intracellular pH in cardiac ventricular tissue and isolated ventricular cells of guinea-pig. **390**, 58*P*, 1987
Measurement of intracellular pH in single isolated cells using fluorescent dyes. **391**, 10*P*, 1987
Simultaneous measurement of intracellular pH and contraction in isolated rat ventricular myocytes using a fluorescent indicator (BCECF). **392**, 41*P*, 1987

Intracellular pressure
Potential-dependent variations of the intracellular pressure in the intracellularly perfused squid giant axon. **369**, 229, 1985

Intracellular recording
Ionic basis for the electroresponsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 145, 1986
An intracellular study of spinocervical tract cell responses to natural stimuli and single hair afferent fibres in cats. **382**, 331, 1987

Intracellular sodium
The effects of membrane potential and extracellular potassium on intracellular sodium activity in isolated ferret papillary muscle. **381**, 121*P*, 1986
A simple model of changes of the intracellular sodium activity (a^i_{Na}) on binding of cardiac glycosides to the sodium–potassium pump of the heart. **386**, 115*P*, 1987
Intracellular sodium activity in isolated guinea-pig cardiac myocytes in normal Tyrode solution and during exposure to calcium-free solution. **386**, 116*P*, 1987
Intracellular sodium–calcium dissociation in early contractile failure in hypoxic ferret papillary muscles. **388**, 449, 1987

Intracellular sodium activity
Relation of sodium pump inhibition to positive inotropy at low concentrations of ouabain in rat heart muscle. **360**, 149, 1985
Effects of stimulation and diphenylhydantoin on the intracellular sodium activity in Purkinje fibres of sheep heart. **362**, 331, 1985

Intracellular sodium activity (*cont.*)
Ion-selective micro-electrode studies of the electrochemical potentials in trout urinary bladder. **370**, 467, 1986
Dissociation between force and intracellular sodium activity with strophanthidin in isolated sheep Purkinje fibres. **381**, 311, 1986
Factors affecting intracellular sodium during repetitive activity in isolated sheep Purkinje fibres. **384**, 405, 1987
Investigation of factors affecting the intracellular sodium activity in the smooth muscle of guinea-pig ureter. **385**, 483, 1987
Effects of repetitive activity on developed force and intracellular sodium in isolated sheep and dog Purkinje fibres. **388**, 295, 1987
The relationship between intracellular sodium activity (a^{i}_{Na}) and extracellular sodium activity (a^{o}_{Na}) in isolated ferret ventricular muscle, in the presence and absence of divalent cations. **390**, 61*P*, 1987
Undershoots of intracellular sodium activity (a^{i}_{Na}) when isolated voltage-clamped quiescient sheep Purkinje fibres recover from sodium loading. **390**, 62*P*, 1987

Intrafusal muscle fibre
Postnatal maturation of deafferented muscle spindles in the rat. **382**, 159*P*, 1987

Inward current
Cadmium- and TTX-insensitive transient inward current in cultured mouse spinal motoneurones. **377**, 82*P*, 1986
Inward rectification in freshly isolated single smooth muscle cells of the rabbit jejunum. **383**, 461, 1987
Copper activates a unique inward current in molluscan neurones. **394**, 429, 1987

Inward rectification
Inward rectification in the transverse tubular system of frog skeletal muscle studied with potentiometric dyes. **359**, 269, 1985
Characterization of the acetylcholine-induced potassium current in rabbit cardiac Purkinje fibres. **371**, 219, 1986
Inward rectification and low threshold calcium conductance in rat cerebellar Purkinje cells. An *in vitro* study. **372**, 1, 1986

Iodide
Iodide transport in rat small intestine: dependence on calcium. **393**, 19, 1987

Ion
A microcomputer program to determine the composition of solutions containing multiple metal ions and complexing ligands. **367**, 10*P*, 1985
Dependence of junctional conductance on proton, calcium and magnesium ions in cardiac paired cells of guinea-pig. **382**, 193, 1987

Ion channel
Use-dependence of ganglion-blocking agents in rat submandibular ganglion cells. **358**, 89*P*, 1985
The action of *N*-methyl-D-aspartic acid on mouse spinal neurones in culture. **361**, 65, 1985
Inactivation of calcium channels in mammalian heart cells: joint dependence on membrane potential and intracellular calcium. **364**, 395, 1985
Single ion channel recordings from nerve terminals of the rat neurohypophysis. **364**, 54*P*, 1985
Potassium channels in cultured bovine adrenal chromaffin cells. **367**, 117, 1985
The long-term excitability of myelinated nerve fibres in the transected frog sciatic nerve. **368**, 309, 1985
Single-channel analysis of fast transient potassium currents from rat nodose neurones. **369**, 199, 1985
Fast events in single-channel currents activated by acetylcholine and its analogues at the frog muscle end-plate. **369**, 501, 1985
The voltage-gated chloride conductance of rat astrocytes. **371**, 141*P*, 1986
Single chloride channel currents in cultured rat epididymal cells. **371**, 142*P*, 1986
A molecular model for the activation of voltage-gated ion channels. **371**, 143*P*, 1986
Patch-clamp and noise analysis studies of cholinergic properties of cultured cockroach neurones. **371**, 145*P*, 1986
Action potentials, macroscopic and single channel currents recorded from growth cones of *Aplysia* neurones in culture. **374**, 289, 1986
Oxytocin and cyclic AMP stimulate four different ionic channels in isolated amphibian epithelial tissues. **377**, 33*P*, 1986
Heterogeneous kinetic properties of acetylcholine receptor channels in *Xenopus* myocytes. **378**, 119, 1986
Three types of K^+ currents recorded from cultured neurones from the region of the rat supraoptic nucleus. **384**, 20*P*, 1987
Development of ionic channels and cell-surface antigens in the cleavage-arrested one-cell embryo of an ascidian. **386**, 113, 1987
GABA activated chloride channels in cultured neurones from the supraoptic area of neonatal rats. **388**, 12*P*, 1987
Secretin-regulated anion channel on the apical membrane of rat pancreatic duct cells *in vitro*. **391**, 33*P*, 1987
Some effects of Ca^{2+}- and K^+-channel-blocking agents on responses to BRL 34915 and pinacidil in the rat isolated portal vein. **391**, 77*P*, 1987
Sodium and potassium currents involved in action potential propagation in normal bovine lactotrophs. **392**, 273, 1987
Burst kinetics of sodium channels which lack fast inactivation in mouse neuroblastoma cells. **392**, 563, 1987
Single channel activity in human sarcolemmal vesicles. **392**, 31*P*, 1987
Characterization of calcium-activated potassium channels in motor nerve terminals of the mouse triangularis sterni muscle preparat'on. **392**, 117*P*, 1987
Activation of the primary kinetic modes of large- and small-conductance cholinergic ion channels in *Xenopus* myocytes. **393**, 437, 1987

Ion channel (*cont.*)
Permeation and block of *N*-methyl-D-aspartic acid receptor channels by divalent cations in mouse cultured central neurones. **394**, 501, 1987
Ion current
A voltage-clamp analysis of membrane currents in solitary bipolar cells dissociated from *Carassius auratus*. **358**, 131, 1985
Ionic basis of the different action potential configurations of single guinea-pig atrial and ventricular myocytes. **368**, 525, 1985
On the mechanism by which changes in extracellular pH affect the electrical activity of the rabbit sino-atrial node. **381**, 181, 1986
Voltage-dependent conductances of solitary ganglion cells dissociated from the rat retina. **385**, 361, 1987
Outward currents of single hippocampal cells obtained from the adult guinea-pig. **393**, 331, 1987
Ion flux
Potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 419, 1985
Calcium-activated potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 441, 1985
Steady-state analysis of ion fluxes in *Necturus* gall-bladder epithelial cells. **382**, 15, 1987
Transcellular sodium fluxes and pump activity in *Necturus* gall-bladder epithelial cells. **382**, 35, 1987
The effect of glucose on insulin release and ion movements in isolated pancreatic islets of rats in old age. **384**, 347, 1987
Paracellular ionic and transcellular water diffusions across rabbit corneal endothelium. **385**, 89, 1987
Ion mechanism
Effects of sodium substitutes on transient inward current and tension in guinea-pig and ferret papillary muscle. **360**, 105, 1985
Ionic basis for the electroresponsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 145, 1986
Ion permeability
Currents carried by monovalent cations through calcium channels in mouse neoplastic B lymphocytes. **358**, 255, 1985
Ionic permeabilities of the gill lamina cuticle of the crayfish, *Astacus leptodactylus* (E). **363**, 377, 1985
Selectivity and patch measurements of A-current channels in *Helix aspersa* neurones. **388**, 437, 1987
Ion-selective electrode
Periodic increase of cytoplasmic free calcium in fertilized hamster eggs measured with calcium-sensitive electrodes. **377**, 193, 1986
Ion selectivity
The ionic selectivity and calcium dependence of the light-sensitive pathway in toad rods. **358**, 447, 1985
Ion strength
Potassium and ionic strength effects on the isometric force of skinned twitch muscle fibres of the rat and toad. **370**, 317, 1986
Ion transport
Endogenous transmembrane pH and electrical gradients in apical plasma membrane vesicles isolated from bovine tracheal epithelium. **358**, 73*P*, 1985
Sodium and potassium distribution in the lactating mouse mammary gland *in vivo*. **361**, 219, 1985
Intracellular pH regulation in the sensory neurone of the stretch receptor of the crayfish (*Astacus fluviatilis*). **362**, 23, 1985
Submucosal plexus and electrolyte transport across rat colonic mucosa. **364**, 301, 1985
An intracellular analysis of γ-aminobutyric-acid-associated ion movements in rat sympathetic neurones. **365**, 41, 1985
Na absorption and Cl secretion in bovine tracheal epithelium may take place in different cells. **367**, 61*P*, 1985
Ion-selective micro-electrode studies of the electrochemical potentials in trout urinary bladder. **370**, 467, 1986
The ionic mechanism of intracellular pH regulation in crayfish muscle fibres. **374**, 137, 1986
Sodium and chloride transport by the tracheal epithelium of fetal, new-born and adult sheep. **375**, 377, 1986
Mucosal plexus and electrolyte transport across the rat colonic mucosa. **376**, 531, 1986
Transmembrane ion balance in slowly and rapidly adapting lobster stretch receptor neurones. **377**, 171, 1986
Mechanism of anion permeation through channels gated by glycine and γ-aminobutyric acid in mouse cultured spinal neurones. **385**, 243, 1987
Iris
Innervation of the iris by individual parasympathetic axons in the adult mouse. **378**, 485, 1986
Iron
Significance of dietary residence time and luminal transferrin levels for a transferrin-mediated mechanism of iron absorption in the mouse. **384**, 46*P*, 1987
Iron absorption across the microvillus membrane (MVM) of the isolated guinea-pig duodenum during development. **394**, 163*P*, 1987
Developmental changes in the autoradiographic localization of iron uptake by the isolated guinea-pig duodenum. **394**, 164*P*, 1987
Ischaemia
Blood flow following occlusion of the circulation to the human forearm. **371**, 73*P*, 1986
The effect of age on energy metabolism and resistance to ischaemic conduction failure in rat peripheral nerve. **374**, 263, 1986
Ketamine protects hippocampal neurones from ischaemic damage in rats. **377**, 28*P*, 1986
A comparison of the effects of administration of an opiate antagonist and a TRH analogue on the loss of neuronal function induced by cerebral ischaemia in the rat. **378**, 102*P*, 1986
Monophasic action potential dispersion in ischaemic segments of pig hearts *in situ*. **387**, 30*P*, 1987

Ischaemia (*cont.*)
The role of myogenic relaxation, adenosine and prostaglandins in human forearm reactive hyperaemia. **389**, 147, 1987
Influence of neutrophils on post-ischaemic renal failure in the rat. **390**, 247*P*, 1987
Effects of ischaemia upon reflex electromyographic responses evoked by stretch and vibration in human wrist flexor muscles. **391**, 589, 1987
The effect of exogenous fructose 1,6-diphosphate on normal and ischaemic canine myocardium. **392**, 80*P*, 1987

Isometric contraction
Force–velocity properties of fast-twitch and slow-twitch muscles of the kitten. **367**, 377, 1985
Contractile effect of short-chain fatty acids on the isolated colon of the rat. **368**, 667, 1985

Isometric exercise
Isometric endurance capacity in males and females with open and occluded circulation. **387**, 75*P*, 1987
Hyperventilation during sustained isometric handgrip and quadriceps contractions in man. **394**, 71*P*, 1987

Isoprenaline
Dopamine, noradrenaline and isoprenaline: secretory and electrophysiological effects *in vitro* on mouse pancreas. **376**, 359, 1986
Metabolic and cardiovascular effects of infusions of low doses of isoprenaline in man. **386**, 48*P*, 1987

Jaw muscle
Jaw position sense maintained under downward force on lower teeth. **366**, 34*P*, 1985
Length-related changes in activation threshold and wave form of motor units in human masseter muscle. **370**, 457, 1986

Jejunum
Electrogenic currents induced by secretagogues across jejuna from fed and fasted rats. **365**, 109*P*, 1985
Characteristics of enterocyte adaptation in the jejunum and colon of weanling rats fed a variety of semi-purified dietary fibres. **371**, 229*P*, 1986
Jejunal myoelectrical activity in the conscious neonatal pig. **374**, 349, 1986
The effects of fasting upon rat jejunal secretion *in vitro* and *in vivo*. **378**, 23*P*, 1986
Role of 5-hydroxytryptamine (5-HT) and PGE_2 in cholera-induced fluid secretion by the rat jejenum *in vivo*. **382**, 46*P*, 1987
Motor response of the canine jejunum to variable periods of gastric distension. **386**, 60*P*, 1987
The effect of *E. coli* STa enterotoxin on the pH profile of villi in rat small intestine *in vitro*. **391**, 71*P*, 1987
Failure of 8% gelatin diet to elicit rat jejunal growth observed with 8% casein diet. **392**, 101*P*, 1987
Disruption of the jejunal migrating motor complex by gastric distension and feeding in the dog. **394**, 381, 1987

Joint
Intra-articular pressures during active and passive movement of normal and distended human knee joints. **369**, 179*P*, 1985
Responses of spinal cord neurones to stimulation of articular afferent fibres in the cat. **372**, 575, 1986
Actions on γ-motoneurones elicited by electrical stimulation of joint afferent fibres in the hind limb of the cat. **375**, 137, 1986
Catecholamine secretion and adrenal nerve activity in response to movements of normal and inflamed knee joints in cats. **375**, 611, 1986
Extravasation of the knee induced by antidromic stimulation of articular C fibre afferents of the anaesthetized cat. **379**, 407, 1986
The role of joint receptors in human kinaesthesia when intramuscular receptors cannot contribute. **386**, 63, 1987
The effects of direction and acceleration of movement of the knee joint of the dog on medial articular nerve discharge. **388**, 505, 1987

Joint angle
The interrelation of neural discharge, intra-articular pressure, and joint angle in the knee of the dog. **373**, 353, 1986

Joint receptor
Reflex actions of knee joint receptors on quadriceps in man. **360**, 48*P*, 1985
Effect of natural stimulation of labyrinth, neck and joint afferents on crossed extensor reflexes in the cat forelimb. **362**, 25*P*, 1985
The interrelation of neural discharge, intra-articular pressure, and joint angle in the knee of the dog. **373**, 353, 1986

Junction potential
Distribution and properties of excitatory and inhibitory junction potentials in circular muscle of the guinea-pig stomach. **370**, 339, 1986
Non-cholinergic excitatory and inhibitory junction potentials in the circular smooth muscle of the guinea-pig ileum. **374**, 153, 1986

Kainic acid
A neurophysiological analysis of the effect of kainic acid on nerve fibres and terminals in the cat spinal cord. **368**, 99, 1985

Kallikrein
Testing for possible movement of kallikrein to the blood from submandibular glands on nerve stimulation in cats. **371**, 97*P*, 1986
Amiloride inhibits the increased urinary kallikrein excretion induced by furosemide administration in the rat. **377**, 53*P*, 1986
Effect of urinary pH and urine flow rate on prostaglandin E_2 and kallikrein excretion by the conscious dog. **383**, 1, 1987
The effect of bradykinin antagonist in rat submandibular gland blood flow regulation. **390**, 110*P*, 1987

Ketone body
Post-exercise ketosis in post-prandial exercise: effect of glucose and alanine ingestion in humans. **358**, 395, 1985
β-Adrenergic blockade restores glucose's antiketogenic activity after exercise in carbohydrate-depleted athletes. **386**, 439, 1987

Ketosis
The effects of post-exercise glucose and alanine ingestion on plasma carnitine and ketosis in humans. **390**, 295, 1987

Kidney
Renal sodium retention in acutely hypophysectomized rats. **361**, 56*P*, 1985
Potentiation by oxytocin of the natriuretic response to vasopressin in the rat. **361**, 57*P*, 1985
Proximal and distal nephron segment fluid reabsorption in the conscious pregnant rat. **361**, 59*P*, 1985
Signals from the oropharynx may contribute to the diuresis which occurs in man to drinking isotonic fluids. **363**, 21, 1985
Dinitrophenol effect on proximal tubular acidification in the rat. **368**, 89, 1985
Cell membranes and paracellular resistances in isolated renal proximal tubules from rabbit and *Ambystoma*. **370**, 25, 1986
A study of the α-adrenoceptors involved in the neural regulation of calcium excretion by the rat kidney. **373**, 30*P*, 1986
Binding of [^{51}Cr]ethylenediaminetetraacetate to proteins of human plasma. **374**, 117, 1986
Effect of atrial natriuretic peptide on the excretion of lithium in man. **376**, 45*P*, 1986
Secretion control for active and inactive renin: effect of ouabain on release from rabbit kidney cortex slices. **379**, 17, 1986
Natriuretic action of arginine vasopressin in the unanaesthetized rat. **380**, 47*P*, 1986
Vasoactive intestinal polypeptide (VIP) stimulation of rabbit renal adenylate cyclase. **380**, 55*P*, 1986
Effect of urinary pH and urine flow rate on prostaglandin E_2 and kallikrein excretion by the conscious dog. **383**, 1, 1987
An investigation into the neural regulation of calcium excretion by the rat kidney. **383**, 745, 1987
Phosphate-buffered sucrose flush protects rat kidney function during normothermic renal ischaemia. **386**, 41*P*, 1987
Renal function in the pig following autotransplantation of the left kidney after 24 hours preservation with phosphate-buffered sucrose solution, with immediate contralateral nephrectomy. **386**, 42*P*, 1987
Effect of pH on prostaglandin E_2 and $F_{2\alpha}$ release from rat renal papillary slices. **386**, 43*P*, 1987
Vasoactive intestinal polypeptide regulation of rabbit renal adenylate cyclase activity *in vitro*. **387**, 1, 1987
Renal mechanisms of human α-atrial natriuretic peptide in man. **387**, 31, 1987
The effect of strophanthidin on the basolateral and transepithelial membrane potentials of the *in vitro* perfused proximal convoluted tubule of the rabbit. **387**, 47*P*, 1987
Captopril dissociates natriuresis and urinary dilution caused by atrial peptide in man. **388**, 38*P*, 1987
Permeability of postglomerular capillaries in the rat kidney after ischaemia. **390**, 105*P*, 1987
Renal haemodynamic actions of pressor doses of lysine vasopressin in the rat. **391**, 407, 1987
The distribution of [^{3}H]bumetanide binding in rabbit kidneys *in vitro*. **391**, 17*P*, 1987
Androgenic effects of a synthetic progestin (medroxyprogesterone acetate) on mouse kidney. **391**, 52*P*, 1987
Renal function in conscious New Zealand genetically hypertensive rats. **391**, 108*P*, 1987
Cell and luminal activities of chloride, potassium, sodium and protons in the late distal tubule of *Necturus* kidney. **393**, 73, 1987
The role of angiotensin II in the renal responses to somatic nerve stimulation in the rat. **393**, 425, 1987
Altered renal function in chronically hyperprolactinaemic rats. **394**, 13, 1987
The influence of posture on lithium clearance in man. **394**, 167*P*, 1987

Kidney tubule
Cell membranes and paracellular resistances in isolated renal proximal tubules from rabbit and *Ambystoma*. **370**, 25, 1986
Intracellular potential measurements in isolated perfused proximal convoluted tubules dissected from cold-preserved kidneys of rabbits. **378**, 104*P*, 1986
A method for the rapid exchange of luminal perfusate in the *in vitro* perfused proximal convoluted tubule of the rabbit. **386**, 12*P*, 1987
An approach to the measurement of intraluminal hydrostatic pressure in the isolated perfused rabbit tubule preparation. **386**, 13*P*, 1987
The effect of barium on the basolateral membrane potential of the isolated perfused rabbit proximal tubule. **386**, 40*P*, 1987

Kinaesthesia
The role of joint receptors in human kinaesthesia when intramuscular receptors cannot contribute. **386**, 63, 1987

Kynurenate
Ia afferent excitation of motoneurones in the *in vitro* new-born rat spinal cord is selectively antagonized by kynurenate. **370**, 515, 1986

L cell
Membrane voltage, resistance, and channel switching in isolated mouse fibroblasts (L cells): a patch-electrode analysis. **367**, 267, 1985

Labyrinth
Production of endolymph in the semicircular canal of the frog *Rana esculenta*. **371**, 17, 1986

Lacrimal cell
Acetylcholine modulation of the conductance of intercellular junctions between rat lacrimal cells. **377**, 283, 1986

Lacrimal gland
Calcium-dependent chloride currents in isolated cells from rat lacrimal glands. **378**, 437, 1986
Nervous control of protein secretion, and $^{45}Ca^{2+}$ efflux in isolated segments of rat lacrimal glands. **392**, 30*P*, 1987

Lactase
Thyroid hormone effects on lactase expression by rat enterocytes. **376**, 253, 1986
Lactate
Evidence for facilitated diffusion of L-lactate across frog skeletal muscle membranes. **361**, 23*P*, 1985
Lactate transport studied in perfused rat skeletal muscle. **365**, 96*P*, 1985
Redox state changes in human skeletal muscle after isometric contraction. **380**, 441, 1986
Effects of acute blood loss on muscle blood flow and protein synthesis in the rat. **380**, 34*P*, 1986
Inhibition of reticulo-ruminal motility by volatile fatty acids and lactic acid in sheep. **382**, 355, 1987
Absence of a relationship between arterial pH and pancreatic bicarbonate secretion in the isolated perfused cat pancreas. **388**, 495, 1987
Onset of blood lactate accumulation and endurance performance in endurance-trained and sprint-trained athletes. **394**, 70*P*, 1987
Lactation
Prepartum milking and the onset of secretion of milk fat in the goat. **366**, 291, 1985
Fluid reabsorption by the proximal convoluted tubule of the kidney in lactating rats. **371**, 267, 1986
Effects of exogenous growth hormone on mammary function in lactating Friesland ewes. **371**, 211*P*, 1986
Effects of exogenous growth hormone on mammary function in lactating Jersey cows. **376**, 19*P*, 1986
Vasopressin, oxytocin, dynorphin, enkephalin and corticotrophin-releasing factor mRNA stimulation in the rat. **394**, 23, 1987
Lactotroph
Electrophysiological responses to dopamine of rat hypophysial cells in lactotroph-enriched primary cultures. **390**, 1, 1987
Lamprey
Regulation of intracellular pH in reticulospinal neurones of the lamprey, *Petromyzon marinus*. **381**, 241, 1986
Specificity of synaptic regeneration in the spinal cord of the larval sea lamprey. **388**, 183, 1987
Lanthanum
Effects of calcium, barium and lanthanum on depolarization–contraction coupling in skeletal muscle fibres of *Rana pipens*. **370**, 39, 1986
Lanthanum as a surrogate for calcium in transmitter release at mouse motor nerve terminals. **373**, 243, 1986
Laryngeal muscle
Restoration of lung liquid volume following its acute alteration in fetal sheep. **385**, 531, 1987
Larynx
Effect of cold air on laryngeal mechanoreceptors of the dog. **371**, 110*P*, 1986
Activation of single laryngeal motoneurones during asphyxic gasping in the anaesthetized rabbit. **371**, 120*P*, 1986
The role of the larynx in lambs with oleic acid-induced lung injury. **371**, 244*P*, 1986
A convergent afferent input from the larynx and nasal mucosa of the cat. **372**, 23*P*, 1986
Laryngeal patency and its ventilatory effects in anaesthetized rabbits. **380**, 44*P*, 1986
Quantitative analysis of laryngeal mechanosensitivity in the cat and rabbit. **388**, 467, 1987
Effects of stimulation of nasal and superior laryngeal inputs on the hindlimb vasculature of anaesthetized cats. **393**, 135, 1987
A convergent input from nasal receptors and the larynx to the rostral sensory trigeminal nuclei of the cat. **393**, 147, 1987
Laser
Sarcomere length measurement in cardiac myocytes isolated from guinea-pigs. **378**, 109*P*, 1986
Lateral geniculate nucleus
The structure of the terminal arborizations of physiologically identified retinal ganglion cell Y axons in the kitten. **359**, 293, 1985
Selective block of Y optic nerve fibres in the cat and the occurrence of inhibition in the lateral geniculate nucleus. **364**, 81, 1985
A comparison of visual responses of cat lateral geniculate nucleus neurones with those of ganglion cells afferent to them. **369**, 249, 1985
Iontophoretically applied bicuculline reveals excitatory responses from the non-dominant eye receptive fields of cells in the A laminae of the cat dorsal lateral geniculate nucleus (dLGN). **369**, 36*P*, 1985
Excitatory and differential disinhibitory actions of acetylcholine in the lateral geniculate nucleus of the cat. **370**, 233, 1986
Binocular excitatory input to Y cells in lamina C of the cat dorsal lateral geniculate nucleus (dLGN). **371**, 42*P*, 1986
The variability of the maintained discharge of cat dorsal lateral geniculate cells. **375**, 339, 1986
The distribution of on- and off-centre X- and Y-like cells in the A layers of the cat's lateral geniculate nucleus. **375**, 561, 1986
The lateral geniculate nucleus of the cat *in vitro*: anatomical and electrophysiological observations. **377**, 9*P*, 1986
Electrophysiological study of morphologically identified X and Y geniculate cells of the cat *in vitro*. **377**, 23*P*, 1986
Organization and post-natal development of the monkey's lateral geniculate nucleus. **380**, 453, 1986
Effects of visual deprivation on the development of the monkey's lateral geniculate nucleus. **380**, 493, 1986
Immunocytochemical evidence that substance P (SP) may be a transmitter or neuromodulator at rabbit retino-geniculate synapses. **382**, 117*P*, 1987
Passive cable properties and morphological correlates of neurones in the lateral geniculate nucleus of the cat. **383**, 653, 1987
The ventral and dorsal lateral geniculate nucleus of the rat: intracellular recordings *in vitro*. **384**, 587, 1987

Lateral geniculate nucleus (*cont.*)
On the excitatory post-synaptic potential evoked by stimulation of the optic tract in the rat lateral geniculate nucleus. **384**, 603, 1987
Contributions of inhibitory mechanisms to the shift responses of X and Y cells in the cat lateral geniculate nucleus. **388**, 199, 1987
Differences in the amplitude of X-cell responses as a function of depth in layer A of lateral geniculate nucleus in cat. **390**, 201, 1987
Membrane properties of morphologically identified X and Y cells in the lateral geniculate nucleus of the cat *in vitro*. **390**, 243, 1987
The length tuning of cells in the feline dorsal lateral geniculate nucleus (dLGN). **390**, 32*P*, 1987
The source of the input generating binocular excitation in the A laminae of the feline dorsal lateral geniculate nucleus (dLGN). **390**, 35*P*, 1987
Contrast affects the transmission of visual information through the mammalian lateral geniculate nucleus. **391**, 267, 1987
Thresholds to chromatic spots of cells in the macaque geniculate nucleus as compared to detection sensitivity in man. **392**, 193, 1987
Directional asymmetries in the length tuning of single cells in the feline dorsal lateral geniculate nucleus (dLGN). **394**, 111*P*, 1987

Lateral line
Evidence for velocity- and acceleration-sensitive units in the trunk lateral line of the trout. **394**, 13*P*, 1987

Lead
Passive transport and binding of lead by human red blood cells. **378**, 267, 1986
The role of anion transport in the passive movement of lead across the human red cell membrane. **378**, 287, 1986

Learning
Long-term changes in hippocampal physiology and learning ability of rats after intrahippocampal tetanus toxin. **368**, 343, 1985

Leech
A dual mechanism for intracellular pH regulation by leech neurones. **364**, 327, 1985
Voltage dependence of 5-hydroxytryptamine release at a synapse between identified leech neurones in culture. **372**, 191, 1986
Conduction block silences parts of a chemical synapse in the leech central nervous system. **387**, 649, 1987
The regulation of intracellular pH by identified glial cells and neurones in the central nervous system of the leech. **388**, 261, 1987
Interactions between sensory and motor neurones in the leech demonstrated by partial coherence analysis. **392**, 75*P*, 1987

Leucocyte
The effect of flavonoid O-(beta-hydroxyethyl)-rutoside (Paroven®) on microcirculation in rat skeletal muscles with limited blood supply. **373**, 4*P*, 1986

Leukotriene
Leukotriene synthesis and release by isolated perfused rat hearts. **391**, 46*P*, 1987

Lidocaine
Lidocaine blockage of basolateral potassium channels in the amphibian urinary bladder. **381**, 575, 1986

Lipid
Lipid-poor apolipoprotein A1 secreted by the human hepatoma cell line, Hep G2: a model for extracellular formation of model precursor high-density lipoproteins. **391**, 38*P*, 1987

Lithium
Electrophysiology of succinate transport across rabbit renal brush border membranes. **360**, 95, 1985
Plasma atrial natriuretic peptide (ANP) and renal function during extracellular fluid volume expansion in man. **371**, 246*P*, 1986

Liver
Blood glucose levels modulate efferent activity in the vagal supply to the rat liver. **364**, 105, 1985
Epinephrine effects on glycogen-phosphorylase activity in catfish liver. **369**, 157*P*, 1985
Micro-electrode measurement of intracellular pH in isolated rat hepatocytes: inhibition of recovery from acidification by reduction of external sodium or by amiloride. **369**, 184*P*, 1985
Regulation of tyrosine aminotransferase in frog (*Rana esculenta*) liver. **369**, 192*P*, 1985
Glucose and lactate metabolism by fetal, new-born and adult sheep livers *in vivo*. **377**, 125*P*, 1986
The changes in adrenoceptor population during fetal and postnatal development in sheep. **378**, 85*P*, 1986
The release of glucose from the liver of fetal, neonatal and adult sheep in response to the infusion of catecholamines and glucagon *in vivo*. **378**, 86*P*, 1986
Transport of glutamic acid across the sinusoidal membrane of perfused rat liver: regional localization and pH dependence. **387**, 94*P*, 1987

Liver cell
Effects of apamin, quinine and neuromuscular blockers on calcium-activated potassium channels in guinea-pig hepatocytes. **358**, 373, 1985
The influence of noradrenaline on the membrane conductance of isolated guinea-pig and rabbit hepatocytes. **369**, 106*P*, 1985
Noise analysis of a α-adrenergic activated K-conductance in isolated guinea-pig hepatocytes. **369**, 107*P*, 1985
The effect of noradrenaline on the ion permeability of isolated mammalian hepatocytes, studied by intracellular recording. **392**, 493, 1987

Lobster
Influence of depolarizing pulse duration on the time course of transmitter release in lobster. **388**, 487, 1987

Locomotion
Dual-component amino-acid-mediated synaptic potentials: excitatory drive for swimming in *Xenopus* embryos. **363**, 35, 1985

Locomotion (*cont.*)
Reciprocal inhibitory interneurones in the *Xenopus* embryo spinal cord. **363**, 61, 1985
Forelimb electromyographic responses to motor cortex stimulation during locomotion in the cat. **367**, 327, 1985
Reciprocal inhibition in control of walking in man. **367**, 39*P*, 1985
The determinants of the step frequency in walking in humans. **373**, 235, 1986
Innervation and function of hind-limb muscles in the cat after cross-union of the tibial and peroneal nerves. **374**, 429, 1986
Differential effects of sacral anterior root stimulation on colorectal motility in spinal man. **378**, 38*P*, 1986
Relationship between stepping frequency and velocity during locomotion of the rat. **378**, 39*P*, 1986
Four mechanisms used to study skilled and adaptive ladder locomotion in the cat. **382**, 11*P*, 1987
Complex spikes in Purkinje cells in the lateral vermis (b zone) of the cat cerebellum during locomotion. **385**, 107, 1987
Stumbling reactions in man: significance of proprioceptive and pre-programmed mechanisms. **386**, 149, 1987
Evidence that glycine mediates left-right alternation in lamprey locomotion. **390**, 41*P*, 1987
Evidence for GABA-mediated inhibition of motoneurones during fictive locomotion in the isolated spinal cord of the lamprey. **391**, 43*P*, 1987
The discharges of cerebellar Golgi cells during locomotion in the cat. **392**, 315, 1987
The effect of baclofen on locomotion in the rat. **392**, 59*P*, 1987
Biophysics of land and water surface locomotion in the spiders *Cupiennius salei* and *Dolomedes fimbriatus*. **392**, 68*P*, 1987
A peculiar pattern of muscle contraction during human locomotion: speedskating. **394**, 74*P*, 1987

Locus coeruleus
On the potassium conductance increased by opioids in rat locus coeruleus neurones. **364**, 265, 1985
Inhibitory synaptic potentials recorded from mammalian neurones prolonged by blockade of noradrenaline uptake. **382**, 87, 1987

Locust
The effect of tubocurarine on single glutamate-activated channels in locust muscle. **365**, 82*P*, 1985
Lipoprotein rearrangement and lipid transport during locust flight. **366**, 75*P*, 1985
Miniature and evoked inhibitory junctional currents and γ-aminobutyric acid-activated current noise in locust muscle fibres. **374**, 179, 1986
A method for studying locust flight using magnetic resonance spectroscopy (MRS). **394**, 161*P*, 1987

Long-term potentiation
Long-term potentiation of transmitter release induced by repetitive presynaptic activities in bull-frog sympathetic ganglia. **359**, 219, 1985
Neurophysiology and pharmacology of long-term potentiation in the rat sympathetic ganglion. **359**, 503, 1985
Long-term potentiation of synaptic acetylcholine release in the superior cervical ganglion of the rat. **363**, 181, 1985
Long-term potentiation of transmitter release induced by adrenaline in bull-frog sympathetic ganglia. **374**, 515, 1986
Correlation between long-term potentiation and release of endogenous amino acids from dentate gyrus of anaesthetized rats. **377**, 391, 1986
Long-term potentiation in rat neocortical neurones in slices, produced by repetitive pairing of an afferent volley with intracellular depolarizing current. **386**, 90*P*, 1987
Increase in concentration of specific extracellular proteins during long-term potentiation in the dentate gyrus of the rat. **388**, 49*P*, 1987
Enhancement of long-term potentiation by BAY K 8644 in CA1 of the rat hippocampus *in vitro*. **390**, 201*P*, 1987
Long-term potentiation is associated with an increase in the excitability of pyramidal cells in area CA1 of the rat hippocampal slice. **390**, 260*P*, 1987
Dimensions of dendritic spines of rat dentate granule cells during long term potentiation (LTP). **390**, 264*P*, 1987
Long-term potentiation involves enhanced synaptic excitation relative to synaptic inhibition in guinea-pig hippocampus. **394**, 367, 1987

Loop diuretic
Influence of loop diuretics and anions on passive potassium influx into human red cells. **369**, 61, 1985

Lung
Pulmonary oedema alters the metabolism of exogenous adenine nucleotides in rat isolated lung. **365**, 106*P*, 1985
Phosgene stimulates J receptors and produces increased respiratory drive in cats. **371**, 109*P*, 1986
The relationship between changes in lung volume and subpleural alveolar surface area, volume and number in the dog. **371**, 232*P*, 1986
Arterial and venous leakage in isolated Zone I dog lung lobes give equal interstitial albumin concentrations. **371**, 243*P*, 1986
An analysis of lung function in the Trinidadian mountain crab. **372**, 43*P*, 1986
Lung ventilation in the Trinidad mountain crab. **378**, 73*P*, 1986
Pulmonary stretch receptor relay neurones of the cat: location and contralateral medullary projections. **383**, 571, 1987
Significance of active ion transport in transalveolar water absorption: a study on isolated rat lung. **384**, 311, 1987
Fluid absorption by rat lung *in situ*: pathways for sodium entry in the luminal membrane of alveolar epithelium. **384**, 325, 1987
Restoration of lung liquid volume following its acute alteration in fetal sheep. **385**, 531, 1987

Lung (*cont.*)
Dry-particle aerosol generation with a fluidized bed: a method of delivering drug to the lung periphery. **387**, 25*P*, 1987
Experimental evaluation of a theory of uptake of soluble gases by the bronchial wall. **388**, 7*P*, 1987
Transport of sodium into apical membrane vesicles prepared from fetal sheep alveolar type II cells. **391**, 101*P*, 1987
Recruitment of eosinophils by platelet activating factor (PAF) in the guinea-pig lung. **394**, 130*P*, 1987

Lung afferent
Projection of pulmonary rapidly adapting receptors to the medulla of the cat: an antidromic mapping study. **373**, 63, 1986

Lung fluid
Measurement of net transplacental transfer of fluid to the fetal sheep. **364**, 289, 1985

Lung inflation
Caudal medullary expiratory neurone and internal intercostal nerve discharges in the cat: effects of lung inflation. **368**, 147, 1985

Lung reflex, *see* Pulmonary reflex

Lung volume
Lung volume and dead space in man from single-breath measurement of airway CO_2 and expired volume. **394**, 2*P*, 1987

Luteinizing hormone
Effects of fasting upon noradrenergic mechanisms regulating release of luteinizing hormone (LH) and prolactin (PRL) in female rats. **361**, 29*P*, 1985
Effect of repeated volleys of luteinizing hormone-releasing hormone (LHRH) on perifused rat pituitary glands removed on dioestrus or pro-oestrus. **369**, 117*P*, 1985
Opioid peptides modulate luteinizing hormone secretion throughout the oestrous cycle in the ewe. **371**, 178*P*, 1986
The effects of ovarian steroids upon opioid mediated LH suppression in the ewe. **371**, 179*P*, 1986
Effect of progesterone *in vivo* or *in vitro* on response of perifused rat pituitary fragments to repeated volleys of LHRH. **372**, 62*P*, 1986

Luteinizing hormone-releasing hormone (LHRH)
Sensitization of perifused rat adenohypophysial cells to luteinizing hormone releasing hormone. **376**, 21*P*, 1986
LHRH-induced $^{45}Ca^{2+}$ influx into rat anterior pituitary tissue *in vitro* can be reduced by activation of protein kinase C. **381**, 44*P*, 1986

Lymph
Relative contribution of Starling and lymphatic flows during protein-rich hydrothorax reabsorption in anaesthetized rabbits. **369**, 138*P*, 1985
Lymph flow changes in the sheep hindlimb following the application of a venous occlusion cuff. **373**, 48*P*, 1986
The effect of local exposure to sub-atmospheric pressure on lymph production in sheep limbs. **374**, 30*P*, 1986
The hyperlymphia following arterial occlusion in sheep limbs. **377**, 57*P*, 1986
A method for studying lymphatic pumping activity in conscious and anaesthetized sheep. **378**, 109, 1986
Intermittent compression as a stimulus to lymph flow in the sheep hind limb. **380**, 35*P*, 1986
Intrinsic and extrinsic propulsion of lymph when lymph flow is increased by rhythmic compression of the sheep's foot. **382**, 154*P*, 1987
The effect of rhythmic compression of the sheep's hoof on local lymph flow. **382**, 198*P*, 1987
Peripheral lymphatic responses to outflow pressure in anaesthetized sheep. **383**, 527, 1987
The role of external compression and movement in lymph propulsion in the sheep hind limb. **387**, 83, 1987
Popliteal efferent lymph flow response to stimulation of the sympathetic chain in the sheep. **387**, 55*P*, 1987
Short-lived excitatory response to sustained field stimulation in isolated bovine lymphatic vessels. **387**, 56*P*, 1987
The effect of electrical stimulation of the sympathetic chain on peripheral lymph flow in the anaesthetized sheep. **393**, 123, 1987

Lymph vessel
The effect of outflow pressure on lymph flow in popliteal efferent lymphatics in anaesthetized sheep. **369**, 139*P*, 1985
Resistance in the lymphatic system draining the sheep's foot. **387**, 57*P*, 1987
Lymphatic clearance of saline injected into the sheep's foot. **387**, 95*P*, 1987

Lymphatic
β-Adrenergic inhibition of bovine mesenteric lymphatics. **374**, 401, 1986
Assessment of the relative contribution of extrinsic and intrinsic pumping to fluid propulsion in sheep lymphatics. **380**, 33*P*, 1986

Lymphocyte
A voltage-gated potassium channel in human T lymphocytes. **358**, 197, 1985
Voltage-gated potassium conductance in human T lymphocytes stimulated with phorbol ester. **372**, 405, 1986
Identifying T and B lymphocytes in the peripheral blood of rats using an immunocytochemical procedure. **387**, 14*P*, 1987
Polyphosphoinositide levels in transformed human lymphocytes isolated from manic-depressive patients. **392**, 112*P*, 1987

Lysosome
Tissue-selective lysosomal accumulation of the beta-adrenergic antagonist, propranolol, in rabbit ventricular myocytes and cultured BC_3H_1 (mouse smooth muscle), HeLa (human carcinoma) and MDCK (dog kidney epithelium) cells. **367**, 71*P*, 1985

M-current
Myoblasts and myoblast-conditioned medium attract the earliest spinal neurites from frog embryos. **375**, 39, 1986

M-current (*cont.*)
Mechanisms of action of acetylcholine in the guinea-pig cerebral cortex *in vitro*. **375**, 169, 1986

Macaque monkey
Thresholds to chromatic spots of cells in the macaque geniculate nucleus as compared to detection sensitivity in man. **392**, 193, 1987

Macrophage
Differential expression of inward and outward potassium currents in the macrophage-like cell line J774.1. **369**, 475, 1985

Magnesium
The action of *N*-methyl-D-aspartic acid on mouse spinal neurones in culture. **361**, 65, 1985
The actions of extracellular magnesium on isolated mammalian ventricular myocardium. **372**, 32*P*, 1986
Properties of the metallochromic dyes Arsenazo III, Antipyrylazo III and Azo1 in frog skeletal muscle fibres at rest. **377**, 89, 1986
Intracellular free magnesium in frog skeletal muscle fibres measured with ion-selective micro-electrodes. **378**, 461, 1986
Voltage-dependent magnesium block of adenosine-triphosphate-sensitive potassium channel in guinea-pig ventricular cells. **387**, 251, 1987
Estimation of the upper limit of intracellular free magnesium $[Mg]_i$ in ferret ventricular muscle. **387**, 85*P*, 1987
Some properties of a system for sodium-dependent outward movement of magnesium from metabolizing human red blood cells. **390**, 367, 1987
The effects of magnesium upon adenosine triphosphate-sensitive potassium channels in a rat insulin-secreting cell line. **391**, 611, 1987
Tonic contraction of canine gastric muscle during long-lasting calcium removal and its dependence on magnesium. **393**, 375, 1987
The intracellular concentration of free magnesium in rat skeletal muscles. **394**, 140*P*, 1987

Magnetic stimulation
Influence of magnetic stimulation of the brain on spinal reflexes in man. **382**, 83*P*, 1987
Interaction between electrical and magnetic stimulation of the human brain. **384**, 74*P*, 1987

Maintained discharge
The variability of the maintained discharge of cat dorsal lateral geniculate cells. **375**, 339, 1986

Mammary gland
Sodium and potassium distribution in the lactating mouse mammary gland *in vivo*. **361**, 219, 1985
Effects of mammary secretion from non-lactating goats on milk secretion *in vivo* and *in vitro*. **361**, 75*P*, 1985
Prepartum milking and the onset of secretion of milk fat in the goat. **366**, 291, 1985
Interactions between prolactin and placental lactogen in the control of mammogenesis in the pregnant mouse. **367**, 83*P*, 1985
Parturition in the guinea-pig: vital role of the mammary glands. **378**, 82*P*, 1986
Bumetanide binding to milk fat globule membrane. **386**, 75*P*, 1987
Serum albumin secretion in rat milk. **391**, 419, 1987

Mast cell
The release of histamine by parasympathetic stimulation in guinea-pig auricle and rat ileum. **371**, 29, 1986
Some characteristics of histamine secretion from rat peritoneal mast cells stimulated with nerve growth factor. **372**, 379, 1986

Mastication
The possible relation between mastication and parotid secretion in the rabbit. **364**, 19, 1985

Mechanical property
Mechanical measurements on skinned muscle fibres from *Balanus nubilus*. **382**, 171*P*, 1987

Mechano-electrical transduction
Mechano-electrical transduction currents in isolated vestibular hair cells of the chick. **359**, 189, 1985
The mechanical properties of ciliary bundles of turtle cochlear hair cells. **364**, 359, 1985
Gating properties of the mechano-electrical transducer channel in the dissociated vestibular hair cell of the chick. **387**, 589, 1987

Mechanoreceptor
Mechanotransducer ion channels in chick skeletal muscle: the effects of extracellular pH. **363**, 119, 1985
Single mechanoreceptor afferent units firing during locomotion in the shore crab (*Carcinus maenas*). **365**, 25*P*, 1985
The effects of Neomycin on the ultrastructure of touch corpuscles in rats and on cellular respiration. **369**, 61*P*, 1985
Are Merkel cell–neurite reciprocal synapses involved in the initiation of tactile responses in salamander skin? **376**, 101, 1986
Dynamic and static responses of cat s.a.I. mechanoreceptors after close arterial infusion of different doses of neomycin. **382**, 76*P*, 1987
Responses to circulatory pressures, and conduction velocity, of pulmocutaneous baroreceptors in *Bufo marinus*. **388**, 41, 1987
Response characteristics of pulmocutaneous arterial baroreceptors in the toad, *Bufo marinus*. **388**, 55, 1987
Quantitative analysis of laryngeal mechanosensitivity in the cat and rabbit. **388**, 467, 1987
Lithium and the excitability of slowly adapting type I (s.a.I) cutaneous mechanoreceptors of the rat. **390**, 38*P*, 1987
The effect of close arterial infusion of neomycin on slowly adapting cutaneous mechanoreceptors in the cat. **394**, 49*P*, 1987

Medulla oblongata
Respiratory responses to medullary hydrogen ion changes in cats: different effects of respiratory and metabolic acidoses. **358**, 285, 1985
Bulbospinal neurones of the 'glycine-sensitive' area in the cat. **361**, 48*P*, 1985
Inhibiting the rabbit caudal ventrolateral medulla prevents baroreceptor-initiated secretion of vasopressin. **367**, 253, 1985

Medulla oblongata (*cont.*)
Mediation of the fastigial pressor response and a somatosympathetic reflex by ventral medullary neurones in the cat. **368**, 423, 1985
The non-uniform character of expiratory synaptic activity in expiratory bulbospinal neurones of the cat. **370**, 433, 1986
Functional specificity of ventral medullary presympathetic neurones in the cat. **377**, 58*P*, 1986
Organization of synaptic transmission in the mammalian solitary complex, studied *in vitro*. **381**, 551, 1986
Central respiratory modulation of subretrofacial bulbospinal neurones in the cat. **388**, 533, 1987
Differential control of cardiac and vasomotor activity by neurones in nucleus paragigantocellularis lateralis in the cat. **389**, 23, 1987
Changes in motoneuronal excitability accompany analgesia evoked from the ventrolateral medulla in the rat. **390**, 51*P*, 1987
The effects of noradrenaline on neurones in the rat dorsal motor nucleus of the vagus, *in vitro*. **393**, 213, 1987

Melanocyte-stimulating hormone
Analysis of the antipyretic action of α-melanocyte-stimulating hormone in rabbits. **359**, 459, 1985
The hypothalamo-hypophyseal rat explant *in vitro*: endocrinological studies of the pars intermedia dopaminergic neural input. **370**, 381, 1986
Effect of α-melanocyte stimulating hormone (α-MSH) on tyrosinase synthesis and activity in mouse hair follicular melanocytes. **391**, 84*P*, 1987

Melatonin
Phase response of human melatonin rhythms to bright light in Antarctica. **377**, 68*P*, 1986
Cyclization of side chain and 2-hydroxylation: a novel metabolic route of melatonin in humans and rats. **390**, 237*P*, 1987

Membrane
Apical membrane potassium and chloride permeabilities in surface cells of rabbit descending colon epithelium. **358**, 433, 1985
A simple means of maintaining very low rates of solution flow for use in recording from excised membrane patches. **369**, 11*P*, 1985
Measurement of capillary basement membrane thickness in the mouse retina with a semi-automatic image analyser. **384**, 2*P*, 1987

Membrane conductance
Apical membrane potassium and chloride permeabilities in surface cells of rabbit descending colon epithelium. **358**, 433, 1985
Extracellular activation and membrane conductances of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 149, 1986
α-Adrenergic inhibition of rat cerebellar Purkinje cells *in vitro*: a voltage-clamp study. **383**, 487, 1987
Variation of membrane properties in hair cells isolated from the turtle cochlea. **385**, 207, 1987

Membrane current
Elemental distribution in *Rana pipiens* retinal rods: quantitative electron probe analysis. **358**, 183, 1985
Two components of muscarine-sensitive membrane current in rat sympathetic neurones. **358**, 335, 1985
Effects of sodium substitutes on transient inward current and tension in guinea-pig and ferret papillary muscle. **360**, 105, 1985
The reduction of calcium current associated with early differentiation of the murine embryo. **363**, 71, 1985
Properties of single potassium channels in vesicles formed from the sarcolemma of frog skeletal muscle. **364**, 339, 1985
Electric current flow inside perineurial sheaths of mouse motor nerves. **368**, 565, 1985
A calcium-activated potassium current in motor nerve terminals of the mouse. **368**, 577, 1985
Action of baclofen on voltage-dependent currents in mouse dorsal root ganglion neurones in culture. **372**, 49*P*, 1986
Analysis of gated membrane currents and mechanisms of firing control in the rapidly adapting lobster stretch receptor neurone. **384**, 649, 1987
Current activation by membrane hyperpolarization in the slowly adapting lobster stretch receptor neurone. **384**, 671, 1987

Membrane electrical property
The admittance of the squid giant axon at radio frequencies and its relation to membrane structure. **360**, 275, 1985
Electric current flow in cell pairs isolated from adult rat hearts. **366**, 177, 1985
Electrophysiological properties and glucose responsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 127, 1986
The ventral and dorsal lateral geniculate nucleus of the rat: intracellular recordings *in vitro*. **384**, 587, 1987
Differences in the electrical properties of rat trigeminal motoneurones under two common anaesthetic regimes. **384**, 67*P*, 1987
Membrane properties of morphologically identified X and Y cells in the lateral geniculate nucleus of the cat *in vitro*. **390**, 243, 1987
Effects of central or peripheral axotomy on membrane properties of sensory neurones in the petrosal ganglion of the cat. **391**, 39, 1987

Membrane excitability
Different properties of two voltage-dependent inward currents of the ciliate *Stylonchia mytilus*. **381**, 1, 1986

Membrane noise
Location of 1/*f* noise: ion channel or bulk ionic solution? **366**, 8*P*, 1985

Membrane permeability
Quantitative assessment of the permeability of the rat blood–retinal barrier to small water-soluble non-electrolytes. **389**, 483, 1987
Proton permeability and membrane fluidity of rabbit duodenal brush-border membrane vesicles. **391**, 26*P*, 1987
Ionic basis of membrane potential in developing ectoderm of the *Xenopus* blastula. **393**, 525, 1987

Membrane potential
Electrophysiology of succinate transport across rabbit renal brush border membranes. **360**, 95, 1985
Comparison of the effects of potassium and membrane potential on the calcium-dependent sodium efflux in squid axons. **378**, 53, 1986
The effects of membrane potential on active and passive sodium transport in *Xenopus* oocytes. **385**, 643, 1987
The effect of membrane potential on the mammalian sodium–potassium pump reconstituted into phospholipid vesicles. **387**, 331, 1987
Effect of sodium–potassium pump inhibition and low sodium on membrane potential in cultured embryonic chick heart cells. **387**, 549, 1987
Electrogenic sodium–calcium exchange in cultured embryonic chick heart cells. **387**, 567, 1987
The properties and function of inward rectification in rod photoreceptors of the tiger salamander. **390**, 319, 1987

Membrane receptor
Multiple receptor sites for a molluscan peptide (FMRFamide) and related peptides of *Helix*. **382**, 51, 1987

Membrane resistance
Cell membranes and paracellular resistances in isolated renal proximal tubules from rabbit and *Ambystoma*. **370**, 25, 1986
Paracellular ionic and transcellular water diffusions across rabbit corneal endothelium. **385**, 89, 1987

Membrane transport
Effect of ventricular tonicity upon cerebrospinal fluid production in rabbits. **362**, 273, 1985
Origin and voltage dependence of asparagine-induced depolarization in intestinal cells of *Xenopus* embryo. **366**, 197, 1985
Determination of relative ion permeabilities in vesicles isolated from the luminal membrane of bovine tracheal epithelium. **380**, 54*P*, 1986
Is there a relationship between erythrocyte morphology and membrane transport? **382**, 26*P*, 1987
Influence of chloride concentration and pH on the ^{36}Cl efflux from depolarized skeletal muscle of *Rana temporaria*. **385**, 49, 1987
Heterogeneity of amino acid transport in horse erythrocytes: a detailed kinetic analysis of inherited transport variation. **389**, 385, 1987
Effect of periglandular ionic composition and transport inhibitors on rhesus monkey eccrine sweat gland function *in vitro*. **393**, 195, 1987

Membrane vesicle
D-Galactose transport in rat intestinal brush border membrane vesicles studied with a molecular-sieve technique. **375**, 71, 1986
Human placental sulphate transport: studies on chorionic trophoblast brush border membrane vesicles. **377**, 15, 1986
Sulphate transport into vesicles prepared from human placental brush border membranes: inhibition by trace element oxides. **379**, 367, 1986

Merkel cell
Are Merkel cell–neurite reciprocal synapses involved in the initiation of tactile responses in salamander skin? **376**, 101, 1986

Mesenteric artery
A phorbol ester has dual actions on the mechanical response in the rabbit mesenteric and porcine coronary arteries. **375**, 515, 1986
Are both co-transmitters involved in contraction of the isolated superior mesenteric artery of the rabbit? **378**, 56*P*, 1986
Comparison of the frequency dependence of venous and arterial responses to sympathetic nerve stimulation in guinea-pigs. **384**, 153, 1987
Contractile responsiveness of the aged human isolated mesenteric artery. **392**, 86*P*, 1987

Mesenteric microcirculation
Direct observations of responses of mesenteric microcirculation of the rat to circulating noradrenaline. **368**, 393, 1985

Mesenteric vein
Comparison of the frequency dependence of venous and arterial responses to sympathetic nerve stimulation in guinea-pigs. **384**, 153, 1987

Messenger RNA
Properties of single sodium channels translated by *Xenopus* oocytes after injection with messenger ribonucleic acid. **386**, 73, 1987
α-Actin mRNA is depressed in denervated adult rat plantaris muscle. **386**, 87*P*, 1987

Metabolism
A non-linear relationship between energy intake and rate of weight loss in rats. **362**, 40*P*, 1985
Differential responsiveness to adrenaline by slow- and fast-twitch rat skeletal muscle with increase in age. **371**, 173*P*, 1986
Metabolic consequences of increasing intracellular calcium and force production in perfused ferret hearts. **376**, 121, 1986
Glycolysis and oxidative phosphorylation during activation of the sodium pump in the taenia from guinea-pig caecum. **381**, 65, 1986
Brain intracellular pH and metabolism during hypercapnia and hypocapnia in the new-born lamb. **382**, 1, 1987
Effect of channel blockers on potassium efflux from metabolically exhausted frog skeletal muscle. **383**, 31, 1987
Energy metabolism in female human subjects – the influence of a fat-rich diet. **390**, 125*P*, 1987
Vitamin D metabolism during Vitamin D_2 administration in man. **391**, 72*P*, 1987

Metallochromic indicator
Caffeine potentiation of calcium release in frog skeletal muscle fibres. **375**, 535, 1986
Properties of the metallochromic dyes Arsenazo III, Antipyrylazo III and Azo1 in frog skeletal muscle fibres at rest. **377**, 89, 1986

Microcirculation
Vascularity and microvessel surface area density in brain and muscle of the cephalopod *Sepia officinalis*. **365**, 98*P*, 1985
Direct observations of responses of mesenteric microcirculation of the rat to circulating noradrenaline. **368**, 393, 1985

Microcirculation (*cont.*)
Responses of skeletal muscle microcirculation to circulating noradrenaline in the rat. **373**, 56*P*, 1986
Effect of inflammatory mediators on the developing microcirculation of the rabbit ear chamber. **374**, 17*P*, 1986
The assessment of vasospastic disease in man using television microscopy and a standardized cold challenge. **387**, 10*P*, 1987
The use of implanted polyvinyl sponge to assess the sensitivity of newly grown blood vessels to inflammatory agents in the rat. **387**, 16*P*, 1987
Responses induced in muscle microcirculation of the rat by systemic hypoxia. **387**, 67*P*, 1987
Adaptations of the rat microvasculature to long-term administration of prazosin. **387**, 71*P*, 1987

Microcomputer, *see also* Computer
Physiology practical classes using the BBC microcomputer and ECONET. **373**, 8*P*, 1986
A vacuum chamber for the application of lower-body negative pressure to human subjects. **374**, 10*P*, 1986
A microcomputer system for measurement of coronary blood flow in man. **374**, 14*P*, 1986
A microcomputer system for analysis of coronary artery calibre. **374**, 15*P*, 1986
Measuring the short-circuit current of an epithelial sheet – interactive simulations for the BBC micro. **376**, 2*P*, 1986
Microcomputer simulation in undergraduate neurophysiology laboratory experiments. **376**, 8*P*, 1986
Simple simulations for teaching physiology with microcomputers. **376**, 9*P*, 1986
Hall-effect length and tension transducers for the BBC B microcomputer. **376**, 13*P*, 1986
A system to provide control of stimulation and acquisition of ionic currents in cell membranes. **377**, 7*P*, 1986
Microcomputer graphics for use with physiology teaching programs. **380**, 2*P*, 1986
A microcomputer-controlled system for the measurement of aerobic power. **380**, 5*P*, 1986
"MISER" – my "inexpensive" solution for excavating records **380**, 6*P*, 1986
Microcomputer control and analysis of experiments on the 'staircase' phenomenon of skeletal muscle in man. **380**, 7*P*, 1986
A simple method for synchronising tape commentary to Microtext modules on a BBC microcomputer. **380**, 12*P*, 1986
A microcomputer simulation of inhibitory neuronal networks. **380**, 21*P*, 1986
A demonstration of stereoscopic vision using red and green images produced by the BBC microcomputer. **382**, 16*P*, 1987
Analysis of neuronal firing pattern changes during microiontophoretic experiments using a BBC microcomputer. **382**, 18*P*, 1987
Analysis of intracellular recordings using an Apple IIe and a CED 1401 interface. **382**, 24*P*, 1987
Signal detection theory measurement of pain. **382**, 25*P*, 1987
An automated microcomputer-based system for estimating spinal inhibition in man. **387**, 8*P*, 1987
A simple, easy-to-use, microcomputer-based modelling system. **388**, 2*P*, 1987
Teaching data-acquisition and data-handling skills with a microcomputer. **388**, 3*P*, 1987
Rodent ultrasonic vocalizations: long-term collection of data using the BBC microcomputer. **388**, 5*P*, 1987
Yet another application of a microcomputer to electrophysiology. **392**, 6*P*, 1987
Visual reaction time measurement using a BBC microcomputer. **392**, 10*P*, 1987
Nonconforming action potentials from isolated mouse Islets of Langerhans. **392**, 15*P*, 1987
A simple, inexpensive method of collection, storage and analysis of data for the BBC microcomputer. **392**, 22*P*, 1987

Microelectrode
'Tungsten plus glass' multibarrel electrodes. **364**, 9*P*, 1985
A simple method for dry bevelling of micropipettes used in the construction of ion-selective microelectrodes. **369**, 8*P*, 1985
Measurement of intracellular pH in rat kidney *in vivo* using micro-electrodes: effect of acetazolamide. **369**, 75*P*, 1985
Eccentric double micropipette suitable both for pH_i micro-electrodes and for intracellular iontophoresis. **371**, 24*P*, 1986
A multibarrelled platinum-coated micro-electrode. **386**, 9*P*, 1987
Dual microinjections into the brain of anaesthetized rats using θ-style micropipettes. **387**, 28*P*, 1987
Micro-electrode studies on the effects of exogenous cyclic adenosine monophosphate on active sodium transport in frog skin. **388**, 547, 1987
Extracellular potassium changes in the rat neurohypophysis during activation of the magnocellular neurosecretory system. **392**, 97, 1987

Micromanipulator
A micromanipulator. **382**, 22*P*, 1987

Microneurography
Efferent discharges recorded from single skeletomotor and fusimotor fibres in man. **375**, 251, 1986

Microprocessor
A microprocessor-controlled pulsed-wavelength differential microspectrophotometer. **361**, 15*P*, 1985
A simple device for interfacing a spike counter and an RML 380Z microcomputer. **364**, 6*P*, 1985
Microcomputer system for simultaneous solution switching and data collection for experiments with ion-sensitive micro-electrodes. **364**, 8*P*, 1985
A Z-80-based signal averager suitable for class use. **387**, 6*P*, 1987

Microscope
A foot-pedal operated focusing device suitable for use with a class-dissection microscope. **369**, 10*P*, 1985

Microscope (*cont.*)
A lower-cost video-enhanced-contrast microscopy system for viewing fine detail in living cells. **377**, 13*P*, 1986
Microstimulation
Muscle fibre conduction velocity in motor units of the human anterior tibial muscle: a new size principle parameter. **391**, 561, 1987
Saccadic eye movements evoked by microstimulation of lobule VII of the cerebellar vermis of macaque monkeys. **394**, 573, 1987
Mid-brain
Red nucleus inputs to retractor bulbi motoneurones in the cat. **371**, 317, 1986
Milk
Sodium and potassium distribution in the lactating mouse mammary gland *in vivo*. **361**, 219, 1985
Prepartum milking and the onset of secretion of milk fat in the goat. **366**, 291, 1985
Stimulation of cell growth by polypeptide growth factors in human mammary secretions. **371**, 206*P*, 1986
Serum albumin secretion in rat milk. **391**, 419, 1987
Milk ejection
Effect of intrathecally administered morphine on reflex milk-ejection in the lactating rat. **358**, 105*P*, 1985
Changing characteristics of the milk-ejection reflex in the rat during late pregnancy, lactation and weaning. **364**, 55*P*, 1985
Effect of lesions of the medial raphe on e.e.g. patterns and reflex milk ejection in the urethane-anaesthetized rat. **364**, 57*P*, 1985
A neuroanatomical study of sensory afferent input from the teat to the spinal cord, in lactating rats. **364**, 58*P*, 1985
Activation of oxytocin neurones influences the periodicity of reflex milk ejection in the rat. **371**, 184*P*, 1986
Regulation of the milk ejection reflex in the rat. **380**, 239, 1986
Role of the sympathetic nervous system in kappa-opioid inhibition of milk ejection in the anaesthetized lactating rat. **381**, 42*P*, 1986
Mineralocorticoid
Salt appetite in the pigeon in response to pharmacological treatments. **393**, 555, 1987
Miniature end-plate current
Apparent acetylcholine receptor channel conversion at individual rat soleus end-plates *in vitro*. **375**, 153, 1986
Miniature end-plate potential
Effect of Cl^- ions on giant miniature end-plate potentials in frog muscle. **366**, 88*P*, 1985
Changes in miniature end-plate potentials due to moderate hypertonicity at the frog neuromuscular junction. **376**, 1, 1986
The nature and origin of calcium-insensitive miniature end-plate potentials at rodent neuromuscular junctions. **381**, 607, 1986
Effect of chloride ions on giant miniature end-plate potentials at the frog neuromuscular junction. **383**, 143, 1987
Miniature inhibitory junctional current
Miniature and evoked inhibitory junctional currents and γ-aminobutyric acid-activated current noise in locust muscle fibres. **374**, 179, 1986
Miniature potential
Characterization of miniature inhibitory post-synaptic potentials in rat spinal motoneurones. **368**, 627, 1985
Mitochondrion
Calcium mobilization in enzymically isolated single intact and skinned muscle cells of the porcine coronary artery. **363**, 103, 1985
Carbonic anhydrase in the sarcoplasmic reticulum of rabbit skeletal muscle. **371**, 351, 1986
Changes in porcine muscle mitochondria induced by environmental temperature and energy intake. **371**, 220*P*, 1986
Simultaneous recording of luciferase luminescence and P_{O_2} in *Limulus* ventral photoreceptor. **382**, 118*P*, 1987
Relationship between mitochondria and oxygen consumption in isolated cat muscles. **385**, 661, 1987
Modulation
Modulation by applied electric fields of Purkinje and stellate cell activity in the isolated turtle cerebellum. **371**, 89, 1986
Molluscan neurone
Calcium-dependent inward current in *Aplysia* bursting pace-maker neurones. **362**, 107, 1985
Membrane currents of internally perfused neurones of the snail, *Lymnaea stagnalis*, at low intracellular pH. **376**, 477, 1986
An enzymatic mechanism for calcium current inactivation in dialysed *Helix* neurones. **378**, 31, 1986
Voltage-dependent intracellular pH in *Helix aspersa* neurones. **390**, 433, 1987
Calcium dependence of voltage sensitivity in adenosine 3′,5′-cyclic phosphate-stimulated sodium current in *Pleurobranchaea*. **393**, 233, 1987
Copper activates a unique inward current in molluscan neurones. **394**, 429, 1987
Monkey
Corticospinal facilitation of hand muscles during voluntary movement in the conscious monkey. **381**, 497, 1986
Selective facilitation of different hand muscles by single corticospinal neurones in the conscious monkey. **381**, 529, 1986
Monoaminergic pathway
Efflux of 5-hydroxytryptamine and noradrenaline into spinal cord superfusates during stimulation of the rat medulla. **359**, 151, 1985
Monoclonal antibody
Development of ionic channels and cell-surface antigens in the cleavage-arrested one-cell embryo of an ascidian. **386**, 113, 1987
Monosynaptic reflex
Morphological and physiological studies of development of the monosynaptic reflex pathway in the rat lumbar spinal cord. **389**, 441, 1987

Morphine
The effects of intrathecal mu and kappa opiates on nociceptive processing in the rat dorsal horn. **365**, 31*P*, 1985
Intravenous morphine raises blood pressure in the conscious rabbit. **371**, 95*P*, 1986
Separate supra-spinal and spinal mechanisms mediate morphine-induced inhibition of reflex urinary bladder contractions in the rat. **371**, 258*P*, 1986
Effect of pentobarbitone, phenoxybenzamine and adrenalectomy on the morphine-induced increase in blood pressure in rabbits. **374**, 49*P*, 1986
Hypersensitivity to naloxone in magnocellular neurones of virgin female rats treated chronically with intracerebroventricular (i.c.v.) morphine. **382**, 151*P*, 1987
Supraspinal morphine and descending inhibitions acting on the dorsal horn of the rat. **384**, 81, 1987
Effects of morphine on electrical activity of the rectum in man. **388**, 153, 1987
The hypertensive effect of intravenous morphine in conscious rabbits is mimicked by intraventricular but not intracisternal morphine. **390**, 207*P*, 1987

Morphometry
A method for measuring cellular and nuclear morphological parameters. **367**, 2*P*, 1985

Mossy fibre
Mossy fibres sending retinal-slip, eye, and head velocity signals to the flocculus of the monkey. **379**, 39, 1986

Motility
Myoelectrical activity and propulsion in the large intestine of fed and fasted rats. **362**, 93, 1985
Isolated intestinal smooth-muscle response to inflammation induced in the rat by *Trichinella spiralis* infection. **378**, 24*P*, 1986

Motoneurone
Structural and topographical influences on functional connectivity in spinal monosynaptic reflex arcs in the cat. **358**, 483, 1985
Intracellular tetra-ethyl ammonium ions enhance group Ia excitatory post-synaptic potentials evoked in cat spinal motoneurones. **358**, 20*P*, 1985
Two post-synaptic regions revealed in cat C-type terminals using ethanolic phosphotungstic acid. **360**, 47*P*, 1985
Pyramidal effects in dorsal neck motoneurones of the cat. **363**, 287, 1985
Cutaneous receptive field and morphological properties of hamstring flexor α-motoneurones in the rat. **364**, 249, 1985
A dorsolateral spinal pathway controlling the pattern of gamma motoneurone discharge in the cat. **365**, 20*P*, 1985
Reflex control of motoneurone firing rates during fatigue in man. **365**, 23*P*, 1985
The components of monosynaptic excitatory post-synaptic potentials evoked in cat lumbosacral motoneurones by impulses in descending fibres. **365**, 32*P*, 1985
The cortico-motoneuronal input to hand and forearm motoneurones in the anaesthetised monkey. **366**, 20*P*, 1985
The nature of the reflex coupling between skin afferents and gamma motoneurones in the cat. **366**, 127*P*, 1985
Characterization of miniature inhibitory post-synaptic potentials in rat spinal motoneurones. **368**, 627, 1985
Partitioning of monosynaptic Ia excitatory post-synaptic potentials in the motor nucleus of the cat semimembranosus muscle. **369**, 379, 1985
Independence of quantal size recorded at the soma and synaptic location of descending monosynaptic excitatory postsynaptic potentials in cat spinal motoneurones. **369**, 25*P*, 1985
Electrophysiological properties of neonatal rat motoneurones studied *in vitro*. **370**, 651, 1986
Arsenazo III transients and calcium current in a normally non-spiking neuronal soma of crayfish. **374**, 571, 1986
Topographical projections of segmental nerves to the frog glutaeus muscle during loss of polyneuronal innervation. **375**, 303, 1986
The degree of short-term synchrony between α- and γ-motoneurones coactivated during the flexion reflex in the cat. **376**, 47, 1986
Effects of calcium and magnesium on transmitter release at Ia synapses of rat spinal motoneurones *in vitro*. **376**, 543,
Intracellular tetraethylammonium ions enhance group Ia excitatory post-synaptic potentials evoked in cat motoneurones. **377**, 267, 1986
Synchrony of motor unit discharge in humans with Parkinson's disease. **377**, 30*P*, 1986
Synaptic physiology of spinal motoneurones of normal and *spastic* mice: an *in vitro* study. **379**, 275, 1986
Motoneurones of the submucous plexus regulate electrical activity of the circular muscle of canine proximal colon. **380**, 293, 1986
Variations in neuronal response to antidromic invasion (F-response) of spinal α motor neurone pools subserving abductor pollicis brevis (A.P.B.), abductor digiti minimi (A.D.M.) and extensor digitorum brevis (E.D.B.) in man. **380**, 59*P*, 1986
Corticospinal facilitation of hand muscles during voluntary movement in the conscious monkey. **381**, 497, 1986
Selective facilitation of different hand muscles by single corticospinal neurones in the conscious monkey. **381**, 529, 1986
Effect of cutaneous nerve stimulation on voluntary and stretch reflex electromyographic activity in wrist flexors in humans. **382**, 509, 1987
Presynaptic inhibition of synaptic potentials evoked in cat spinal motoneurones by impulses in single group Ia axons. **383**, 153, 1987
Dendritic activities of spinal motoneurones in pigs and rabbits enhanced through chronic stimulation of a dorsal root. **383**, 171, 1987
Recurrent inhibitory connexions among neck motoneurones in the cat. **383**, 301, 1987

Motoneurone (*cont.*)
Cell death of axotomized motoneurones in neonatal rats, and its prevention by peripheral reinnervation. **386**, 135, 1987
The dynamic response of cat gastrocnemius motor units investigated by ramp-current injection into their motoneurones. **387**, 317, 1987
The measurement of single motor-axon recurrent inhibitory post-synaptic potentials in the cat. **388**, 631, 1987
Distribution of single-axon recurrent inhibitory post-synaptic potentials in a single spinal motor nucleus in the cat. **388**, 653, 1987
Activation patterns of embryonic chick lumbrosacral motoneurones following large spinal cord reversals. **389**, 491, 1987
Post-synaptic actions of midlumbar interneurones on motoneurones of hind-limb muscles in the cat. **389**, 675, 1987
Cross-correlation assessment of synaptic strength of single Ia fibre connections with triceps surae motoneurones in cats. **390**, 161, 1987
Synaptology of identified motoneurones supplying the cat external anal sphincter. **390**, 193*P*, 1987
Identification and electrical properties of rat spinal motoneurones in culture. **394**, 106*P*, 1987

Motor axon
Activation of cat motor units by paired stimuli at short intervals. **387**, 385, 1987

Motor control
Behaviour of motor units of human arm muscles: differences between slow isometric contraction and relaxation. **359**, 107, 1985
Strategies of upper limb control in hemiplegic stroke patients. **366**, 21*P*, 1985
Physiological studies of the connection between the ectoneural and hyponeural nervous systems in an echinoderm, *Ophiura ophiura*. **367**, 53*P*, 1985
H-reflex inhibition precedes voluntary termination of motor activity in man. **369**, 27*P*, 1985
Stumbling reactions in man: significance of proprioceptive and pre-programmed mechanisms. **386**, 149, 1987
Maintenance of constant arm position or force: reflex and volitional components in man. **386**, 247, 1987
Coordinative movements of the pelvis and trunk are controlled by task-specific motor programmes in man. **390**, 136*P*, 1987
The discharges of cerebellar Golgi cells during locomotion in the cat. **392**, 315, 1987
Quadriceps motor-unit coupling induced by mechanical stimulation of cat knee-joint receptors. **392**, 105*P*, 1987

Motor cortex
Direct estimation of corticospinal tract conduction velocity in man. **358**, 36*P*, 1985
The site of facilitation of the response to cortical stimulation during voluntary contraction in man. **360**, 52*P*, 1985
Post-natal development of pyramidal tract neurones in kittens. **363**, 481, 1985
Motor cortical discharges and locomotion in the cat. **364**, 28*P*, 1985
Methods for identification of single motor cortex neurones with projections to motoneurones of hand and forearm muscles in the conscious monkey. **366**, 2*P*, 1985
Further studies of monkey post-arcuate premotor neurones whose activity occurs before visually cued arm movements. **366**, 24*P*, 1985
Electromyographic responses evoked in muscles of the forelimb by intracortical stimulation in the cat. **367**, 309, 1985
Forelimb electromyographic responses to motor cortex stimulation during locomotion in the cat. **367**, 327, 1985
Magnetic stimulation of the human brain. **369**, 3*P*, 1985
The consequences of synchronization among cortico-motor neurones in the monkey. **371**, 46*P*, 1986
The impact of differences in cortico-motor (CM) neurone firing frequency upon hand muscles in the conscious monkey. **372**, 15*P*, 1986
The effect of percutaneous motor cortex stimulation on H reflexes in muscles of the arm and leg in intact man. **377**, 333, 1986
Plasma-immunoreactive atrial natriuretic peptide (ANP) and urinary PGE_2 excretion during vasopressin-induced natriuresis in the rat. **378**, 34*P*, 1986
Percutaneous stimulation of the human brain: a comparison of electrical and magnetic stimuli. **378**, 35*P*, 1986
Differences between electrical and magnetic stimulation of the human brain. **378**, 36*P*, 1986
Corticospinal facilitation of hand muscles during voluntary movement in the conscious monkey. **381**, 497, 1986
Selective facilitation of different hand muscles by single corticospinal neurones in the conscious monkey. **381**, 529, 1986
Multiple firing of spinal motoneurones produced by single anodal electrical shocks to human motor cortex. **381**, 45*P*, 1986
Subthreshold motor commands and the control of human motoneurones. **381**, 46*P*, 1986
Activation of the human diaphragm from the motor cortex. **384**, 109, 1987
Responses in small hand muscles from magnetic stimulation of the human brain. **388**, 397, 1987
Facilitation of single thenar motor units by single corticospinal neurones in the conscious monkey. **390**, 20*P*, 1987
Focal cerebral and peripheral nerve stimulation in man with the magnetic coil. **390**, 24*P*, 1987
A comparison of the effects of cathodal, and anodal stimulation of the human motor cortex through the intact scalp. **394**, 118*P*, 1987
Magnetic coil versus electrical stimulation of monkey motor cortex. **394**, 119*P*, 1987

Motor nerve
Electric current flow inside perineurial sheaths of mouse motor nerves. **368**, 565, 1985
A calcium-activated potassium current in motor nerve terminals of the mouse. **368**, 577, 1985

Motor nerve terminal
Electrical excitability of motor nerve terminals in the mouse. **366**, 411, 1985
Motor unit
Motor units are of mixed fibre type in a fast muscle of neonatal rat. **358**, 28*P*, 1985
Effect of dantrolene sodium on external intercostal muscle activity and respiration in the anaesthetized rat. **358**, 97*P*, 1985
Behaviour of motor units of human arm muscles: differences between slow isometric contraction and relaxation. **359**, 107, 1985
Interactions between motor units and Golgi tendon organs in the tibialis posterior muscle of the cat. **364**, 199, 1985
Single motor units in the rat. **364**, 11*P*, 1985
Single motor unit recording during locomotion in the cat. **364**, 12*P*, 1985
Effect of central nervous system lesions on the synchronization between motor unit discharge during voluntary contraction in human first dorsal interosseous muscle. **365**, 19*P*, 1985
Short-term synchronization of high-threshold motor units in human first dorsal interosseous muscle recorded during steady voluntary isometric contractions. **366**, 22*P*, 1985
Activation of motor units in human arm muscles in relation to elbow joint angle. **366**, 23*P*, 1985
The effect of altered peripheral field on motoneurone function in developing rat soleus muscles. **368**, 513, 1985
Activation of cat muscle spindles by static skelefusimotor axons. **369**, 323, 1985
The effect of stroke on synchronization of human motor unit firing in large flexor and extensor muscles in the leg and a small hand muscle. **369**, 29*P*, 1985
Length-related changes in activation threshold and wave form of motor units in human masseter muscle. **370**, 457, 1986
A new technique to assess the ongoing short-term synchronization in individual motor units during different voluntary movements in man. **371**, 19*P*, 1986
Reinnervation of the lateral gastrocnemius and soleus muscles in the rat by their common nerve. **372**, 485, 1986
Organization of motor units following cross-reinnervation of antagonistic muscles in the cat hind limb. **374**, 443, 1986
Low-threshold motor units in human hand muscles can be selectively activated by magnetic brain stimulation. **380**, 62*P*, 1986
Contractile and electromyographic characteristics of rat plantaris motor unit types during fatigue *in situ*. **385**, 13, 1987
Motor units in a skeletal muscle of neonatal rat: mechanical properties and weak neuromuscular transmission. **386**, 355, 1987
The non-selective innervation of muscle fibres and mixed composition of motor units in a muscle of neonatal rat. **386**, 377, 1987
The dynamic response of cat gastrocnemius motor units investigated by ramp-current injection into their motoneurones. **387**, 317, 1987
Activation of cat motor units by paired stimuli at short intervals. **387**, 385, 1987
Responses in small hand muscles from magnetic stimulation of the human brain. **388**, 397, 1987
Muscle fibre conduction velocity in motor units of the human anterior tibial muscle: a new size principle parameter. **391**, 561, 1987
Fast contracting motor units and their pattern of staircase phenomenon in anterior tibialis muscle of the rat. **392**, 100*P*, 1987
Age changes in motor unit threshold firing rate in the first dorsal interosseous muscle in man. **392**, 104*P*, 1987
Properties of motor units in the transversus abdominis muscle of the garter snake. **393**, 355, 1987
Movement
Magnocellular red nucleus activity during different types of limb movement in the Macaque monkey. **358**, 527, 1985
Relation between red nucleus discharge and movement parameters in trained Macaque monkeys. **358**, 551, 1985
The measurement of external knee movement during weight-lifting. **365**, 9*P*, 1985
Non-visual assessment of finger-tip positions in a horizontal plane. **366**, 94*P*, 1985
The determinants of the step frequency in walking in humans. **373**, 235, 1986
A system for moving limbs. **382**, 14*P*, 1987
The role of external compression and movement in lymph propulsion in the sheep hind limb. **387**, 83, 1987
Cerebellar neuronal activity related to arm movements in trained rhesus monkeys. **394**, 351, 1987
Mucin
Transmural calcium fluxes and role of mucins as cellular calcium-transport vehicles in chicken trachea *in vitro*. **388**, 121, 1987
Mucosa
Parasympathetic nervous control of tracheal vascular resistance in the dog. **385**, 135, 1987
Mucosal plexus
Mucosal plexus and electrolyte transport across the rat colonic mucosa. **376**, 531, 1986
Mucus
Tracheal gland volume, mucosal volume and secretion rate in ferrets. **358**, 101*P*, 1985
A microprocessor-controlled hydraulic probe for measurement of changes in tracheal mucosal thickness. **362**, 7*P*, 1985
Changes in mucosal thickness in the dog trachea. **362**, 13*P*, 1985
Nervous control of mucin secretion into human bronchi. **365**, 297, 1985
A method for measuring the output of mucins from the hamster caecum. **365**, 17*P*, 1985
Gastric mucus in the anaesthetized rat: response to secretin, prostaglandin, ethanol and pepsin. **371**, 135*P*, 1986

Mucus (*cont.*)
Effect of tripotassium dicitrate bismuthate (Denol) on the differentiation and quantitation of mucosubstances in the guinea-pig gastric antrum. **371**, 228*P*, 1986
The effect of cigarette smoke on mucin secretion into the trachea of the anaesthetized cat. **373**, 19*P*, 1986
Lateral nasal gland secretion in the anaesthetized dog. **374**, 359, 1986
Separation of mucus macromolecules secreted into the cat trachea. **376**, 50*P*, 1986
The effect of airflow on mucus secretion into the trachea of the cat. **380**, 429, 1986
Homeostasis of the pH of mucus in the *in vitro* trachea of ferrets. **380**, 41*P*, 1986
The effect of vasoactive intestinal peptide on mucus secretion from the ferret *in vitro* whole trachea. **384**, 65*P*, 1987
Characterization of metachronal wave of beating cilia on frog's palate epithelium in tissue culture. **388**, 1, 1987
Measurement of gastric mucus biosynthesis and secretion in the rat and frog. **391**, 36*P*, 1987
Pepsin and ethanol damage: two different mechanisms of response by the rat gastric mucosa. **391**, 69*P*, 1987
The structure of mucus glycoprotein isolated from the human middle ear. **391**, 73*P*, 1987
Factors affecting the microclimate pH in rat jejunum. **392**, 113, 1987

Muscarine
Elemental distribution in *Rana pipiens* retinal rods: quantitative electron probe analysis. **358**, 183, 1985
Two components of muscarine-sensitive membrane current in rat sympathetic neurones. **358**, 335, 1985

Muscarinic receptor
Muscarinic m_1 and m_2 receptors mediate depolarization and presynaptic inhibition in guinea-pig enteric nervous system. **368**, 435, 1985
On the positive inotropic response of muscarinic receptor stimulation in feline papillary muscle *in vitro*. **369**, 84*P*, 1985
Effect of gallamine and pancuronium on muscarinic receptors in the guinea-pig lung. **376**, 23*P*, 1986
Neurotensin and acetylcholine evoke common responses in frog oocytes injected with rat brain messenger ribonucleic acid. **382**, 523, 1987
Actions of acetylcholine in the guinea-pig and cat medial and lateral geniculate nuclei, *in vitro*. **392**, 147, 1987

Muscarinic response
Muscarinic slow excitation and muscarinic inhibition of synaptic transmission in the rat neostriatum. **380**, 593, 1986
Protein kinase C activators inhibit the inositol trisphosphate-mediated muscarinic current responses in rat lacrimal cells. **394**, 239, 1987

Muscle
How many fibre types in amphibian limb muscles? A comparison of *Rana* and *Xenopus*. **358**, 78*P*, 1985
Zero-order transparency changes during 'isometric' relaxation of frog's sartorius muscle. **358**, 79*P*, 1985
Lack of correlation between twitch contraction time and velocity of unloaded shortening in fibres of frog anterior tibialis muscle. **358**, 81*P*, 1985
The effect of previous activity on the labile heat and rate of relaxation in sartorius muscle (*Rana temporaria*). **358**, 82*P*, 1985
Potentiation of contraction by AR-L 115 BS in striated muscle fibres from the barnacle, *Balanus nubilus*. **360**, 58*P*, 1985
Tension transients during steady shortening of frog muscle fibres. **361**, 131, 1985
The problem of resonance in isokinetic dynamometers. **361**, 7*P*, 1985
Changes in myosin light chains by chronic stimulation of chick myotubes in culture. **361**, 33*P*, 1985
Transformation and/or replacement of fibres in chronically stimulated rabbit fast-twitch muscle? **361**, 34*P*, 1985
Chronic low-frequency activation prevents immobilization atrophy in rabbit soleus muscles. **361**, 35*P*, 1985
Kinetics of glutamate and glutamine transport in perfused rat skeletal muscle. **361**, 37*P*, 1985
Effects of inorganic phosphate on tension development by skinned fibres isolated from red and white muscles of an Antarctic fish (*Notothenia neglecta*). **361**, 39*P*, 1985
Effects of temperature on force–velocity relationship of skinned fibres isolated from Icefish (*Chaenocephalus aceratus*) skeletal muscle. **361**, 40*P*, 1985
Glycerol 3-phosphate in muscle as a source of blood glycerol in the horse following maximal short-term exercise. **361**, 84*P*, 1985
Stepwise shortening in unstimulated frog skeletal muscle fibres. **362**, 173, 1985
Adaptation of mechanical properties of muscle to high force training in man. **365**, 277, 1985
A simple apparatus for eccentric or concentric exercise of the biceps. **365**, 10*P*, 1985
An apparatus for unilateral *in situ* exercise of the lower limb muscles of small mammals. **365**, 11*P*, 1985
Quantification of the relaxing effect of muscle parvalbumins. **365**, 67*P*, 1985
The velocity of the 'quick tension recovery' during the rise of tension in an isometric tetanus in frog single muscle fibres. **365**, 68*P*, 1985
The effect of training on human muscle pain and damage. **365**, 76*P*, 1985
The effect of lignocaine at the frog sartorius muscle. **365**, 78*P*, 1985
Biphasic effect of neuropeptide Y on adrenergic transmission in the rat anococcygeus muscle. **366**, 89*P*, 1985
The energy turnover in contracting muscles of hypothyroid rats. **366**, 124*P*, 1985
Adenosine triphosphatase measurements in skinned muscle fibres from fish using high-performance liquid chromatography. **367**, 6*P*, 1985

Muscle (*cont.*)
Laser spectroscopic studies of actin–myosin interaction in living frogs' muscles. **367**, 76*P*, 1985
The initial burst of impulses in responses of toad muscle spindles during stretch. **368**, 1, 1985
Effects of phosphate on the contractile properties of fast and slow muscle fibres from an Antarctic fish. **368**, 491, 1985
Single fura-2 loaded barnacle muscle fibres studied under voltage clamp using image intensification techniques. **369**, 22*P*, 1985
Effects of strength training on MVC, e.m.g. activity, and shortening speed of the quadriceps in man. **369**, 181*P*, 1985
Potassium and ionic strength effects on the isometric force of skinned twitch muscle fibres of the rat and toad. **370**, 317, 1986
Dose–response of acetylcholine receptor channels opened by a flash-activated agonist in voltage-clamped rat myoballs. **371**, 407, 1986
Cytosol constituents from frog skeletal muscle determined by laser micro-probe mass analysis. **371**, 160*P*, 1986
Tension transients during the rise of tetanic tension in frog muscle fibres. **372**, 595, 1986
Apparatus for measuring force of adduction of the thumb, and for measuring profiles of the hand in human subjects. **372**, 9*P*, 1986
Isometric force in maximum voluntary contractions related to an estimate of the cross-sectional area of adductor pollicis in the human subject. **372**, 31*P*, 1986
Intramembrane charge movement and calcium release in frog skeletal muscle. **373**, 481, 1986
Effects of exercise on zinc excretion in man. **373**, 44*P*, 1986
Sodium dependent glutamine transport in perfused rat skeletal muscle. **373**, 67*P*, 1986
Labile heat and changes in rate of relaxation of frog muscles. **374**, 123, 1986
Induction of action potentials by denervation of tonic fibres in rat extraocular muscles. **374**, 165, 1986
Computerized displacement transducer for quantifying muscle weakness and fatigue in surgical patients. **374**, 13*P*, 1986
Effects of corticosteroid on glutamine transport in rat skeletal muscle. **374**, 35*P*, 1986
Asymmetric charge movement in contracting muscle fibres in the rabbit. **376**, 63, 1986
Components of charge movement in rabbit skeletal muscle: the effect of tetracaine and nifedipine. **376**, 85, 1986
Relation of the length of the electrically stimulated human biceps to elbow movement. **376**, 58*P*, 1986
The time course and magnitude of blood flow changes in the human quadriceps muscles following isometric contraction. **377**, 445, 1986
Series-elasticity of tendinous structures of rat EDL muscle. **377**, 89*P*, 1986
Metabolic patterns in the limb and trunk skeletal muscle fibres of vertebrates, shown by quantitative histochemistry. **377**, 94*P*, 1986
Birefringence as a probe of crossbridge orientation in demembranated muscle fibres of frog and rabbit. **377**, 95*P*, 1986
Ca-sensitivity in isolated, skinned fibres of the iliofibularis muscle of *Xenopus laevis*. **377**, 96*P*, 1986
Recruitment of three different leg muscles during cycle ergometer exercise. **377**, 101*P*, 1986
Decreased economy of isometric exercise in medial gastrocnemius muscles of male Wistar rats during growth. **377**, 105*P*, 1986
M-wave potentiation during muscle fatigue and recovery in man and rat. **377**, 108*P*, 1986
Quantitative description of three modes of activity of fast chloride channels from rat skeletal muscle. **378**, 141, 1986
Activation of acetylcholine receptor channels by covalently bound agonists in cultured rat myoballs. **379**, 83, 1986
Reflex origin for the slowing of motoneurone firing rates in fatigue of human voluntary contractions. **379**, 451, 1986
A velocity-dependent shortening depression in the development of the force–velocity relation in frog muscle fibres. **380**, 227, 1986
An isometric myograph for human observations. **380**, 14*P*, 1986
Contractility of myotomal muscle from deep sea fish: preliminary results of Challenger cruise 6B/85. **380**, 30*P*, 1986
The development of neuromuscular junctions on rat regenerating skeletal muscle fibres. **380**, 65*P*, 1986
A comparison of jaw reflexes evoked by stimulating facial skin and oral mucosa in man. **380**, 75*P*, 1986
A mechanism for the reduced parvalbumin content found in dystrophic muscle. **381**, 89*P*, 1986
Innervated muscle fibres in partly denervated mouse muscles transiently express N-CAM. **382**, 160*P*, 1987
Differential effects of an anabolic hormone on aerobic capacity of rat striated muscle. **382**, 166*P*, 1987
The relation between muscle stiffness and crossbridge appearance in the flight muscle of the waterbug *Lethocerus*. **382**, 193*P*, 1987
Asymmetric charge movement in polarized and depolarized muscle fibres of the rabbit. **383**, 349, 1987
Force–velocity characteristics of knee extensor muscles in young and elderly females. **384**, 32*P*, 1987
Relationship between numbers and frequencies of stimuli in human muscle fatigue. **384**, 33*P*, 1987
A system for measuring human muscle rigidity at the elbow. **384**, 34*P*, 1987
Artefactual variation in rat skeletal muscle [ATP] with fasting and insulin treatment: biochemical and NMR studies. **384**, 61*P*, 1987
Effects of electrical stimulation on muscle protein turnover in patients with quadriceps atrophy. **384**, 62*P*, 1987

Muscle (*cont.*)
The role of joint receptors in human kinaesthesia when intramuscular receptors cannot contribute. **386**, 63, 1987
Decreased sugar uptake as a result of changes in the kinetic characteristics of transport in Zucker obese rats. **386**, 117*P*, 1987
A model to demonstrate the power transporting role of biarticular muscles. **387**, 24*P*, 1987
The temperature dependence of isometric contractions of single, intact fibres dissected from a mouse foot muscle. **390**, 285, 1987
Contractions of a human skeletal muscle at different temperatures. **390**, 383, 1987
A technique for the simultaneous measurement of contractile properties of the human adductor pollicis and first dorsal interosseus. **390**, 5*P*, 1987
Human physiological measuring systems using fibre optics: demonstration of a strain gauge for measuring muscle force in a magnetic resonance system. **390**, 13*P*, 1987
Caged-calcium photolysis activates demembranated muscle fibres from the rabbit. **390**, 144*P*, 1987
Human muscle strength training: the effects of three different regimes and the nature of the resultant changes. **391**, 1, 1987
The mechanical properties of isolated polyneuronally innervated teleost (*Myoxocephalus scorpius*) fast muscle fibres. **391**, 88*P*, 1987
Impulse propagation and muscle activation during prolonged human maximal contractions. **391**, 91*P*, 1987
Effects of pH on shortening velocity and tension development in skinned muscle fibres from the cod, *Gadus morhua* L. **391**, 115*P*, 1987
Human muscle thixotropy revealed by electrical stimulation. **392**, 50*P*, 1987
Post-contraction errors in human force production are reduced by muscle stretch. **393**, 247, 1987
Characteristics of L-glutamine transport in perfused rat skeletal muscle. **393**, 283, 1987
Properties of motor units in the transversus abdominis muscle of the garter snake. **393**, 355, 1987
Stable maintenance heat rate and contractile properties of different single muscle fibres from *Xenopus laevis* at 20 °C. **393**, 399, 1987
Fast activation of skinned muscle fibres from the frog by photolysis of caged-calcium. **394**, 24*P*, 1987

Muscle activity
The relationship between lean limb volume and performance in the standing long jump and handgrip tests in young adult males and females. **382**, 196*P*, 1987

Muscle adaptation
Effects of long-term phasic stimulation of denervated slow-twitch muscle of the guinea-pig. **387**, 45*P*, 1987
The role of frequency in the effects of long-term intermittent stimulation of denervated slow-twitch muscle in the rat. **392**, 377, 1987
Response of fast twitch muscle in rat to low rate chronic stimulation. **394**, 19*P*, 1987

Muscle afferent
Sources of input to interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. **361**, 379, 1985
Organization of input to the interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. With an Appendix by P. J. HARRISON. **361**, 403, 1985
Different types of slowly conducting afferent units in cat skeletal muscle and tendon. **363**, 403, 1985
Responses of cat muscle spindles reinnervated by afferents formerly terminating in tendon organs. **372**, 24*P*, 1986
Fusimotor reflexes in triceps surae muscle elicited by stretch of muscles in the contralateral hind limb of the cat. **373**, 419, 1986
The dorsal column projection of hindlimb group II muscle afferent fibres in the cat. **394**, 98*P*, 1987

Muscle afferent nerve fibre
Synchronous afferent discharge from a passive muscle of the cat: significance for interpreting spike-triggered averages. **365**, 77, 1985
Lamina VIII interneurones interposed in crossed reflex pathways in the cat. **371**, 147, 1986
The effects of adrenergic blockers and clonidine on the changes in blood pressure during muscle contractions in the cat. **371**, 79*P*, 1986
On the specificity of sensory reinnervation of cat skeletal muscle. **375**, 587, 1986
Field potentials generated by group II muscle afferents in the middle lumbar segments of the cat spinal cord. **385**, 393, 1987
An interneuronal relay for group I and II muscle afferents in the midlumbar segments of the cat spinal cord. **389**, 647, 1987

Muscle blood flow
Vasomotion and reduced perfusion pressure in rabbit tenuissimus muscle. **366**, 125*P*, 1985
Changes in the composition of muscle fibres and their ultrastructure in stimulated rat fast muscles with limited blood supply. **373**, 10*P*, 1986

Muscle capillarity
Capillarity, oxidative capacity and fibre composition of the soleus and gastrocnemius muscles of rats in hypothyroidism. **361**, 281, 1985

Muscle contraction
A mechanical study of regulation in the striated adductor muscle of the scallop. **358**, 47, 1985
Shortening velocity extrapolated to zero load and unloaded shortening velocity of whole rat skeletal muscle. **359**, 357, 1985
Lateral filamentary spacing in chemically skinned murine muscles during contraction. **360**, 135, 1985
Effects of inhibiting carbonic anhydrase on isometric contraction of frog skeletal muscle. **361**, 91, 1985
Movements of cross-bridges during and after slow length changes in active frog skeletal muscle. **361**, 151, 1985

Muscle contraction (*cont.*)
Measurement of human muscle torque under isokinetic conditions using electrically evoked tetani. **361**, 9*P*, 1985
Hysteresis in the Ca *vs.* tension relationship of chemically 'skinned' rat cardiac muscle. **364**, 76*P*, 1985
Change in intracellular calcium ion concentration induced by caffeine and rapid cooling in frog skeletal muscle fibres. **365**, 131, 1985
A velocity-dependent shortening deactivation in frog muscle fibres during the rise of tension in an isometric tetanus. **365**, 64*P*, 1985
Active stiffness in frog skinned muscle fibres at different Ca concentrations. **366**, 65*P*, 1985
Force–velocity properties of fast-twitch and slow-twitch muscles of the kitten. **367**, 377, 1985
The action of dantrolene sodium on tension and integrated electromyogram (e.m.g.) in the soleus muscle of the decerebrate rat. **367**, 75*P*, 1985
Changes in contractile properties of the first dorsal interosseous muscle with age in man. **367**, 99*P*, 1985
Knee-joint distension and quadriceps maximal voluntary contraction in man. **367**, 100*P*, 1985
The maximum speed of shortening in living and skinned frog muscle fibres. **370**, 181, 1986
Effect of CO_2 on force during isometric tetanus of isolated skeletal muscle from the frog. **371**, 172*P*, 1986
Inorganic phosphate regulates the contraction–relaxation cycle in skinned muscles of the rabbit mesenteric artery. **376**, 231, 1986
Effects on shortening velocity of rabbit skeletal muscle due to variations in the level of thin-filament activation. **377**, 487, 1986
Time-resolved ^{31}P-NMR studies on isolated skeletal muscles of the bullfrog (*R. catesbeiana*). **377**, 99*P*, 1986
The influence of free calcium on the maximum speed of shortening in skinned frog muscle fibres. **380**, 257, 1986
γ Loop contributing to maximal voluntary contractions in man. **380**, 575, 1986
Birefringence transients during relaxation of rabbit de-membranated muscle fibres from rigor following laser flash photolysis of caged-ATP. **381**, 86*P*, 1986
Effects of impulse blockade on the contractile properties of rat skeletal muscle. **382**, 255, 1987
Effects of hypertonic solutions on calcium transients in frog twitch muscle fibres. **383**, 615, 1987
The kinetics of heat production in response to active shortening in frog skeletal muscle. **385**, 449, 1987
An ergometer for isovelocity movement of small, isolated muscles. **387**, 3*P*, 1987
Force–velocity relation of living fibres from dogfish white muscle. **387**, 46*P*, 1987
Contractions of a human skeletal muscle at different temperatures. **390**, 383, 1987
Force and segment movements during relaxation of frog muscle fibres; effects of fatigue and intracellular acidification. **390**, 153*P*, 1987
Transient tension changes initiated by laser temperature jumps in rabbit psoas muscle fibres. **392**, 71, 1987
Effects of age on contractile and enzyme-histochemical properties of fast- and slow-twitch single motor units in the rat. **392**, 129, 1987

Muscle damage
Increase in polyneuronal innervation in frog muscle after muscle injury. **371**, 167, 1986
Experimental human muscle damage: morphological changes in relation to other indices of damage. **375**, 435, 1986

Muscle development
The number and size of slow muscle fibres in a fast muscle during post-natal development of the rat. **360**, 78*P*, 1985
Development of synaptic currents in immobilized muscle of *Xenopus laevis*. **364**, 57, 1985
The low safety factor of neuromuscular transmission in neonatal rats. **364**, 14*P*, 1985
Force–velocity properties of fast-twitch and slow-twitch muscles of the kitten. **367**, 377, 1985
Effects of denervation on Na^+ and K^+-activities of skeletal muscle of neonate rats. **371**, 269*P*, 1986
Comparative development of end-plate currents in two muscles of *Xenopus laevis*. **374**, 413, 1986
Competition between segmental nerves at end-plates in rat gastrocnemius muscle during loss of polyneuronal innervation. **381**, 351, 1986
Effect of immobilization during development on subsequent fibre composition and fatigue resistance of rat soleus muscle. **382**, 192*P*, 1987

Muscle disuse
Effects of impulse blockade on the contractile properties of rat skeletal muscle. **382**, 255, 1987

Muscle energetics
Effects of calcium and substrate on force–velocity relation and energy turnover in skinned smooth muscle of the guinea-pig. **360**, 347, 1985
Effect of active and passive warm-up on maximal short-term power output of human muscle. **365**, 74*P*, 1985
Stable maintenance heat rate is related to maximum tetanic force in isolated fibres from frog tibialis anterior muscle near 0 °C. **367**, 77*P*, 1985
The kinetics of heat production in response to active shortening in frog skeletal muscle. **385**, 449, 1987
Transient tension changes initiated by laser temperature jumps in rabbit psoas muscle fibres. **392**, 71, 1987
Repriming and reversal of the isometric unexplained enthalpy in frog skeletal muscle. **393**, 157, 1987

Muscle fatigue
Influence of human muscle length on fatigue. **362**, 205, 1985
Electromyographical power spectrum changes during fatigue of the human masseter muscle at different contraction levels. **366**, 99*P*, 1985
Muscular weakness following prolonged exercise in man. **366**, 126*P*, 1985
Activation of the human diaphragm during maximal static efforts. **367**, 45, 1985

Muscle fatigue (*cont.*)
Quadriceps surface e.m.g. and fatigue during maximal dynamic exercise in man. **369**, 180*P*, 1985
Human e.m.g. and motoneurone discharge rates during sustained submaximal contractions. **371**, 54*P*, 1986
The effect of long-term electrical stimulation on capillary density, blood flow and muscle performance in rat fast muscles with limited blood supply. **371**, 86*P*, 1986
Effects of muscle length on fatiguability of the adductor pollicis in man. **371**, 259*P*, 1986
Neuromuscular transmission and muscle activation in human post-fatigue ischaemia. **377**, 76*P*, 1986
Reflex origin for the slowing of motoneurone firing rates in fatigue of human voluntary contractions. **379**, 451, 1986
Contractile and electromyographic characteristics of rat plantaris motor unit types during fatigue *in situ*. **385**, 13, 1987
Frequency dependence of excitation and force generation in human adductor pollicis. **386**, 113*P*, 1987
Human muscle fatigue: reversed changes in myotonic dystrophy. **390**, 133*P*, 1987
Changes in intracellular pH after fatiguing stimulation of single *Xenopus* muscle fibres. **390**, 145*P*, 1987
Differential effects of acidosis on calcium-activated force and ATPase of fast- and slow-twitch skeletal muscles of the rabbit. **390**, 152*P*, 1987
Human muscle fatigue: effects of ischaemia, perfusion and B-adrenergic blockade. **390**, 156*P*, 1987
Muscle fatigue in man induced by functional electrical stimulation can be reduced by using multiple sites of stimulation. **392**, 106*P*, 1987
Greater hydrogen ion-induced depression of tension and velocity in skinned single fibres of rat fast than slow muscles. **393**, 727, 1987
Human muscle fatigue: post-tetanic potentiation of low-frequency tetani is not related to altered excitation or slowing of relaxation. **394**, 141*P*, 1987
Human muscle fatigue: excitation–contraction coupling failure in McArdle's disease. **394**, 142*P*, 1987
Diaphragmatic fatigue produced by low- and high-frequency stimulation of the rat isolated phrenic nerve–diaphragm preparation. **394**, 149*P*, 1987

Muscle fibre
Simultaneous recording of force and fluorescence changes in voltage-clamped *Balanus nubilus* single muscle fibres using the Ca^{2+} indicator quin 2. **358**, 6*P*, 1985
Detection of transient TnCDANZ fluorescence and aequorin luminescence signals from single *Balanus nubilus* muscle fibres. **358**, 7*P*, 1985
Microscope-image intensifier studies on single quin-2-loaded muscle fibres from the barnacle *Balanus nubilus* under voltage clamp. **358**, 8*P*, 1985
Force potentiation as examined by aequorin luminescence, labelled troponin C fluorescence in single voltage-clamped muscle fibres from the barnacle *Balanus nubilus*. **358**, 76*P*, 1985
Donnan potential changes in rabbit muscle A-bands are associated with myosin. **358**, 80*P*, 1985
The effect of hydrostatic pressure on isometric tension generation in glycerinated rabbit muscle fibres. **358**, 83*P*, 1985
Temperature-dependent calcium sensitivity changes in skinned muscle fibres of rat and toad. **360**, 1, 1985
Capillarity, oxidative capacity and fibre composition of the soleus and gastrocnemius muscles of rats in hypothyroidism. **361**, 281, 1985
Stepwise shortening in unstimulated frog skeletal muscle fibres. **362**, 173, 1985
Differences in maximum velocity of shortening along single muscle fibres of the frog. **365**, 147, 1985
Differences in stable maintenance heat rate between single muscle fibres isolated from m. iliofibularis of *Xenopus laevis*. **367**, 78*P*, 1985
Simultaneous measurement of fura-2 fluorescence changes at several excitation wavelengths in voltage-clamped *Balanus nubilus* single muscle fibres using a pulsed-wavelength microspectrophotometer. **369**, 19*P*, 1985
Isometric tension provides an accurate measurement of the temperature of single glycerinated muscle fibres from the rabbit. **369**, 72*P*, 1985
Temperature-jump, temperature-clamp experiments on glycerol-extracted muscle fibres from rabbit psoas muscle. **369**, 73*P*, 1985
The maximum speed of shortening in living and skinned frog muscle fibres. **370**, 181, 1986
Enzyme activities in single electrophysiologically identified crab muscle fibres. **371**, 191, 1986
Quantitative analysis of histochemically stained sections of mammalian muscle. **371**, 15*P*, 1986
Muscle force and fibre recruitment during dynamic exercise in man. **371**, 176*P*, 1986
The removal of myoplasmic free calcium following calcium release in frog skeletal muscle. **372**, 261, 1986
Induction of ultrastructural damage in mammalian cardiac and skeletal muscle by Bay K 8644. **373**, 61*P*, 1986
The ionic mechanism of intracellular pH regulation in crayfish muscle fibres. **374**, 137, 1986
Properties of the metallochromic dyes Arsenazo III, Antipyrylazo III and Azo1 in frog skeletal muscle fibres at rest. **377**, 89, 1986
Effects on shortening velocity of rabbit skeletal muscle due to variations in the level of thin-filament activation. **377**, 487, 1986
Activation of the contractile apparatus of skinned fibres of frog by the divalent cations barium, cadmium and nickel. **380**, 75, 1986
The influence of free calcium on the maximum speed of shortening in skinned frog muscle fibres. **380**, 257, 1986
Properties of the intracellular pH-regulating systems of frog skeletal muscle. **381**, 205, 1986
Fibre sizes and histochemical staining characteristics in normal and chronically stimulated fast muscle of cat. **382**, 237, 1987

Muscle fibre (*cont.*)
Contractile and electromyographic characteristics of rat plantaris motor unit types during fatigue *in situ*. **385**, 13, 1987
The sarcomere length–tension relation determined in short segments of intact muscle fibres of the frog. **385**, 709, 1987
The non-selective innervation of muscle fibres and mixed composition of motor units in a muscle of neonatal rat. **386**, 377, 1987
Rat muscle during post-natal development: evidence in favour of no interconversion between fast- and slow-twitch fibres. **386**, 395, 1987
Factors influencing the ascending limb of the sarcomere length–tension relationship in rabbit skinned muscle fibres. **390**, 119, 1987
Type 2 fibre composition and force per cross-sectional area in the human quadriceps. **390**, 154*P*, 1987
Sarcomere dynamics during stretch of single frog muscle fibres. **390**, 214*P*, 1987
Different fibre types revealed in a crustacean muscle using histochemical and electrophysiological techniques. **391**, 86*P*, 1987
Greater hydrogen ion-induced depression of tension and velocity in skinned single fibres of rat fast than slow muscles. **393**, 727, 1987

Muscle fibre classification
Maximum activities of key glycolytic and oxidative enzymes in human muscle from differently trained individuals. **381**, 111, 1986
Effects of age on contractile and enzyme-histochemical properties of fast- and slow-twitch single motor units in the rat. **392**, 129, 1987

Muscle heat production, *see* Thermogenesis

Muscle length
Influence of human muscle length on fatigue. **362**, 205, 1985

Muscle mechanics
A mechanical study of regulation in the striated adductor muscle of the scallop. **358**, 47, 1985
Tension transients during steady shortening of frog muscle fibres. **361**, 131, 1985
Differences in maximum velocity of shortening along single muscle fibres of the frog. **365**, 147, 1985
The early part of the tension transient of activated skinned muscle fibres of the frog at high time-resolution. **366**, 74*P*, 1985
Physiological changes in medial gastrocnemius muscles of male Wistar rats during growth. **366**, 77*P*, 1985
Power output of human triceps surae muscle-tendon complex during jumping. **366**, 78*P*, 1985
Changes in the resonant frequency of a limb induced by artificial changes of stiffness – a feedback method for measuring muscle tension and limb inertia in man. **367**, 7*P*, 1985
Thixotropic behaviour of human finger flexor muscles with accompanying changes in spindle and reflex responses to stretch. **368**, 323, 1985
Mechanical properties of glycerol-extracted rabbit striated muscle fibres at temperatures below 0 °C. **369**, 70*P*, 1985
The maximum speed of shortening in living and skinned frog muscle fibres. **370**, 181, 1986
Variation in tetanus force production per cross-sectional area in single fibres from frog skeletal muscle. **371**, 169*P*, 1986
Tension transients during the rise of tetanic tension in frog muscle fibres. **372**, 595, 1986
The relation between force, stiffness and velocity of lengthening in 'tendon-free' segments of frog single muscle fibres. **377**, 90*P*, 1986
The sarcomere length-tension relation in short length-clamped segments of frog single muscle fibres. **377**, 91*P*, 1986
Modelling of mechanical output of human muscles during explosive movements. **377**, 110*P*, 1986
The influence of free calcium on the maximum speed of shortening in skinned frog muscle fibres. **380**, 257, 1986
Laser spectroscopic studies of actin-myosin interaction in isolated active frog's muscle: wavelength dependence of transparency changes during stretch. **380**, 28*P*, 1986
Recovery of tension after step-length changes applied to tetanized isolated frog muscle fibres during constant velocity stretches. **381**, 87*P*, 1986
Long- and short-term human muscle thixotrophy. **381**, 88*P*, 1986
Changes in the length of the human biceps brachii muscle during elbow movements. **383**, 405, 1987
The sarcomere length–tension relation determined in short segments of intact muscle fibres of the frog. **385**, 709, 1987
Apparatus for advanced class experiments in the field of muscle mechanics. **386**, 4*P*, 1987
Relative displacements in muscle and tendon during human arm movements. **389**, 37, 1987
Short-range elasticity and resting tension of relaxed human lower leg muscles. **391**, 451, 1987

Muscle metabolism
The measurement of limb and tissue protein metabolism in man. **384**, 10*P*, 1987
Metabolic regulation in human muscle during submaximal contractions. **390**, 158*P*, 1987
Repriming and reversal of the isometric unexplained enthalpy in frog skeletal muscle. **393**, 157, 1987

Muscle receptor
Different types of slowly conducting afferent units in cat skeletal muscle and tendon. **363**, 403, 1985
Interactions between motor units and Golgi tendon organs in the tibialis posterior muscle of the cat. **364**, 199, 1985
Responses of muscle receptors in the kitten. **366**, 27, 1985

Muscle reflex
Observations on the automatic compensation of reflex gain on varying the pre-existing level of motor discharge in man. **374**, 73, 1986

Muscle relaxation
Effect of tetanus duration on the free calcium during the relaxation of frog skeletal muscle fibres. **376**, 203, 1986
Resonance at the human hip. **392**, 4*P*, 1987

Muscle shortening
Shortening velocity extrapolated to zero load and unloaded shortening velocity of whole rat skeletal muscle. **359**, 357, 1985

Muscle spindle
Lack of reflex activation of fusimotor neurones innervating relaxed muscles in man. **358**, 35*P*, 1985
Fusimotor after-effects on responses of primary endings to test dynamic stimuli in cat muscle spindles. **360**, 187, 1985
Effects of stretch on dynamic fusimotor after-effects in cat muscle spindles. **360**, 201, 1985
Reinnervation of cat muscle spindles after periods of up to fifty days denervation. **361**, 43*P*, 1985
Responses of muscle receptors in the kitten. **366**, 27, 1985
Activation of cat muscle spindles by static skeleto-fusimotor axons. **369**, 323, 1985
Muscle spindle projections to feline thalamic neurones identified by local arterial injection of succinylcholine. **371**, 43*P*, 1986
Insensitivity of cat muscle spindles to hyperkalaemia in the physiological range. **372**, 26*P*, 1986
'Slow' fibres and spindles in the jaw-closer muscles of the cat and rabbit. **372**, 27*P*, 1986
How much is known about the motor nerve supply to mammalian muscle spindles? **373**, 11*P*, 1986
Studies of capsule and capsular space of cat muscle spindles. **376**, 281, 1986
γ Loop contributing to maximal voluntary contractions in man. **380**, 575, 1986
Changes in the length of the human biceps brachii muscle during elbow movements. **383**, 405, 1987
Regeneration and recovery of cat muscle spindles after temporary ischaemia. **384**, 55*P*, 1987
Motor and sensory innervation of muscle spindles in the early post-natal rat. **387**, 44*P*, 1987
Relative displacements in muscle and tendon during human arm movements. **389**, 37, 1987
Reciprocal Ia inhibition between ankle flexors and extensors in man. **389**, 163, 1987
The muscle spindle – Part II (16 mm sound colour film, 30 minutes). **390**, 12*P*, 1987
The mechanical behaviour of the dynamic bag_1 fibre in isolated cat muscle spindles during rapid stretch. **390**, 138*P*, 1987
Recovery of cat muscle spindles in orthotopic muscle grafts. **391**, 55*P*, 1987
Models of muscle spindle action and of postural reflexes. **392**, 19*P*, 1987
The combined action of two static γ axons to the same type of intrafusal fibre on the length sensitivity of primary and secondary endings in cat tenuissimus muscle spindles. **392**, 70*P*, 1987
Correlation of ultrastructure and fusimotor control of four muscle spindles in the same cat tenuissimus muscle. **392**, 71*P*, 1987
Fusimotor-induced phase differences between responses of primary and secondary sensory endings from the same cat muscle spindle. **392**, 72*P*, 1987
Motor innervation of developing intrafusal muscle fibres in the rat. **392**, 73*P*, 1987
Type-differentiation of intrafusal fibres during muscle development in the cat. **392**, 74*P*, 1987

Muscle spindle afferent
Discharge in muscle spindle afferents related to direction of slow precision movements in man. **362**, 437, 1985
Morphological and electrophysiological determination of the projections of jaw-elevator muscle spindle afferents in rats. **369**, 93, 1985
Evidence for interneuronally mediated Ia excitatory effects to human quadriceps motoneurones. **377**, 143, 1986
Assessing changes in presynaptic inhibition of Ia fibres: a study in man and the cat. **389**, 729, 1987
Changes in presynaptic inhibition of Ia fibres at the onset of voluntary contraction in man. **389**, 757, 1987
Muscle receptor firing during paw shakes in cats. **392**, 62*P*, 1987
Ensemble proprioceptive activity in feline gait. **392**, 63*P*, 1987

Muscle stiffness
Resonance at the human wrist in hemiplegia. **373**, 17*P*, 1986
The stiffness of frog skinned muscle fibres at altered lateral filament spacing. **378**, 175, 1986
Stiffness during the tension redevelopment after shortening at zero load in tetanized frog muscle fibres. **390**, 149*P*, 1987

Muscle stimulation
A comparison of two patterns of chronic stimulation on the contractile properties and fatigue characteristics of human hand muscles. **390**, 131*P*, 1987

Muscle stretch
The sagittal vestibulocollic reflex and its interaction with neck proprioceptive afferents in the decerebrate cat. **359**, 17, 1985
The interaction between noradrenaline activation and distension activation of the rabbit ear artery. **375**, 283, 1986
Effects of ischaemia upon reflex electromyographic responses evoked by stretch and vibration in human wrist flexor muscles. **391**, 589, 1987

Muscle sympathetic activity
Respiratory modulation of muscle sympathetic and vagal cardiac outflow in man. **365**, 181, 1985

Muscle tension
Stiffness during tension recovery after a step stretch applied to tetanized frog muscle fibres during steady lengthening. **390**, 148*P*, 1987

Muscle tremor
Accelerometric measurement of finger tremor: analysis of the analogue signal. **361**, 12*P*, 1985
Instability in the control of arm position, evoked by increasing the stretch-responsiveness of muscle afferents in man. **365**, 21*P*, 1985
Absence of stretch reflex activity in a physiological tremor in man. **365**, 22*P*, 1985

Muscle tremor(*cont.*)
Instability in human forearm positioning, during feedback-controlled electrical stimulation of muscles to mimic hyper-reflexia. **372**, 28*P*, 1986
Aperiodic tremor of the human finger. **380**, 3*P*, 1986
An isometric tremorograph (for human observations). **380**, 9*P*, 1986

Muscular dystrophy
Secretion of altered chondroitin sulphate proteoglycan in Duchenne muscular dystrophy. **360**, 40*P*, 1985
Calcium and strontium activation of single skinned muscle fibres of normal and dystrophic mice. **373**, 513, 1986
Low frequency chronic electrical stimulation of normal and dystrophic chicken muscle. **376**, 377, 1986
Discrimination of normal and mdx dystrophic skeletal muscles in the mouse using quantitative multivariate histochemistry. **380**, 29*P*, 1986
Effect of chronic high-frequency stimulation on muscles of children with Duchenne Muscular Dystrophy. **390**, 132*P*, 1987

Myelinated nerve fibre
The space constants of rat myelinated axons *in vivo*. **358**, 29*P*, 1985
Inward rectification in rat and frog myelinated axons. **360**, 15*P*, 1985
The long-term excitability of myelinated nerve fibres in the transected frog sciatic nerve. **368**, 309, 1985
Phoneutria and *Leiurus* venoms induce spontaneous compound action potentials in rat spinal roots. **369**, 63*P*, 1985
Accommodation in rat myelinated axons depends on two pharmacologically distinct types of potassium channel. **369**, 102*P*, 1985
Sodium currents in the isolated voltage-clamped frog internode. **372**, 53*P*, 1986
A comparison of sodium currents in rat and frog myelinated nerve: normal and modified sodium inactivation. **382**, 175, 1987
Function and distribution of three types of rectifying channel in rat spinal root myelinated axons. **383**, 45, 1987
Comparison of the after-effects of impulse conduction on threshold at nodes of Ranvier along single frog sciaticaxons. **386**, 503, 1987
The distribution of sodium and potassium channels in single demyelinated axons of the frog. **392**, 587, 1987

Myenteric neurone
The calcium current in a myenteric neurone of the guinea-pig ileum. **361**, 297, 1985
The slow calcium-dependent potassium current in a myenteric neurone of the guinea-pig ileum. **361**, 315, 1985
Electrophysiology and morphology of vasoactive-intestinal-peptide-immuoreactive neurones of the guinea-pig ileum. **378**, 1, 1986
Electrophysiological and morphological similarities between myenteric plexus neurones showing immunoreactivity to enkephalins (ENK) and to vasoactive intestinal peptide (VIP) in guinea-pig isolated ileum. **378**, 101*P*, 1986
Intracellular recordings from myenteric neurones in the human colon. **390**, 305, 1987

Myenteric plexus
Intracellular recordings from the rat myenteric plexus *in vitro*. **369**, 109*P*, 1985
Effects of forskolin on electrical behaviour of myenteric neurones in guinea-pig small intestine. **376**, 439, 1986
Elevation of adenosine 3′,5′-phosphate mimics slow synaptic excitation in myenteric neurones of the guinea-pig. **376**, 451, 1986
Intracellular recordings from human myenteric plexus neurones. **377**, 27*P*, 1986
Intrinsic reflexes underlying peristalsis in the small intestine of the domestic fowl. **380**, 311, 1986
Persistent calcium-sensitive potassium current and the resting properties of guinea-pig myenteric neurones. **386**, 333, 1987
Purinergic inhibition in the small intestinal myenteric plexus of the guinea-pig. **387**, 357, 1987
Transduction of aminergic and peptidergic signals in enteric neurones of the guinea-pig. **387**, 371, 1987

Myocardial blood flow
Transmural coronary vasodilator reserve and flow distribution during maximal exercise in normal and splenectomized ponies. **387**, 425, 1987

Myocardium
The effect of noradrenaline lack on oxygen consumption in canine denervated myocardium. **366**, 40*P*, 1985
The effects of a modified haemoglobin oxygen dissociation curve (ODC) on myocardial function in isolated rabbit hearts. **366**, 41*P*, 1985
The relationship between action potential duration and force of contraction in isolated human myocardium. **377**, 119*P*, 1986
Mechanical restitution in isolated human myocardium. **377**, 120*P*, 1986
Reduced afterload increases monophasic action potential duration in the *in situ* left ventricle of anaesthetized pigs. **382**, 112*P*, 1987
Sodium current kinetics in cat atrial myocytes. **384**, 169, 1987

Myocyte
Identification of a transient outward current in single myocytes from the *crista terminalis* of rabbit heart. **358**, 50*P*, 1985
Frequency-dependent changes in inward current in single guinea-pig ventricular cells. **358**, 53*P*, 1985
Dihydropyridine effects on single Ca channels in rat heart cells. **358**, 62*P*, 1985
Ionic basis of the different action potential configurations of single guinea-pig atrial and ventricular myocytes. **368**, 525, 1985
Importance of calcium and hyaluronidase concentrations in the preparation of isolated calcium tolerant myocytes from adult rat and rabbit hearts. **373**, 88*P*, 1986

Myocyte (*cont.*)
Continuous display of length change of electrically stimulated isolated cardiac myocytes from rat and rabbit. **381**, 4*P*, 1986
Inward current related to contraction in guinea-pig ventricular myocytes. **385**, 565, 1987
Immunolocalization of ornithine decarboxylase in isoproterenol-stimulated rat atria. **390**, 208*P*, 1987
Comparison of contractile responses to isoprenaline and increased extracellular calcium concentration in isolated rat and rabbit cardiac myocytes. **390**, 209*P*, 1987
Desensitization to isoprenaline detected in cardiac myocytes isolated from rats exposed to isoprenaline. **390**, 210*P*, 1987
The arrhythmogenic transient inward current i_{Ti} and related contraction in isolated guinea-pig ventricular myocytes. **392**, 523, 1987

Myoelectric activity
Myoelectrical activity and propulsion in the large intestine of fed and fasted rats. **362**, 93, 1985
Effect of 16,16-dimethyl prostaglandin E_2 on the myoelectric activity of the gastrointestinal tract of the opossum. **377**, 421, 1986

Myofibril
Dependence of adenosine triphosphatase activity of rabbit psoas muscle fibres and myofibrils on substrate concentration. **365**, 259, 1985
Slow stretches and releases of the contracting myofibril (bullfrog atria) to test tension fluctuations due to cross-bridge mechanical cycling. **366**, 69*P*, 1985

Myoglobin
Effect of albumin on the osmotic pressure exerted by myoglobin across capillary walls in frog mesentery. **387**, 69, 1987

Myometrial cell
The calcium channel current of pregnant rat single myometrial cells in short-term primary culture. **392**, 253, 1987

Myometrium
Some properties of the circular myometrium of the sheep throughout pregnancy and during labour. **359**, 1, 1985

Myopathy
Anticholinesterase-induced myopathy and changes in creatine kinase in mice. **373**, 29*P*, 1986

Myopia
Refractive sectors in the visual field of the pigeon eye. **369**, 33, 1985

Myosin
Control of myosin isoenzyme transitions by thyroid hormone in the dwarf mouse strain. **377**, 93*P*, 1986

Myotome
Contractile activation in myotomes from developing larvae of *Xenopus laevis*. **375**, 391, 1986

Naloxone
Naloxone increases blood flow in the human hand. **363**, 315, 1985
Kappa opiate-mediated reductions of spinal nociceptive reflexes in rats are reversed by low doses of intravenous naloxone. **364**, 44*P*, 1985
Descending influences restrict naloxone enhancement of a spinal reflex in the rabbit. **369**, 26*P*, 1985
Non-cholinergic component of rat splanchnic nerves predominates at low neuronal activity and is eliminated by naloxone. **383**, 639, 1987

Nasal gland
Lateral nasal gland secretion in the anaesthetized dog. **374**, 359, 1986

Natriuresis, *see* Sodium excretion

Neonatal development
Dexamethasone selectively increases sodium-dependent alanine transport across neonatal piglet intestine. **393**, 569, 1987
Epidermal growth factor selectively increases maltase and sucrase activities in neonatal piglet intestine. **393**, 583, 1987

Neonate
Adrenomedullary function in the neonatal rat: responses to acute hypoxia. **358**, 1, 1985
Urinary sodium excretion and the renin–aldosterone system in new-born calves. **362**, 261, 1985
Flow through the foramen ovale of the fetal and new-born lamb. **365**, 29, 1985
Ia afferent excitation of motoneurones in the *in vitro* new-born rat spinal cord is selectively antagonized by kynurenate. **370**, 515, 1986
Electrophysiological properties of neonatal rat motoneurones studied *in vitro*. **370**, 651, 1986
Effect of hyperoxia from birth on the carotid chemoreceptor and ventilatory responses of rats to acute hypoxia. **374**, 24*P*, 1986
Post-natal re-setting of carotid chemoreceptor sensitivity in the lamb. **382**, 57*P*, 1987
Respiratory sinus arrhythmia in new-born infants. **385**, 1, 1987
Cell death of axotomized motoneurones in neonatal rats, and its prevention by peripheral reinnervation. **386**, 135, 1987
Maturation of the respiratory response to acute hypoxia in the newborn rat. **392**, 1, 1987
Effects of chronic hypoxia from birth on the ventilatory response to acute hypoxia in the newborn rat. **392**, 11, 1987

Neostigmine
Botulinum toxin prevents stimulus-induced backfiring produced by neostigmine in the mouse phrenic nerve–diaphragm. **372**, 395, 1986

Nephrocalcinosis
Kidney function in rats with corticomedullary nephrocalcinosis: effects of alterations in dietary calcium and magnesium. **380**, 405, 1986

Nerve
Regeneration of unmyelinated nerve fibres in the rat saphenous nerve. **364**, 15*P*, 1985
The use of some sampling schemes to determine the number of myelinated nerve fibres in a unifascicular nerve trunk. **364**, 16*P*, 1985
Caudal medullary expiratory neurone and internal intercostal nerve discharges in the cat: effects of lung inflation. **368**, 147, 1985

Nerve (*cont.*)
Functional fish axons from 4000 m depths, 400 atm pressure: preliminary results of *Challenger* cruise 6B/85. **372**, 57*P*, 1986
The effect of age on energy metabolism and resistance to ischaemic conduction failure in rat peripheral nerve. **374**, 263, 1986
Innervation and function of hind-limb muscles in the cat after cross-union of the tibial and peroneal nerves. **374**, 429, 1986
Lumbo-sacral root responses evoked by dermatomal stimulation in man. **380**, 60*P*, 1986
Sodium currents in axon-associated Schwann cells from adult rabbits. **386**, 181, 1987
Change in optical activity of a lobster nerve associated with excitation. **389**, 223, 1987

Nerve block
Effects of impulse blockade on the contractile properties of rat skeletal muscle. **382**, 255, 1987

Nerve conduction
Electrical excitability of motor nerve terminals in the mouse. **366**, 411, 1985
Electrical properties of axons and neurohypophysial nerve terminals and their relationship to secretion in the rat. **380**, 521, 1986
The extensibility of *Aplysia* nerve and the determination of true axon length. **390**, 469, 1987
The effect of acclimation temperature on nerve conduction in carp (*Cyprinus carpio*); measured *in vitro*. **392**, 113*P*, 1987

Nerve development
Competition between segmental nerves at endplates in rat gastrocnemius muscle during loss of polyneuronal innervation. **381**, 351, 1986

Nerve fibre
The measurement of gamma discharge to the soleus muscle in the decerebrate rat. **380**, 8*P*, 1986
The extensibility of *Aplysia* nerve and the determination of true axon length. **390**, 469, 1987
The disturbance of the fast axonal transport of protein by passive stretching of an axon in *Aplysia*. **390**, 489, 1987

Nerve growth
Action potentials, macroscopic and single channel currents recorded from growth cones of *Aplysia* neurones in culture. **374**, 289, 1986
Dynamic aspects of amphibian neurite growth and the effects of an applied electric field. **375**, 55, 1986

Nerve growth factor
Human muscle cell conditioned media stimulates neurofilament protein expression in primary cultures of human and chick spinal cord. **360**, 43*P*, 1985
Some characteristics of histamine secretion from rat peritoneal mast cells stimulated with nerve growth factor. **372**, 379, 1986

Nerve injury
β-Endorphin and α-melanotropin immunoreactivity in degenerating and contralateral motoneurones of the rat. **388**, 52*P*, 1987

Nerve regeneration, *see also* Regeneration, Reinnervation
A study of factors influencing synapse formation by a foreign nerve in skeletal muscle of *Rana pipiens*. **375**, 449, 1986
Inappropriate reinnervation of peripheral tissue changes the ability of afferents to modulate the flexion reflex in the adult rat. **390**, 50*P*, 1987
Neural activity in the regenerating optic nerve of the goldfish. **391**, 299, 1987

Nerve sprouting
The transneuronal induction of sprouting and synapse formation in intact mouse muscles. **360**, 387, 1985

Nerve terminal
The early time course of potassium-stimulated calcium uptake in presynaptic nerve terminals isolated from rat brain. **361**, 251, 1985
Electric current flow inside perineurial sheaths of mouse motor nerves. **368**, 565, 1985
A calcium-activated potassium current in motor nerve terminals of the mouse. **368**, 577, 1985
Electrical properties of axons and neurohypophysial nerve terminals and their relationship to secretion in the rat. **380**, 521, 1986
Hormone release from isolated nerve endings of the rat neurohypophysis. **390**, 55, 1987
Requirements for hormone release from permeabilized nerve endings isolated from the rat neurohypophysis. **390**, 71, 1987
Augmented synaptic release by one excitatory axon in regions in which a synergistic axon was removed in lobster muscle. **390**, 189, 1987

Neural stimulation
Mucosal responses evoked by stimulation of ganglion cell somas in the submucosal plexus of the guinea-pig ileum. **364**, 69, 1985

Neuroblastoma
Stabilization of sodium channel states by deltamethrin in mouse neuroblastoma cells. **380**, 191, 1986
Characterization of two types of calcium channels in mouse neuroblastoma cells. **383**, 231, 1987

Neurohormone
Hormone release from isolated nerve endings of the rat neurohypophysis. **390**, 55, 1987
Requirements for hormone release from permeabilized nerve endings isolated from the rat neurohypophysis. **390**, 71, 1987

Neurohypophysis
Chronic morphine exposure and oxytocin neurones in rats: lack of both morphine dependence and cross-tolerance to endogenous opioids in the neurohypophysis. **361**, 32*P*, 1985
Vasopressin release following naloxone administration to rats treated chronically with intracerebroventricular (i.c.v.) morphine. **364**, 61*P*, 1985
Relaxin suppression of oxytocin release occurs at the neurohypophysis in the rat. **365**, 49*P*, 1985
The role of patterned burst and interburst interval on the excitation-coupling mechanism in the isolated rat neural lobe. **369**, 45, 1985

Neurophypophysis (*cont.*)
Electrical properties of axons and neurohypophysial nerve terminals and their relationship to secretion in the rat. **380**, 521, 1986
Extracellular potassium activity in the rat neurohypophysis. **382**, 30*P*, 1987
Opioid receptor subtypes mediating inhibition of oxytocin, vasopressin and noradrenaline release from the rat neurohypophysis *in vitro*. **388**, 9*P*, 1987
Action potential conduction failure in the rat neurohypophysis. **388**, 13*P*, 1987
Facilitation of stimulus-evoked hormone release from the rat neurohypophysis by elevated extracellular potassium concentrations. **388**, 14*P*, 1987
Hormone release from isolated nerve endings of the rat neurohypophysis. **390**, 55, 1987
Requirements for hormone release from permeabilized nerve endings isolated from the rat neurohypophysis. **390**, 71, 1987
Extracellular potassium changes in the rat neurohypophysis during activation of the magnocellular neurosecretory system. **392**, 97, 1987
Action potential recordings from the rat neural lobe *in vivo*. **394**, 122*P*, 1987
Functional kappa-opioid receptors on oxytocin and vasopressin secretory terminals isolated from rat neurohypophysis. **394**, 123*P*, 1987

Neuromodulation
Dopaminergic modulation of neuromuscular transmission in the prawn. **363**, 363, 1985

Neuromuscular blockade
Partial neuromuscular blockade and cardiovascular responses to static exercise in man. **359**, 365, 1985

Neuromuscular junction, *see also* End-plate
Profiles of evoked release along the length of frog motor nerve terminals. **359**, 235, 1985
Quantal release of newly formed transmitter in frog. **361**, 17*P*, 1985
Interaction of verapamil with tubocurarine at the chick neuromuscular junction. **362**, 47*P*, 1985
Dopaminergic modulation of neuromuscular transmission in the prawn. **363**, 363, 1985
Development of synaptic currents in immobilized muscle of *Xenopus laevis*. **364**, 57, 1985
Morphological responses to conditioning stimulation in a phasic motor axon of crayfish (*Procambarus clarkii*). **365**, 26*P*, 1985
The dependence of channel opening probability on acetylcholine concentration at the frog neuromuscular junction. **365**, 77*P*, 1985
Mechanism of action of human autoantibodies interfering with acetylcholine release in the mouse. **365**, 79*P*, 1985
A population of miniature end-plate potentials unaffected by botulinum neurotoxin at mouse motor nerve terminals. **365**, 80*P*, 1985
Electrical excitability of motor nerve terminals in the mouse. **366**, 411, 1985
On the neurotrophic control of acetylcholine receptors at frog end-plates reinnervated by the vagus nerve. **367**, 387, 1985
Neostigmine increases the size of subunits composing the quantum of transmitter release at mouse neuromuscular junction. **367**, 489, 1985
Effect of protease inhibitors on mature endplates in rat muscle. **367**, 82*P*, 1985
Fast events in single-channel currents activated by acetylcholine and its analogues at the frog muscle end-plate. **369**, 501, 1985
Acetylcholine receptor activation by a site-selective ligand: nature of brief open and closed states in BC3H–1 cells. **370**, 357, 1986
Increase in polyneuronal innervation in frog muscle after muscle injury. **371**, 167, 1986
Site of action of Lambert-Eaton myasthenic syndrome antibodies at mouse motor nerve terminals. **371**, 61*P*, 1986
Facilitation by nicotinic autoreceptors of acetylcholine release from the rat phrenic nerve. **371**, 62*P*, 1986
Factors influencing an increase in spontaneous transmitter release by hypoxia at the mouse neuromuscular junction. **372**, 303, 1986
Effect of denervation on a steady electric current generated at the end-plate region of rat skeletal muscle. **373**, 97, 1986
Activation of acetylcholine receptors on clonal mammalian BC3H–1 cells by low concentrations of agonist. **373**, 129, 1986
Lanthanum as a surrogate for calcium in transmitter release at mouse motor nerve terminals. **373**, 243, 1986
Comparative development of end-plate currents in two muscles of *Xenopus laevis*. **374**, 413, 1986
Estimating the time course of evoked quantal release at the frog neuromuscular junction using end-plate current latencies. **374**, 503, 1986
Tritiated-inositol uptake by the isolated phrenic nerve diaphragm of rat: lack of effect of nerve activity. **374**, 42*P*, 1986
Apparent acetylcholine receptor channel conversion at individual rat soleus end-plates *in vitro*. **375**, 153, 1986
Changes in miniature end-plate potentials due to moderate hypertonicity at the frog neuromuscular junction. **376**, 1, 1986
The apparent dependence of depression on stimulation frequency at the frog neuromuscular junction. **376**, 41*P*, 1986
Lack of interaction between botulinum neurotoxin and Lambert-Eaton myasthenic syndrome IgG at mouse motor nerve terminals. **376**, 42*P*, 1986
Heterogeneous kinetic properties of acetylcholine receptor channels in *Xenopus* myocytes. **378**, 119, 1986
Differences in synaptic efficacy at neuromuscular junctions in frog twitch muscles. **379**, 205, 1986
The probability of quantal secretion along visualized terminal branches at amphibian (*Bufo marinus*) neuromuscular synapses. **379**, 257, 1986
Evaluation of a hand-held dynamometer for measuring muscle strength under field conditions. **380**, 64*P*, 1986

Neuromuscular junction (*cont.*)
The nature and origin of calcium-insensitive miniature end-plate potentials at rodent neuromuscular junctions. **381**, 607, 1986
On the action of Ruthenium Red and neuraminidase at the frog neuromuscular junction. **382**, 411, 1987
Quantal size increases without detectable change in vesicle size at the frog neuromuscular junction. **382**, 157*P*, 1987
Effect of phospholipase C at the neuromuscular junction *in vitro* in the immature rat. **382**, 158*P*, 1987
Effect of chloride ions on giant miniature end-plate potentials at the frog neuromuscular junction. **383**, 143, 1987
Acetylcholine metabolism and choline availability at the neuromuscular junction of mature adult and aged rats. **383**, 693, 1987
On the role, inactivation and origin of endogenous adenosine at the frog neuromuscular junction. **384**, 571, 1987
Effects of a diacylglycerol kinase inhibitor on the endplate responses in the mouse diaphragm *in vitro*. **384**, 24*P*, 1987
Surplus acetylcholine and acetylcholine release in the rat diaphragm. **385**, 147, 1987
Activation of acetylcholine receptors on clonal mammalian BC3H-1 cells by high concentrations of agonist. **385**, 325, 1987
Statistics of neuromuscular transmitter release in young and old mouse muscle. **385**, 507, 1987
The actions of presynaptic snake toxins on membrane currents of mouse motor nerve terminals. **386**, 455, 1987
The effects of *in vitro* application of purified botulinum neurotoxin at mouse motor nerve terminals. **386**, 475, 1987
Sodium channels near end-plates and nuclei of snake skeletal muscle. **388**, 213, 1987
Control of end-plate channel properties by neurotrophic effects and by muscle activity in rat. **388**, 367, 1987
The effect of myasthenic syndrome antibody on presynaptic calcium channels in the mouse. **390**, 257, 1987
Acetylcholine receptors at rat neuromuscular junctions turn over rapidly after nerve block by TTX. **390**, 174*P*, 1987
Acceleration of desensitization by agonist pretreatment in the snake. **391**, 109, 1987
A prolonged contraction at the end-plate region of the diaphragm of rats and mice after anticholinesterases *in vitro*. **391**, 429, 1987
Structure and function of the neuromuscular junction in human neuromuscular disease. **391**, 12*P*, 1987
Activation of the primary kinetic modes of large- and small-conductance cholinergic ion channels in *Xenopus* myocytes. **393**, 437, 1987
Plasma factors from a myasthenia gravis patient without acetylcholine receptor antibody: effect on mouse neuromuscular transmission. **394**, 148*P*, 1987

Neuromuscular transmission
Effects of inhibiting carbonic anhydrase on isometric contraction of frog skeletal muscle. **361**, 91, 1985
Noradrenaline and adenosine triphosphate as co-transmitters of neurogenic vasoconstriction in rabbit mesenteric artery. **367**, 435, 1985
The effect of altered peripheral field on motoneurone function in developing rat soleus muscles. **368**, 513, 1985
Estimating the time course of evoked quantal release at the frog neuromuscular junction using end-plate current latencies. **374**, 503, 1986
The probability of quantal secretion along visualized terminal branches at amphibian (*Bufo marinus*) neuromuscular synapses. **379**, 257, 1986
Catecholamines release mediators in the opossum oesophageal circular smooth muscle. **382**, 489, 1987
Comparison of the frequency dependence of venous and arterial responses to sympathetic nerve stimulation in guinea-pigs. **384**, 153, 1987
Motor units in a skeletal muscle of neonatal rat: mechanical properties and weak neuromuscular transmission. **386**, 355, 1987
Influence of depolarizing pulse duration on the time course of transmitter release in lobster. **388**, 487, 1987
Neuromuscular transmission in isolated preparations of human vastus lateralis. **390**, 175*P*, 1987
Neuromuscular transmission at new neuromuscular junctions in rat regenerating skeletal muscle fibres. **391**, 58*P*, 1987

Neuronal activity
Magnocellular red nucleus activity during different types of limb movement in the Macaque monkey. **358**, 527, 1985
Relation between red nucleus discharge and movement parameters in trained Macaque monkeys. **358**, 551, 1985
Cerebellar neuronal activity related to arm movements in trained rhesus monkeys. **394**, 351, 1987

Neurone
Two types of calcium channels in the somatic membrane of new-born rat dorsal root ganglion neurones. **359**, 431, 1985
Calcium-induced inactivation of calcium current causes the inter-burst hyperpolarization of *Aplysia* bursting neurones. **362**, 131, 1985
A dual mechanism for intracellular pH regulation by leech neurones. **364**, 327, 1985
Voltage-dependent potassium currents in developing neurones from quail mesencephalic neural crest. **366**, 129, 1985
Projections of oestrogen-sensitive neurones from the ventromedial hypothalamic nucleus of the female rat. **372**, 207, 1986
Properties of rat medial septal neurones recorded *in vitro*. **379**, 309, 1986
The development of voltage-dependent conductances in murine spinal cord neurones in culture. **381**, 70*P*, 1986

Neurome (*cont.*)
Enhancement of cyclic AMP-stimulated Na^+ current by the convulsant drug pentylenetetrazol in identified neurones of *Lymnaea stagnalis*. **391**, 82*P*, 1987
Calcium-activated chloride current in cultured sensory and parasympathetic quail neurones. **394**, 125, 1987

Neuropeptide
Different action of FMRFamide analogues on identified *Helix* neurones. **367**, 66*P*, 1985
The role of sensory fibres in the rat splanchnic nerve in the regulation of adrenal medullary secretion during stress. **370**, 201, 1986
Non-cholinergic neurotransmission and the effects of peptides on the urinary bladder of guinea-pigs and rabbits. **374**, 103, 1986
A comparison of the cutaneous actions of substance P, neurokinin A and calcitonin gene-related peptide in man. **374**, 48*P*, 1986
Vasopressin actions in the superior cervical ganglion of the rat *in vitro*. **378**, 88*P*, 1986
Synaptic inputs to immunohistochemically identified neurones in the submucous plexus of the guinea-pig small intestine. **381**, 465, 1986
Multiple receptor sites for a molluscan peptide (FMRFamide) and related peptides of *Helix*. **382**, 51, 1987
The release of certain neuropeptides in response to splanchnic nerve stimulation in conscious calves. **384**, 29*P*, 1987
Evidence supporting a role for endogenous vasopressin in fever suppression in the rat. **387**, 163, 1987
Differential regional vascular responses to vasopressin (AVP) and neuropeptide Y (NPY) in conscious, Long Evans rats. **390**, 188*P*, 1987
Sensory fibres modulate histamine-induced catecholamine secretion from the rat adrenal medulla and sympathetic nerves. **391**, 511, 1987

Neuropeptide Y
Involvement of catecholamines in the central pressor effect of neuropeptide Y in rats. **371**, 96*P*, 1986
Renal effects of the homologous neuropeptides pancreatic polypeptide (PP) and neuropeptide Y (NPY) in conscious rabbits. **376**, 24*P*, 1986
Presynaptic action of neuropeptide Y in area CA1 of the rat hippocampal slice. **383**, 285, 1987
Actions of neuropeptide Y on innervated and denervated rat tail arteries. **386**, 19, 1987
Evidence for an organizational effect of neuropeptide Y on hypothalamic catecholamine activity and neurohypophyseal function in rats. **388**, 51*P*, 1987
Effects of NPY on ocular blood flow and local blood flow in some other tissues in the rabbit. **390**, 119*P*, 1987

Neurosecretion
Simultaneous monitoring of electrical and secretory activity in peptidergic neurosecretory terminals of the crab. **359**, 163, 1985
Calcium-dependence of hormone release from isolated neurohypophysial nerve endings (neurosecretosomes) of the rat. **369**, 166*P*, 1985
Actions of γ-aminobutyric acid on rat supraoptic nucleus neurosecretory neurones *in vitro*. **387**, 629, 1987

Neurosecretory cell
Calcium-dependent action potentials in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 419, 1985
Activity dependence of action potential duration in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 429, 1985
Non-synaptic depolarizing potentials in rat supraoptic neurones recorded *in vitro*. **376**, 493, 1986

Neurotensin
Neurotensin and acetylcholine evoke common responses in frog oocytes injected with rat brain messenger ribonucleic acid. **382**, 523, 1987

Neurotoxin
The actions of presynaptic snake toxins on membrane currents of mouse motor nerve terminals. **386**, 455, 1987

Neurotransmitter
Influence of divalent cations on the phospholipase-independent action of β-bungarotoxin at frog neuromuscular junctions. **363**, 169, 1985
Non-cholinergic neurotransmission and the effects of peptides on the urinary bladder of guinea-pigs and rabbits. **374**, 103, 1986
Catecholamines release mediators in the opossum oesophageal circular smooth muscle. **382**, 489, 1987
Co-operative action of calcium ions in dopamine release from rat brain synaptosomes. **387**, 415, 1987
Spinal inhibition of phrenic motoneurones by stimulation of afferents from leg muscle in the cat: blockade by strychnine. **389**, 137, 1987

Neurotrophic effect
On the neurotrophic control of acetylcholine receptors at frog end-plates reinnervated by the vagus nerve. **367**, 387, 1985

Neutrophil
Differential control of azurophilic and specific granule exocytosis in Sendai-virus-permeabilized rabbit neutrophils. **383**, 115, 1987

New-born, *see* Neonate

Nicotinamide-adenine dinucleotide
Redox state changes in human skeletal muscle after isometric contraction. **380**, 441, 1986

Nicotine
Effects of nicotine on the habituation of rats to an elevated x-maze. **367**, 34*P*, 1985

Nicotinic receptor
5-Hydroxytryptamine decreases the sensitivity of nicotinic acetylcholine receptor in bull-frog sympathetic ganglion cells. **380**, 93, 1986
Acetylcholine regulation of nicotinic receptor channels through a putative G protein in chick myotubes. **393**, 635, 1987

Nifedipine
Components of charge movement in rabbit skeletal muscle: the effect of tetracaine and nifedipine. **376**, 85, 1986

Niflumic acid
Evidence for two transient sodium currents in the frog node of Ranvier. **361**, 339, 1985
Nimodipine
Nimodipine block of calcium channels in rat anterior pituitary cells. **387**, 195, 1987
Ninhydrin-positive substances
Are ninhydrin-positive substances volume-regulatory osmolytes in rat renal papillary cells? **386**, 45, 1987
Nitroglycerine
Mechanism of vasodilation induced by α-human atrial natriuretic polypeptide in rabbit and guinea-pig renal arteries. **377**, 315, 1986
Nociception
A thermal stimulus device for studying the effects of antinociceptive drugs in the sheep. **358**, 4*P*, 1985
Suppression of trigeminal noxious and 'cold' inputs in rats by hypothalamic stimulation. **358**, 25*P*, 1985
The lateral thalamic and lateral posterior nuclei of the rat: evidence for a role in nociception. **361**, 53*P*, 1985
Different types of slowly conducting afferent units in cat skeletal muscle and tendon. **363**, 403, 1985
Intracerebroventricular injection of bestatin in rats gives antinociception and increases metenkephalin levels in the periaqueductal grey matter. **364**, 46*P*, 1985
Spinothalamic lumbosacral lamina I cells responsive to skin and muscle stimulation in the cat. **365**, 197, 1985
Long-duration antinociception from stimulation of the pretectal nucleus in the rat. **367**, 36*P*, 1985
Turpentine inflammation: a nociceptive visceral stimulus in the rat. **372**, 22*P*, 1986
Inhibition of lamina IV and V dorsal horn neurones by noxious heat stimulation of the hind limb in the cat and the rat. **378**, 42*P*, 1986
Direct evidence of neurally mediated vasodilatation in hairy skin of the human foot. **382**, 105, 1987
Blockade of nociceptive responses in the neonatal rat spinal cord *in vitro* by excitatory amino acid antagonists. **382**, 177*P*, 1987
Laser Doppler measurement of acetylcholine-induced axon reflex flare to assess human nociceptive C fibre function. **384**, 3*P*, 1987
GABAergic influence on tonic descending inhibition of noxious input arising from the rostral ventrolateral medulla in the rat. **384**, 73*P*, 1987
Further investigations of the afferent fibres from the rat parietal meninges. **384**, 78*P*, 1987
Anterior pretectal stimulation alters the responses of spinal dorsal horn neurones to cutaneous stimulation in the rat. **385**, 415, 1987
Stimulation of cat cutaneous nociceptive C fibres causing tonicand synchronous activity in climbing fibres. **386**, 539, 1987
Electrophysiological investigations of the projection from the parabrachial region (PB) to nucleus raphe magnus (NRM) in the anaesthetized rat. **386**, 30*P*, 1987
Responses of spinothalamic tract cells in the superficial dorsal horn of the primate lumbar spinal cord. **388**, 681, 1987
Opioid inhibition of subcutaneous formalin-induced activity of rat dorsal horn neurones depends on time of administration. **390**, 257*P*, 1987
Antinociceptive effects of microinjection of D,L-homocysteic acid into the anterior pretectal nucleus of the rat. **394**, 103*P*, 1987
Nociceptor
Study of neurones in rat trigeminal nucleus caudalis excited by stimulation of meningeal nociceptors. **358**, 24*P*, 1985
Evidence of the regeneration of cutaneous polymodal nociceptor afferents following nerve crush in the rat. **369**, 62*P*, 1985
Cutaneous nociceptors in the amputated beak of the chicken. **382**, 119*P*, 1987
Cutaneous primary afferent properties in the hind limb of the neonatal rat. **383**, 79, 1987
Selective responsiveness of polymodal nociceptors of the rabbit ear to capsaicin, bradykinin and ultra-violet irradiation. **388**, 9, 1987
A nociceptive non-FRA pathway to plantaris motoneurones in the cat. **390**, 49*P*, 1987
Node of Ranvier
Quantitative analysis of the fine structure of frog nodes of Ranvier from random longitudinal sections. **360**, 16*P*, 1985
Evidence for two transient sodium currents in the frog node of Ranvier. **361**, 339, 1985
Sodium tail currents at different post-pulse potentials in the voltage-clamped frog node of Ranvier. **369**, 103*P*, 1985
The effects of rubidium ions on components of the potassium conductance in the frog node of Ranvier. **375**, 81, 1986
Properties of maintained sodium current induced by a toxin from *Androctonus* scorpion in frog node of Ranvier. **383**, 93, 1987
Comparison of the after-effects of impulse conduction on threshold at nodes of Ranvier along single frog sciaticaxons. **386**, 503, 1987
Interactions of guanidinium ions with sodium channels in frog myelinated nerve fibre. **391**, 85, 1987
Nodose ganglion
Single-channel analysis of fast transient potassium currents from rat nodose neurones. **369**, 199, 1985
Factors affecting the expression of acetylcholine receptors on rat sensory neurones in culture. **377**, 409, 1986
Tetrodotoxin-resistant sodium current of rat nodose neurones: monovalent cation selectivity and divalent cation block. **389**, 255, 1987
Ouabain augments calcium-dependent potassium conductance in visceral primary afferent neurones of the rabbit. **389**, 629, 1987
Non-cholinergic response
Non-cholinergic excitatory and inhibitory junction potentials in the circular smooth muscle of the guinea-pig ileum. **374**, 153, 1986

Non-cholinergic response (*cont.*)
Non-cholinergic transmission in a sympathetic ganglion of the guinea-pig elicited by colon distension. **374**, 315, 1986
Non-myelinated nerve
Graded blocking of non-myelinated vagal fibres in the rabbit. **366**, 31*P*, 1985
Blood pressure response evoked by ventral root afferent fibres in the cat. **370**, 255, 1986
Non-myelinated nerve fibre
The effects of electrical stimulation of myelinated and non-myelinated vagal fibres on heart rate in the rabbit. **380**, 341, 1986
Non-shivering thermogenesis
Multilocular adipocytes from muscovy ducklings differentiated in response to cold acclimation. **375**, 27, 1986
Noradrenaline
Noradrenaline hyperpolarization and depolarization in cat vesical parasympathetic neurones. **361**, 165, 1985
Noradrenaline and functional plasticity in kitten visual cortex: a re-examination. **367**, 73, 1985
Noradrenaline and adenosine triphosphate as co-transmitters of neurogenic vasoconstriction in rabbit mesenteric artery. **367**, 435, 1985
Direct observations of responses of mesenteric microcirculation of the rat to circulating noradrenaline. **368**, 393, 1985
Evidence for opioid inhibition of noradrenaline (NA) release in the medial preoptic area (MPOA) of female rats. **371**, 213*P*, 1986
Opioids inhibit noradrenaline release in rat supraoptic nucleus and neurohypophysis. **371**, 215*P*, 1986
Actions of noradrenaline recorded intracellularly in rat hippocampal CA1 pyramidal neurones, *in vitro*. **372**, 221, 1986
Cyclic adenosine 3′,5′-monophosphate mediates β-receptor actions of noradrenaline in rat hippocampal pyramidal cells. **372**, 245, 1986
Presence of a noradrenaline uptake system on a ligated cat sympathetic nerve. **372**, 351, 1986
Dopamine, noradrenaline and isoprenaline: secretory and electrophysiological effects *in vitro* on mouse pancreas. **376**, 359, 1986
Membrane responses to noradrenaline in dispersed single smooth muscle cells of the guinea-pig pulmonary artery studied with patch-pipette techniques. **377**, 37*P*, 1986
Noradrenaline modulates calcium channels in avian dorsal root ganglion cells through tight receptor–channel coupling. **379**, 131, 1986
Inhibitory synaptic potentials recorded from mammalian neurones prolonged by blockade of noradrenaline uptake. **382**, 87, 1987
In vivo release of noradrenaline in the rat hippocampus. **382**, 88*P*, 1987
Afferent lymph flow in the sheep hind limb following intra-arterial infusion of noradrenaline. **382**, 155*P*, 1987
Increase of potassium and chloride conductance with internal perfusion of inositol trisphosphate of calcium ions in guinea-pig isolated hepatocytes. **382**, 188*P*, 1987
Action of noradrenaline on single smooth muscle cells freshly dispersed from the rat anococcygeus muscle. **389**, 513, 1987
Noradrenaline decreases voltage-dependent calcium current in neuroblastoma × glioma hybrid (NG108 15) cells. **390**, 81*P*, 1987
Noradrenaline spillover from skeletal muscle during exercise at various work intensities in man. **390**, 252*P*, 1987
The effect of noradrenaline on the ion permeability of isolated mammalian hepatocytes, studied by intracellular recording. **392**, 493, 1987
[^{3}H]Noradrenaline release from rabbit pulmonary artery: sodium-pump-dependent sodium–calcium exchange. **393**, 29, 1987
The effects of noradrenaline on neurones in the rat dorsal motor nucleus of the vagus, *in vitro*. **393**, 213, 1987
Dopamine (D2) receptors mediate noradrenaline action on cat retinal ganglion cells. **394**, 14*P*, 1987
Noradrenergic neurone
Inhibiting the rabbit caudal ventrolateral medulla prevents baroreceptor-initiated secretion of vasopressin. **367**, 253, 1985
Noradrenergic transmission
Pre- and post-junctional effects of adenosine triphosphate on noradrenergic transmission in the rabbit ear artery. **389**, 423, 1987
Nose
Control of secretion from the dog lateral nasal gland. **358**, 100*P*, 1985
The effects of nasal airflow on the electromyographic activity of nasal muscles in the anaesthetized cat. **358**, 102*P*, 1985
Effects of hypercapnia and hypoxia on nasal vasculature and airflow resistance in the anaesthetized dog. **373**, 261, 1986
Lateral nasal gland secretion in the anaesthetized dog. **374**, 359, 1986
Lung reflexes and nasal vascular resistance in the anaesthetized dog. **386**, 465, 1987
Electromyographic responses of a nasal muscle to stimulation of the nasal vestibule in the cat. **391**, 25, 1987
Arterial supply, venous drainage and collateral circulation in the nose of the anaesthetized dog. **391**, 57, 1987
Effects of stimulation of nasal and superior laryngeal inputs on the hindlimb vasculature of anaesthetized cats. **393**, 135, 1987
A convergent input from nasal receptors and the larynx to the rostral sensory trigeminal nuclei of the cat. **393**, 147, 1987
Autonomic nervous stimulation on canine nasal vascular and airway resistances. **394**, 61*P*, 1987
The effect of a nasal airflow stimulus upon human alae nasi e.m.g. activity. **394**, 78*P*, 1987
Nuclear magnetic resonance
Changes in brain phosphorus metabolites during the post-natal development of the rat. **359**, 417, 1985

Nuclear magnetic resonance (*cont.*)
A nuclear magnetic resonance study of metabolism in the ferret heart during hypoxia and inhibition of glycolysis. **361**, 185, 1985
The effects of pregnancy and parturition on phosphorus metabolites in rat uterus studied by ^{31}P nuclear magnetic resonance. **368**, 19, 1985
The response of the African frog *Xenopus laevis*, to increased salinity demonstrated by ^{31}P-NMR spectroscopy. **381**, 30*P*, 1986
Apparatus for recording ^{31}P n.m.r. spectra and force from a functionally and anatomically discrete human muscle. **390**, 3*P*, 1987
^{14}Nitrogen nuclear magnetic resonance (n.m.r.) spectroscopy of isolated living *Xenopus* muscle. **390**, 227*P*, 1987
A phosphorus nuclear magnetic resonance study of metabolites and intracellular pH in rabbit vascular smooth muscle. **393**, 57, 1987

Nucleotide
Measurement of intracellular nucleotide content of primary and established cell cultures using reverse-phase ion-pair chromatography. **367**, 5*P*, 1985

Nucleus accumbens
Effects of infusions of D-amphetamine into nucleus accumbens on measures of exploration in rats. **367**, 43*P*, 1985

Nucleus tractus solitarius
Post-synaptic activity evoked in the nucleus tractus solitarius by carotid sinus and aortic nerve afferents in the cat. **360**, 261, 1985
Vasopressin modifies the cardiovascular response to noradrenaline microinjection in the nucleus of the tractus solitarius in rats. **360**, 55*P*, 1985
Inhibitory actions of γ-aminobutyric acid (GABA) in the nucleus tractus solitarius of the cat. **366**, 33*P*, 1985
Selective cardiovascular and neuroendocrine effects of a κ-opioid agonist in the nucleus tractus solitarii of rats. **367**, 363, 1985
The effects of γ-aminobutyric acid and bicuculline on neurones in the nucleus tractus solitarius of the cat activated following electrical stimulation of the aortic nerve. **369**, 51*P*, 1985
Autoradiographic demonstration of a variation in receptor populations in the nucleus of the tractus solitarius between rabbit and cat. **372**, 85*P*, 1986
A γ-aminobutyric-acid-mediated inhibition of neurones in the nucleus tractus solitarius of the cat. **392**, 417, 1987

Nucleus Z
Pathway to the cerebral cortex for impulses from tendon organs in the cat's hind limb. **369**, 115, 1985

Nutrition
Lipemic risk factors and dietary intake in premenarcheal athletes. **366**, 102*P*, 1985
The nutritional regulation of plasma prostaglandin E concentrations in the fetus and pregnant ewe during late gestation. **394**, 1, 1987

Nystagmus
Baclofen and velocity storage: a model of the effects of the drug on the vestibulo-ocular reflex in the rhesus monkey. **393**, 703, 1987
Disabling of the oculomotor neural integrator by kainic acid injections in the prepositus–vestibular complex of the cat. **394**, 267, 1987

Octopamine
Regional differences in responsiveness to octopamine within a locust skeletal muscle. **366**, 331, 1985

Oculomotor system
Predictive velocity estimation in the pursuit reflex response to pseudo-random and step displacement stimuli in man. **389**, 111, 1987
Saccadic eye movements evoked by microstimulation of lobule VII of the cerebellar vermis of macaque monkeys. **394**, 573, 1987

Oedema
Decreased adenosine uptake and metabolism in isolated lungs of rats precedes pulmonary oedema induced by α-naphthylthiourea (ANTU). **371**, 126*P*, 1986

Oesophagus
Effects of vagal deafferentation on oesophageal motility and transit in the sheep. **372**, 425, 1986
Tetrodotoxin-sensitive and -insensitive relaxations in the rat oesophageal tunica muscularis mucosae. **381**, 49, 1986
Valvular behaviour of the human gastro-oesophageal junction. **390**, 6*P*, 1987
Role of medullary inspiratory neurones in the control of the diaphragm during oesophageal stimulation in cats. **391**, 289, 1987

Oestrogen
The effects of oestrogens on spontaneous activity and responses to phenylephrine of the mammalian urethra. **358**, 35, 1985

Oestrous cycle
Changes in sensitivity to diazepam during the oestrous cycle in the mouse. **377**, 70*P*, 1986
Pituitary reproductive hormones during the oestrous cycle in Zucker rats. **381**, 43*P*, 1986

Olfactory bulb
Field potentials in the rabbit accessory olfactory bulb. **369**, 53*P*, 1985

Olfactory cortex
Calcium-dependent potassium conductance in guinea-pig olfactory cortex neurones *in vitro*. **387**, 173, 1987
The enhancement of synaptic transmission by phorbol ester in the guinea-pig olfactory cortex. **394**, 155*P*, 1987

Oocyte
Fertilization-induced ionic conductances in eggs of the frog, *Rana pipiens*. **358**, 299, 1985
Kainic acid opens low conductance channels in *Xenopus laevis* oocytes injected with mRNA from rat brain. **365**, 85*P*, 1985
Role of calcium mobilization in mediation of acetylcholine-evoked chloride currents in *Xenopus laevis* oocytes. **366**, 299, 1985
Propagating potassium and chloride conductances during activation and fertilization of the egg of the frog, *Rana pipiens*. **368**, 227, 1985

Oocyte (*cont.*)
Measurements of membrane capacity in *Xenopus* eggs. **369**, 105*P*, 1985
Cyclic adenosine monophosphate, calcium, acetylcholine and the current induced by adenosine in the *Xenopus* oocyte. **374**, 551, 1986
Periodic increase of cytoplasmic free calcium in fertilized hamster eggs measured with calcium-sensitive electrodes. **377**, 193, 1986
A calcium-activated sodium conductance produces a long-duration action potential in the egg of a nemertean worm. **381**, 263, 1986
Oscillatory chloride current evoked by temperature jumps during muscarinic and serotonergic activation in *Xenopus* oocyte. **383**, 213, 1987
The effects of membrane potential on active and passive sodium transport in *Xenopus* oocytes. **385**, 643, 1987
Excision-activated non-selective ion channels in mouse oocytes. **386**, 80*P*, 1987
Inhibition of secretory granule discharge during exocytosis in sea urchin eggs by polymer solutions. **389**, 527, 1987
Calcium current and calcium-activated inward current in the oocyte of the starfish *Leptasterias hexactis*. **390**, 397, 1987
A reversible membrane hyperpolarization induced in hamster eggs by high external pH. **390**, 104*P*, 1987
The calcium current of mouse egg measured in physiological calcium and temperature conditions. **391**, 573, 1987

Opiate
Naloxone potentiates the posterior pituitary response to immobilization in female, but not male rats. **360**, 76*P*, 1985
On the potassium conductance increased by opioids in rat locus coeruleus neurones. **364**, 265, 1985
Selective cardiovascular and neuroendocrine effects of a κ-opioid agonist in the nucleus tractus solitarii of rats. **367**, 363, 1985
Certain 'sigma' opiate stereoisomer pairs have opposite actions on potassium (K) permeabilities in rat presynaptic nerve terminals. **371**, 202*P*, 1986
The effects of the opioid antagonists ICI 174864 and WIN 44441-3 on a spinal reflex in the rabbit. **373**, 91*P*, 1986
Mu and delta opiate receptors: location and influences on nociceptive transmission in the rat spinal cord. **376**, 57*P*, 1986
The effects of opioids on a spinal reflex in the rabbit: suppression by μ-agonists and enhancement by κ-agonists. **377**, 26*P*, 1986
Presynaptic opioid δ-receptors in the rabbit mesenteric artery. **379**, 217, 1986
Renal and endocrine response to kappa-opioid agonist administration in the rat. **386**, 66*P*, 1987
The use of high-performance liquid chromatography with electrochemical detection to examine the effects of opiates on rat brain catecholamine levels. **392**, 16*P*, 1987
Vasopressin, oxytocin, dynorphin, enkephalin and corticotrophin-releasing factor mRNA stimulation in the rat. **394**, 23, 1987

Opiate receptor
Effect of androgens on rat brain opioid receptors. **369**, 67*P*, 1985
Effects of receptor-selective opioid peptides in superficial dorsal horn of the cat. **373**, 72*P*, 1986
Dynorphin A decreases voltage-dependent calcium conductance of mouse dorsal root ganglion neurones. **377**, 237, 1986
Behavioural effects of [D-Pen^2, D-Pen^5]-enkephalin and ICI 174,864 after intrathecal injection in the rat. **382**, 153*P*, 1987
μ- and δ-opioid receptors both belong to a family of neurotransmitter receptors which increase an inwardly rectifying potassium conductance. **390**, 199*P*, 1987
Release of substance P from the cat spinal cord. **391**, 141, 1987

Optic nerve
An *in vitro* preparation for the study of visual physiology in the squid, *Alloteuthis subulata*. **360**, 18*P*, 1985
Non-NMDA receptors mediate the optic nerve input to the rat LGN *in vitro*. **365**, 40*P*, 1985
Selective degeneration of optic nerve fibres in the cat produced by a pressure block. **376**, 461, 1986
Axon diameter spectra across the optic tract of the macaque monkey. **382**, 94*P*, 1987
Function of the Y optic nerve fibres in the cat: do they contribute to acuity and ability to discriminate fast motion? **392**, 35, 1987

Optic pathway
Retinal projections of neonatal mammals visualized in wholemount preparations. **358**, 13*P*, 1985
Connections of long visual fibres in the optic lobes of the dragon-fly *Sympetrum*. **365**, 38*P*, 1985

Optic tectum
Double dissociation of learning functions within the avian hyperstriatal complex. **367**, 32*P*, 1985

Optical monitoring
Early events in development of electrical activity and contraction in embryonic rat heart assessed by optical recording. **369**, 209, 1985

Optical rotation
Change in optical activity of a lobster nerve associated with excitation. **389**, 223, 1987

Optokinetic system
Lesions in the cat prepositus complex: effects on the optokinetic system. **372**, 95, 1986

Optometer
A Maxwellian-view optometer using Scheiner's principle, suitable for electrophysiology and psychophysics. **362**, 5*P*, 1985

Orientation column
Continuity of orientation columns between superficial and deep laminae of the cat primary visual cortex. **381**, 95, 1986

Osmolality
The effect of airflow on mucus secretion into the trachea of the cat. **380**, 429, 1986
Inhibition of secretory granule discharge during exocytosis in sea urchin eggs by polymer solutions. **389**, 527, 1987

Osmosensitivity
Vasopressin, oxytocin, dynorphin, enkephalin and corticotrophin-releasing factor mRNA stimulation in the rat. **394**, 23, 1987
Osmosis
Effect of solute concentration on intracellular water volume and hydraulic conductivity of human blood platelets. **374**, 375, 1986
Osmotic pressure
Effect of albumin on the osmotic pressure exerted by myoglobin across capillary walls in frog mesentery. **387**, 69, 1987
Ouabain, *see also* Cardiac glycoside
Sodium–potassium pump in guinea-pig parotid gland: secretagogue stimulation of ouabain binding to dispersed acini. **360**, 121, 1985
Effect of ouabain on tone, membrane potential and sodium efflux compared with [^{3}H]ouabain binding in rat resistance vessels. **362**, 215, 1985
The subcellular localisation of, and the effect of chloroquine on, ouabain and digoxin after binding to HeLa cells. **367**, 95*P*, 1985
The roles of paracellular and transcellular pathways and submucosal space in isotonic water absorption by rabbit ileum. **370**, 409, 1986
Production of endolymph in the semicircular canal of the frog *Rana esculenta*. **371**, 17, 1986
Secretion control for active and inactive renin: effect of ouabain on release from rabbit kidney cortex slices. **379**, 17, 1986
The reaction of ouabain with the sodium pump of guinea-pig myocardium in relation to its inotropic effect. **379**, 187, 1986
Ouabain binding and its effects on murine neuroblastoma cells. **380**, 24*P*, 1986
Quantification of the maximum capacity for active sodium–potassium transport in rat skeletal muscle. **388**, 163, 1987
Ouabain augments calcium-dependent potassium conductance in visceral primary afferent neurones of the rabbit. **389**, 629, 1987
Oxidative enzyme
Maximum activities of key glycolytic and oxidative enzymes in human muscle from differently trained individuals. **381**, 111, 1986
Oxygen
Transient responses of coronary flow in the blood-perfused isolated rat heart submitted to changes in oxygen content. **358**, 321, 1985
On the construction of oxygen micro-electrodes. **364**, 19*P*, 1985
Oxygen electrodes for use on the surface of brain tissue subjected to pressure during neurosurgery. **365**, 13*P*, 1985
Measurement of oxygen consumption of single frog muscle fibres. **366**, 5*P*, 1985
Metabolic and cardiovascular effects on fetal sheep of sustained reduction of uterine blood flow. **368**, 109, 1985
Ventilation in intact and glossopharyngeal nerve sectioned anaesthetized rats exposed to oxygen at high pressure. **370**, 489, 1986
Contraction of human umbilical artery, but not vein, by oxygen. **380**, 513, 1986
Portable apparatus for obtaining direct *in vivo* monitoring of cerebral oxygenation in the human neonate using near infrared spectroscopy. **390**, 4*P*, 1987
Responses of rapidly adapting and slowly adapting pulmonary stretch receptors to lymphatic obstruction and pulmonary congestion in dogs. **390**, 181*P*, 1987
The kinetics of oxygen uptake during heavy exercise in man. **394**, 56*P*, 1987
Oxygen consumption
Ambulatory monitoring of the oxygen cost of self-paced walking. **361**, 6*P*, 1985
Oxygen consumption of single frog muscle fibres during twitch contractions. **365**, 71*P*, 1985
Oxygen consumption following contraction of isolated rabbit papillary muscle at 20 °C. **371**, 175*P*, 1986
Continuous measurement of oxygen consumption and carbon dioxide production in man. **371**, 233*P*, 1986
Uncoupling of myocardial oxygen consumption from energy production and work during endotoxic shock in dogs. **371**, 251*P*, 1986
Oxygen consumption and active sodium and chloride transport in bovine tracheal epithelium. **372**, 51, 1986
The oxygen cost of walking in the elderly. **373**, 42*P*, 1986
Kinetics of O_2 consumption following a brief flash of light in the lateral eye of the barnacle, *Balanus eburneus*. **378**, 65*P*, 1986
Maximum activities of key glycolytic and oxidative enzymes in human muscle from differently trained individuals. **381**, 111, 1986
Maximum oxygen uptake and capillarity and enzyme activity in the gastrocnemius muscle of trained and untrained tufted ducks, *Aythya fuligula*. **394**, 131*P*, 1987
Oxytocin
Neonatal androgenization of female rats abolishes the sexual dimorphism of oxytocin responses to stress. **369**, 119*P*, 1985
Synchronization and recruitment of paraventricular and supraoptic cells in suckled rats. **369**, 173*P*, 1985
Oxytocin and oxytocin cell background activity in suckled rats. **369**, 174*P*, 1985
Excitation of neurones in the rat paraventricular nucleus *in vitro* by vasopressin and oxytocin. **370**, 165, 1986
Plasma oxytocin and oxytocin neurone activity during delivery in rabbits. **370**, 501, 1986
A model system for the study of morphine dependence and withdrawal in identified peptidergic neurones in the rat. **371**, 4*P*, 1986
Evidence that morphine interrupts parturition in rats by inhibiting oxytocin secretion. **371**, 182*P*, 1986
Actions of the uterine oxytocin receptor in the cyclic ewe. **371**, 205*P*, 1986
Steroid production by isolated binucleate cells from ruminant placenta. **371**, 218*P*, 1986

Oxytocin (*cont.*)
Oxytocin and monoamine concentrations in sheep cerebrospinal fluid during labour, parturition, vaginocervical stimulation, lamb separation and suckling. **376**, 20*P*, 1986
Paired recordings from supraoptic and paraventricular oxytocin cells in suckled rats: recruitment and synchronization. **377**, 369, 1986
Direct excitation of vagal neurones by oxytocin in rat brainstem slices. **378**, 87*P*, 1986
Regulation of the milk ejection reflex in the rat. **380**, 239, 1986
The influence of neurohypophysial hormones on renal function in the acutely hypophysectomized rat. **381**, 439, 1986
A synergistic effect of oxytocin and vasopressin on sodium excretion in the neurohypophysectomized rat. **381**, 453, 1986
Intracerebroventricular oxytocin stimulates maternal behaviour in the sheep. **381**, 80*P*, 1986
Relationship between peak torque and cross-sectional area of knee extensor and flexor muscles by nuclear magnetic resonance imaging. **382**, 28*P*, 1987
A technique for combining time-lapse cinemicrography and immunoelectron microscopy. **384**, 13*P*, 1987
Oxytocin release in response to osmotic stimulation following lesions to the antero-ventral third ventricular region (AV3V region) in rats. **384**, 28*P*, 1987
Intracranial dialysis measurement of oxytocin release from the olfactory bulb and substantia nigra of sheep during parturition, suckling and eating. **388**, 8*P*, 1987
Differential inhibition of vasopressin and oxytocin by opiates in man. **390**, 185*P*, 1987

Pacemaker
Slow depolarizing and hyperpolarizing currents which mediate bursting in *Apiysia* neurone R15. **360**, 51, 1985
Voltage and ion dependences of the slow currents which mediate bursting in *Aplysia* neurone R15. **360**, 69, 1985
Calcium-dependent inward current in *Aplysia* bursting pace-maker neurones. **362**, 107, 1985
Calcium-induced inactivation of calcium current causes the inter-burst hyperpolarization of *Aplysia* bursting neurones. **362**, 131, 1985
Electrotonic influence of atrial myocardium on sinus node function in the rabbit. **366**, 36*P*, 1985
Effects of thallium on membrane currents at diastolic potentials in canine cardiac Purkinje strands. **370**, 285, 1986
Slow membrane currents in bursting pace-maker neurones of *Tritonia*. **382**, 425, 1987
Conductance and kinetics of delayed rectifier potassium channels in nodal cells of the rabbit heart. **387**, 227, 1987

Pacemaker current
Does i_f contribute to pace-making in the rabbit sinoatrial node? **358**, 51*P*, 1985
Properties of the hyperpolarizing-activated current (i_f) in cells isolated from the rabbit sino-atrial node. **377**, 61, 1986

Pacemaker potential
Voltage clamp of bull-frog cardiac pace-maker cells: a quantitative analysis of potassium currents. **368**, 265, 1985

Pacinian corpuscle
Phase coherence in vibration-induced responses of tactile fibres associated with Pacinian corpuscle receptors in the cat. **386**, 263, 1987
Temporal patterning in the responses of gracile and cuneate neurones in the cat to cutaneous vibration. **386**, 277, 1987
Actions of single sensory fibres on cat dorsal column nuclei neurones: vibratory signalling in a one-to-one linkage. **386**, 293, 1987
Integrative processing of vibratory information in cat dorsal column nuclei neurones driven by identified sensory fibres. **386**, 311, 1987

Pain
Responses of spinal cord neurones to stimulation of articular afferent fibres in the cat. **372**, 575, 1986
A cutaneous pressure device for measuring the effects of antinociceptive drugs in sheep. **372**, 89*P*, 1986
Somatic and visceral inputs to the thoracic spinal cord of the cat: marginal zone (lamina I) of the dorsal horn. **388**, 383, 1987
Heterotopic activation of Aδ and C fibres triggers inhibition of trigeminal and spinal convergent neurones in the rat. **389**, 301, 1987
Experimental stress and the modulation of dental pain thresholds in man. **390**, 25*P*, 1987
Cold stimulation of teeth: a comparison between the responses of cat intradental Aδ and C fibres and human sensation. **391**, 193, 1987

Pancreas, *see also* Endocrine pancreas, Exocrine pancreas
Acetylcholine-evoked potassium release in the mouse pancreas. **365**, 319, 1985
Starvation and refeeding modulate L-phenylalanine transport in the perfused rat exocrine pancreas. **369**, 149*P*, 1985
Effects of starvation and diabetes mellitus on free amino acid concentrations in the exocrine pancreas and plasma of the rat. **369**, 196*P*, 1985
The transpancreatic carbon dioxide gradient. **378**, 30*P*, 1986
The role of calcium in water and electrolyte secretion by the perfused cat pancreas. **378**, 31*P*, 1986
The effects of the phorbol ester, TPA, on amylase secretion and cytoplasmic free calcium concentration in guinea-pig pancreatic acini. **378**, 96*P*, 1986
Two types of calcium-sensitive cation channels in isolated rat pancreatic duct cells. **386**, 82*P*, 1987
Effect of secretin, carbon dioxide and dicyclohexylcarbodiimide (DCCD) on the population of cytoplasmic vesicles in pancreatic duct cells. **390**, 167*P*, 1987

Pancreas (*cont.*)
Optical measurement of intracellular pH (pH_i) in single isolated rat pancreatic acini: evidence of Cl^-/HCO_3^- exchange. **394**, 93*P*, 1987
Characteristics of a large-conductance anion channel in membrane patches excised from rat pancreatic duct cells *in vitro*. **394**, 146*P*, 1987
Pancreatic acinar cell
Phosphorus nuclear magnetic resonance in isolated perfused rat pancreas. **371**, 133*P*, 1986
Influence of $[Ca^{2+}]_o$ on CCK-induced secretion and redox state in perfused rat pancreas. **371**, 134*P*, 1986
Cholecystokinin activates K^+-channels via internal messenger in pig pancreatic acinar cells. **371**, 158*P*, 1986
Comparison of calcium efflux from isolated rat pancreatic acini and perfused pancreas: effects of carbachol. **390**, 100*P*, 1987
Pancreatic islet
The effect of glucose on insulin release and ion movements in isolated pancreatic islets of rats in old age. **384**, 347, 1987
Pancreatic islet cell
Failure of glucose to affect ^{86}rubidium efflux and ^{45}calcium uptake of fetal rat pancreatic islets. **358**, 365, 1985
Glucose inhibits potassium channel activity in single rat pancreatic islet cells. **358**, 88*P*, 1985
Calcium and delayed potassium currents in mouse pancreatic β-cells under voltage-clamp conditions. **374**, 531, 1986
Cyclic adenosine monophosphate differently affects the response of mouse pancreatic β-cells to various amino acids. **381**, 77, 1986
ADP modulates the ATP-sensitivity of the K-channel closed by glucose in isolated rat pancreatic B-cells. **381**, 68*P*, 1986
Effects of 2-ketoisocaproate on insulin release and single potassium channel activity in dispersed rat pancreatic β-cells. **385**, 517, 1987
Pancreatic secretion
Pancreatic secretion in the conscious unrestrained rat. **387**, 9*P*, 1987
Absence of a relationship between arterial pH and pancreatic bicarbonate secretion in the isolated perfused cat pancreas. **388**, 495, 1987
The transport of lactate and pyruvate into the pancreatic juice of isolated perfused cat pancreas. **391**, 30*P*, 1987
Pancreatic electrolyte and amylase secretion in the anaesthetized guinea-pig stimulated with either secretin, cholecystokinin octapeptide (CCK-8) or bombesin. **391**, 104*P*, 1987
Papillary muscle
Electrical constants of arterially perfused rabbit papillary muscle. **385**, 307, 1987
Parallel fibre
Optical recording of electrical activity from parallel fibres and other cell types in skate cerebellar slices *in vitro*. **393**, 681, 1987
Synaptic modification of parallel fibre–Purkinje cell transmission in *in vitro* guinea-pig cerebellar slices. **394**, 463, 1987
Paramecium
Slow inactivation of the calcium current of *Paramecium* is dependent on voltage and not internal calcium. **365**, 165, 1985
Parasympathetic axon
Innervation of the iris by individual parasympathetic axons in the adult mouse. **378**, 485, 1986
Parasympathetic ganglion
Noradrenaline hyperpolarization and depolarization in cat vesical parasympathetic neurones. **361**, 165, 1985
Vasoactive intestinal polypeptide depolarizations in cat bladder parasympathetic ganglia. **374**, 457, 1986
Neurotransmitter action and modulation of a calcium conductance in rat cultured parasympathetic cardiac neurones. **394**, 153*P*, 1987
Parasympathetic nerve
Three serial neurones in the innervation of the colon by the sacral parasympathetic nerve of the dog. **362**, 69, 1985
Parasympathetic stimulation
The release of histamine by parasympathetic stimulation in guinea-pig auricle and rat ileum. **371**, 29, 1986
Parasympathetic system
Effects of certain metabolites on pancreatic endocrine responses to stimulation of the vagus nerves in conscious calves. **362**, 303, 1985
Parathyroid hormone
Skeletal changes associated with thyroparathyroidectomy of the fetal lamb. **360**, 75*P*, 1985
Renal electrolyte excretion and renin release during calcium and parathormone infusions in conscious rabbits. **373**, 329, 1986
Effect of external chloride and PTH on intracellular pH in cultured rat osteoblasts. **382**, 143*P*, 1987
Paraventricular nucleus
Excitation of neurones in the rat paraventricular nucleus *in vitro* by vasopressin and oxytocin. **370**, 165, 1986
Plasma oxytocin and oxytocin neurone activity during delivery in rabbits. **370**, 501, 1986
Paired recordings from supraoptic and paraventricular oxytocin cells in suckled rats: recruitment and synchronization. **377**, 369, 1986
Effects of atrial natriuretic polypeptide on rat hypothalamic neurones *in vitro*. **389**, 717, 1987
Paraventriculo-spinal neurones in the rat. **394**, 105*P*, 1987
Parietal cell
Preparation of purified parietal cells from rat using Nycodenz density gradients. **391**, 9*P*, 1987
Parkinson's disease
Performance of various types of simultaneous movements in patients with Parkinson's disease. **369**, 30*P*, 1985
Parotid gland, *see also* Salivary gland
Sodium–potassium pump in guinea-pig parotid gland: secretagogue stimulation of ouabain binding to dispersed acini. **360**, 121, 1985
The effect of vitamin D deficiency on secretion of saliva by rat parotid gland *in vivo*. **363**, 323, 1985

Parotid gland (*cont.*)
The possible relation between mastication and parotid secretion in the rabbit. **364**, 19, 1985
Mechanism of action of extracellular calcium on isoprenaline-evoked amylase secretion from isolated rat parotid glands. **369**, 337, 1985
Reflex stimulation of parotid secretion in sheep after atropine and cervical sympathetic ganglionectomy. **371**, 129*P*, 1986
Parotid gland function and nerves in streptozotocin-diabetic rats. **371**, 130*P*, 1986
On regulation of amylase synthesis by nerve stimulation in the rat parotid gland. **371**, 131*P*, 1986
Parotid degranulation and amylase secretion in rats caused by release of non-adrenergic non-cholinergic components from the parasympathetic nerve. **372**, 42*P*, 1986
Electrophysiological effects of β-adrenoceptor stimulation in the rat parotid gland. **376**, 27*P*, 1986
Non-parallel features in parasympathetic and sympathetic parotid saliva from rats. **381**, 33*P*, 1986
Effects of sympathectomy on the protein content of parasympathetic saliva from parotid glands of rats. **390**, 171*P*, 1987
Amylase in rat parotid saliva on prolonged parasympathetic stimulation. **390**, 172*P*, 1987
Quin2 fluorescence measurements in rat parotid acinar suspensions. **391**, 105*P*, 1987

Pars intermedia
The hypothalamo-hypophyseal rat explant *in vitro*: endocrinological studies of the pars intermedia dopaminergic neural input. **370**, 381, 1986

Parturition
Morphine acts centrally to interrupt established parturition in rats. **364**, 59*P*, 1985
Serum tyrosine and phenylalanine levels in late human pregnancy and in relation to duration of labour. **367**, 84*P*, 1985
The effects of pregnancy and parturition on phosphorus metabolites in rat uterus studied by ^{31}P nuclear magnetic resonance. **368**, 19, 1985
Plasma oxytocin and oxytocin neurone activity during delivery in rabbits. **370**, 501, 1986

Patch clamp
A voltage-gated potassium channel in human T lymphocytes. **358**, 197, 1985
Currents carried by monovalent cations through calcium channels in mouse neoplastic B lymphocytes. **358**, 255, 1985
Mechano-electrical transduction currents in isolated vestibular hair cells of the chick. **359**, 189, 1985
Patch-clamp of rat cerebellar neurones in tissue culture. **362**, 45*P*, 1985
Properties of adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 441, 1985
Potassium channels in cultured bovine adrenal chromaffin cells. **367**, 117, 1985
Properties of the hyperpolarizing-activated current (i_f) in cells isolated from the rabbit sino-atrial node. **377**, 61, 1986
Freshly dissociated rat sympathetic neurones: a preparation suitable for patch-clamp recording. **377**, 2*P*, 1986
Patch-clamp studies of K^+ channels in guinea-pig pancreatic acinar cells. **378**, 62*P*, 1986
Stabilization of sodium channel states by deltamethrin in mouse neuroblastoma cells. **380**, 191, 1986
A simple microforge for bending the tips of patch pipettes. **381**, 8*P*, 1986
Inositol 1,4,5-triphosphate and GTP-γ-S induce calcium transients in isolated rat peritoneal mast cells. **381**, 71*P*, 1986
Voltage-activated currents in freshly dispersed granule cells from neonatal rat cerebellum. **381**, 114*P*, 1986
A simple method of obtaining rapid solution changes which requires only very small quantities of solutions for use in recording from excised membrane patches. **382**, 23*P*, 1987
Characterization of two types of calcium channels in mouse neuroblastoma cells. **383**, 231, 1987
Slow sodium channel inactivation in rat fast-twitch muscle. **383**, 327, 1987
Comparison between slow sodium channel inactivation in rat slow- and fast-twitch muscle. **383**, 339, 1987
The receptor-regulated calcium influx in mouse submandibular acinar cells is sodium dependent: a patch-clamp study. **384**, 119, 1987
Sodium current kinetics in cat atrial myocytes. **384**, 169, 1987
Voltage-dependent conductances of solitary ganglion cells dissociated from the rat retina. **385**, 361, 1987
Two distinct calcium-activated potassium currents in a rat anterior pituitary cell line. **385**, 591, 1987
Sodium currents in axon-associated Schwann cells from adult rabbits. **386**, 181, 1987
The action of excitatory amino acids on chick spinal cord neurones in culture. **386**, 425, 1987
On the electrical properties of a human neuroblastoma cell-line (IMR-32). **386**, 111*P*, 1987
Conductance and kinetics of delayed rectifier potassium channels in nodal cells of the rabbit heart. **387**, 227, 1987
Gating properties of the mechano-electrical transducer channel in the dissociated vestibular hair cell of the chick. **387**, 589, 1987
Electropermeabilization of single cells under patch clamp. **390**, 14*P*, 1987
A patch-clamp study of mammalian platelets and their voltage-gated potassium current. **391**, 467, 1987
An inexpensive head stage for the 'patch-clamp' apparatus. **391**, 11*P*, 1987
A high-threshold non-inactivating calcium current in isolated rat melanotrophs *in vitro*. **391**, 74*P*, 1987

Patch clamp (*cont.*)
Patch-clamp analysis of the intrinsic membrane properties of adult rat melanotrophs maintained *in vitro*. **391**, 80*P*, 1987
Sodium and potassium currents involved in action potential propagation in normal bovine lactotrophs. **392**, 273, 1987
Burst kinetics of sodium channels which lack fast inactivation in mouse neuroblastoma cells. **392**, 563, 1987
Calcium current activation kinetics in isolated pyramidal neurones of the CA1 region of the mature guinea-pig hippocampus. **392**, 603, 1987

Penile erection
Autonomic control of penile erection in the dog. **384**, 525, 1987

Pentagastrin
Activation of enteric nerve pathways in the guinea-pig duodenum by cholecystokinin octapeptide and pentagastrin. **364**, 31, 1985
Release of 5-hydroxytryptamine by pentagastrin and its role in the 'fade' of stimulated gastric secretion in cats. **383**, 499, 1987

Pentobarbitone
Kinetic properties of the pentobarbitone-gated chloride current in frog sensory neurones. **394**, 85, 1987

Peptide
Canine bombesin-like gastrin releasing peptides stimulate gastrin release and acid secretion in the dog. **365**, 121, 1985
An evaluation of the role of CCK and VIP in the cat visual cortex. **365**, 42*P*, 1985
Muscarinic and peptidergic excitation of bull-frog sympathetic neurones. **366**, 63, 1985
Homeostatic regulation of transcriptional process in mouse leukaemia cells by small chromatin peptides: molecular and cellular aspects. **369**, 148*P*, 1985
Neuropeptide Y (NPY) causes excitation of granule cells of the rat dentate gyrus *in vitro*. **372**, 83*P*, 1986
Peptidergic modulation of the membrane potential of the Schwann cell of the squid giant nerve fibre. **379**, 61, 1986
Modulation of potassium conductances by an endogenous neuropeptide in neurones of *Aplysia californica*. **382**, 267, 1987
Transduction of aminergic and peptidergic signals in enteric neurones of the guinea-pig. **387**, 371, 1987
Suppression of calcium current by an endogenous neuropeptide in neurones of *Aplysia californica*. **388**, 35, 1987

Perchlorate anion
Perchlorate and the relationship between charge movement and contractile activation in frog skeletal muscle fibres. **390**, 213, 1987

Perfusion
A precision microperfusion apparatus. **369**, 4*P*, 1985
Intracellular factors for the maintenance of calcium currents in perfused neurones from the snail, *Lymnaea stagnalis*. **370**, 631, 1986
An enzymatic mechanism for calcium current inactivation in dialysed *Helix* neurones. **378**, 31, 1986
A system for producing pulsatile and pulse-less vascular perfusion of an organ. **382**, 13*P*, 1987
Contribution of chloride shifts to the fade of γ-aminobutyric acid-gated currents in frog dorsal root ganglion cells. **391**, 219, 1987

Peripheral nerve
Soma – sensory receptor relationships in rat dorsal root ganglion (DRG) neurones. **380**, 15*P*, 1986

Peristalsis
A Trendelenburg apparatus; using volume transducers to measure orally and aborally expelled intestinal contents during the peristaltic reflex in the rat. **378**, 8*P*, 1986
Factors influencing the volume expelled from isolated segments of rat small intestine during the peristaltic reflex. **378**, 15*P*, 1986
Intrinsic reflexes underlying peristalsis in the small intestine of the domestic fowl. **380**, 311, 1986

Permeability
Kinetic properties and selectivity of calcium-permeable single channels in *Aplysia* neurones. **367**, 457, 1985
Dinitrophenol effect on proximal tubular acidification in the rat. **368**, 89, 1985
The effect of high-molecular-weight polymers on fluid flux through the wall of the rabbit common carotid artery. **374**, 21*P*, 1986
The apparent reflexion coefficient of the leaky corneal endothelium to sodium chloride is about one in the rabbit. **385**, 97, 1987
Steady-state fluid filtration at different capillary pressures in perfused frog mesenteric capillaries. **388**, 421, 1987

Pertussis toxin
Pertussis toxin abolishes somatostatin-induced enhancement of inward rectification in brain neurones. **394**, 47*P*, 1987

pH, ***see also*** Hydrogen ion, Intracellular pH
Differential effects of carbon dioxide and pH on central chemoreceptors in the rat *in vitro*. **368**, 679, 1985
An investigation of chloride–bicarbonate exchange in the sheep cardiac Purkinje fibre. **379**, 377, 1986
The role of the sarcoplasmic reticulum in the response of ferret and rat heart muscle to acidosis. **384**, 431, 1987
Factors affecting the microclimate pH in rat jejunum. **392**, 113, 1987
A phosphorus nuclear magnetic resonance study of metabolites and intracellular pH in rabbit vascular smooth muscle. **393**, 57, 1987

Phenylalanine
The effect of intraluminal tryptophan and phenylalanine on small intestinal motility in the conscious dog. **367**, 353, 1985

Phenylephrine
The effect of adrenergic, cholinergic and peptidergic salivary stimulants on gastric mucosal integrity in the rat. **380**, 329, 1986
Phosphate
Effects of phosphate on the contractile properties of fast and slow muscle fibres from an Antarctic fish. **368**, 491, 1985
The effects of inorganic phosphate and creatine phosphate on force production in skinned muscles from rat ventricle. **370**, 585, 1986
The role of inorganic phosphate in vascular dilatation. **373**, 55*P*, 1986
Inorganic phosphate regulates the contraction–relaxation cycle in skinned muscles of the rabbit mesenteric artery. **376**, 231, 1986
Phospholipase
The effects of pyrogens on phospholipase A_2 (PLA_2) activity in the rabbit. **391**, 95*P*, 1987
Phosphorylase
Phosphorylase activity in needle biopsy samples – factors influencing transformation in man. **390**, 249*P*, 1987
Photocurrent
Kinetics and components of the flash photocurrent of isolated retinal rods of the larval salamander, *Ambystoma tigrinum*. **394**, 529, 1987
Photoreceptor
Introduction of calcium buffers into rod photoreceptors of the salamander. **360**, 20*P*, 1985
Membrane current noise in toad retinal rods exposed to low external calcium. **361**, 205, 1985
Changes in sodium activity during light stimulation in photoreceptors, glia and extracellular space in drone retina. **362**, 415, 1985
Calcium ion, an intracellular messenger of light adaptation, also participates in excitation of *Limulus* photoreceptors. **364**, 381, 1985
Trapped calcium buffer alters the light-adaptation properties of rod photoreceptors from *Ambystoma tigrinum*. **365**, 37*P*, 1985
Patch-clamp recordings of the light-sensitive dark noise in retinal rods from the lizard and frog. **367**, 183, 1985
Adaptation in the input–output relation of the synapse made by the barnacle's photoreceptor. **368**, 179, 1985
Calcium content and calcium exchange in dark-adapted toad rods. **368**, 641, 1985
Rapid and delayed components in the response of salamander retinal rods to reduced external calcium. **369**, 34*P*, 1985
Electrical properties of the light-sensitive conductance of rods of the salamander *Ambystoma tigrinum*. **371**, 115, 1986
Light-dependence of mitochondrial activity and pupillary pigment migration in blowfly photoreceptors. **371**, 33*P*, 1986
Slow changes of the membrane potential and photoresponses of isolated frog retinal rods investigated by the whole-cell patch clamp technique. **371**, 34*P*, 1986
Modulation of ionic current by light in salamander rods. **371**, 37*P*, 1986
Sodium–calcium exchange in the outer segments of bovine rod photoreceptors. **373**, 25, 1986
An electrophysiological apparatus for recording from photoreceptors under normal room lighting conditions. **381**, 11*P*, 1986
Incorporation of hydrolysis-resistant analogues of GTP into rod photoreceptors isolated from the tiger salamander. **381**, 58*P*, 1986
Photopic spectral sensitivity of the cat. **382**, 537, 1987
Calcium in dark-adapted toad rods: evidence for pooling and cyclic-guanosine-3′-5′-monophosphate-dependent release. **389**, 361, 1987
Properties of ion channels closed by light and opened by guanosine 3′,5′-cyclic monophosphate in toad retinal rods. **389**, 691, 1987
Spectral sensitivity of cones of the monkey *Macaca fascicularis*. **390**, 145, 1987
Inhibition of the light-sensitive current in isolated salamander rods by L-*cis*-diltiazem. **390**, 159*P*, 1987
The effect of divalent cations on the light-sensitive current of isolated salamander rods. **390**, 160*P*, 1987
Continuous monitoring of blowfly photoreceptor sensitivity with a stimulation feed-back control system. **390**, 164*P*, 1987
Ionic permeability ratios of the cyclic GMP-activated conductance in the outer segment membrane of salamander rods. **394**, 17*P*, 1987
Phototransduction
The effects of phosphodiesterase inhibitors and lanthanum ions on the light-sensitive current of toad retinal rods. **370**, 91, 1986
Incorporation of calcium buffers into salamander retinal rods: a rejection of the calcium hypothesis of phototransduction. **372**, 315, 1986
Properties of ion channels closed by light and opened by guanosine 3′,5′-cyclic monophosphate in toad retinal rods. **389**, 691, 1987
Effect of G-protein inactivation of salamander rods. **390**, 161*P*, 1987
Measurement of sodium–calcium exchange in salamander rods. **391**, 347, 1987
The effect of ions on sodium–calcium exchange in salamander rods. **391**, 371, 1987
Phrenic nerve
Responses of phrenic motoneurones of the cat to stimulation of medullary raphe nuclei. **380**, 349, 1986
Serotoninergic and non-serotoninergic responses of phrenic motoneurones to raphe stimulation in the cat. **380**, 373, 1986
Spinal inhibition of phrenic motoneurones by stimulation of afferents from leg muscle in the cat: blockade by strychnine. **389**, 137, 1987
Pial artery
Contractile effects of perivascularly applied vasopressin on the pial artery of the cat brain. **387**, 441, 1987
Pinocytosis
Gradual and stepwise changes in the membrane capacitance of rat peritoneal mast cells. **386**, 205, 1987

Piretanide
Potassium uptake in the mouse submandibular gland is dependent on chloride and sodium and abolished by piretanide. **378**, 97, 1986

Pituitary gland
Responsiveness of the hypothalamo-pituitary-adrenocortical (HPA) axis in the rat after withdrawal of long-term prednisolone treatment. **362**, 41*P*, 1985
GABA-related anion channels, labelled by [^{35}S]t-butylbicyclophosphorothionate ([^{35}S]TBPS), in rat pituitary. **362**, 43*P*, 1985
Evidence for GABA receptors on rat somatotrophes and gonadotrophes. **365**, 51*P*, 1985
Further studies on recovery of the responsiveness of the pituitary gland after chronic prednisolone treatment in the rat. **372**, 63*P*, 1986
Voltage-dependent ionic currents in normal gonadotrophs of the ovine pars tuberalis. **376**, 26*P*, 1986
Secretory changes in parotid acini of cats on nerve stimulation. **376**, 29*P*, 1986
Autoradiographic measurement of regional pituitary blood flow in the conscious rat. **381**, 19*P*, 1986
Two distinct calcium-activated potassium currents in a rat anterior pituitary cell line. **385**, 591, 1987
Thyrotropin-releasing hormone stimulates a calcium-activated potassium current in a rat anterior pituitary cell line. **385**, 611, 1987
Sodium and potassium currents involved in action potential propagation in normal bovine lactotrophs. **392**, 273, 1987

Placenta
Measurement of net transplacental transfer of fluid to the fetal sheep. **364**, 289, 1985
Characterization of choline transport at maternal and fetal interfaces of the perfused guinea-pig placenta. **366**, 251, 1985
Evidence for carrier-mediated uptake of calcium and choline at maternal and fetal sides of the perfused human placenta. **367**, 60*P*, 1985
Bi-directional phosphate fluxes across the isolated dually perfused human placental lobule. **367**, 95*P*, 1985
Metabolic and cardiovascular effects on fetal sheep of sustained reduction of uterine blood flow. **368**, 109, 1985
Effect of molecular charge on guinea-pig placenta permeability: quantitative measurements using horseradish peroxidase (HRP). **369**, 155*P*, 1985
Sodium transfer across the *in vitro* pig placenta; effect of adrenaline. **369**, 156*P*, 1985
Transport of calcium by the placenta of the rat. **371**, 1, 1986
Sulphate transport by human placental microvillus brush border membrane vesicles. **371**, 167*P*, 1986
Storage of oxytocin and neurophysin in the secretory granules of ovine large luteal cells. **371**, 217*P*, 1986
Rapid uptake of adenosine at maternal and fetal sides of the perfused guinea-pig placenta: inhibition by dipyridamole. **371**, 231*P*, 1986
Effect of chloride replacement on the electrical activity of the pig placenta *in vitro*. **371**, 270*P*, 1986
Divalent anion inhibition of sulphate transport into membrane vesicles from human placenta. **373**, 71*P*, 1986
Human placental sulphate transport: studies on chorionic trophoblast brush border membrane vesicles. **377**, 15, 1986
Perfusion of the rat placenta *in situ*. **377**, 5*P*, 1986
Sodium transport across the microvillous membrane of human term placenta. **378**, 78*P*, 1986
The effect of a diphenylamine-2-carboxylate derivative on anion transport in human placental membrane vesicles. **378**, 79*P*, 1986
Stimulation by adrenaline of the *in vivo* maternofetal potential difference in the pig. **378**, 84*P*, 1986
Sulphate transport into vesicles prepared from human placental brush border membranes: inhibition by trace element oxides. **379**, 367, 1986
Calcium transport across the isolated dually perfused human placental lobule. **382**, 397, 1987
Network thermodynamics applied to simulate some properties of the perfused guinea-pig placenta using the electronic network simulation program SPICE. **386**, 16*P*, 1987
Uptake of alpha-2-macroglobulin and its trypsin complex by the isolated perfused human placenta. **386**, 18*P*, 1987
Control of glucose transport by insulin and prostaglandin in the isolated guinea-pig placenta. **386**, 20*P*, 1987
The role of maternal vitamin D status in maternofetal calcium exchange across the rat placenta. **386**, 22*P*, 1987
Effects of adrenergic agonists and a β-antagonist on the maternofetal potential difference (p.d.) fetal heart rate and fetal blood pressure (B.P.) in the unanaesthetized pig. **386**, 25*P*, 1987
Ultrastructural evidence for placental lactogen transport and secretion in ruminants. **386**, 26*P*, 1987
Growth of the rat placenta during normal and diabetic pregnancies. **386**, 28*P*, 1987
Release of proteins from the human placenta perfused *in vitro*. **386**, 94*P*, 1987
Characterization of lipoprotein receptor on microvillous membranes isolated from normal term human placenta. **386**, 95*P*, 1987
Potassium (tracer ^{86}Rb) transport across the microvillous membrane of human term placenta. **386**, 110*P*, 1987
Microvascular effects of histamine in the isolated dually perfused guinea-pig placenta. **387**, 70*P*, 1987
Pathways for chloride transport into human placental microvillus membrane vesicles. **390**, 101*P*, 1987
Selenate transport by human placental microvillus membrane vesicles. **390**, 102*P*, 1987

Placenta (*cont.*)
The uptake of proline and alanine into vesicles isolated from the maternal surface of human placenta. **392**, 115*P*, 1987
Inhibition of adenosine metabolism by 2′-deoxycoformycin and characterization of an adenosine carrier in the perfused guinea-pig placenta. **394**, 89*P*, 1987
Incomplete perfusion of the *in vitro* isolated human placental lobule. **394**, 168*P*, 1987
Experimentally produced placental compromise: microsphere embolization of fetal placental vessels in the lamb resulting in fetal hypoxaemia. **394**, 170*P*, 1987

Plasma
The effect of anthelmintic treatment on gastrointestinal loss of plasma proteins in sheep infected with *Haemonchus contortus*. **371**, 209*P*, 1986
Plasma expansion does not precipitate the fall in plasma vasopressin in humans drinking isotonic fluids. **376**, 429, 1986

Plasma protein
Binding of [^{51}Cr]ethylenediaminetetraacetate to proteins of human plasma. **374**, 117, 1986

Plasticity
Neurophysiology and pharmacology of long-term potentiation in the rat sympathetic ganglion. **359**, 503, 1985
Heterosynaptic changes accompany long-term but not short-term potentiation of the perforant path in the anaesthetized rat. **363**, 335, 1985
Permanent changes of motor reflexes induced by postnatal nerve injury in the rat. **378**, 40*P*, 1986
Chronic block of the cervical trunk increases synaptic efficacy in the superior and stellate ganglia of the guinea-pig. **382**, 449, 1987
Synaptic modification of parallel fibre–Purkinje cell transmission in *in vitro* guinea-pig cerebellar slices. **394**, 463, 1987

Platelet
Cortical spreading depression and platelet function in anaesthetized rabbits. **358**, 49*P*, 1985
cAMP inhibits non-competitively in the cGMP-dependent secretory response from permeabilized platelets. **358**, 65*P*, 1985
Platelet aggregation may require functional calcium channels. **358**, 68*P*, 1985
Velocity profiles of blood platelets flowing in arterioles of the rabbit mesentery. **366**, 47*P*, 1985
Responses to adenosine diphosphate in human platelets loaded with the fluorescent calcium indicator quin2. **368**, 131, 1985
Role of blood platelets in cerebral haemorrhagic arteriopathy in the cat. **371**, 80*P*, 1986
Chloride channels in highly purified human platelet surface membranes. **373**, 86*P*, 1986
Effect of solute concentration on intracellular water volume and hydraulic conductivity of human blood platelets. **374**, 375, 1986
Effects of ionic substitution on human platelet responses to thrombin. **377**, 124*P*, 1986
Effects of bubbles on human platelets *in vitro*. **380**, 31*P*, 1986
Effect of an additional 5 atm nitrogen partial pressure on human platelet aggregation *in vitro*. **388**, 37*P*, 1987
Increased platelet aggregability in humans during mental stress and adrenaline infusions as determined by *in vivo* filtragometry. **390**, 109*P*, 1987
Agonist effects on cytosolic free [Ca^{2+}] and inositol phosphates in fura-2 loaded rat parotid acinar cells. **390**, 141*P*, 1987
^{45}Ca extrusion from fura2-loaded human platelets: no evidence for Na:Ca exchange. **390**, 142*P*, 1987
A patch-clamp study of mammalian platelets and their voltage-gated potassium current. **391**, 467, 1987
Does cyclic-3′,5′-AMP (cAMP) inhibit GTP sensitive Ca^{2+}-dependent serotonin secretion from human platelets by increasing a GTPase? **392**, 29*P*, 1987
Stimulated calcium efflux from fura-2-loaded human platelets. **393**, 513, 1987

Plethysmography
Air plethysmography in the assessment of the calf muscle pump in man. **374**, 11*P*, 1986

Polyinnervation
Increase in polyneuronal innervation in frog muscle after muscle injury. **371**, 167, 1986

Pons
Lesions in the upper lateral pons abolish the hypoxic depression of breathing in unanaesthetized fetal lambs *in utero*. **382**, 373, 1987

Postsynaptic potential
Blockade of slow excitatory post-synaptic potential by substance P antagonists in guinea-pig sympathetic ganglia. **361**, 115, 1985
Synchronous afferent discharge from a passive muscle of the cat: significance for interpreting spike-triggered averages. **365**, 77, 1985
Characterization of miniature inhibitory post-synaptic potentials in rat spinal motoneurones. **368**, 627, 1985
A magnesium-sensitive post-synaptic potential in rat cerebral cortex resembles neuronal responses to *N*-methylaspartate. **370**, 531, 1986
Red nucleus inputs to retractor bulbi motoneurones in the cat. **371**, 317, 1986
Organization of synaptic transmission in the mammalian solitary complex, studied *in vitro*. **381**, 551, 1986
On the excitatory post-synaptic potential evoked by stimulation of the optic tract in the rat lateral geniculate nucleus. **384**, 603, 1987
Intracellular recordings from myenteric neurones in the human colon. **390**, 305, 1987

Post-tetanic potentiation
Field potential reversal-point movement after afferent tetanization in the rat dentate gyrus. **358**, 46*P*, 1985
Calcium levels measured in a presynaptic neurone of *Aplysia* under conditions that modulate transmitter release. **375**, 625, 1986

Post-tetanic potentiation (*cont.*)
Stimulus frequency and post-tetanic potentiation in the detection of neuromuscular transmission in rat isolated diaphragm preparation partially blocked by atracurium. **381**, 102*P*, 1986
Posture
Cardiovascular responses to postural stress in patients with chronic renal failure. **371**, 72*P*, 1986
Immediate ventilatory response to sudden changes in venous return in humans. **380**, 45, 1986
Postural vasoconstriction in the human foot during the menstrual cycle. **382**, 44*P*, 1987
Effect of local nervous blockade on postural vasoconstriction in man. **386**, 47*P*, 1987
Reactive hyperaemia during postural vasoconstriction in man. **390**, 122*P*, 1987
Interlimb coordination of posture in man. **390**, 135*P*, 1987
Potassium
Calcium-activated potassium channels in rat muscle inactivate from a short-duration open state. **363**, 501, 1985
Acetylcholine-evoked potassium release in the mouse pancreas. **365**, 319, 1985
Potassium and ionic strength effects on the isometric force of skinned twitch muscle fibres of the rat and toad. **370**, 317, 1986
The reaction of ouabain with the sodium pump of guinea-pig myocardium in relation to its inotropic effect. **379**, 187, 1986
Effects of high potassium on the release of [^{3}H]dopamine from the cat carotid body *in vitro*. **379**, 293, 1986
The effect of potassium on carotid body chemoreceptor discharge in the anaesthetized cat. **381**, 39, 1986
Electrophysiological properties of ependymal cells (radial glia) in dorsal cortex of the turtle, *Pseudemys scripta*. **385**, 287, 1987
Slow depolarizing potentials recorded from glial cells in the rat superficial dorsal horn. **388**, 597, 1987
Bumetanide inhibition of ouabain-insensitive ^{86}Rb(K) transport in a cultured human colonic adenocarcinoma cell-line (HT29 cl. 19A). **391**, 100*P*, 1987
Extracellular potassium changes in the rat neurohypophysis during activation of the magnocellular neurosecretory system. **392**, 97, 1987
Potassium activity
Triggered activity in atrial fibres of canine coronary sinus: role of extracellular potassium accumulation and depletion. **383**, 191, 1987
Potassium channel
A voltage-gated potassium channel in human T lymphocytes. **358**, 197, 1985
Potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 419, 1985
Calcium-activated potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 441, 1985
A high conductance K^+ channel in rabbit cultured fibroblasts. **361**, 19*P*, 1985
Properties of adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 441, 1985
Membrane current through adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 463, 1985
Properties of single potassium channels in vesicles formed from the sarcolemma of frog skeletal muscle. **364**, 339, 1985
Voltage-dependent activation of the inward-rectifier potassium channel in the ventricular cell membrane of guinea-pig heart. **366**, 365, 1985
Membrane voltage, resistance, and channel switching in isolated mouse fibroblasts (L cells): a patch-electrode analysis. **367**, 267, 1985
Three distinct potassium channels in cultured rat pancreatic islet cells. **369**, 100*P*, 1985
The glucose-sensitive potassium channel in rat pancreatic beta-cells is inhibited by intracellular ATP. **369**, 101*P*, 1985
Calcium-activated potassium channels in single smooth muscle cells of rabbit jejunum and guinea-pig mesenteric artery. **371**, 45, 1986
The effect of potassium channel blockers on the responses to substance P and other spasmogens in longitudinal smooth muscle from the guinea-pig ileum. **371**, 260*P*, 1986
Calcium-activated potassium channels in canine airway smooth muscle. **372**, 113, 1986
High-affinity voltage-dependent block of the K^+-channel from rabbit cardiac sarcoplasmic reticulum (SR) by gallamine. **372**, 56*P*, 1986
Catechol: a potent and specific inhibitor of the fast potassium channel in frog primary afferent neurones. **373**, 115, 1986
A patch-clamp study of potassium currents in resting and acetylcholine-stimulated mouse submandibular acinar cells. **373**, 379, 1986
The effect of nucleotides on the adenosine triphosphate-regulated potassium channel in frog skeletal muscle. **373**, 63*P*, 1986
Rubidium acts as a permeant blocker of the glucose and ATP-sensitive K-channel in rat pancreatic beta-cells. **377**, 38*P*, 1986
Characteristics of a K^+ current of cells derived from a human T-cell lymphoma. **378**, 59*P*, 1986
Single potassium channels of adult locust (*Schistocerca gregaria*) muscle recorded using the gigaohm seal patch-clamp technique. **378**, 60*P*, 1986
Two ATP-sensitive K^+ channels in an insulin-secreting cell-line are inhibited by D-glyceraldehyde and activated by cell permeabilization. **378**, 61*P*, 1986
Rubidium permeability of ATP-dependent potassium channels of frog skeletal muscle. **378**, 105*P*, 1986
The involvement of basolateral potassium channels in the intestinal response to secretagogues in the rat. **379**, 331, 1986
Properties of potassium and sodium channels in frog internode. **381**, 119, 1986

Potassium channel (*cont.*)
Lidocaine blockage of basolateral potassium channels in the amphibian urinary bladder. **381**, 575, 1986
GTP and ADP activate ATP-inhibited K^+ channels in the insulin-secreting cell line RINm5F. **381**, 67*P*, 1986
Ion activities and potassium uptake mechanisms of glial cells in guinea-pig olfactory cortex slices. **382**, 159, 1987
Studies of the unitary properties of adenosine-5′-triphosphate-regulated potassium channels of frog skeletal muscle. **382**, 213, 1987
Voltage-activation of high-conductance K^+ channel is dependent on local extracellular Ca^{2+} concentration in the RINm5S cell line. **382**, 127*P*, 1987
Permeation and block of the inwardly rectifying K channel in isolated guinea-pig ventricular myocytes by divalent and monovalent ions. **382**, 128*P*, 1987
Evidence for two open states of different conductance in delayed rectifier potassium channels of mouse neuroblastoma. **382**, 191*P*, 1987
Function and distribution of three types of rectifying channel in rat spinal root myelinated axons. **383**, 45, 1987
Effects of 2-ketoisocaproate on insulin release and single potassium channel activity in dispersed rat pancreatic β-cells. **385**, 517, 1987
The actions of presynaptic snake toxins on membrane currents of mouse motor nerve terminals. **386**, 455, 1987
Apical K^+ channels of diluting segment of *Amphiuma* kidney: a channel made of four subconductive units. **386**, 34*P*, 1987
Conductance and kinetics of delayed rectifier potassium channels in nodal cells of the rabbit heart. **387**, 227, 1987
Voltage-dependent magnesium block of adenosine-triphosphate-sensitive potassium channel in guinea-pig ventricular cells. **387**, 251, 1987
Selectivity and patch measurements of A-current channels in *Helix aspersa* neurones. **388**, 437, 1987
Single calcium-activated potassium channels recorded from cultured rat sympathetic neurones. **389**, 337, 1987
Effects of internal Mg^{2+} on ATP-sensitive K-channels in isolated rat pancreatic B-cells. **390**, 72*P*, 1987
Phorbol ester and cell-permeable diacylglycerol evoke closure of ATP-sensitive K^+ channels in a cultured insulin-secreting cell-line. **390**, 73*P*, 1987
Single K^+ channel activity recorded from leech neurones in culture. **390**, 76*P*, 1987
K channels in NG108-15 rodent neuroblastoma × glioma cells evoked by intracellular injections of inositol-1,4,5-triphosphate (IP_3). **390**, 217*P*, 1987
Cs^+ produced a flickery block of ATP-sensitive potassium channels of frog skeletal muscle. **390**, 218*P*, 1987
The fast block by external tetraethylammonium ions of the delayed rectifier potassium channel of frog skeletal muscle. **390**, 219*P*, 1987
Effects of tetraethylammonium ions on ATP-regulated potassium channels of frog skeletal muscle. **390**, 220*P*, 1987
The K^+ and Cl^- channel protein from Ehrlich ascites tumour cells under reducing and oxidizing conditions. **390**, 223*P*, 1987
A patch-clamp study of mammalian platelets and their voltage-gated potassium current. **391**, 467, 1987
The effects of magnesium upon adenosine triphosphate-sensitive potassium channels in a rat insulin-secreting cell line. **391**, 611, 1987
Sodium and potassium currents in acutely demyelinated internodes of rabbit sciatic nerves. **391**, 631, 1987
The action of external tetraethylammonium ions on unitary delayed rectifier potassium channels of frog skeletal muscle. **393**, 467, 1987

Potassium conductance
Fertilization-induced ionic conductances in eggs of the frog, *Rana pipiens*. **358**, 299, 1985
Effects of apamin, quinine and neuromuscular blockers on calcium-activated potassium channels in guinea-pig hepatocytes. **358**, 373, 1985
Noradrenaline hyperpolarization and depolarization in cat vesical parasympathetic neurones. **361**, 165, 1985
The slow calcium-dependent potassium current in a myenteric neurone of the guinea-pig ileum. **361**, 315, 1985
On the potassium conductance increased by opioids in rat locus coeruleus neurones. **364**, 265, 1985
Cholinergic agonists suppress a potassium current in freshly dissociated smooth muscle cells of the toad. **367**, 503, 1985
Synaptic block of a transmitter-induced potassium conductance in *Aplysia* neurones. **369**, 399, 1985
Synaptic block of a calcium-activated potassium conductance in *Aplysia* neurones. **369**, 439, 1985
Differential expression of inward and outward potassium currents in the macrophage-like cell line J774.1. **369**, 475, 1985
Desensitization of the acetylcholine-induced increase of potassium conductance in rabbit cardiac Purkinje fibres. **371**, 239, 1986
Volume-induced changes in membrane potential in the stripped epithelium of the frog skin (*Rana ridibunda*). **371**, 150*P*, 1986
Voltage-gated potassium conductance in human T lymphocytes stimulated with phorbol ester. **372**, 405, 1986
γ-Aminobutyric acid hyperpolarizes rat hippocampal pyramidal cells through a calcium-dependent potassium conductance. **373**, 181, 1986
The effect of a transient outward current (I_A) on synaptic potentials in sympathetic ganglion cells of the guinea-pig. **374**, 273, 1986
Vasoactive intestinal polypeptide depolarizations in cat bladder parasympathetic ganglia. **374**, 457, 1986

Potassium conductance (*cont.*)
The effects of rubidium ions on components of the potassium conductance in the frog node of Ranvier. **375**, 81, 1986
Persistent calcium-sensitive potassium current and the resting properties of guinea-pig myenteric neurones. **386**, 333, 1987
Somatostatin increases an inwardly rectifying potassium conductance in guinea-pig submucous plexus neurones. **390**, 335, 1987
A non-adrenergic, non-cholinergic slow inhibitory post-synaptic potential in neurones of the guinea-pig submucous plexus. **390**, 357, 1987
Dopamine acts on D_2 receptors to increase potassium conductance in neurones of the rat substantia nigra zona compacta. **392**, 397, 1987
The effect of noradrenaline on the ion permeability of isolated mammalian hepatocytes, studied by intracellular recording. **392**, 493, 1987
Pharmacologically distinct actions of serotonin on single pyramidal neurones of the rat hippocampus recorded *in vitro*. **394**, 99, 1987

Potassium contracture
Excitation–contraction coupling and charge movement in denervated rat extensor digitorum longus and soleus muscles. **358**, 75, 1985
Contractile activation in myotomes from developing larvae of *Xenopus laevis*. **375**, 391, 1986
Effects of external calcium on potassium contractures in tonic muscle fibres of the frog (*Rana pipiens*). **376**, 219, 1986

Potassium current
A fast transient outward current in the rat sympathetic neurone studied under voltage-clamp conditions. **358**, 91, 1985
Identification of delayed potassium and calcium currents in the rat sympathetic neurone under voltage clamp. **358**, 109, 1985
Effects of L-glutamate on the anomalous rectifier potassium current in horizontal cells of *Carassius auratus* retina. **358**, 169, 1985
The calcium current in a myenteric neurone of the guinea-pig ileum. **361**, 297, 1985
The slow calcium-dependent potassium current in a myenteric neurone of the guinea-pig ileum. **361**, 315, 1985
A slow, muscarine-sensitive Ca-dependent K current in guinea-pig olfactory cortex neurones *in vitro*. **365**, 47*P*, 1985
Muscarinic and peptidergic excitation of bull-frog sympathetic neurones. **366**, 63, 1985
Adenosine actions on CA1 pyramidal neurones in rat hippocampal slices. **366**, 119, 1985
Voltage-dependent potassium currents in developing neurones from quail mesencephalic neural crest. **366**, 129, 1985
A transient outward current in isolated cells from the crista terminalis of rabbit heart. **368**, 243, 1985
Voltage clamp of bull-frog cardiac pace-maker cells: a quantitative analysis of potassium currents. **368**, 265, 1985
Ionic conductances in frog short skeletal muscle fibres with slow delayed rectifier currents. **368**, 359, 1985
Biochemical separation of delayed rectifier currents in frog short skeletal muscle fibres. **368**, 379, 1985
Single-channel analysis of fast transient potassium currents from rat nodose neurones. **369**, 199, 1985
Effects of thallium on membrane currents at diastolic potentials in canine cardiac Purkinje strands. **370**, 285, 1986
Characteristics of phasic and tonic sympathetic ganglion cells of the guinea-pig. **372**, 457, 1986
Development of voltage-activated currents in rat superior cervical ganglion cells in culture. **372**, 50*P*, 1986
The actions of some general anaesthetics on the potassium current of the squid giant axon. **373**, 311, 1986
Calcium and delayed potassium currents in mouse pancreatic β-cells under voltage-clamp conditions. **374**, 531, 1986
Differentiation of voltage-gated potassium current and modulation of excitability in cultured amphibian spinal neurones. **375**, 229, 1986
Membrane currents of internally perfused neurones of the snail, *Lymnaea stagnalis*, at low intracellular pH. **376**, 477, 1986
Nifedipine and bepridil block potassium currents in isolated bovine chromaffin cells. **380**, 76*P*, 1986
Modulation of potassium conductances by an endogenous neuropeptide in neurones of *Aplysia californica*. **382**, 267, 1987
Transient outward currents and changes of their gating properties after cell activation in thrombocytes of the newt. **385**, 189, 1987
Two distinct calcium-activated potassium currents in a rat anterior pituitary cell line. **385**, 591, 1987
Thyrotropin-releasing hormone stimulates a calcium-activated potassium current in a rat anterior pituitary cell line. **385**, 611, 1987
Potassium currents evoked by brief depolarizations in bull-frog sympathetic ganglion cells. **387**, 519, 1987
Selectivity and patch measurements of A-current channels in *Helix aspersa* neurones. **388**, 437, 1987
Comparison of effects of acetylcholine on calcium and potassium currents in frog atrium and ventricle. **389**, 411, 1987
The effects of tetraethylammonium ions, 4-aminopyridine, quinidine or quinine on K^+-currents in single smooth-muscle cells from the rabbit portal vein. **390**, 88*P*, 1987
K-currents in unmyelinated afferent axons of guinea-pig olfactory cortex revealed by extracellular polarization. **390**, 196*P*, 1987
Pharmacological and physiological properties of the after-hyperpolarization current of bullfrog ganglion neurones. **394**, 315, 1987

Potassium flux
Stimulation of trans-membrane diuretic-sensitive ^{86}Rb(K)fluxes in cultured kidney cells in hyperosmotic media: the role of intracellular cAMP and Ca. **358**, 69*P*, 1985
Calcium regulation of potassium fluxes in rabbit aorta during activation by noradrenaline or high potassium medium. **367**, 27, 1985
K^+ release and uptake by muscle in the anaesthetized cat: effect of propranolol. **372**, 77*P*, 1986
BRL 34915-induced stimulation of ^{86}Rb efflux in rabbit aorta and its dependence on calcium. **374**, 36*P*, 1986

Potassium homeostasis
Plasma and cerebrospinal fluid potassium concentration in developing rats during chronic maternal hyperkalaemia. **377**, 74*P*, 1986
The control of potassium concentration in the cerebrospinal fluid and brain interstitial fluid of developing rats. **383**, 441, 1987
Myocardial potassium uptake and cardiac catecholamine release during sympathetic nerve stimulation in the pig. **390**, 116*P*, 1987

Potassium permeability
Potassium movements associated with amino acid and sugar transport in enterocytes isolated from rabbit jejunum. **363**, 271, 1985
Dependence on calcium of potassium- and agonist-induced changes in potassium permeability of rabbit ear artery. **364**, 151, 1985
Potassium transport of the frog retinal pigment epithelium: autoregulation of potassium activity in the subretinal space. **375**, 461, 1986
Effect of channel blockers on potassium efflux from metabolically exhausted frog skeletal muscle. **383**, 31, 1987
Effects of cell volume changes on membrane ionic permeabilities and sodium transport in frog skin (*Rana ridibunda*). **393**, 1, 1987

Potassium transport
Paradoxical effect of oligomycin on Ca-dependent ^{86}Rb transport in human red cell ghosts. **369**, 113*P*, 1985
L antigen and active potassium transport in HK and LK red cells of Barbary sheep. **371**, 219*P*, 1986
Potassium uptake in the mouse submandibular gland is dependent on chloride and sodium and abolished by piretanide. **378**, 97, 1986
The effects of calcium on potassium transport in ferret red cells. **386**, 407, 1987
A membrane protein with a K^+ and a Cl^- channel. **387**, 33*P*, 1987
The base-line current in patch-clamp experiments is due to a membrane protein. **387**, 34*P*, 1987

Potentiation
A magnesium-sensitive post-synaptic potential in rat cerebral cortex resembles neuronal responses to *N*-methylaspartate. **370**, 531, 1986

Potentiometric dye
Inward rectification in the transverse tubular system of frog skeletal muscle studied with potentiometric dyes. **359**, 269, 1985

Power output
The effects of exercise on maximal instantaneous anaerobic power in man. **378**, 66*P*, 1986

Pregnancy
Arterial pressure maintenance after haemorrhage in the pregnant rabbit. **366**, 17, 1985
The effect of pregnancy on the changes in hind-limb vascular resistance following haemorrhage in the rabbit. **372**, 63, 1986
Diamine oxidase in plasma during late human pregnancy and in relation to duration of labour. **378**, 89*P*, 1986
Lactate–glucose interrelationships in the pregnant ewe and conceptus. **386**, 19*P*, 1987
Serum leucine aminopeptidase levels in late human pregnancy. **386**, 77*P*, 1987
Renal fluid handling and plasma atrial natriuretic peptide in human pregnancy. **387**, 90*P*, 1987
Renal haemodynamics during pregnancy in the conscious rat. **391**, 107*P*, 1987
Relation between elevated serum 5-nucleotidase in late human pregnancy and duration of labour. **392**, 53*P*, 1987
The nutritional regulation of plasma prostaglandin E concentrations in the fetus and pregnant ewe during late gestation. **394**, 1, 1987

Preoptic area
Activity of preoptic neurones in conscious rabbits. **364**, 49*P*, 1985

Prepositus hypoglossi nucleus
Lesions in the cat prepositus complex: effects on the vestibulo-ocular reflex and saccades. **372**, 75, 1986
Lesions in the cat prepositus complex: effects on the optokinetic system. **372**, 95, 1986

Pressure, *see also* High pressure
The effect of high hydrostatic pressure on membrane ion transport in the erythrocyte of the plaice, *Pleuronectes platessa*. **362**, 14*P*, 1985
The effects of anaesthetics and high pressure on the responses of the rat superior cervical ganglion *in vitro*. **374**, 387, 1986
Peripheral lymphatic responses to outflow pressure in anaesthetized sheep. **383**, 527, 1987
The tolerance of shallow- and deep-sea fish to hydrostatic pressure; final preliminary report of *Challenger* cruise 6B/85. **384**, 37*P*, 1987

Presynaptic inhibition
Clonidine inhibits catecholamine release from bovine adrenal medullary cells but apparently not via α_2-adrenoceptors. **358**, 87*P*, 1985
Muscarinic slow excitation and muscarinic inhibition of synaptic transmission in the rat neostriatum. **380**, 593, 1986
Presynaptic inhibition of synaptic potentials evoked in cat spinal motoneurones by impulses in single group Ia axons. **383**, 153, 1987
Inhibition of monosynaptic reflexes in the human lower limb. **385**, 69, 1987
Assessing changes in presynaptic inhibition of Ia fibres: a study in man and the cat. **389**, 729, 1987
Changes in presynaptic inhibition of Ia fibres at the onset of voluntary contraction in man. **389**, 757, 1987

Presynaptic inhibition (*cont.*)
Positive and negative feed-back modulation of Ca_o-dependent release of acetylcholine from mouse hemidiaphragm preparation. **390**, 176*P*, 1987
Evidence favouring presynaptic inhibition between antagonist muscle afferents in the human forearm. **391**, 71, 1987
Cutaneous effects on presynaptic inhibition of flexor Ia afferents in the human forearm. **394**, 160*P*, 1987
Presynaptic nerve terminal
Potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 419, 1985
Calcium-activated potassium channels in isolated presynaptic nerve terminals from rat brain. **361**, 441, 1985
Presynaptic receptor
The role of presynaptic receptors in neuronal plasticity in the rat. **371**, 60*P*, 1986
Effects of drugs on field stimulation-induced ^{3}H-noradrenaline overflow and responses of rat isolated atria. **386**, 53*P*, 1987
Pretectum
Anterior pretectal stimulation alters the responses of spinal dorsal horn neurones to cutaneous stimulation in the rat. **385**, 415, 1987
Primary afferent depolarization
Phase-dependent central modulation of proprioceptive input to crayfish walking-leg motoneurones. **364**, 26*P*, 1985
Origin of primary afferent depolarization of group II muscle afferent fibres in the cat spinal cord. **390**, 43*P*, 1987
Primary afferent fibre
Cutaneous afferent properties in the neonatal rat. **377**, 47*P*, 1986
Progesterone
A rapid enzyme-amplified immunoassay for progesterone in bovine milk using a monoclonal antibody. **371**, 2*P*, 1986
Prolactin
Techniques for recording electrical activity of normal bovine pituitary lactotrophs. **371**, 6*P*, 1986
Is hormone secretion independent of Na^+ action potentials in bovine lactotrophs? **371**, 185*P*, 1986
Activation and inactivation of sodium and calcium currents in bovine lactotrophs. **371**, 267*P*, 1986
Prolactin (PRL) and corticosterone (CORT) responses to footshock in sick and healthy rats. **371**, 276*P*, 1986
Electrophysiological responses to dopamine of rat hypophysial cells in lactotroph-enriched primary cultures. **390**, 1, 1987
Altered renal function in chronically hyperprolactinaemic rats. **394**, 13, 1987
A comparison between right and left kidney function in rats with unilateral renal anterior pituitary implants. **394**, 64*P*, 1987
Propranolol
The role of the sympathetic system in the control of insulin release in response to hyperglycaemia in conscious calves. **362**, 311, 1985
Proprioception
Disturbance of proprioception at the human knee resulting from acute joint distension. **392**, 60*P*, 1987
Prostaglandin
Pulmonary metabolism of prostaglandin $F_{2\alpha}$ in the conscious non-pregnant cow. **358**, 107*P*, 1985
Central stimulation of breathing movements in fetal lambs by prostaglandin synthetase inhibitors. **362**, 455, 1985
Two calcium-sensitive spike after-hyperpolarizations in visceral sensory neurones of the rabbit. **365**, 59, 1985
Differential changes of prostacyclin and thromboxane A_2 synthesis in the gastrointestinal tract of the fasted and semi-starved rat. **376**, 16*P*, 1986
Effect of 16,16-dimethyl prostaglandin E_2 on the myoelectric activity of the gastrointestinal tract of the opossum. **377**, 421, 1986
Renal vasoconstrictor response to hypertonic saline in the dog: effects of prostaglandins, indomethacin and theophylline. **380**, 35, 1986
Contraction of human umbilical artery, but not vein, by oxygen. **380**, 513, 1986
Bradykinin induced 13,14-dihydro-15-oxo-prostaglandin $F_{2\alpha}$ production in man. **381**, 106*P*, 1986
Microinjection of [^{3}H]PGE_2 into surface nephrons of the anaesthetized rat. **386**, 39*P*, 1987
The secretory actions of histamine in rat small intestine. **388**, 521, 1987
Renal degradation and distribution between urinary and venous output of prostaglandins E_2 and I_2 in the dog. **390**, 108*P*, 1987
Inhibition of calcium-dependent spike after-hyperpolarization increases excitability of rabbit visceral sensory neurones. **394**, 415, 1987
Prostaglandin E
PGE excretion in alkaline urine: effect of urine flow and frusemide in the rat. **371**, 98*P*, 1986
Prostaglandin E_2 and $F_{2\alpha}$ excretion in acidic and alkaline urine in the rat. **371**, 99*P*, 1986
Effect of urinary pH and urine flow rate on prostaglandin E_2 and kallikrein excretion by the conscious dog. **383**, 1, 1987
The nutritional regulation of plasma prostaglandin E concentrations in the fetus and pregnant ewe during late gestation. **394**, 1, 1987
Investigation of the mechanism of inhibition by prostaglandin E_1 of electrically evoked transmitter release from sympathetic nerves of the guinea-pig vas deferens *in vitro*. **394**, 11*P*, 1987
Prosthesis
An adjustable pressure-regulated prosthetic sphincter. **377**, 6*P*, 1986
Prostaglandin E
The effect of pyrogens and antipyretics on blood prostaglandin E_2 levels in the rabbit. **391**, 94*P*, 1987
Protease
Protease activity is involved in the elimination of polyneuronal innervation in the neonatal rat. **373**, 27*P*, 1986

Protein
Transfer of newly synthetized protein into the giant axon of the squid *Loligo forbesi*. **381**, 74*P*, 1986
Protein kinase C
Protein kinase C activators inhibit the inositol trisphosphate-mediated muscarinic current responses in rat lacrimal cells. **394**, 239, 1987
Protein secretion
The effect of autonomic agonists and nerve stimulation on protein secretion from the rat submandibular gland. **358**, 65, 1985
Protein synthesis
Protein synthesis in red and white skeletal muscle of carp (*Cyprinus carpio*) measured *in vivo* and the effect of temperature. **361**, 42*P*, 1985
Relative importance of luminal and vascular amino acids for protein synthesis in rat jejunum. **378**, 49*P*, 1986
Preparation and mass-spectrometric analysis of 13-C of CO_2 derived from breath, body fluids and from free or protein bound amino acids in human samples. **380**, 18*P*, 1986
Whole-body protein turnover in thyroid disease in man. **380**, 50*P*, 1986
Paradoxical increase in human quadriceps protein synthetic rate measured by stable isotopes with chronic reduction of knee mobility. **380**, 69*P*, 1986
Proton pump
Electrogenic active proton pump in *Rana esculenta* skin and its role in sodium ion transport. **359**, 331, 1985
Acid secretion through the *Rana esculenta* skin: involvement of an anion-exchange mechanism at the basolateral membrane. **378**, 195, 1986
Proximal convoluted tubule
Fluid reabsorption by the proximal convoluted tubule of the kidney in lactating rats. **371**, 267, 1986
Pudendal nerve
Discharge patterns of pudendal efferent fibres innervating the external anal sphincter of the cat. **368**, 471, 1985
Pulmonary blood flow
Changed site of pulmonary vasoconstriction in chronically hypoxic rats. **371**, 127*P*, 1986
Behaviour of canine pulmonary vagal afferent receptors during sustained acute pulmonary venous pressure elevation. **394**, 249, 1987
Pulmonary chemoreflex
MDL 72222 (a 5-HT antagonist) antagonizes the pulmonary depressor and respiratory chemoreflexes evoked by phenylbiguanide in anaesthetized rabbits. **365**, 104*P*, 1985
Stimulation of pulmonary C fibres decreases coronary arterial resistance in dogs. **371**, 277, 1986
Pulmonary embolism
MDL 72222 antagonizes the reflex tachypnoeic response to miliary pulmonary embolism in anaesthetized rabbits. **381**, 13*P*, 1986
Pulmonary homoeostasis
Alveolar liquid lining: Langmuir method used to measure surface tension in bovine and canine lung extracts. **359**, 65, 1985
Pulmonary liquid
The effects of loop diuretics and ouabain on lung liquid secretion in fetal sheep and guinea-pig. **371**, 240*P*, 1986
The effect of wood smoke inhalation on canine pulmonary endothelial permeability. **371**, 242*P*, 1986
Pulmonary permeability
Active D-glucose transport across the pulmonary epithelium of the fetal sheep. **388**, 30*P*, 1987
The effect of dibutyryl cyclic AMP on lung liquid volume flow across the pulmonary epithelium of the fetal sheep. **391**, 61*P*, 1987
Pulmonary receptor
Effects of drug-induced hyperventilation on the discharge of intrapulmonary chemoreceptors in the decerebrate domestic fowl. **361**, 61*P*, 1985
A problem associated with apparent sensitivity of 'pulmonary' non-myelinated vagal afferent endings to increased $[H^+]$ and/or $[CO_2]$ in anaesthetized rabbits. **371**, 104*P*, 1986
The control of breathing following heart and lung transplantation in man. **371**, 125*P*, 1986
The cardiac and hind-limb vascular responses to excitation of pulmonary C fibres, and their modification by changes in respiration in the cat. **384**, 52*P*, 1987
Behaviour of canine pulmonary vagal afferent receptors during sustained acute pulmonary venous pressure elevation. **394**, 249, 1987
Pulmonary reflex
Time-dependent respiratory effects of injected phenyldiguanide on vagotomized rabbits. **362**, 49*P*, 1985
Apparent H^+/CO_2 sensitivity of non-myelinated vagal afferent endings adjacent to the pulmonary circulation of anaesthetized rabbits. **369**, 147*P*, 1985
Pulmonary chemoreflexes induced by metabolites of arachidonic acid in the anaesthetized rabbit. **369**, 191*P*, 1985
Reversible blockade of the pulmonary chemoreflex and airway reflexes in dogs by local anaesthetic aerosol. **371**, 111*P*, 1986
The pulmonary chemoreflexes evoked by phenyl biguanide, diguanide and guanidine in anaesthetized rabbits. **371**, 115*P*, 1986
Contralateral projections of pump neurones of the nucleus of the solitary tract in the cat. **371**, 118*P*, 1986
Modification by lung inflation of the vascular responses from the carotid body chemoreceptors and other receptors in dogs. **378**, 13, 1986
The pattern of sympathetic neurone activity during expiration in the cat. **378**, 375, 1986
Blocking action of Methylene Blue on a respiratory reflex mediated by non-myelinated vagal afferent fibres in rabbit. **382**, 55*P*, 1987
Lung reflexes and nasal vascular resistance in the anaesthetized dog. **386**, 465, 1987
Electromyographic responses of a nasal muscle to stimulation of the nasal vestibule in the cat. **391**, 25, 1987

Pulmonary stretch afferent
A method for the characterization of afferent pulmonary stretch receptors in the cat. **372**, 5*P*, 1986
Purine
Depression of carbachol responses by purines in the rat hippocampal slice. **391**, 111*P*, 1987
Purine receptor
Regional variation in the sensitivity to adrenoceptor and purinoceptor agonists in the isolated vas deferens of rat, guinea-pig and rabbit. **392**, 49*P*, 1987
Purkinje cell
Development of rat cerebellar Purkinje cells maintained in organotypic monolayer cultures. **360**, 9*P*, 1985
Unitary inhibitory post-synaptic potentials (i.p.s.p.s) between Purkinje cells studied in slices of rat cerebellum. **360**, 36*P*, 1985
Direct and indirect effects of excitatory amino acids on rat cerebellar Purkinje cells, *in vivo*. **369**, 177*P*, 1985
Inward rectification and low threshold calcium conductance in rat cerebellar Purkinje cells. An *in vitro* study. **372**, 1, 1986
The secondary spikes of climbing fibre responses recorded from Purkinje cell somata in cat cerebellum. **377**, 207, 1986
The secondary spikes of climbing fibre responses recorded from Purkinje cell axons in cat cerebellum. **377**, 225, 1986
Similarities between firing patterns of cerebellar Purkinje cells in Jolting and aged mice. **380**, 66*P*, 1986
Current–voltage relationships of Purkinje cells in slices of mouse cerebellum. **382**, 87*P*, 1987
α-Adrenergic inhibition of rat cerebellar Purkinje cells *in vitro*: a voltage-clamp study. **383**, 487, 1987
Complex spikes in Purkinje cells in the lateral vermis (b zone) of the cat cerebellum during locomotion. **385**, 107, 1987
Responses of Purkinje cells and mossy fibres in the flocculus of the monkey during sinusoidal movements of a visual pattern. **387**, 611, 1987
Mapping calcium transients in the dendrites of Purkinje cells from the guinea-pig cerebellum *in vitro*. **389**, 319, 1987
Voltage dependency of inward currents elicited from Purkinje cells by excitatory amino acids in rat cerebellar slices. **390**, 194*P*, 1987
Excitation of cerebellar Purkinje cells in slices of jolting mouse brain. **391**, 40*P*, 1987
Purkinje fibre, *see* Cardiac Purkinje fibre
Pursuit
Human fixation and pursuit in normal and open-loop conditions: effects of central and peripheral retinal targets. **379**, 109, 1986
Pylorus
Human pyloric motor activity under fasting and fed conditions and its response to intraduodenal lipid. **378**, 111*P*, 1986
Pyramidal neurone
Post-natal development of electrophysiological properties of rat cerebral cortical pyramidal neurones. **393**, 743, 1987
Pyramidal tract
Changes in the cortico-spinal tract induced by nerve section in neonatal rats. **360**, 53*P*, 1985
Post-natal development of pyramidal tract neurones in kittens. **363**, 481, 1985
Electromyographic responses evoked in muscles of the forelimb by intracortical stimulation in the cat. **367**, 309, 1985
A transient cortical projection to the pyramidal tract in the neonatal ferret. **382**, 96*P*, 1987
Pyrimidine
The transport of pyrimidines into tissue rings cut from rat small intestine. **382**, 475, 1987
Pyrogen
Evidence for the involvement of the organum vasculosum laminae terminalis in the febrile response of rabbits and rats. **368**, 501, 1985
Separate mechanisms inside and outside the blood–brain barrier inducing metabolic changes in febrile rabbits. **392**, 637, 1987
Quantal release
Neostigmine increases the size of subunits composing the quantum of transmitter release at mouse neuromuscular junction. **367**, 489, 1985
Quantal analysis of action of hemicholinium-3 studied at a central cholinergic synapse of *Aplysia*. **380**, 209, 1986
Quantal currents evoked by graded intracellular depolarization of crayfish motor axon terminals. **383**, 587, 1987
Presynaptic actions of curare and atropine on quantal acetylcholine release at a central synapse of *Aplysia*. **388**, 665, 1987
Rabbit
Water and salt intake of wild rabbits (*Oryctolagus cuniculus* (L)) following dipsogenic stimuli. **362**, 285, 1985
The cardiovascular responses elicited from the posterior cerebellar cortex in the anaesthetized and decerebrate rabbit. **383**, 537, 1987
Myogenic adaptation of rabbit ear arteries to pulsatile internal pressures. **391**, 313, 1987
Cardiovascular responses evoked from the fastigial region of the cerebellum in anaesthetized and decerebrate rabbits. **392**, 475, 1987
Radiology
Small intestinal motility and transit by electromyography and radiology in the fasted and fed pig. **379**, 245, 1986
Raphe nucleus
Effects of ventromedial forebrain stimulation on the activities of raphe- and reticulo-spinal neurones in the rat. **365**, 28*P*, 1985
Evidence that an amino acid is an excitatory transmitter of the projection from periaqueductal grey to raphe magnus in the rat. **371**, 51*P*, 1986
Responses of phrenic motoneurones of the cat to stimulation of medullary raphe nuclei. **380**, 349, 1986
Serotoninergic and non-serotoninergic responses of phrenic motoneurones to raphe stimulation in the cat. **380**, 373, 1986

Raphe nucleus (*cont.*)
Stimulation of raphe (obscurus) nucleus causes long-term potentiation of phrenic nerve activity in cat. **381**, 169, 1986
Rat
Role of sodium and potassium permeabilities in the depolarization of denervated rat muscle fibres. **392**, 301, 1987
Diurnal- and behaviour-related activity of ventromedial hypothalamic neurones in freely behaving rats. **394**, 201, 1987
Receptive field, *see also* Visual receptive field
The post-natal development of cutaneous afferent fibre input and receptive field organization in the rat dorsal horn. **364**, 1, 1985
Effects of descending influences on the high-threshold excitatory fields of post-synaptic dorsal column neurones in the chloralose-anaesthetized cat. **364**, 43*P*, 1985
Receptive field profiles and integrative properties of spinocervical tract cells in the cat. **374**, 335, 1986
Push–pull effect of surround illumination on excitatory and inhibitory inputs to mudpuppy retinal ganglion cells. **388**, 233, 1987
α-Receptor
The effects of oestrogens on spontaneous activity and responses to phenylephrine of the mammalian urethra. **358**, 35, 1985
Receptor
The binding of *N*-methyl-D-aspartate receptor ligands to a crude postsynaptic density preparation from rat forebrain **365**, 44*P*, 1985
The initial burst of impulses in responses of toad muscle spindles during stretch. **368**, 1, 1985
Characterization of bombesin receptors on Swiss 3T3 mouse embryo fibroblasts. **371**, 210*P*, 1986
Reversible and irreversible H_1-receptor antagonists do not bind to the same site as histamine in guinea-pig ileum. **373**, 31*P*, 1986
Sensitization of aortic and cardiac baroreceptors by arginine vasopressin in mammals. **377**, 251, 1986
Visualization of substance-P receptors in isolated guinea-pig lung and trachea. **386**, 99*P*, 1987
Influence of LDL receptor on the uptake and degradation of low density lipoprotein (LDL) in the media of rabbit thoracic aorta. **388**, 22*P*, 1987
Isoprenaline induces increased airway reactivity in the guinea-pig. **390**, 180*P*, 1987
Receptor binding
Autoradiographic mapping of calcitonin gene-related peptide (CGRP) binding sites in rat lung. **394**, 129*P*, 1987
Receptor potential
The responses of hair cells in the basal turn of the guinea-pig cochlea to tones. **383**, 551, 1987
Reciprocal inhibition
Elevation of soleus reflex threshold following low-intensity electrical stimulation of antagonist muscle afferents in man. **362**, 26*P*, 1985
Reciprocal inhibitory interneurones in the *Xenopus* embryo spinal cord. **363**, 61, 1985
Variations in latency of reciprocal inhibition in human postural muscles. **372**, 29*P*, 1986
Reciprocal Ia inhibition between ankle flexors and extensors in man. **389**, 163, 1987
Evidence favouring presynaptic inhibition between antagonist muscle afferents in the human forearm. **391**, 71, 1987
Recording device
A multiplexing circuit that enables one channel of a digital pulse code modulator to record eight channels of analogue data. **382**, 17*P*, 1987
Rectification
Ionic conductance associated with electrical activity of guinea-pig red nucleus neurones *in vitro*. **362**, 161, 1985
Selective block of inward but not outward rectification in rat sensory neurones infected with herpes simplex virus. **375**, 327, 1986
Function and distribution of three types of rectifying channel in rat spinal root myelinated axons. **383**, 45, 1987
The properties and function of inward rectification in rod photoreceptors of the tiger salamander. **390**, 319, 1987
Rectum
Effects of morphine on electrical activity of the rectum in man. **388**, 153, 1987
Recurrent excitation
Inhibitory control of local excitatory circuits in the guinea-pig hippocampus. **388**, 611, 1987
Recurrent inhibition
Recurrent inhibitory connexions among neck motoneurones in the cat. **383**, 301, 1987
Red blood cell, *see* Erythrocyte
Red nucleus
Magnocellular red nucleus activity during different types of limb movement in the Macaque monkey. **358**, 527, 1985
Relation between red nucleus discharge and movement parameters in trained Macaque monkeys. **358**, 551, 1985
Significance of cortical input to the monkey red nucleus. **371**, 47*P*, 1986
Reflection coefficient
The apparent reflexion coefficient of the leaky corneal endothelium to sodium chloride is about one in the rabbit. **385**, 97, 1987
Reflex
The latency of the pudendo-anal reflex in man. **360**, 49*P*, 1985
Vestibular control of neck muscles in acute and chronic hemilabyrinthectomized cats. **366**, 281, 1985
Actions on γ-motoneurones elicited by electrical stimulation of cutaneous afferent fibres in the hind limb of the cat. **366**, 343, 1985
Fusimotor reflexes in triceps surae muscle elicited by stretch of muscles in the contralateral hind limb of the cat. **373**, 419, 1986
Observations on the automatic compensation of reflex gain on varying the pre-existing level of motor discharge in man. **374**, 73, 1986

Reflex (*cont.*)
Actions on γ-motoneurones elicited by electrical stimulation of joint afferent fibres in the hind limb of the cat. **375**, 137, 1986
Catecholamine secretion and adrenal nerve activity in response to movements of normal and inflamed knee joints in cats. **375**, 611, 1986
Dissociated long-latency (M2) and voluntary e.m.g. responses to arm perturbations in man. **377**, 31*P*, 1986
Effect of cutaneous nerve stimulation on voluntary and stretch reflex electromyographic activity in wrist flexors in humans. **382**, 509, 1987
The effect of cooling the arm on the 'long-latency' response of the human Abductor Digiti Minimi. **382**, 75*P*, 1987
Transmission of human tendon jerk reflexes during stance and gait. **382**, 82*P*, 1987
An interneuronal relay for group I and II muscle afferents in the midlumbar segments of the cat spinal cord. **389**, 647, 1987
Post-synaptic actions of midlumbar interneurones on motoneurones of hind-limb muscles in the cat. **389**, 675, 1987
Modulation of voluntary jaw muscle activity by stimulation of the arm in man. **390**, 259*P*, 1987
Difference in the amplitude of the human soleus H reflex during walking and running. **392**, 513, 1987
Receptor modalities responsible for the jaw-opening reflex in the cat. **392**, 61*P*, 1987
The sagittal vestibulo-collic reflex evoked by slow movements of the head in the cat. **392**, 111*P*, 1987

Refraction
Electrophysiological optometry using Scheiner's principle in the pigeon eye. **369**, 17, 1985
Refractive sectors in the visual field of the pigeon eye. **369**, 33, 1985

Refractory period
Activation of cat motor units by paired stimuli at short intervals. **387**, 385, 1987

Regeneration, *see also* Nerve regeneration, Reinnervation
Mechanosensory domains within shared touch domes of rats: studies on reinnervation. **358**, 27*P*, 1985
The proportions of unmyelinated afferent and sympathetic postganglionic fibres in normal and regenerated cat sural nerves. **372**, 19*P*, 1986
Regulation of Nerve Growth Factor-dependent growth of peripheral axons in the Japanese quail *in vitro* by α-melanotropin and its derivatives. **381**, 56*P*, 1986
Specificity of synaptic regeneration in the spinal cord of the larval sea lamprey. **388**, 183, 1987

Reinnervation, *see also* Nerve regeneration, Regeneration
Changes in capillary distribution in rat fast muscles following nerve crush and reinnervation. **362**, 13, 1985
Reinnervation of the lateral gastrocnemius and soleus muscles in the rat by their common nerve. **372**, 485, 1986
A peripheral stimulus initiates the collateral reinnervation of cat teeth. **373**, 83*P*, 1986
Innervation and function of hind-limb muscles in the cat after cross-union of the tibial and peroneal nerves. **374**, 429, 1986
Organization of motor units following cross-reinnervation of antagonistic muscles in the cat hind limb. **374**, 443, 1986
On the specificity of sensory reinnervation of cat skeletal muscle. **375**, 587, 1986
The effect of gender on reinnervation of soleus muscles of dystrophic mice (C57BL/6J dy^{2J}/dy^{2J}). **381**, 97*P*, 1986
An electrophysiological and morphological study of the innervation and reinnervation of cat dentine. **386**, 31, 1987
Responses to small-amplitude sinusoidal stretching of cat peroneus brevis muscle spindles reinnervated after nerve section. **391**, 56*P*, 1987

Relaxation
The role of hyperpolarization in the relaxation of smooth muscle of monkey coronary artery. **371**, 257, 1986
Labile heat and changes in rate of relaxation of frog muscles. **374**, 123, 1986

Relaxin
Relaxin prolongs gestation and delivery time in the rat. **371**, 181*P*, 1986
Opioids, from the adrenal glands, may mediate relaxin inhibition of oxytocin release in lactating rats. **371**, 183*P*, 1986
Relaxin increases blood pressure and vasopressin levels in anaesthetized rats. **381**, 37*P*, 1986
Evidence that chronic treatment with intravenous (i.v.) relaxin induces relaxin tolerance and opioid dependence in the oxytocin system of the lactating rat. **382**, 40*P*, 1987

Renal -, *see also* Kidney

Renal blood flow
Renal extraction and clearance of *p*-aminohippurate during saline and dextrose infusion in the rat. **363**, 303, 1985
Lack of change in renal vascular resistance in conscious rabbits when cardiac output is reduced without alteration of blood volume. **372**, 72*P*, 1986
Forskolin and calcium: interactions in the control of renin secretion and perfusate flow in the isolated rat kidney. **375**, 361, 1986
Renal vasoconstrictor response to hypertonic saline in the dog: effects of prostaglandins, indomethacin and theophylline. **380**, 35, 1986
The effects of stimulating carotid chemoreceptors on renal haemodynamics and function in dogs. **392**, 451, 1987

Renal clearance
Renal extraction and clearance of *p*-aminohippurate during saline and dextrose infusion in the rat. **363**, 303, 1985

Renal function
Urinary sodium excretion and the renin–aldosterone system in new-born calves. **362**, 261, 1985

Renal function (*cont.*)
Altered renal function in chronically hyperprolactinaemic male rats. **371**, 257*P*, 1986
Collection and on-line analysis of renal function data using a BBC microcomputer. **373**, 2*P*, 1986
Renal function in rats with chronic sodium depletion. **373**, 79*P*, 1986
Renal effects of atrial natriuretic peptide (ANP) in man. **374**, 47*P*, 1986
Kidney function in rats with corticomedullary nephrocalcinosis: effects of alterations in dietary calcium and magnesium. **380**, 405, 1986
Postischaemic renal function in anaesthetized rats depends upon the site of occlusion of the blood supply. **381**, 28*P*, 1986
Renal function in rats before and after preparation for clearance experiments. **381**, 100*P*, 1986
Studies of renal responses to stimulation of carotid baroreceptors, chemoreceptors and atrial receptors, and to acute coronary occlusion in anaesthetized dogs. **386**, 14*P*, 1987
Renal calcium handling in streptozotocin-induced diabetes mellitus in the rat. **386**, 36*P*, 1987
Effect of dietary protein intake on renal handling of sodium and water in man. **386**, 37*P*, 1987
The influence of carotid sinus pressure on renal responses to left atrial receptor stimulation in anaesthetized dogs. **386**, 38*P*, 1987
Renal function in the rat before and after preparation for micropuncture studies. **386**, 45*P*, 1987
The renal responses to occlusion of a branch of the left coronary artery in anaesthetized dogs. **386**, 100*P*, 1987
The effects of frusemide, saralasin and hypotension on fetal plasma renin activity and on fetal renal function. **393**, 479, 1987
Altered renal function in chronically hyperprolactinaemic rats. **394**, 13, 1987

Renal nerve
Interaction of the renin–angiotensin system and the renal nerves in the regulation of rat kidney function. **369**, 311, 1985
A study of renal nerve regulation of calcium excretion in the rat kidney. **371**, 102*P*, 1986
An investigation into the neural regulation of calcium excretion by the rat kidney. **383**, 745, 1987
Differential reflex activation of noradrenaline and dopamine overflow from the human kidney. **390**, 106*P*, 1987

Renal papilla
Are ninhydrin-positive substances volume-regulatory osmolytes in rat renal papillary cells? **386**, 45, 1987

Renal plasma flow
Renal haemodynamic actions of pressor doses of lysine vasopressin in the rat. **391**, 407, 1987

Renal slice
The effect of hyperosmotic shock on cellular levels of ninhydrin-positive substances in rat renal papillary slices. **377**, 51*P*, 1986

Renal tubule
The effects of luminal anion substitution on fluid absorption from the proximal convoluted tubule of the anaesthetized rat. **358**, 109*P*, 1985
The effect of inhibitors of anion exchange and chloride conductance on fluid reabsorption from rat renal proximal convoluted tubule. **361**, 58*P*, 1985
The effects of three transplant preservation solutions upon cell sectional area (c.s.a.) of isolated perfused proximal convoluted tubules of the rabbit kidney after rewarming to 37 °C. **371**, 103*P*, 1986
Proximal tubular function in potassium-depleted rats. **381**, 27*P*, 1986
Stimulation of fluid absorption by formate in the rat proximal tubule. **386**, 35*P*, 1987

Renin
Effects of the calcium agonist BAY-K-8644 on *in vitro* renin release from rat kidney cortex. **360**, 56*P*, 1985
The renin system: the effect of oral contraception and exercise in trained and sedentary women. **366**, 100*P*, 1985
A role for kallikreins in converting enzyme-inhibitor-induced active and inactive renin release? Studies with enalapril and aprotinin in conscious sheep. **369**, 137*P*, 1985
Effect of β-blockade with atenolol on the increased plasma active and inactive renin produced by the converting enzyme inhibitor enalapril: studies in conscious sheep. **371**, 94*P*, 1986
Elevated left heart pressure causes increases in plasma levels of atrial natriuretic peptide (ANP) in conscious dogs. **371**, 247*P*, 1986
A role for prostaglandins in converting enzyme inhibitor-induced active and inactive renin secretion. Studies using enalapril and indomethacin in conscious sheep. **373**, 36*P*, 1986
Forskolin and calcium: interactions in the control of renin secretion and perfusate flow in the isolated rat kidney. **375**, 361, 1986
Secretion control for active and inactive renin: effect of ouabain on release from rabbit kidney cortex slices. **379**, 17, 1986
Effect *in vitro* of parathormone (PTH) and the homologous peptide family vasoactive intestinal polypeptide (VIP), glucagon and secretin on renin release. **382**, 37*P*, 1987
Effect of cadmium on renin release from rat kidney slices. **382**, 197*P*, 1987
Pentobarbitone anaesthesia-induced changes in plasma-active and -inactive renin. Studies using indomethacin in conscious and anaesthetized sheep. **386**, 44*P*, 1987
Salt appetite in the pigeon in response to pharmacological treatments. **393**, 555, 1987

Renin–angiotensin
Interaction of the renin–angiotensin system and the renal nerves in the regulation of rat kidney function. **369**, 311, 1985
The relation of endogenous angiotensin and aldosterone to inhibition by captopril of salt appetite evoked in steers. **371**, 188*P*, 1986

Renin-angiotensin (*cont.*)
Regional haemodynamic influences of the renin–angiotensin system and vasopressin during α-adrenoceptor antagonism in conscious Long Evans rats. **387**, 63*P*, 1987
Intraruminal saline load inhibits feeding-induced activation of the renin-angiotensin-aldosterone system (RAAS) and vasopressin (AVP) secretion in the goat. **390**, 248*P*, 1987
The role of angiotensin II in the renal responses to somatic nerve stimulation in the rat. **393**, 425, 1987

Renshaw cell
Recurrent inhibitory connexions among neck motoneurones in the cat. **383**, 301, 1987
Inhibitory connections of ipsilateral semicircular canal afferents onto Renshaw cells in the lumbar spinal cord of the cat. **388**, 83, 1987
The measurement of single motor-axon recurrent inhibitory post-synaptic potentials in the cat. **388**, 631, 1987
Distribution of single-axon recurrent inhibitory post-synaptic potentials in a single spinal motor nucleus in the cat. **388**, 653, 1987

Respiration, *see also* Breathing, Ventilation
Maintenance of blood gas homeostasis without respiratory movement using continuous flow ventilation in dog and cat. **360**, 11*P*, 1985
Central stimulation of breathing movements in fetal lambs by prostaglandin synthetase inhibitors. **362**, 455, 1985
Respiratory activation of the facial nerve and alar muscles in anaesthetized dogs. **363**, 351, 1985
Suppression of respiratory influence in the diastolic pressure as evidence of a functioning baroreflex in man. **366**, 55*P*, 1985
Respiration and development of bird embryos under optimal and extreme conditions. **366**, 58*P*, 1985
Differential effects of carbon dioxide and pH on central chemoreceptors in the rat *in vitro*. **368**, 679, 1985
Measurement of respiratory variables in human studies. **369**, 12*P*, 1985
Effects of superior laryngeal nerve stimulation on expiratory activity in cats. **369**, 143*P*, 1985
Reflex hyperventilation in relation to cardiovascular changes in cats. **369**, 144*P*, 1985
Repetitive firing properties of medullary respiratory neurones in the cat. **371**, 116*P*, 1986
Time constants, pure delays and gains of the respiratory responses to step changes of alveolar P_{CO_2} and P_{O_2} in moderate exercise in man. **371**, 121*P*, 1986
Beat-by-beat changes in stroke volume during the respiratory cycle in conscious man. **371**, 128*P*, 1986
Confirmation of chemosensitivity of 'pulmonary' endings by use of a differential vagal nerve block in anaesthetized rabbits. **376**, 52*P*, 1986
A pulmonary function test for domestic fowl. **376**, 53*P*, 1986
The effect of small changes in arterial carbon dioxide tension on carotid chemoreceptor activity in the cat. **380**, 415, 1986
The effect of potassium on carotid body chemoreceptor discharge in the anaesthetized cat. **381**, 39, 1986
Stimulation of raphe (obscurus) nucleus causes long-term potentiation of phrenic nerve activity in cat. **381**, 169, 1986
Evidence in favour of the increased frequency of breathing in response to lactic acid infusion in rabbits being mediated by non-myelinated vagal afferent fibres. **381**, 14*P*, 1986
Respiratory modulation of hypoglossal motoneurones in the cat. **382**, 61*P*, 1987
The effect of exercise on the central-chemoreceptor threshold in man. **383**, 9, 1987
Properties of the inspiration-related activity of sympathetic preganglionic neurones of the cervical trunk in the cat. **385**, 545, 1987
Dynamics of medullary hydrogen ion and respiratory responses to square-wave change of arterial carbon dioxide in cats. **385**, 627, 1987
Central respiratory modulation of subretrofacial bulbospinal neurones in the cat. **388**, 533, 1987
Cardiovascular and phrenic nerve responses to stimulation of the amygdala central nucleus in the anaesthetized rabbit. **389**, 541, 1987
The effect of treadmill speed on ventilation at the start of exercise in man. **391**, 13, 1987
Human pulmonary dynamics during upright immersion. **392**, 82*P*, 1987
Pressure changes during clarinet playing. **392**, 83*P*, 1987
Respiratory modulation of left ventricular stroke volume in man measured using pulsed Doppler ultrasound. **393**, 499, 1987
An ultrasonic phase-shift flowmeter for the measurement of respiratory airflow. **394**, 9*P*, 1987
Developmental changes in the reflex respiratory response to alternations of $F_{I.O_2}$ in the newborn kitten. **394**, 69*P*, 1987

Respiratory control
Haemodynamic and ventilatory responses to a vasodilator during steady-state exercise in man. **361**, 77*P*, 1985
Haemodynamic and ventilatory responses to a vasodilator during steady-state upright exercise in man following beta-adrenergic blockade. **365**, 100*P*, 1985
Neural respiratory and circulatory interaction during chemoreceptor stimulation and cooling of ventral medulla in cats. **370**, 217, 1986
Ventilation and sensitivity to induced hypercapnia related to convective effects of ventriculocisternal perfusion and brain blood flow in the cat. **371**, 107*P*, 1986
Factors influencing the inspiratory–facilitatory response to lung inflation in the decerebrate cat. **371**, 237*P*, 1986
Projection of pulmonary rapidly adapting receptors to the medulla of the cat: an antidromic mapping study. **373**, 63, 1986

Respiratory control (*cont.*)
Ventilatory responses to right ventricular pressure changes in anaesthetized dogs. **377**, 63*P*, 1986
Cardiac output and ventilation during lower body negative pressure applied during steady-state exercise in man. **381**, 23*P*, 1986
Mesencephalic apnoeic regions in the rat. **382**, 176*P*, 1987
Pulmonary stretch receptor relay neurones of the cat: location and contralateral medullary projections. **383**, 571, 1987
Respiratory exchange ratio
Factors affecting the respiratory exchange ratio as a predictor of aerobic power. **380**, 40*P*, 1986
The effect of respiratory alkalosis and acidosis on the respiratory exchange ratio in man. **391**, 62*P*, 1987
The effect of acidosis and alkalosis on the respiratory exchange ratio during maximal incremental treadmill exercise in man. **392**, 102*P*, 1987
Respiratory muscle
The respiratory activity of human levator costae muscles and its modification by posture. **362**, 189, 1985
Sleep state, chest-wall muscles and periodic breathing in infants. **366**, 61*P*, 1985
The labile respiratory activity of ribcage muscles of the rat during sleep. **389**, 99, 1987
Respiratory neurone
The detection of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 33, 1985
The distribution of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 63, 1985
The non-uniform character of expiratory synaptic activity in expiratory bulbospinal neurones of the cat. **370**, 433, 1986
Differential changes in the synaptic rhythm of caudal medullary expiratory bulbospinal neurones in response to hypothalamic stimulation in the cat. **371**, 117*P*, 1986
Synaptic inhibition of caudal medullary expiratory bulbospinal neurones during hypothalamic stimulation in the cat. **376**, 32*P*, 1986
Responses of phrenic motoneurones of the cat to stimulation of medullary raphe nuclei. **380**, 349, 1986
Serotoninergic and non-serotoninergic responses of phrenic motoneurones to raphe stimulation in the cat. **380**, 373, 1986
Monosynaptic excitation of thoracic motoneurones by inspiratory neurones of the nucleus tractus solitarius in the cat. **390**, 415, 1987
Role of medullary inspiratory neurones in the control of the diaphragm during oesophageal stimulation in cats. **391**, 289, 1987
Respiratory reflex, *see* Pulmonary reflex
Respiratory rhythm, *see also* Ventilation pattern
The non-uniform character of expiratory synaptic activity in expiratory bulbospinal neurones of the cat. **370**, 433, 1986
Discharge patterns of cervical sympathetic preganglionic neurones related to central respiratory drive in the rat. **378**, 253, 1986
Resting potential
Membrane voltage, resistance, and channel switching in isolated mouse fibroblasts (L cells): a patch-electrode analysis. **367**, 267, 1985
Role of sodium and potassium permeabilities in the depolarization of denervated rat muscle fibres. **392**, 301, 1987
Reticular formation
Enhancement of long-term potentiation in the rat dentate gyrus by post-trial stimulation of the reticular formation. **360**, 215, 1985
Projections of the cerebellar fastigial nuclei to the inferior centralis nucleus of the raphe and surrounding reticular formation in the cat. **361**, 47*P*, 1985
Cells of origin of pathways descending to the spinal cord in the eel. **366**, 97*P*, 1985
Connexions of reticulo-spinal neurones with the cerebellum in the eel. **373**, 82*P*, 1986
Reticularis
Thalamic burst patterns in the naturally sleeping cat: a comparison between cortically projecting and reticularis neurones. **379**, 429, 1986
Reticulo-ruminal motility
Inhibition of reticulo-ruminal motility by volatile fatty acids and lactic acid in sheep. **382**, 355, 1987
Retina
A voltage-clamp analysis of membrane currents in solitary bipolar cells dissociated from *Carassius auratus*. **358**, 131, 1985
Permeability changes induced by L-glutamate in solitary retinal horizontal cells isolated from *Carassius auratus*. **358**, 153, 1985
Glutamate induces an increase in extracellular potassium activity in a cyprinid fish retina. **358**, 11*P*, 1985
Rod photoresponses from isolated retinae of +rd mouse and RCS rat. **358**, 12*P*, 1985
Membrane currents in bipolar cells isolated from the axolotl retina, recorded by whole-cell patch-clamping. **360**, 19*P*, 1985
Quantitative analysis of the distribution of the retinal ganglion cells in Amazon rodents. **360**, 24*P*, 1985
Ionic and electrophysiological properties of retinal Müller (glial) cells of the turtle. **362**, 79, 1985
Action and localization of γ-aminobutyric acid in the cat retina. **362**, 369, 1985
Physiological and ultrastructural evidence for light-dependent plasticity of horizontal cell-cone photoreceptor feed-back interactions in the isolated retina of a cyprinid fish. **362**, 20*P*, 1985
Neurotransmitter-induced currents in bipolar cells isolated from the axolotl retina, recorded by whole-cell patch-clamping. **364**, 38*P*, 1985
Use of patch-clamp recording to study Müller cells and bipolar cells isolated from, or in, slices of the axolotl retina. **365**, 4*P*, 1985
Membrane currents in depolarizing bipolar cells recorded by whole-cell patch-clamping in living retinal slices from the axolotl retina. **365**, 34*P*, 1985

Retina (*cont.*)
Cyclic GMP-sensitive conductance in excised inside-out membrane patches from catfish cone outer segment. **365**, 35*P*, 1985
Does substance P control sensitivity of ganglion cells in the vertebrate (fish) retina? **365**, 36*P*, 1985
Effect of excitatory amino acids and analogues on [^{3}H]acetylcholine release from amacrine cells of the rabbit retina. **366**, 47, 1985
Synaptic transmission at *N*-methyl-D-aspartate receptors in the proximal retina of the mudpuppy. **367**, 99, 1985
Recovery of visual function in retrobulbar neuritis with drink. **367**, 27*P*, 1985
The absence of spread of adaptation between rod photoreceptors in turtle retina. **369**, 161, 1985
Electrophysiology of the Müller cell network in the isolated axolotl retina. **369**, 33*P*, 1985
The distribution of ipsilaterally projecting retinal ganglion cells in neonatal pigmented and albino ferrets. **369**, 35*P*, 1985
Single potassium channels in Müller cells of the salamander retina. **371**, 35*P*, 1986
Noise changes associated with the action of glutamate on retinal bipolar cells from the salamander (*Ambystoma mexicanum*). **371**, 39*P*, 1986
Quantitative analysis of the retinal ganglion cell size in Amazon rodents. **374**, 39*P*, 1986
Synaptic transmission in amphibian retinae during conditions unfavourable for calcium entry into presynaptic terminals. **376**, 411, 1986
Receptor binding in intact rat retina: characterization of β-adrenergic ([^{3}H] CGP-12177) and opiate ([^{3}H]naloxone) binding sites *in vitro*. **376**, 22*P*, 1986
Synaptogenesis in the inner plexiform layer of area centralis of kitten retina. **380**, 74*P*, 1986
The electroretinogram of heterozygous +rd mice *in vivo*. **382**, 116*P*, 1987
Transmission of noise between rods and cones in the isolated retina of the salamander (*Ambystoma*). **384**, 22*P*, 1987
Effects of L-dopa on the tilt after-effect with differing contrast and stimulus duration. **384**, 77*P*, 1987
The dynamics of the cat retinal X cell centre. **386**, 219, 1987
Neurotransmitter-induced currents in retinal bipolar cells of the axolotl, *Ambystoma mexicanum*. **387**, 125, 1987
Push–pull effect of surround illumination on excitatory and inhibitory inputs to mudpuppy retinal ganglion cells. **388**, 233, 1987
Use of fura2 to monitor changes in cytosolic free [Ca^{2+}] of rods in the isolated retina of the bullfrog. **388**, 36*P*, 1987
Light-evoked decrease of intracellular potassium activity in luminosity type horizontal cells of isolated retinae of cyprinid fish. **388**, 41*P*, 1987
Properties of ion channels closed by light and opened by guanosine 3′,5′-cyclic monophosphate in toad retinal rods. **389**, 691, 1987
Ganglion cell performance at absolute threshold in toad retina: effects of dark events in rods. **393**, 667, 1987
Spatial spread of adaptation within the cone network of turtle retina. **393**, 763, 1987
Glutamate depolarizes cones isolated from the tiger salamander retina. **394**, 16*P*, 1987

Retinal bipolar cell
A voltage-clamp analysis of membrane currents in solitary bipolar cells dissociated from *Carassius auratus*. **358**, 131, 1985
Neurotransmitter-induced currents in retinal bipolar cells of the axolotl, *Ambystoma mexicanum*. **387**, 125, 1987
Voltage gain of signal transfer from retinal rods to bipolar cells in the tiger salamander. **391**, 125, 1987

Retinal cone
Electroretinograms evoked by sinusoidal excitation of human cones. **363**, 135, 1985
Wavelength discrimination in the lower and upper visual field of the pigeon. **366**, 95*P*, 1985
Effects of γ-aminobutyric acid on isolated cone photoreceptors of the turtle retina. **373**, 443, 1986
Blocking effects of cobalt and related ions on the γ-aminobutyric acid-induced current in turtle retinal cones. **373**, 463, 1986
Spectral sensitivity of cones of the monkey *Macaca fascicularis*. **390**, 145, 1987
Spatial spread of adaptation within the cone network of turtle retina. **393**, 763, 1987

Retinal ganglion cell
The structure of the terminal arborizations of physiologically identified retinal ganglion cell Y axons in the kitten. **359**, 293, 1985
Difference in GABA and glycine actions between the retinal ganglion cells in the area centralis and peripheral retina of the cat. **360**, 21*P*, 1985
Synaptic transmission at *N*-methyl-D-aspartate receptors in the proximal retina of the mudpuppy. **367**, 99, 1985
A comparison of visual responses of cat lateral geniculate nucleus neurones with those of ganglion cells afferent to them. **369**, 249, 1985
Distribution of neurones in the retinal ganglion cell layer of the Tammar Wallaby. **381**, 60*P*, 1986
The receptive-field spatial structure of cat retinal Y cells. **384**, 49, 1987
Voltage-dependent conductances of solitary ganglion cells dissociated from the rat retina. **385**, 361, 1987
The dynamics of the cat retinal X cell centre. **386**, 219, 1987
Push–pull effect of surround illumination on excitatory and inhibitory inputs to mudpuppy retinal ganglion cells. **388**, 233, 1987
Membrane currents of neurones in the ganglion cell layer of retinal slices isolated from the tiger salamander retina. **394**, 15*P*, 1987

Retinal horizontal cell
Permeability changes induced by L-glutamate in solitary retinal horizontal cells isolated from *Carassius auratus*. **358**, 153, 1985

Retinal horizontal cell (*cont.*)
Effects of L-glutamate on the anomalous rectifier potassium current in horizontal cells of *Carassius auratus* retina. **358**, 169, 1985
Effect of excitatory amino acids on γ-aminobutyric acid release from frog horizontal cells. **362**, 51, 1985
The dogfish retinal slice preparation: responses of rod horizontal cells to ionophoretically applied amino acids. **365**, 6*P*, 1985
GABA-induced polarizations of horizontal cells in the isolated fish retina persist in chloride-free Ringer. **366**, 14*P*, 1985
GABA depolarizes horizontal cells in goldfish retina perfused with low calcium. **371**, 38*P*, 1986
Interaction between the soma and the axon terminal of retinal horizontal cells in *Cyprinus carpio*. **375**, 121, 1986
Calcium action potential and its use for measurement of reversal potentials of horizontal cell responses in carp retina. **386**, 165, 1987
Retinal pigment epithelium
Potassium transport of the frog retinal pigment epithelium: autoregulation of potassium activity in the subretinal space. **375**, 461, 1986
Retinal rod
The ionic selectivity and calcium dependence of the light-sensitive pathway in toad rods. **358**, 447, 1985
Membrane current noise in toad retinal rods exposed to low external calcium. **361**, 205, 1985
Patch-clamp recordings of the light-sensitive dark noise in retinal rods from the lizard and frog. **367**, 183, 1985
The absence of spread of adaptation between rod photoreceptors in turtle retina. **369**, 161, 1985
The effects of phosphodiesterase inhibitors and lanthanum ions on the light-sensitive current of toad retinal rods. **370**, 91, 1986
Electrical properties of the light-sensitive conductance of rods of the salamander *Ambystoma tigrinum*. **371**, 115, 1986
Spatial and temporal limits of vision in the achromat. **371**, 365, 1986
Spatial and temporal properties of human rod vision in the achromat. **371**, 387, 1986
Aequorin signals from isolated salamander rods. **371**, 36*P*, 1986
Incorporation of calcium buffers into salamander retinal rods: a rejection of the calcium hypothesis of phototransduction. **372**, 315, 1986
Effects of changing Ca before and after light flashes in salamander rods. **372**, 54*P*, 1986
Sodium–calcium exchange in the outer segments of bovine rod photoreceptors. **373**, 25, 1986
Regional variation of contrast sensitivity across the retina of the achromat: sensitivity of human rod vision. **388**, 101, 1987
Light responses and Na:Ca exchange in isolated salamander rod outer segments. **390**, 11*P*, 1987
Voltage gain of signal transfer from retinal rods to bipolar cells in the tiger salamander. **391**, 125, 1987
Measurement of sodium–calcium exchange in salamander rods. **391**, 347, 1987
The effect of ions on sodium–calcium exchange in salamander rods. **391**, 371, 1987
Ganglion cell performance at absolute threshold in toad retina: effects of dark events in rods. **393**, 667, 1987
Kinetics and components of the flash photocurrent of isolated retinal rods of the larval salamander, *Ambystoma tigrinum*. **394**, 529, 1987
Retinotectal projection
A sharp retinal image increases the precision of the regenerated goldfish retinotectal projection under stroboscopic conditions. **372**, 84*P*, 1986
Refinement of brachial selection by regenerating axons in the goldfish optic tract may be due to collateral loss. **382**, 175*P*, 1987
Neural activity in the regenerating optic nerve of the goldfish. **391**, 299, 1987
Reversal potential
Currents carried by monovalent cations through calcium channels in mouse neoplastic B lymphocytes. **358**, 255, 1985
Calcium action potential and its use for measurement of reversal potentials of horizontal cell responses in carp retina. **386**, 165, 1987
Rod, *see* Retinal rod
Rod photoreceptor
Regional variation of contrast sensitivity across the retina of the achromat: sensitivity of human rod vision. **388**, 101, 1987
The properties and function of inward rectification in rod photoreceptors of the tiger salamander. **390**, 319, 1987
Rubidium
Evidence for the ordered release of rubidium ions occluded within the Na, K-ATPase of mammalian kidney. **368**, 453, 1985
The effects of rubidium ions on components of the potassium conductance in the frog node of Ranvier. **375**, 81, 1986
Rumen
Effects of abrupt changes in food and potassium intake on the rumen sodium reservoir in sheep. **381**, 84*P*, 1986
A demonstration of the temporarily isolated and washed-rumen technique in the sheep. **386**, 7*P*, 1987
Rumination is evoked by xylazine (an alpha-2 adrenoreceptor agonist) given into the coeliac artery of sheep. **388**, 16*P*, 1987
Ruthenium Red
On the action of Ruthenium Red and neuraminidase at the frog neuromuscular junction. **382**, 411, 1987
Ryanodine
Ryanodine releases calcium from sarcoplasmic reticulum in calcium-tolerant rat cardiac myocytes. **390**, 453, 1987
Saccade
Neurological control of horizontal binocular saccadic eye movements. **369**, 45*P*, 1985

Saccade (*cont.*)
Facilitation of vergence changes by saccades: influences of misfocused images and of disparity stimuli in man. **371**, 69, 1986
Lesions in the cat prepositus complex: effects on the vestibulo-ocular reflex and saccades. **372**, 75, 1986
The vestibulo-ocular reflex during human saccadic eye movements. **373**, 209, 1986
Disabling of the oculomotor neural integrator by kainic acid injections in the prepositus–vestibular complex of the cat. **394**, 267, 1987
Salivary gland, *see also* Parotid gland, Submandibular gland
The effects of bumetanide on the stimulated rabbit mandibular salivary gland. **378**, 103*P*, 1986
Calcitonin gene related peptide in rat salivary glands. **381**, 36*P*, 1986
The receptor-regulated calcium influx in mouse submandibular acinar cells is sodium dependent: a patch-clamp study. **384**, 119, 1987
Parasympathetic nerve-evoked salivary secretion from the ferret submandibular gland in the presence of an antimuscarinic agent. **390**, 166*P*, 1987
Salivary secretion
The influence of forskolin on electrolyte transport processes in the perfused rabbit mandibular salivary gland. **361**, 25*P*, 1985
The sensory receptors of the sheep's forestomach responsible for reflex elicitation of parotid salivary secretion. **364**, 35*P*, 1985
Substance P-evoked salivary secretion in the ferret. **372**, 41*P*, 1986
Autonomic mechanisms underlying capsaicin induced oral sensations and salivation in man. **373**, 87, 1986
The effect of adrenergic, cholinergic and peptidergic salivary stimulants on gastric mucosal integrity in the rat. **380**, 329, 1986
Changes in elemental concentrations of rat parotid acinar cells following pilocarpine stimulation. **381**, 297, 1986
Effects of chronic sympathectomy on parasympathetic secretion of saliva from rat parotid glands. **381**, 32*P*, 1986
Parotid salivary amylase output in man during chewing. **386**, 59*P*, 1987
Analysis by high-performance liquid chromatography of proteins secreted by rabbit mandibular salivary gland following stimulation with acetylcholine and isoproterenol. **391**, 37*P*, 1987
Saponin
Calcium mobilization in enzymically isolated single intact and skinned muscle cells of the porcine coronary artery. **363**, 103, 1985
Sarcomere
Stepwise shortening in unstimulated frog skeletal muscle fibres. **362**, 173, 1985
Effect of Sr^{2+} on force and sarcomere length in heart muscle of rat. **381**, 96*P*, 1986
Sarcoplasmic reticulum
Mechanism of Ca^{2+}-induced release of Ca^{2+} from the sarcoplasmic reticulum of a skinned cardiac cell from the rat ventricle. **358**, 58*P*, 1985
Calcium channels and intracellular calcium release are pharmacologically different in frog skeletal muscle. **361**, 231, 1985
Calcium mobilization in enzymically isolated single intact and skinned muscle cells of the porcine coronary artery. **363**, 103, 1985
Spontaneous sarcoplasmic reticulum Ca^{2+} release limits the effect of Ca^{2+} to enhance twitch shortening in rat cardiac myocytes. **369**, 81*P*, 1985
Does inositol triphosphate induce tension development in skinned muscle fibres of barnacle and frog? **369**, 185*P*, 1985
Carbonic anhydrase in the sarcoplasmic reticulum of rabbit skeletal muscle. **371**, 351, 1986
Some properties of the contractile system and sarcoplasmic reticulum of skinned slow fibres from *Xenopus* muscle. **373**, 1, 1986
Effects of procaine on calcium accumulation by the sarcoplasmic reticulum of mechanically disrupted rat cardiac muscle. **373**, 195, 1986
Donnan potential measurements from the sarcoplasmic reticulum of rabbit muscle under rigor and relaxed conditions. **388**, 34*P*, 1987
Ryanodine releases calcium from sarcoplasmic reticulum in calcium-tolerant rat cardiac myocytes. **390**, 453, 1987
Depletion of calcium from the sarcoplasmic reticulum during calcium release in frog skeletal muscle. **392**, 167, 1987
Some factors which influence the gating behaviour of the reconstituted rabbit cardiac sarcoplasmic reticulum (SR) K^+ channel. **394**, 144*P*, 1987
Schwann cell
The admittance of the squid giant axon at radio frequencies and its relation to membrane structure. **360**, 275, 1985
Peptidergic modulation of the membrane potential of the Schwann cell of the squid giant nerve fibre. **379**, 61, 1986
Secretion
Simultaneous monitoring of electrical and secretory activity in peptidergic neurosecretory terminals of the crab. **359**, 163, 1985
The secretory action of barium chloride in rat colon. **361**, 19, 1985
The possible relation between mastication and parotid secretion in the rabbit. **364**, 19, 1985
Mucosal responses evoked by stimulation of ganglion cell somas in the submucosal plexus of the guinea-pig ileum. **364**, 69, 1985
Mechanism of action of extracellular calcium on isoprenaline-evoked amylase secretion from isolated rat parotid glands. **369**, 337, 1985
Production of endolymph in the semicircular canal of the frog *Rana esculenta*. **371**, 17, 1986
The action of pentobarbitone on catecholamine secretion and ^{45}Ca influx in bovine adrenal medullary cells. **376**, 18*P*, 1986

Secretion (*cont.*)
The probability of quantal secretion along visualized terminal branches at amphibian (*Bufo marinus*) neuromuscular synapses. **379**, 257, 1986
Calcium dependence of presynaptic calcium current and post-synaptic response at the squid giant synapse. **381**, 619, 1986
Gradual and stepwise changes in the membrane capacitance of rat peritoneal mast cells. **386**, 205, 1987
Evidence for Na/H and Cl/HCO_3 exchange in the isolated, perfused rabbit mandibular salivary gland. **391**, 24*P*, 1987
Phorbol esters inhibit the secretion provoked by prostaglandin E_2 in a colonic epithelial cell line. **391**, 35*P*, 1987
The influences of tyramine released endogenous noradrenergic stores upon electrogenic secretion in the starved isolated rat jejunum. **394**, 84*P*, 1987

Seizure
Role of large arteries in regulation of blood flow to brain stem in cats. **387**, 115, 1987

Sensory input
Responses of precentral cells during cooling of postcentral cortex in conscious monkeys. **368**, 611, 1985
The role of *N*-methylaspartate receptors in mediating responses of rat and cat spinal neurones to defined sensory stimuli. **385**, 169, 1987

Sensory nerve fibre
Phase coherence in vibration-induced responses of tactile fibres associated with Pacinian corpuscle receptors in the cat. **386**, 263, 1987

Sensory neurone
Evidence of an interaction between Na and Ca ions on TTX-insensitive channels in rat cranial sensory neurones. **358**, 71*P*, 1985
γ-Aminobutyric- acid- and pentobarbitone-gated chloride currents in internally perfused frog sensory neurones. **360**, 367, 1985
Immunoreactive calcitonin gene-related peptide and substance P: co-existence in sensory neurones and behavioural interaction after intrathecal administration in the rat. **362**, 29*P*, 1985
Two calcium-sensitive spike after-hyperpolarizations in visceral sensory neurones of the rabbit. **365**, 59, 1985
Selective block of inward but not outward rectification in rat sensory neurones infected with herpes simplex virus. **375**, 327, 1986
Prolongation of calcium action potentials by γ-aminobutyric acid in primary sensory neurones of lamprey. **375**, 481, 1986
Inactivation of the low-threshold transient calcium current in rat sensory neurones: evidence for a dual process. **376**, 341, 1986
Factors affecting the expression of acetylcholine receptors on rat sensory neurones in culture. **377**, 409, 1986
'Concentration-clamp' study of γ-aminobutyric-acid-induced chloride current kinetics in frog sensory neurones. **379**, 171, 1986
Kinetics and selectivity of a low-voltage-activated calcium current in chick and rat sensory neurones. **386**, 547, 1987
Single low-voltage-activated calcium channels in chick and rat sensory neurones. **386**, 571, 1987
Unmyelinated skin afferent neurones, Rohon-Beard cells, release an excitatory amino acid in the spinal cord of *Xenopus laevis* embryos. **388**, 54*P*, 1987
Photoactivation of a GTP analogue differentially inhibits the transient component of the calcium channel current in rat sensory neurones. **390**, 89*P*, 1987
Effects of central or peripheral axotomy on membrane properties of sensory neurones in the petrosal ganglion of the cat. **391**, 39, 1987
Kinetic and pharmacological properties distinguishing three types of calcium currents in chick sensory neurones. **394**, 149, 1987
Single-channel recordings of three types of calcium channels in chick sensory neurones. **394**, 173, 1987

Septum
Properties of rat medial septal neurones recorded *in vitro*. **379**, 309, 1986

Serotonin, *see* 5-Hydroxytryptamine

Serotonin receptor
Serotonin receptors expressed by brain mRNA in *Xenopus* oocytes mediate three different ionic currents. **386**, 83*P*, 1987

Sex difference
Sexual dimorphism of neonatal rat brain mRNA-directed protein synthesis *in vitro*: effects of oestradiol benzoate. **371**, 177*P*, 1986

Sheep
A method for studying lymphatic pumping activity in conscious and anaesthetized sheep. **378**, 109, 1986
Involvement of autonomic nerves in the contribution of the liver to the control of food intake in sheep. **386**, 88*P*, 1987
The effect of increased potassium concentration on the absorption of magnesium from the reticulo-rumen of conscious sheep. **386**, 89*P*, 1987
The role of external compression and movement in lymph propulsion in the sheep hind limb. **387**, 83, 1987
Thirst thresholds in response to intracerebroventricular and intracarotid infusions of hypertonic NaCl in sheep. **390**, 246*P*, 1987
The effect of electrical stimulation of the sympathetic chain on peripheral lymph flow in the anaesthetized sheep. **393**, 123, 1987

Shivering
The relationship between ventilation and oxygen consumption in man is the same during both moderate exercise and shivering. **383**, 455, 1987

Short-term synchrony
The degree of short-term synchrony between α- and γ-motoneurones coactivated during the flexion reflex in the cat. **376**, 47, 1986

Sialic acid
On the action of Ruthenium Red and neuraminidase at the frog neuromuscular junction. **382**, 411, 1987

Single channel
Voltage-dependent activation of the inward-rectifier potassium channel in the ventricular cell membrane of guinea-pig heart. **366**, 365, 1985
Single-channel recordings from cultured human myotubes. **366**, 91*P*, 1985
Calcium-activated potassium channels in single smooth muscle cells of rabbit jejunum and guinea-pig mesenteric artery. **371**, 45, 1986
Single low-voltage-activated calcium channels in chick and rat sensory neurones. **386**, 571, 1987
Single-channel current
Effects of chlorpromazine and phencyclidine on mouse C2 acetylcholine receptor kinetics. **378**, 497, 1986
Sino-atrial node
Vagal stimulation decreases intercellular coupling in the rabbit s.a. node. **366**, 35*P*, 1985
The mode of action of alinidine in the rabbit sino-atrial node. **366**, 117*P*, 1985
Effects of changes in excitability and intercellular coupling on synchronization in the rabbit sino-atrial node. **370**, 127, 1986
Relationship between the transient inward current and slow inward currents in the sino-atrial node of the rabbit. **370**, 299, 1986
Selective innervation of sinoatrial and atrioventricular nodes in the canine heart. **371**, 66*P*, 1986
The decline in the response to acetylcholine (ACh) mediated by the muscarinic cholinoceptor of the rabbit sino-atrial node: a biphasic process. **371**, 198*P*, 1986
Properties of the hyperpolarizing-activated current (i_f) in cells isolated from the rabbit sino-atrial node. **377**, 61, 1986
Recording of single i_f channels in isolated rabbit sino-atrial node cells. **377**, 111*P*, 1986
On the mechanism by which changes in extracellular pH affect the electrical activity of the rabbit sino-atrial node. **381**, 181, 1986
Isolated sino-atrial node cells of rabbit: long, thin cells which are calcium-tolerant. **390**, 60*P*, 1987
The fade of the response to acetylcholine at the rabbit isolated sino-atrial node. **393**, 171, 1987
Sinusoidal movement
Predictive velocity estimation in the pursuit reflex response to pseudo-random and step displacement stimuli in man. **389**, 111, 1987
Size principle
Organization of motor units following cross-reinnervation of antagonistic muscles in the cat hind limb. **374**, 443, 1986
Muscle fibre conduction velocity in motor units of the human anterior tibial muscle: a new size principle parameter. **391**, 561, 1987
Skeletal muscle
Shortening velocity extrapolated to zero load and unloaded shortening velocity of whole rat skeletal muscle. **359**, 357, 1985
The effects of chronic stimulation at low rates on denervated rat soleus muscle. **361**, 36*P*, 1985
Changes in capillary distribution in rat fast muscles following nerve crush and reinnervation. **362**, 13, 1985
Acetylcholine receptors of skeletal muscle cells in cultures of rat thymus glands. **362**, 349, 1985
Properties of single potassium channels in vesicles formed from the sarcolemma of frog skeletal muscle. **364**, 339, 1985
Electromyographic activity in the cross-reinnervated soleus muscle of unrestrained cats. **365**, 13, 1985
Differences in maximum velocity of shortening along single muscle fibres of the frog. **365**, 147, 1985
Calcium transients from intact frog skeletal muscle fibres simultaneously injected with Antipyrylazo III and Azol. **365**, 70*P*, 1985
Injury to skeletal muscle of mice by lengthening contractions. **365**, 75*P*, 1985
Maximal perfusion of skeletal muscle in man. **366**, 233, 1985
Regional differences in responsiveness to octopamine within a locust skeletal muscle. **366**, 331, 1985
Long-term nerve stimulation affects electromyographic properties of cat's skeletal muscle. **366**, 29*P*, 1985
Observations on isometric twitches of human soleus before, during and after prolonged low-frequency stimulation. **366**, 30*P*, 1985
Feasibility of simultaneous monitoring of phosphorus metabolites and lactate in rat skeletal muscle by ^{31}P and ^{1}Hnuclear magnetic resonance. **366**, 64*P*, 1985
Alterations in force activation after the injection of EGTA into short muscle fibres of the frog. **366**, 66*P*, 1985
Effects of temperature and pH on the contractile properties of skinned fibres isolated from the iliofibularis muscle of the freshwater turtle *Pseudemys scripta elegans*. **367**, 79*P*, 1985
^{86}Rubidium uptake in the perfused rat hindlimb; stimulation by insulin. **367**, 96*P*, 1985
Inhibition of unidirectional sugar transport into perfused rat skeletal muscle by the fatty acid oleate. **367**, 97*P*, 1985
Developmental changes in the differentiation of muscle fibres in the Antarctic teleost *Notothenia neglecta*. **367**, 98*P*, 1985
Ionic conductances in frog short skeletal muscle fibres with slow delayed rectifier currents. **368**, 359, 1985
Biochemical separation of delayed rectifier currents in frog short skeletal muscle fibres. **368**, 379, 1985
Diffusible sodium, potassium, magnesium, calcium and phosphorus in frog skeletal muscle. **368**, 545, 1985
A comparison of the heat produced in two successive tetani of isolated fibres from frog tibialis anterior muscle near 0 °C. **369**, 71*P*, 1985
A fast-activated inward calcium current in twitch muscle fibres of the frog (*Rana montezume*). **370**, 151, 1986
Chloride-dependent sodium influx into rat skeletal muscle fibres measured with ion-selective microelectrodes. **371**, 146*P*, 1986

Skeletal muscle (*cont.*)
Isolation of the tubular action potential in the frog skeletal muscle fibre. **371**, 149*P*, 1986
The removal of myoplasmic free calcium following calcium release in frog skeletal muscle. **372**, 261, 1986
Effects of an anabolic hormone on performance and composition of rat skeletal muscle. **373**, 35*P*, 1986
Changes in mitochondrial spacing in fish skeletal muscle induced by environmental temperature. **373**, 78*P*, 1986
Experimental human muscle damage: morphological changes in relation to other indices of damage. **375**, 435, 1986
A study of factors influencing synapse formation by a foreign nerve in skeletal muscle of *Rana pipiens*. **375**, 449, 1986
Effect of tetanus duration on the free calcium during the relaxation of frog skeletal muscle fibres. **376**, 203, 1986
Further characterization of the force-velocity relation in frog skeletal muscle. **377**, 92*P*, 1986
Comparison of birefringence- and tension-transients upon double stimulation in isolated single fibres of frog skeletal muscle. **378**, 63*P*, 1986
Caffeine-induced sarcomeric oscillations in skeletal muscle fibres of the frog. **378**, 106*P*, 1986
The differential effects of twitch potentiators on charge movements in frog skeletal muscle. **380**, 17, 1986
Characteristics of L(+) lactate transport in rat skeletal muscle. **380**, 51*P*, 1986
Studies of the unitary properties of adenosine-5′-triphosphate-regulated potassium channels of frog skeletal muscle. **382**, 213, 1987
Fibre sizes and histochemical staining characteristics in normal and chronically stimulated fast muscle of cat. **382**, 237, 1987
The effect of nifedipine on slow Ca^{2+} inward current and force development in isolated skeletal muscle fibres of the frog. **382**, 122*P*, 1987
Long-term denervation compared in rat and guinea-pig skeletal muscles. **382**, 161*P*, 1987
Mechanisms of action of inorganic phosphate in the relaxation of mammalian vascular smooth muscle. **382**, 169*P*, 1987
Effect of channel blockers on potassium efflux from metabolically exhausted frog skeletal muscle. **383**, 31, 1987
'Off' tails of intramembrane charge movements in frog skeletal muscle in perchlorate-containing solutions. **384**, 491, 1987
Influence of chloride concentration and pH on the ^{36}Cl efflux from depolarized skeletal muscle of *Rana temporaria*. **385**, 49, 1987
Relationship between mitochondria and oxygen consumption in isolated cat muscles. **385**, 661, 1987
Effects of the calcium antagonist gallopamil (D600) upon excitation–contraction coupling in toe muscle fibres of the frog. **385**, 693, 1987
The sarcomere length–tension relation determined in short segments of intact muscle fibres of the frog. **385**, 709, 1987
Rat muscle during post-natal development: evidence in favour of no interconversion between fast- and slow-twitch fibres. **386**, 395, 1987
Intramembrane charge movement in frog skeletal muscle fibres. Properties of charge 2. **387**, 489, 1987
Sodium channels near end-plates and nuclei of snake skeletal muscle. **388**, 213, 1987
The temperature dependence of isometric contractions of single, intact fibres dissected from a mouse foot muscle. **390**, 285, 1987
Regional heterogeneity of blood flow in resting skeletal muscle in the rabbit. **390**, 118*P*, 1987
Sex differences in the strength of the human elbow flexor muscles. **390**, 130*P*, 1987
The effect of the guanidinium ion upon excitation-contraction coupling in isolated skeletal muscle fibres of the frog. **390**, 150*P*, 1987
Short-range elasticity and resting tension of relaxed human lower leg muscles. **391**, 451, 1987
Continuous stimulation of organ-cultured rat skeletal muscle. **391**, 2*P*, 1987
Absence of tetracaine-sensitive charge components in rat isolated skeletal muscle. **391**, 89*P*, 1987
Effect of calcium (Ca) buffering by Fura2 on the second component of the intrinsic birefringence signal in frog isolated twitch muscle fibres. **391**, 90*P*, 1987
Human skeletal muscle adaptation to a 6-month endurance training programme. **391**, 92*P*, 1987
Depletion of calcium from the sarcoplasmic reticulum during calcium release in frog skeletal muscle. **392**, 167, 1987
Sarcolemmal vesicles from mammalian, including human, skeletal muscle. **392**, 12*P*, 1987
Effects of electrical stimulation on glutamine transport in perfused rat skeletal muscle. **392**, 28*P*, 1987
Modulation of calcium channels of twitch skeletal muscle fibres of the frog by adrenaline and cyclic adenosine monophosphate. **393**, 307, 1987
The action of external tetraethylammonium ions on unitary delayed rectifier potassium channels of frog skeletal muscle. **393**, 467, 1987
A comparison of reinnervation of fast and slow muscle in the rat. **394**, 18*P*, 1987
Response of skeletal muscles from normal and dystrophic mice (C57B1/6J dy^{2J}) to a local decrease in Ca^{2+}. **394**, 21*P*, 1987
Hypertonic contractures of isolated rat soleus muscle. **394**, 25*P*, 1987
Quantitative histochemical analysis of skeletal muscle adaptation to endurance training in man. **394**, 72*P*, 1987
Calcium-dependent force and skeletal troponin C_{DANZ} fluorescence in rabbit psoas skinned fibres. **394**, 145*P*, 1987

Skeletal muscle fibre
Tension transients during steady shortening of frog muscle fibres. **361**, 131, 1985

Skeletal muscle fibre (*cont.*)
Dependence of adenosine triphosphatase activity of rabbit psoas muscle fibres and myofibrils on substrate concentration. **365**, 259, 1985
Effect of altered extracellular potassium and calcium on birefringence signal and twitch from isolated frog skeletal muscle fibres. **369**, 79*P*, 1985
Tension transients during the rise of tetanic tension in frog muscle fibres. **372**, 595, 1986
Intracellular free magnesium in frog skeletal muscle fibres measured with ion-selective micro-electrodes. **378**, 461, 1986
Effects of caffeine on intracellular calcium concentration in frog skeletal muscle fibres. **383**, 269, 1987
Length–tension relations of Ba^{2+}- and Ca^{2+}-induced contractions of freeze-dried skinned single skeletal muscle fibres of the rabbit. **390**, 146*P*, 1987
Skeletal muscle metabolism
Skeletal muscle metabolism, contraction force and glycogen utilization during prolonged electrical stimulation in humans. **374**, 493, 1986
Skeletofusimotor innervation
Activation of cat muscle spindles by static skeletofusimotor axons. **369**, 323, 1985
Skin
Mechanical properties of skin and responsiveness of slowly adapting type I mechanoreceptors in rats at different ages. **371**, 329, 1986
Responsiveness and ultrastructure of slowly adapting type I cutaneous mechanoreceptors in vitamin A deficient rats. **371**, 339, 1986
Plasma extravasation after localized skin heating in the rat. **390**, 111*P*, 1987
Skinned fibre
The stiffness of frog skinned muscle fibres at altered lateral filament spacing. **378**, 175, 1986
Activation of the contractile apparatus of skinned fibres of frog by the divalent cations barium, cadmium and nickel. **380**, 75, 1986
Sleep
Device to prevent vehicle drivers falling asleep **371**, 22*P*, 1986
The effect of sleep and physical training on heart period in man. **371**, 77*P*, 1986
Vasodilatation in forearm and calf during sleep in human subjects. **373**, 50*P*, 1986
The effects of some centrally active adrenergic agonists and antagonists on sleeping time in the rat. **378**, 45*P*, 1986
Thalamic burst patterns in the naturally sleeping cat: a comparison between cortically projecting and reticularis neurones. **379**, 429, 1986
Magnetic stimulation of the human brain during natural sleep. **388**, 48*P*, 1987
The labile respiratory activity of ribcage muscles of the rat during sleep. **389**, 99, 1987
Slow current
Slow membrane currents in bursting pace-maker neurones of *Tritonia*. **382**, 425, 1987
Slow inactivation
Slow sodium channel inactivation in rat fast-twitch muscle. **383**, 327, 1987
Comparison between slow sodium channel inactivation in rat slow- and fast-twitch muscle. **383**, 339, 1987
Slow inward current
Inward current related to contraction in guinea-pig ventricular myocytes. **385**, 565, 1987
Slow muscle
Some properties of the contractile system and sarcoplasmic reticulum of skinned slow fibres from *Xenopus* muscle. **373**, 1, 1986
Slow synaptic potential
Muscarinic slow excitation and muscarinic inhibition of synaptic transmission in the rat neostriatum. **380**, 593, 1986
Slow wave
Electrophysiology of smooth muscle of the small intestine of some mammals. **372**, 501, 1986
Small intestine
Descending reflex activity in the chicken small intestine. **360**, 69*P*, 1985
Electrophysiology of smooth muscle of the small intestine of some mammals. **372**, 501, 1986
The transport of uric acid across mouse small intestine *in vitro*. **378**, 229, 1986
Small intestinal motility and transit by electromyography and radiology in the fasted and fed pig. **379**, 245, 1986
Intrinsic reflexes underlying peristalsis in the small intestine of the domestic fowl. **380**, 311, 1986
High apical membrane Cl^- permeability in isolated *Necturus* small intestine. **390**, 99*P*, 1987
Characteristics of transmural potential changes associated with the proton–peptide co-transport in toad small intestine. **394**, 481, 1987
Smooth muscle, *see also* Arterial smooth muscle, Vascular smooth muscle
The action of acetylcholine on single cells of longitudinal smooth muscle of rabbit jejunum studied by whole-cell voltage-clamp. **358**, 84*P*, 1985
Some properties of the circular myometrium of the sheep throughout pregnancy and during labour. **359**, 1, 1985
Electrical responses of smooth muscle cells of the rabbit ear artery to adenosine triphosphate. **359**, 401, 1985
Effects of calcium and substrate on force–velocity relation and energy turnover in skinned smooth muscle of the guinea-pig. **360**, 347, 1985
Membrane potential and mechanical responses evoked by bath-applied noradrenaline in the isolated rat anococcygeus muscle. **360**, 60*P*, 1985
Differential sensitivities of the responses to K^+ ions and oxygen on the guinea-pig ductus arteriosus. **361**, 38*P*, 1985
Effects of readmission of substrate on the membrane potential in glycogen-depleted guinea-pig taenia coli. **362**, 39, 1985
Dependence on calcium of potassium- and agonist-induced changes in potassium permeability of rabbit ear artery. **364**, 151, 1985
Slow wave heterogeneity within the circular muscle of the canine gastric antrum. **366**, 221, 1985

Smooth muscle (*cont.*)
The effects of bicarbonate and foreign anions on chloride transport in smooth muscle of the guinea-pig vas deferens. **366**, 267, 1985
Calcium regulation of potassium fluxes in rabbit aorta during activation by noradrenaline or high potassium medium. **367**, 27, 1985
The neural and non-neural mechanisms involved in urethral activity in rabbits. **367**, 57, 1985
Cholinergic agonists suppress a potassium current in freshly dissociated smooth muscle cells of the toad. **367**, 503, 1985
Effects of foreign anions upon vascular responses of the isolated rabbit ear to pH change. **367**, 45*P*, 1985
How does vascular muscle in the isolated rabbit ear adapt its tone after alkaline or acid loads? **367**, 46*P*, 1985
Free calcium changes indicated by the fluorescent dye, fura-2, in smooth muscle cells isolated from guinea-pig taenia coli. **367**, 90*P*, 1985
Gradient in excitation–contraction coupling in canine gastric antral circular muscle. **369**, 283, 1985
Is pH_i involved in the temperature-sensitivity of the oxygen-mediated response in the smooth muscle of guinea-pig ductus arteriosus? **369**, 74*P*, 1985
Changes of $[Ca^{2+}]_i$, estimated by quin 2 during contraction of the longitudinal layer of the guinea-pig ileum. **369**, 97*P*, 1985
Distribution and properties of excitatory and inhibitory junction potentials in circular muscle of the guinea-pig stomach. **370**, 339, 1986
Characteristics of neuro-effector transmission in the smooth muscle layer of dog bronchiole and modifications by autacoids. **370**, 551, 1986
Effects of frequency on the wave form of propagated slow waves in canine gastric antral muscle. **371**, 179, 1986
Modulation of transient outward currents by internal calcium in single visceral and vascular smooth muscle cells of rabbit. **371**, 199*P*, 1986
Relaxation of the smooth muscle of the rat tail artery associated with hyperpolarization of the smooth muscle. **371**, 261*P*, 1986
Calcium-activated potassium channels in canine airway smooth muscle. **372**, 113, 1986
Electrophysiology of smooth muscle of the small intestine of some mammals. **372**, 501, 1986
Effect of potassium and acetylcholine on canine intestinal smooth muscle. **372**, 521, 1986
An *in vitro* investigation of normal and abnormal human bladder smooth muscle. **372**, 37*P*, 1986
Reduction in plasmalemmal sodium gradient leads to elevated cytosolic free calcium concentration in fura-2-loaded guinea-pig smooth-muscle cells. **372**, 80*P*, 1986
β-Adrenergic inhibition of bovine mesenteric lymphatics. **374**, 401, 1986
A phorbol ester has dual actions on the mechanical response in the rabbit mesenteric and porcine coronary arteries. **375**, 515, 1986
Enteric neural regulation of slow waves in circular muscle of the canine proximal colon. **377**, 297, 1986
Two types of single-channel and whole-cell calcium or barium currents in single smooth muscle cells of rabbit ear artery and the effects of noradrenaline. **377**, 36*P*, 1986
Effect of catecholamines on isolated strips of sphincteric muscle from human digestive tract. **378**, 97*P*, 1986
Potential-dependent calcium inward current in a single isolated smooth muscle cell of the guinea-pig taenia caeci. **380**, 1, 1986
Inactivation of calcium channel current in rat uterine smooth muscle: evidence for calcium- and voltage-mediated mechanisms. **380**, 111, 1986
Motoneurones of the submucous plexus regulate electrical activity of the circular muscle of canine proximal colon. **380**, 293, 1986
Spontaneous transient outward currents in single visceral and vascular smooth muscle cells of the rabbit. **381**, 385, 1986
Capacitance of the rabbit portal vein and inferior vena cava. **381**, 417, 1986
Inward rectification in freshly isolated single smooth muscle cells of the rabbit jejunum. **383**, 461, 1987
Selectivity of calcium channels in rat uterine smooth muscle: interactions between sodium, calcium and barium ions. **384**, 247, 1987
Investigation of factors affecting the intracellular sodium activity in the smooth muscle of guinea-pig ureter. **385**, 483, 1987
Actions of neuropeptide Y on innervated and denervated rat tail arteries. **386**, 19, 1987
Calcium-stimulated sodium efflux from rabbit vascular smooth muscle. **388**, 245, 1987
Action of noradrenaline on single smooth muscle cells freshly dispersed from the rat anococcygeus muscle. **389**, 513, 1987
Contractile properties of skinned guinea-pig taenia coli smooth muscle at varying ionic strength. **390**, 224*P*, 1987
An investigation of sodium–calcium exchange in the smooth muscle of guinea-pig ureter. **391**, 325, 1987
Contractile responses of isolated human ureteric smooth muscle to extracellular pH changes. **391**, 49*P*, 1987
Myogenic electrical control activity in longitudinal muscle of human and dog colon. **392**, 21, 1987
The calcium channel current of pregnant rat single myometrial cells in short-term primary culture. **392**, 253, 1987
The role of membrane depolarization in the contractile response of the rabbit basilar artery to 5-hydroxytryptamine. **392**, 333, 1987
Calcium-dependent inactivation of potential-dependent calcium inward current in an isolated guinea-pig smooth muscle cell. **392**, 431, 1987
Contractile properties of smooth muscle cells isolated from the dog carotid artery. **392**, 67*P*, 1987

Smooth muscle (*cont.*)
The effect of Na ions and loop diuretics on transmembrane ^{36}Cl fluxes in isolated guinea-pig smooth muscles. **394**, 86*P*, 1987
Na, K, Cl co-transport is involved in Cl accumulation in the smooth muscle of isolated guinea-pig vas deferens. **394**, 87*P*, 1987
Smooth muscle contraction
Calcium release by noradrenaline from central sarcoplasmic reticulum in rabbit main pulmonary artery smooth muscle. **366**, 153, 1985
The interaction between noradrenaline activation and distension activation of the rabbit ear artery. **375**, 283, 1986
Tonic contraction of canine gastric muscle during long-lasting calcium removal and its dependence on magnesium. **393**, 375, 1987
Smooth muscle potential
Two types of 'slow waves' in intestinal smooth muscle of cat. **392**, 51, 1987
Snail neurone
Effects of halothane on the giant serotonin-containing cerebral neurones of *Lymnaea*. **369**, 56*P*, 1985
The electrotonic location of low-resistance intercellular junctions between a pair of giant neurones in the snail *Lymnaea*. **370**, 111, 1986
Intracellular factors for the maintenance of calcium currents in perfused neurones from the snail, *Lymnaea stagnalis*. **370**, 631, 1986
Multiple receptor sites for a molluscan peptide (FMRFamide) and related peptides of *Helix*. **382**, 51, 1987
Sodium, *see also* Intracellular sodium
Changes in sodium activity during light stimulation in photoreceptors, glia and extracellular space in drone retina. **362**, 415, 1985
Comparison of dose responses to atrial natriuretic factor (ANF) and human urinary natriuretic factor (UNF) in water loaded rats. **369**, 123*P*, 1985
Phosphate transport in brush-border membranes from control and rachitic pig kidney and small intestine. **384**, 479, 1987
Voltage-dependent magnesium block of adenosine-triphosphate-sensitive potassium channel in guinea-pig ventricular cells. **387**, 251, 1987
Some properties of a system for sodium-dependent outward movement of magnesium from metabolizing human red blood cells. **390**, 367, 1987
Sodium-dependent suppression of γ-aminobutyric-acid-gated chloride currents in internally perfused frog sensory neurones. **392**, 543, 1987
The gut and sodium regulation in sheep and other herbivores. **394**, 134*P*, 1987
Sodium activity
The effect of Na^+ and HCO_3^- ions on recovery from an acid load in the smooth muscle of guinea-pig ureter. **369**, 80*P*, 1985
Effect of prolonged depolarizations on twitch tension and intracellular sodium activity in sheep cardiac Purkinje fibres. **384**, 355, 1987
Sodium appetite
Effects of angiotensin or carbachol on sodium intake and excretion in adrenalectomized or deoxycorticosterone-treated rats. **359**, 447, 1985
The consumption of solutions of sodium chloride and potassium chloride by rats after removal of area postrema. **360**, 81*P*, 1985
Water and salt intake of wild rabbits (*Oryctolagus cuniculus* (L)) following dipsogenic stimuli. **362**, 285, 1985
The effect of captopril on sodium appetite in adrenalectomized and deoxycorticosterone-treated rats. **365**, 1, 1985
Salt appetite during pregnancy in sheep on moderate or low-sodium diets. **390**, 189*P*, 1987
Salt appetite in the pigeon in response to pharmacological treatments. **393**, 555, 1987
Sodium–calcium exchange
Isolation of sodium–calcium exchange current in single ventricular cells of guinea-pig. **371**, 191*P*, 1986
Block of sodium–calcium exchange in cultured chick embryo heart cells by lanthanum and manganese. **371**, 192*P*, 1986
Sodium–calcium exchange in the outer segments of bovine rod photoreceptors. **373**, 25, 1986
The arrhythmogenic current I_{Ti} in the absence of electrogenic sodium–calcium exchange in sheep cardiac Purkinje fibres. **374**, 201, 1986
Comparison of the effects of potassium and membrane potential on the calcium-dependent sodium efflux in squid axons. **378**, 53, 1986
Influence of membrane potential on calcium efflux from giant axons of *Loligo*. **378**, 77, 1986
Effects of amiloride and 3′,4′-dichlorobenzamil on Na–Ca exchange in the squid axon. **378**, 107*P*, 1986
The regulation of cytosolic calcium in rat brain synaptosomes by sodium-dependent calcium efflux. **381**, 17, 1986
Activation of the Na:Ca exchange in salamander rods by intracellular Ca. **382**, 135*P*, 1987
Stoichiometry of sodium:calcium exchange in dog red blood cells. **382**, 142*P*, 1987
Identification of sodium–calcium exchange current in single ventricular cells of guinea-pig. **384**, 199, 1987
Effect of sodium–potassium pump inhibition and low sodium on membrane potential in cultured embryonic chick heart cells. **387**, 549, 1987
Electrogenic sodium–calcium exchange in cultured embryonic chick heart cells. **387**, 567, 1987
Voltage dependence of Na:Ca exchange in isolated salamander rod outer segments. **390**, 162*P*, 1987
Inhibition of Na:Ca exchange in isolated salamander rods by quinidine. **390**, 163*P*, 1987
An investigation of sodium–calcium exchange in the smooth muscle of guinea-pig ureter. **391**, 325, 1987
Measurement of sodium–calcium exchange in salamander rods. **391**, 347, 1987
The effect of ions on sodium–calcium exchange in salamander rods. **391**, 371, 1987
Regulation of cell calcium and contractility in mammalian arterial smooth muscle: the role of sodium–calcium exchange. **392**, 617, 1987

Sodium–calcium exchange(*cont.*)
$[Ca^{2+}]_i$-transients, measured with fura2, and membrane currents that result from Na/Ca exchange in single isolated guinea-pig ventricular myocytes. **394**, 27*P*, 1987
Transient inward current and an outward-rectifying background current in single guinea-pig cardiac cells are blocked by a vesicular sodium–calcium exchange inhibitor. **394**, 28*P*, 1987

Sodium channel
Evidence for two transient sodium currents in the frog node of Ranvier. **361**, 339, 1985
Sodium channels in rat cultured astrocytes. **361**, 18*P*, 1985
Dynamics of strychnine block of single sodium channels in bovine chromaffin cells. **370**, 395, 1986
The conductance and density of sodium channels in the cut-open squid giant axon. **377**, 463, 1986
Stabilization of sodium channel states by deltamethrin in mouse neuroblastoma cells. **380**, 191, 1986
Properties of potassium and sodium channels in frog internode. **381**, 119, 1986
Purified and unpurified sodium channels from eel electroplax in planar bilayers. **381**, 66*P*, 1986
Properties of maintained sodium current induced by a toxin from *Androctonus* scorpion in frog node of Ranvier. **383**, 93, 1987
Slow sodium channel inactivation in rat fast-twitch muscle. **383**, 327, 1987
Comparison between slow sodium channel inactivation in rat slow- and fast-twitch muscle. **383**, 339, 1987
Sodium current kinetics in cat atrial myocytes. **384**, 169, 1987
Properties of single sodium channels translated by *Xenopus* oocytes after injection with messenger ribonucleic acid. **386**, 73, 1987
Sodium channels near end-plates and nuclei of snake skeletal muscle. **388**, 213, 1987
Hodgkin-Huxley parameters TTX-sensitive and TTX-insensitive sodium channels in human myoballs. **390**, 78*P*, 1987
Block by Ca of single cardiac Na channels from the guinea-pig heart. **390**, 79*P*, 1987
Interactions of guanidinium ions with sodium channels in frog myelinated nerve fibre. **391**, 85, 1987
Sodium and potassium currents in acutely demyelinated internodes of rabbit sciatic nerves. **391**, 631, 1987
The distribution of sodium and potassium channels in single demyelinated axons of the frog. **392**, 587, 1987
Inactivation of the guinea-pig cardiac Na channel as examined by the new oil-gap method. **394**, 42*P*, 1987

Sodium conductance
A calcium-activated sodium conductance produces a long-duration action potential in the egg of a nemertean worm. **381**, 263, 1986

Sodium current
Na current inactivation develops with a delay in bullfrog atrial myocytes. **358**, 56*P*, 1985
Dual effects of internal *n*-alkyltrimethylammonium ions on the sodium current of the squid giant axon. **361**, 47, 1985
Fast Na current inhibition by cations of group 2b in isolated guinea-pig and neonatal rat cardiac cells. **369**, 87*P*, 1985
Shift in inactivation and activation parameters of Na^+ current in internally dialysed canine cardiac Purkinje cells. **371**, 194*P*, 1986
A quantitative description of the sodium current in the rat sympathetic neurone. **380**, 275, 1986
The effects of carboxylic esters on Na current inactivation in axons of *Loligo*. **380**, 22*P*, 1986
A comparison of sodium currents in rat and frog myelinated nerve: normal and modified sodium inactivation. **382**, 175, 1987
Nonlinear relationship of maximal upstroke velocity to the sodium current in single canine cardiac Purkinje cells. **382**, 103*P*, 1987
External Ca^{2+} ions block unitary Na^+ currents through Ca^{2+} channels of cultured chick sensory neurones by favouring prolonged closures. **382**, 124*P*, 1987
Tetrodotoxin-resistant sodium current of rat nodose neurones: monovalent cation selectivity and divalent cation block. **389**, 255, 1987
Sodium currents in dissociated bull-frog sympathetic neurones. **389**, 605, 1987
Sodium current in single cells from bullfrog atrium: voltage dependence and ion transfer properties. **391**, 235, 1987
Burst kinetics of sodium channels which lack fast inactivation in mouse neuroblastoma cells. **392**, 563, 1987
Calcium dependence of voltage sensitivity in adenosine 3′,5′-cyclic phosphate-stimulated sodium current in *Pleurobranchaea*. **393**, 233, 1987
Changes in sodium, calcium and potassium currents during early embryonic development of the ascidian *Boltenia villosa*. **393**, 619, 1987

Sodium exchange
[^{3}H]Noradrenaline release from rabbit pulmonary artery: sodium-pump-dependent sodium–calcium exchange. **393**, 29, 1987

Sodium excretion
Role of atrial natriuretic peptide (ANP) in mineralocorticoid escape in the dog. **371**, 249*P*, 1986
Renal electrolyte excretion and renin release during calcium and parathormone infusions in conscious rabbits. **373**, 329, 1986
The influence of neurohypophysial hormones on renal function in the acutely hypophysectomized rat. **381**, 439, 1986
A synergistic effect of oxytocin and vasopressin on sodium excretion in the neurohypophysectomized rat. **381**, 453, 1986
Renal response to 0·9% (w/v) saline infusion following a period of 0·45% saline or 2·5% dextrose infusion in the rat. **382**, 145*P*, 1987

Sodium excretion(*cont.*)
Renal tubular effects and changes in whole blood calcium ion activity (a_{Ca}) during calcium chloride ($CaCl_2$) infusion in man. **382**, 146*P*, 1987
Indomethacin does not alter the sodium excretion and the urinary dilution caused by human α atrial natriuretic peptide in man. **384**, 40*P*, 1987
Water deprivation: effects on fluid and electrolyte handling and plasma biochemistry in Long–Evans and Brattleboro rats. **385**, 35, 1987
Renal mechanisms of human α-atrial natriuretic peptide in man. **387**, 31, 1987
Natriuretic action of oxytocin (OXT) and arginine-vasopressin (AVP) infusion during water deprivation in rats with a lesion in the region anterior and ventral to the third ventricle (AV3V). **388**, 10*P*, 1987
Effect of glucose loading on the renal response to 0·45% saline infusion in the rat. **391**, 51*P*, 1987
The effects of stimulating carotid chemoreceptors on renal haemodynamics and function in dogs. **392**, 451, 1987
The role of angiotensin II in the renal responses to somatic nerve stimulation in the rat. **393**, 425, 1987
Potentiation of the natriuretic action of angiotensin by the Na/K ATPase inhibitor bufalin in the rat. **394**, 52*P*, 1987

Sodium flux
Two distinct kinetic phases of desensitization of acetylcholine receptors of clonal rat PC12 cells. **389**, 45, 1987

Sodium–hydrogen exchange
Control of cell volume and ion transport by β-adrenergic catecholamines in erythrocytes of rainbow trout, *Salmo gairdneri*. **382**, 123, 1987
Ion movements and volume changes induced by catecholamines in erythrocytes of rainbow trout: effect of pH. **382**, 145, 1987
Evidence for sodium–hydrogen ion exchange in the basolateral membrane of the isolated frog skin epithelium: kinetic studies. **382**, 136*P*, 1987
Evidence for basolateral sodium–hydrogen exchange in frog skin epithelium and its role in sodium transport and intracellular pH regulation. **382**, 137*P*, 1987
Influence of sodium–hydrogen exchange on intracellular pH, sodium and tension in sheep cardiac Purkinje fibres. **390**, 93, 1987
Amiloride-sensitive Na, H-exchange in rat isolated small arteries. **390**, 56*P*, 1987
Stimulation of Na^+/H^+ antiport in plasma membrane vesicles from rat liver perfused with dibutyryl cyclic AMP. **391**, 102*P*, 1987

Sodium inactivation
A comparison of sodium currents in rat and frog myelinated nerve: normal and modified sodium inactivation. **382**, 175, 1987

Sodium permeability
Effects of stimulation and diphenylhydantoin on the intracellular sodium activity in Purkinje fibres of sheep heart. **362**, 331, 1985

Sodium–potassium ATPase
Evidence for the ordered release of rubidium ions occluded within the Na, K-ATPase of mammalian kidney. **368**, 453, 1985
Parallel studies of cation release and conformational change in dog kidney Na,K-ATPase. **371**, 256*P*, 1986
Potassium–potassium exchange as part of the overall reaction mechanism of the sodium pump of the human red blood cell. **374**, 221, 1986
Effects of mono and divalent cations on total and partial reactions catalysed by pig kidney Na,K-ATPase. **375**, 1, 1986
The order of addition of sodium and release of potassium at the inside of the sodium pump of the human red cell. **381**, 149, 1986
Comparison of rates of cation release and of conformational change in dog kidney Na,K-ATPase. **383**, 477, 1987
Direct evidence for tight binding of cobalt ions to phosphorylated forms of canine Na^+,K^+-ATPase. **386**, 112*P*, 1987
The effect of membrane potential on the mammalian sodium–potassium pump reconstituted into phospholipid vesicles. **387**, 331, 1987
Marked inhibition of canine renal Na/K ATPase by a bufodienolide but weak natriuretic activity in the rat. **390**, 94*P*, 1987
Rat hypothalamic Na,K-ATPase inhibitory activity is heterogenous and mostly of small-molecular-weight size. **390**, 97*P*, 1987

Sodium–potassium–chloride co-transport
Potassium uptake in the mouse submandibular gland is dependent on chloride and sodium and abolished by piretanide. **378**, 97, 1986

Sodium–potassium pump
The isolated Na–K pump current: effects of changing external K, intracellular Na and ATP in internally dialysed single guinea-pig ventricular cells. **358**, 55*P*, 1985
Cation activation of the pig kidney sodium pump: transmembrane allosteric effects of sodium. **359**, 119, 1985
Sodium–potassium pump in guinea-pig parotid gland: secretagogue stimulation of ouabain binding to dispersed acini. **360**, 121, 1985
Identification of a Na/K pump in cultured human monocytes. **366**, 90*P*, 1985
Potassium–potassium exchange as part of the overall reaction mechanism of the sodium pump of the human red blood cell. **374**, 221, 1986
Facilitation of transmitter action on catecholamine output by cardiac glycoside in perfused adrenal gland of guinea-pig. **374**, 475, 1986
Effects of mono and divalent cations on total and partial reactions catalysed by pig kidney Na,K-ATPase. **375**, 1, 1986
Transmembrane ion balance in slowly and rapidly adapting lobster stretch receptor neurones. **377**, 171, 1986
Sodium activation of the Na,K-pump in isolated sheep cardiac Purkinje strands. **381**, 91*P*, 1986
Ion activities and potassium uptake mechanisms of glial cells in guinea-pig olfactory cortex slices. **382**, 159, 1987

Sodium–potassium pump (*cont.*)
Properties of an electrogenic sodium–potassium pump in isolated canine Purkinje myocytes. **383**, 251, 1987
Comparison of rates of cation release and of conformational change in dog kidney Na,K-ATPase. **383**, 477, 1987
Effects of hypoxia on rat hippocampal neurones *in vitro*. **384**, 131, 1987
The effects of membrane potential on active and passive sodium transport in *Xenopus* oocytes. **385**, 643, 1987
The effect of membrane potential on the mammalian sodium–potassium pump reconstituted into phospholipid vesicles. **387**, 331, 1987
Quantification of the maximum capacity for active sodium–potassium transport in rat skeletal muscle. **388**, 163, 1987
Electrogenic and electroneutral transport modes of the mammalian renal Na/K pump. **390**, 98*P*, 1987
Ionic basis of membrane potential in developing ectoderm of the *Xenopus* blastula. **393**, 525, 1987

Sodium pump
Transient leakiness of HeLa cells to Na and K during 'rounding up' with trypsin, EDTA and pronase. **358**, 70*P*, 1985
Activity-dependent excitability changes in normal and demyelinated rat spinal root axons. **365**, 239, 1985
Origin and voltage dependence of asparagine-induced depolarization in intestinal cells of *Xenopus* embryo. **366**, 197, 1985
Activation of acetylcholine synthesis in cat sympathetic ganglia: dependence on external choline and sodium-pump rate. With an Appendix by K. J. Worsley and R. I. Birks. **367**, 401, 1985
Problems associated with the use of detergents in assays of Na, K-ATPase activity in membrane vesicle preparations. **367**, 69*P*, 1985
Low doses of ethanol inhibit the sodium pump of isolated rat hepatocytes. **367**, 92*P*, 1985
Evidence for the ordered release of rubidium ions occluded within the Na, K-ATPase of mammalian kidney. **368**, 453, 1985
Effect of denervation during development of the Sprague–Dawley rat upon [^{3}H]-ouabain binding by skeletal muscles. **369**, 58*P*, 1985
The metabolic clearance rate for vasopressin and the pressor responsiveness to vasopressin in conscious male and female rats. **371**, 90*P*, 1986
Voltage dependence of Na/K pump-mediated ^{22}Na efflux and current in squid giant axon. **371**, 144*P*, 1986
Na/K (electrogenic) pump current in isolated canine cardiac Purkinje myocytes. **371**, 190*P*, 1986
Dependence of Na/K pump current on intracellular [Na] in isolated cells from guinea-pig ventricle. **371**, 201*P*, 1986
Guinea-pig diaphragm and spontaneous recovery from depolarizing drugs *in vitro*: effect of potassium-free solution. **374**, 43*P*, 1986
The voltage dependence of the Na–K pump in isolated *Xenopus* oocytes: simultaneous measurement of membrane current and ^{22}Na efflux. **377**, 84*P*, 1986
Glycolysis and oxidative phosphorylation during activation of the sodium pump in the taenia from guinea-pig caecum. **381**, 65, 1986
The order of addition of sodium and release of potassium at the inside of the sodium pump of the human red cell. **381**, 149, 1986
[Na] dependence of the Na/K pump current–voltage relationship in isolated cells from guinea-pig ventricle. **382**, 106*P*, 1987
Triggered activity in atrial fibres of canine coronary sinus: role of extracellular potassium accumulation and depletion. **383**, 191, 1987
Comparison of rates of cation release and of conformational change in dog kidney Na,K-ATPase. **383**, 477, 1987
The role of the sodium pump during prolonged end-plate currents in guinea-pig diaphragm. **384**, 377, 1987
High internal sodium on sodium pump density and mRNA for the alpha subunit of the sodium pump in human cultured cells. **390**, 96*P*, 1987
Number of Na^+-K^+ pumps and capacity for K^+ re-uptake in mouse muscles stimulated *in vitro*. **390**, 222*P*, 1987
Changes in the numbers of high-affinity ouabain binding sites on murine neuroblastoma cells. **391**, 20*P*, 1987
[^{3}H]Noradrenaline release from rabbit pulmonary artery: sodium-pump-dependent sodium–calcium exchange. **393**, 29, 1987

Sodium reabsorption
Interaction of the renin–angiotensin system and the renal nerves in the regulation of rat kidney function. **369**, 311, 1985

Sodium transport
Electrogenic active proton pump in *Rana esculenta* skin and its role in sodium ion transport. **359**, 331, 1985
Transport of sodium and chloride across rat gastric mucosa *in vitro*. **360**, 293, 1985
Effect of ouabain on tone, membrane potential and sodium efflux compared with [^{3}H]ouabain binding in rat resistance vessels. **362**, 215, 1985
Oxygen consumption and active sodium and chloride transport in bovine tracheal epithelium. **372**, 51, 1986
Interaction between sodium and chloride transport in bovine tracheal epithelium. **376**, 299, 1986
The role of amiloride-blockable sodium transport in adrenaline-induced lung liquid reabsorption in the fetal lamb. **376**, 321, 1986
Transcellular sodium fluxes and pump activity in *Necturus* gall-bladder epithelial cells. **382**, 35, 1987
In vitro effects of dexamethasone on sodium transport across rat colon. **383**, 69, 1987
Calcium-stimulated sodium efflux from rabbit vascular smooth muscle. **388**, 245, 1987

Sodium uptake
The effect of Librium (chlordiazepoxide hydrochloride) on the protoveratrine A-stimulated uptake of ^{22}Na by slices of rat cerebral cortex *in vitro*. **373**, 22*P*, 1986

Soleus muscle
Quantification of the maximum capacity for active sodium–potassium transport in rat skeletal muscle. **388**, 163, 1987
Reflex excitability of human soleus motoneurones during voluntary shortening or lengthening contractions. **390**, 271, 1987

Somatosensory cortex
Bilateral receptive fields in Sm1 neocortex of the rat. **358**, 9*P*, 1985
A Mg^{2+} and ketamine-sensitive e.p.s.p. in slices of rat somatosensory cortex: a role for *N*-methyl-aspartate receptors. **358**, 22*P*, 1985
Bilateral synchronous firing and receptive fields of single units in Sm1 neocortex of the Althesin-anaesthetized rat. **360**, 27*P*, 1985
Convergence and divergence of input to layer IV rat barrel cortex. **387**, 54*P*, 1987
Computer simulation of somatotopic map plasticity. **390**, 31*P*, 1987

Somatosensory system
Excitatory amino acid receptors and synaptic transmission in the rat ventrobasal thalamus. **391**, 499, 1987

Somatostatin
Somatostatin-like immunoreactivity in the alimentary tract of the sheep. **371**, 208*P*, 1986
Localization of somatostatin mRNA in rat brain by *in situ* hybridization. **372**, 18*P*, 1986
Investigation of the mechanism of somatostatin action on growth hormone secretion in rats. **373**, 75*P*, 1986
Somatostatin-14 inhibits insulin-induced stimulation of amino acid transport in the isolated rat pancreas. **384**, 44*P*, 1987
Retrograde labelling of somatostatin-containing neurones in the trigeminal ganglion following subcutaneous injections of neuronal pathway tracers in the rat. **386**, 102*P*, 1987
Somatostatin increases an inwardly rectifying potassium conductance in guinea-pig submucous plexus neurones. **390**, 335, 1987

Spasticity
An assessment of the use of the Wartenburg pendulum test in an elderly population. **373**, 80*P*, 1986

Spatial and temporal tuning
Spatial and temporal frequency selectivity of neurones in visual cortical areas V1 and V2 of the macaque monkey. **365**, 331, 1985

Spatial frequency
Spatial-frequency characteristics of neurones of area 18 in the cat: dependence on the velocity of the visual stimulus. **359**, 259, 1985
The contrast sensitivity of human colour vision to red–green and blue–yellow chromatic gratings. **359**, 381, 1985
Interhemispheric transfer of visual information in humans: spatial characteristics. **384**, 633, 1987

Spectral sensitivity
A comparison of the spectral sensitivities of the chicken and the pigeon. **366**, 13*P*, 1985
Photopic spectral sensitivity of the cat. **382**, 537, 1987

Spermatozoon
Accumulation of calcium in cold-shocked spermatozoa of the ram and its intracellular localization using pyroantimonate. **365**, 65*P*, 1985
Calcium ion movement across the plasma membrane of ram spermatozoa subjected to mild cold stress. **372**, 86*P*, 1986
Ionic regulation of sea urchin sperm motility, metabolism and fertilizing capacity. **379**, 347, 1986

Spike-triggered averaging
The detection of monosynaptic connexions from inspiratory bulbospinal neurones to inspiratory motoneurones in the cat. **368**, 33, 1985
Monosynaptic excitation of thoracic motoneurones by inspiratory neurones of the nucleus tractus solitarius in the cat. **390**, 415, 1987

Spinal cord
Electrophysiological evidence that interneurones located in lamina VIII of the spinal cord mediate crossed reflexes in the cat. **358**, 33*P*, 1985
Evoked potentials to and from epidural electrodes in man. **358**, 34*P*, 1985
Efflux of 5-hydroxytryptamine and noradrenaline into spinal cord superfusates during stimulation of the rat medulla. **359**, 151, 1985
Motor conduction velocity in the human spinal cord. **360**, 50*P*, 1985
Sources of input to interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. **361**, 379, 1985
Organization of input to the interneurones mediating group I non-reciprocal inhibition of motoneurones in the cat. With an Appendix by P. J. Harrison. **361**, 403, 1985
Somatotopic organization in the thoracic spinal cord of the cat. **361**, 45*P*, 1985
Distribution of α-adrenergic, muscarinic and opiate receptors within lumbar spinal cord of cat. **362**, 42*P*, 1985
Dual-component amino-acid-mediated synaptic potentials: excitatory drive for swimming in *Xenopus* embryos. **363**, 35, 1985
Reciprocal inhibitory interneurones in the *Xenopus* embryo spinal cord. **363**, 61, 1985
Cutaneous receptive field and morphological properties of hamstring flexor α-motoneurones in the rat. **364**, 249, 1985
Evidence for the possible involvement of γ-aminobutyric acid (GABA) in cutaneous and muscle-nerve-evoked inhibitions of responses of cat spinal neurones to noxious thermal stimulation. **364**, 42*P*, 1985
Spinothalamic lumbosacral lamina I cells responsive to skin and muscle stimulation in the cat. **365**, 197, 1985
Observations on the mechanism of long-lasting reciprocal inhibition in the human forearm. **365**, 24*P*, 1985

Spinal cord (*cont.*)
A neurophysiological analysis of the effect of kainic acid on nerve fibres and terminals in the cat spinal cord. **368**, 99, 1985
Development of the monosynaptic stretch reflex in the rat: an *in vitro* study. **369**, 127, 1985
Partitioning of monosynaptic Ia excitatory postsynaptic potentials in the motor nucleus of the cat semimembranosus muscle. **369**, 379, 1985
Noxious stimulus-evoked increases in the excitability of the flexor reflex in the decerebrate-spinal rat. **369**, 28*P*, 1985
Regional blood flows in the rabbit spinal cord during sleep. **369**, 131*P*, 1985
Electrophysiological properties of neonatal rat motoneurones studied *in vitro*. **370**, 651, 1986
Morphology of dorsal horn spinocerebellar tract neurones in the cat. **371**, 56*P*, 1986
Functional properties of dorsal horn spinocerebellar tract neurones in the cat. **371**, 57*P*, 1986
Responses of spinal cord neurones to stimulation of articular afferent fibres in the cat. **372**, 575, 1986
Supraspinal excitation and inhibition of viscerosomatic neurones in the thoracic spinal cord of the cat. **373**, 20*P*, 1986
Receptive field profiles and integrative properties of spinocervic l tract cells in the cat. **374**, 335, 1986
On the specificity of sensory reinnervation of cat skeletal muscle. **375**, 587, 1986
Discharge patterns of cervical sympathetic preganglionic neurones related to central respiratory drive in the rat. **378**, 253, 1986
Synaptic physiology of spinal motoneurones of normal and *spastic* mice: an *in vitro* study. **379**, 275, 1986
Activation patterns of embryonic chick hind-limb muscles following blockade of activity and motoneurone cell death. **380**, 157, 1986
Relations between spinocervical and post-synaptic dorsal column neurones in the cat. **381**, 333, 1986
Excitatory actions of single impulses in single hair follicle afferent fibres on spinocervical tract neurones in the cat. **382**, 291, 1987
Actions of trains and pairs of impulses from single primary afferent fibres on single spinocervical tract cells in cat. **382**, 313, 1987
Effect of cutaneous nerve stimulation on voluntary and stretch reflex electromyographic activity in wrist flexors in humans. **382**, 509, 1987
Intracellular recordings from wide dynamic range neurones in the deep dorsal horn of the rat lumbar spinal cord. **382**, 65*P*, 1987
The anatomical distribution of sural nerve afferent fibres within the lumbar spinal cord of the rat is not changed by neonatal administration of capsaicin. **382**, 66*P*, 1987
Synaptic relationships of glutamic acid decarboxylase-immunoreactive boutons with identified hair-follicle afferent terminals in the feline spinal cord. **382**, 68*P*, 1987
The postnatal development of the ventral root reflex: a comparison between *in vivo* and *in vitro* rat spinal cord preparations. **382**, 69*P*, 1987
Propriospinal neurones in the middle lumbar segments of the cat spinal cord interposed in reflex pathways from group II muscle afferents to hindlimb motoneurones. **382**, 70*P*, 1987
Modulation of spinal reciprocal inhibition during postural sway in man. **382**, 71*P*, 1987
Spatial distribution of the cord dorsum potential and its presence during H reflex inhibition in man. **382**, 72*P*, 1987
Delta opioids exert antinociceptive effects in lamina I, but not laminae III–V of rat dorsal horn. **382**, 152*P*, 1987
Intracellular labelling of neurones in rat and frog spinal cord with a low-toxicity cobalt compound. **382**, 199*P*, 1987
Dendritic activities of spinal motoneurones in pigs and rabbits enhanced through chronic stimulation of a dorsal root. **383**, 171, 1987
Spinal cord influences on the colonic myoelectrical activity of fed and fasted rats. **383**, 395, 1987
Supraspinal morphine and descending inhibitions acting on the dorsal horn of the rat. **384**, 81, 1987
The action of neurokinins on dorsal horn neurones in anaesthetized rats and cats. **384**, 68*P*, 1987
Inhibition of monosynaptic reflexes in the human lower limb. **385**, 69, 1987
The role of *N*-methylaspartate receptors in mediating responses of rat and cat spinal neurones to defined sensory stimuli. **385**, 169, 1987
Mechanism of anion permeation through channels gated by glycine and γ-aminobutyric acid in mouse cultured spinal neurones. **385**, 243, 1987
Field potentials generated by group II muscle afferents in the middle lumbar segments of the cat spinal cord. **385**, 393, 1987
Anterior pretectal stimulation alters the responses of spinal dorsal horn neurones to cutaneous stimulation in the rat. **385**, 415, 1987
Somatic and visceral inputs to the thoracic spinal cord of the cat: marginal zone (lamina I) of the dorsal horn. **388**, 383, 1987
The measurement of single motor-axon recurrent inhibitory post-synaptic potentials in the cat. **388**, 631, 1987
Responses of spinothalamic tract cells in the superficial dorsal horn of the primate lumbar spinal cord. **388**, 681, 1987
Electromyographic responses from leg muscles produced by percutaneous electrical stimulation over the lower spinal column in man. **388**, 53*P*, 1987
Spontaneous tetrodotoxin-resistant inhibitory and excitatory potentials in *Xenopus* embryo spinal cord neurones. **388**, 55*P*, 1987
Spinal inhibition of phrenic motoneurones by stimulation of afferents from leg muscle in the cat: blockade by strychnine. **389**, 137, 1987
Morphological and physiological studies of development of the monosynaptic reflex pathway in the rat lumbar spinal cord. **389**, 441, 1987

Spinal cord (*cont.*)
Activation patterns of embryonic chick lumbrosacral motoneurones following large spinal cord reversals. **389**, 491, 1987
Cross-correlation assessment of synaptic strength of single Ia fibre connections with triceps surae motoneurones in cats. **390**, 161, 1987
Response properties of neurones recorded from the deep dorsal horn of 14 to 16 day old rats *in vitro*. **390**, 39*P*, 1987
Evoked and spontaneous $[K^+]_o$ transients are large in neonatal rat lumbar spinal cord: an *in vitro* study. **390**, 46*P*, 1987
Caesium ions activate chloride channels in rat cultured spinal cord neurones. **392**, 231, 1987
The ultrastructure of cells in lamina II of the rat spinal cord. **392**, 107*P*, 1987
Post-contraction errors in human force production are reduced by muscle stretch. **393**, 247, 1987
Most viscero-somatic neurones in the thoracic spinal cord of the cat have bilateral visceral inputs. **394**, 108*P*, 1987
Correlations in the patterns of spontaneous firing from lumbar dorsal roots on opposite sides of the cord recorded from isolated spinal cords of mice and hamsters. **394**, 156*P*, 1987
Spinal interneurone, *see also* Interneurone
Lamina VIII interneurones interposed in crossed reflex pathways in the cat. **371**, 147, 1986
Evidence for interneuronally mediated Ia excitatory effects to human quadriceps motoneurones. **377**, 143, 1986
An interneuronal relay for group I and II muscle afferents in the midlumbar segments of the cat spinal cord. **389**, 647, 1987
Post-synaptic actions of midlumbar interneurones on motoneurones of hind-limb muscles in the cat. **389**, 675, 1987
Spinal reflex
Shoulder stabilization, the spinal accessory nerve and the trapezius muscle in man. **371**, 55*P*, 1986
Evidence for interneuronally mediated Ia excitatory effects to human quadriceps motoneurones. **377**, 143, 1986
Reflex origin for the slowing of motoneurone firing rates in fatigue of human voluntary contractions. **379**, 451, 1986
Stumbling reactions in man: significance of proprioceptive and pre-programmed mechanisms. **386**, 149, 1987
Reciprocal Ia inhibition between ankle flexors and extensors in man. **389**, 163, 1987
Assessing changes in presynaptic inhibition of Ia fibres: a study in man and the cat. **389**, 729, 1987
Changes in presynaptic inhibition of Ia fibres at the onset of voluntary contraction in man. **389**, 757, 1987
Tonic descending suppression of a spinal reflex in the rabbit is blocked by an α-adrenoceptor antagonist. **390**, 42*P*, 1987
Spindle capsular space
Studies of capsule and capsular space of cat muscle spindles. **376**, 281, 1986
Spinocervical tract
Receptive field profiles and integrative properties of spinocervical tract cells in the cat. **374**, 335, 1986
Relations between spinocervical and post-synaptic dorsal column neurones in the cat. **381**, 333, 1986
Excitatory actions of single impulses in single hair follicle afferent fibres on spinocervical tract neurones in the cat. **382**, 291, 1987
Actions of trains and pairs of impulses from single primary afferent fibres on single spinocervical tract cells in cat. **382**, 313, 1987
An intracellular study of spinocervical tract cell responses to natural stimuli and single hair afferent fibres in cats. **382**, 331, 1987
Spinothalamic tract
Spinothalamic lumbosacral lamina I cells responsive to skin and muscle stimulation in the cat. **365**, 197, 1985
Responses of spinothalamic tract cells in the superficial dorsal horn of the primate lumbar spinal cord. **388**, 681, 1987
Splanchnic nerve
Haemodynamic responses to stimulation of the splanchnic and cardiac sympathetic nerves in the anaesthetized cat. **378**, 417, 1986
Sprouting
The selective innervation of guinea-pig superior cervical ganglion cells by sprouts from intact preganglionic axons. **358**, 239, 1985
Two types of synaptic selectivity and their interrelation during sprouting in the guinea-pig superior cervical ganglion. **384**, 233, 1987
Sprouting responses to axon damage by touch and nociceptive cells in the leech *Hirudo medicinalis*. **387**, 42*P*, 1987
Reduction of paralysis-induced terminal sprouting in mouse muscles with antibodies to N-CAM. **390**, 177*P*, 1987
No change in electrical properties during sprouting *in vivo* of identified leech neurones. **392**, 110*P*, 1987
Squid
Inhibitors of calcium buffering depress evoked transmitter release at the squid giant synapse. **369**, 145, 1985
Potential-dependent variations of the intracellular pressure in the intracellularly perfused squid giant axon. **369**, 229, 1985
Squid axon, *see also* Giant axon
The actions of some general anaesthetics on the potassium current of the squid giant axon. **373**, 311, 1986
Comparison of the effects of potassium and membrane potential on the calcium-dependent sodium efflux in squid axons. **378**, 53, 1986
Influence of membrane potential on calcium efflux from giant axons of *Loligo*. **378**, 77, 1986
Improvements in the recording of gating currents in the squid giant axon. **381**, 9*P*, 1986
Statocyst
Statocyst interneurones coding different planes of tilt in the Norway lobster **392**, 66*P*, 1987

Stereoscopic vision, *see* Binocular vision
Stereotaxic apparatus
A versatile mammalian stereotaxic headholder for visual neurophysiology. **358**, 2*P*, 1985
A computerized stereotaxic atlas of the rat brain. **369**, 16*P*, 1985
Stereotaxy
Stereotaxic placement of electrodes in the brain stem of rabbit pups of different size. **362**, 4*P*, 1985
A stereotaxic procedure for recording the electrical activity of neurones in chicken brains during the perinatal period. **371**, 5*P*, 1986
Steroid hormone
Projections of oestrogen-sensitive neurones from the ventromedial hypothalamic nucleus of the female rat. **372**, 207, 1986
In vitro effects of dexamethasone on sodium transport across rat colon. **383**, 69, 1987
Potentiation of γ-aminobutyric-acid-activated chloride conductance by a steroid anaesthetic in cultured rat spinalneurones. **386**, 485, 1987
Existence of calcium channels and intercellular couplings in the testosterone-secreting cells of the mouse. **393**, 647, 1987
Stimulation, *see* Electrical stimulation
Stimulus–secretion coupling
Nimodipine block of calcium channels in rat anterior pituitary cells. **387**, 195, 1987
Stimulus velocity
Spatial-frequency characteristics of neurones of area 18 in the cat: dependence on the velocity of the visual stimulus. **359**, 259, 1985
Stomach
Neural control of electrical gastric activity in response to inflation of the antrum in the rabbit. **367**, 13, 1985
Distribution and properties of excitatory and inhibitory junction potentials in circular muscle of the guinea-pig stomach. **370**, 339, 1986
Effects of frequency on the wave form of propagated slow waves in canine gastric antral muscle. **371**, 179, 1986
Electromyographic activity of the reticulo-omasal orifice in fasted and fed lambs. **381**, 83*P*, 1986
Importance of vagal input in maintaining gastric tone in the dog. **384**, 511, 1987
Modulation of the vagal drive to the intramural cholinergic and non-cholinergic neurones in the ferret stomach by baclofen. **388**, 25, 1987
Stress
The relationship between the corticosterone response to stress and anxiety in the rat. **367**, 33*P*, 1985
The effect of chronic, mild stress on monoamine synthesis rate in rat cortical synaptosomes. **369**, 68*P*, 1985
Stretch receptor
Fusimotor after-effects on responses of primary endings to test dynamic stimuli in cat muscle spindles. **360**, 187, 1985
Effects of stretch on dynamic fusimotor after-effects in cat muscle spindles. **360**, 201, 1985
Intracellular pH regulation in the sensory neurone of the stretch receptor of the crayfish (*Astacus fluviatilis*). **362**, 23, 1985
Mechanotransducer ion channels in chick skeletal muscle: the effects of extracellular pH. **363**, 119, 1985
Proprioceptive reflex integration in the shore crab: an isolated ganglion-muscle-joint receptor preparation. **364**, 25*P*, 1985
Hyperpolarizing responses to stretch in neurones innervating body wall muscle in the leech. **371**, 58*P*, 1986
Forskolin and calcium: interactions in the control of renin secretion and perfusate flow in the isolated rat kidney. **375**, 361, 1986
Transmembrane ion balance in slowly and rapidly adapting lobster stretch receptor neurones. **377**, 171, 1986
Analysis of gated membrane currents and mechanisms of firing control in the rapidly adapting lobster stretch receptor neurone. **384**, 649, 1987
Current activation by membrane hyperpolarization in the slowly adapting lobster stretch receptor neurone. **384**, 671, 1987
Stretch reflex
New observations on the human stretch reflex. **360**, 51*P*, 1985
Habituation of the human long latency stretch reflex. **362**, 27*P*, 1985
Effects of prior instruction and anaesthesia on long-latency responses to stretch in the long flexor of the human thumb. **365**, 285, 1985
Thixotropic behaviour of human finger flexor muscles with accompanying changes in spindle and reflex responses to stretch. **368**, 323, 1985
Morphological and electrophysiological determination of the projections of jaw-elevator muscle spindle afferents in rats. **369**, 93, 1985
Development of the monosynaptic stretch reflex in the rat: an *in vitro* study. **369**, 127, 1985
Contrasting responses of the long flexor of the big toe to stretch and to vibration. **369**, 14*P*, 1985
Stretch reflexes from the thoracic-coxal muscle receptor organ entrain a central locomotor rhythm in the crayfish. **373**, 13*P*, 1986
Differential effects upon human short- and long-latency stretch reflexes of ischaemic nerve block. **377**, 21*P*, 1986
Relationship between the stretch reflexes of abductor digiti minimi and flexor carpi ulnaris in man. **384**, 35*P*, 1987
Maintenance of constant arm position or force: reflex and volitional components in man. **386**, 247, 1987
Interaction between the vestibulo-collic reflex and the cervico-collic stretch reflex in the decerebrate cat. **387**, 19, 1987
Contribution from hand muscle afferents to forearm muscle stretch reflexes in man. **390**, 258*P*, 1987
Stretch reflex latency at the relaxed normal human ankle is dependent on tendon compliance. **394**, 101*P*, 1987

Stretch reflex (*cont.*)
Effect of arm cooling on long-latency reflex responses from the human first dorsal interosseus muscle – evidence for a group I contribution. **394**, 102*P*, 1987

Striatum
The rat cortico-striatal pathway *in vitro*. **367**, 102*P*, 1985

Stroke volume
Respiratory modulation of left ventricular stroke volume in man measured using pulsed Doppler ultrasound. **387**, 27*P*, 1987
Respiratory modulation of left ventricular stroke volume in man measured using pulsed Doppler ultrasound. **393**, 499, 1987

Strontium
Calcium and strontium activation of single skinned muscle fibres of normal and dystrophic mice. **373**, 513, 1986

Strychnine
Action and localization of glycine and taurine in the cat retina. **362**, 395, 1985
Dynamics of strychnine block of single sodium channels in bovine chromaffin cells. **370**, 395, 1986

Stylonychia
Different properties of two voltage-dependent inward currents of the ciliate *Stylonchia mytilus*. **381**, 1, 1986

Subfornical organ
An electrophysiological demonstration of rat subfornical organ neurones projecting to the supraoptic nucleus. **364**, 24*P*, 1985

Submandibular gland, *see also* Salivary gland
The effect of autonomic agonists and nerve stimulation on protein secretion from the rat submandibular gland. **358**, 65, 1985
A patch-clamp study of potassium currents in resting and acetylcholine-stimulated mouse submandibular acinar cells. **373**, 379, 1986
Effects of stimulating the sympathetic innervation in bursts on submandibular vascular and secretory function in cats. **393**, 91, 1987

Submucosal plexus
Submucosal plexus and electrolyte transport across rat colonic mucosa. **364**, 301, 1985
Somatostatin increases an inwardly rectifying potassium conductance in guinea-pig submucous plexus neurones. **390**, 335, 1987

Substance P
Blockade of slow excitatory post-synaptic potential by substance P antagonists in guinea-pig sympathetic ganglia. **361**, 115, 1985
Substance P provoked γ-aminobutyric acid release from the myenteric plexus of the guinea-pig small intestine. **362**, 319, 1985
Inhibition of reflex milk-ejection by substance P administered intrathecally to anaesthetized lactating rats. **364**, 56*P*, 1985
Autonomic mechanisms underlying capsaicin induced oral sensations and salivation in man. **373**, 87, 1986
A comparison of substance P innervation of the mesenteric vascular bed in hypertensive and normotensive rats. **377**, 55*P*, 1986
Lidamidine, a specific antagonist to substance-P-induced secretion in rabbit ileum. **378**, 32*P*, 1986
Potentiation of substance-P evoked amylase secretion by phorbol esters in the rat parotid gland *in vitro*. **381**, 35*P*, 1986
Neurotensin and acetylcholine evoke common responses in frog oocytes injected with rat brain messenger ribonucleic acid. **382**, 523, 1987
Multiple actions of substance P that regulate the functional properties of acetylcholine receptors of clonal rat PC12 cells. **389**, 69, 1987
Effects of substance P on intestinal secretion, blood flow, motility and release of vasoactive intestinal polypeptide *in vivo* in the rat and cat. **390**, 255*P*, 1987
Release of substance P from the cat spinal cord. **391**, 141, 1987

Substantia nigra
Electrophysiological recording from nigral transplants in the rat. **360**, 32*P*, 1985
Taurine and L-glutamate as transmitters in dendrosomes isolated from the substantia nigra of the rat. **382**, 180*P*, 1987
Cell-attached patch recordings from single cells isolated from guinea-pig substantia nigra. **390**, 77*P*, 1987
Dopamine acts on D_2 receptors to increase potassium conductance in neurones of the rat substantia nigra zona compacta. **392**, 397, 1987

Succinate transport
Electrophysiology of succinate transport across rabbit renal brush border membranes. **360**, 95, 1985

Sugar transport
The transport of sugars across the perfused choroid plexus of the sheep. **362**, 245, 1985
A rabbit jejunal isolated enterocyte preparation suitable for transport studies. **363**, 257, 1985
Evidence from counterflow for compartmentation of D-glucose within human red cells. **365**, 88*P*, 1985
D-Galactose transport in rat intestinal brush border membrane vesicles studied with a molecular-sieve technique. **375**, 71, 1986
Genetic and phenotypic adaptation of intestinal nutrient transport to diet in fish. **393**, 261, 1987
Effects of phlorizin and phloretin on transport of glucose, galactose and fructose in perfused isolated liver of rat. **394**, 94*P*, 1987

Sulphate transport
The effect of cystic fibrosis (CF) serum and pancreotone on the transport and retention of sulphate across isolated gastrointestinal mucosae of the rat. **373**, 69*P*, 1986
Human placental sulphate transport: studies on chorionic trophoblast brush border membrane vesicles. **377**, 15, 1986

Superior cervical ganglion
A fast transient outward current in the rat sympathetic neurone studied under voltage-clamp conditions. **358**, 91, 1985

Superior cervical ganglion (*cont.*)
Identification of delayed potassium and calcium currents in the rat sympathetic neurone under voltage clamp. **358**, 109, 1985
The selective innervation of guinea-pig superior cervical ganglion cells by sprouts from intact preganglionic axons. **358**, 239, 1985
Neurophysiology and pharmacology of long-term potentiation in the rat sympathetic ganglion. **359**, 503, 1985
Long-term potentiation of synaptic acetylcholine release in the superior cervical ganglion of the rat. **363**, 181, 1985
Outgoing synapses of small granule-containing cells in the rat superior cervical ganglion after post-ganglionic axotomy. **374**, 1, 1986
Incoming synapses and size of small granule-containing cells in a rat sympathetic ganglion after post-ganglionic axotomy. **374**, 33, 1986
A quantitative description of the sodium current in the rat sympathetic neurone. **380**, 275, 1986
Single channels activated by acetylcholine in rat superior cervical ganglion. **388**, 141, 1987

Superior colliculus
A map of auditory space in the ferret superior colliculus. **358**, 31*P*, 1985
Unit responses in the superior colliculus of the chloralose-anaesthetized cat: projections from vibration-sensitive receptors. **371**, 48*P*, 1986
An electrophysiological study of the superior collicular and visual cortical projections to the lateral posterior nucleus in the rat. **372**, 88*P*, 1986
The representation of auditory space in the superior colliculus of ferrets raised with abnormal binaural cues during postnatal development. **381**, 49*P*, 1986

Supersensitivity
A physiological basis for subclassifying β-adrenoceptors examined by chemical sympathectomy of guinea-pigs. **373**, 367, 1986

Supporting cell
Slow depolarizing response from supporting cells in the goldfish saccule. **366**, 107, 1985

Suprachiasmatic nucleus
Circadian variation in sensitivity of suprachiasmatic and lateral geniculate neurones to 5-hydroxytryptamine in the rat. **377**, 1, 1986
The effects of neuropeptide-Y (NPY) on hamster suprachiasmatic neurones recorded *in vitro*. **386**, 91*P*, 1987

Supraoptic nucleus
Calcium-dependent action potentials in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 419, 1985
Activity dependence of action potential duration in rat supraoptic neurosecretory neurones recorded *in vitro*. **363**, 429, 1985
Phasic cells of the supraoptic nuclei of the rat in DOC-salt hypertension. **369**, 127*P*, 1985
Barium ions induce prolonged plateau depolarizations in neurosecretory neurones of the adult rat supraoptic nucleus. **375**, 573, 1986
Non-synaptic depolarizing potentials in rat supraoptic neurones recorded *in vitro*. **376**, 493, 1986
Paired recordings from supraoptic and paraventricular oxytocin cells in suckled rats: recruitment and synchronization. **377**, 369, 1986
Regulation of the milk ejection reflex in the rat. **380**, 239, 1986
A γ-aminobutyric-acid-mediated baroreceptor input to supraoptic vasopressin neurones in the rat. **381**, 595, 1986
Synaptic activation of slow depolarization in rat supraoptic nucleus neurones *in vitro*. **387**, 273, 1987
Actions of γ-aminobutyric acid on rat supraoptic nucleus neurosecretory neurones *in vitro*. **387**, 629, 1987
Effects of atrial natriuretic polypeptide on rat hypothalamic neurones *in vitro*. **389**, 717, 1987

Surface tension
Alveolar liquid lining: Langmuir method used to measure surface tension in bovine and canine lung extracts. **359**, 65, 1985

Surfactant
Alveolar liquid lining: Langmuir method used to measure surface tension in bovine and canine lung extracts. **359**, 65, 1985
Staining of phospholipid granules in Type II alveolar cells in lungs from fetal and neonatal pigs and sheep. **394**, 3*P*, 1987

Suxamethonium
Effect of differential neuromuscular block in cat forelimb during placing movements. **358**, 39*P*, 1985

Sweat gland
Differentiation of vasodilator and sudomotor responses in the cat paw pad to preganglionic sympathetic stimulation. **364**, 93, 1985
Electrophysiological studies on isolated human eccrine sweat glands. **367**, 73*P*, 1985
Intracellular concentrations of sodium, phosphorus, chlorine and potassium in the ductal epithelium of unstimulated and active equine sweat glands. **367**, 74*P*, 1985
Dye coupling in cells of isolated human eccrine sweat glands. **369**, 121*P*, 1985
Electrophysiological and dye-coupling studies on secretory, myoepithelial and duct cells in human eccrine sweat glands. **389**, 461, 1987
Effect of periglandular ionic composition and transport inhibitors on rhesus monkey eccrine sweat gland function *in vitro*. **393**, 195, 1987
Intracellular electrical measurements on perifused ducts isolated from eccrine sweat glands on normal subjects and patients with cystic fibrosis. **394**, 95*P*, 1987

Sympathetic ganglion, *see also* Superior cervical ganglion
Long-term potentiation of transmitter release induced by repetitive presynaptic activities in bullfrog sympathetic ganglia. **359**, 219, 1985
Blockade of slow excitatory post-synaptic potential by substance P antagonists in guinea-pig sympathetic ganglia. **361**, 115, 1985

Sympathetic ganglion (*cont.*)
An intracellular analysis of γ-aminobutyric-acid-associated ion movements in rat sympathetic neurones. **365**, 41, 1985
Membrane currents underlying the cholinergic slow excitatory post-synaptic potential in the rat sympathetic ganglion. **365**, 365, 1985
The release of purines by the frog sympathetic ganglion is the result of activation of post-synaptic elements. **371**, 274*P*, 1986
The dependence on external cation of sodium and potassium fluxes across the human red cell membrane at low temperatures. **375**, 403, 1986
Venous mechanoreceptor input to neurones in the inferior mesenteric ganglion of the guinea-pig. **377**, 49, 1986
5-Hydroxytryptamine decreases the sensitivity of nicotinic acetylcholine receptor in bull-frog sympathetic ganglion cells. **380**, 93, 1986
Chronic block of the cervical trunk increases synaptic efficacy in the superior and stellate ganglia of the guinea-pig. **382**, 449, 1987
The effects of axotomy on bullfrog sympathetic neurones. **392**, 213, 1987

Sympathetic nerve
Presence of a noradrenaline uptake system on a ligated cat sympathetic nerve. **372**, 351, 1986
A preparation to study the physiology and pharmacology of patterns of sympathetic outflow in the cat. **376**, 7*P*, 1986
The effect of electrical stimulation of the sympathetic chain on peripheral lymph flow in the anaesthetized sheep. **393**, 123, 1987

Sympathetic nerve activity
Mediation of the fastigial pressor response and a somatosympathetic reflex by ventral medullary neurones in the cat. **368**, 423, 1985
Respiratory modulation of cervical sympathetic preganglionic neurones in the anaesthetized rat. **369**, 145*P*, 1985
The diving response in man: effects on sympathetic activity in muscle and skin nerve fascicles. **377**, 429, 1986
Discharge patterns of cervical sympathetic preganglionic neurones related to central respiratory drive in the rat. **378**, 253, 1986
The pattern of sympathetic neurone activity during expiration in the cat. **378**, 375, 1986
Central respiratory modulation of subretrofacial bulbospinal neurones in the cat. **388**, 533, 1987
Changes in renal sympathetic nerve activity, heart rate and arterial blood pressure associated with eating in cats. **390**, 229, 1987

Sympathetic nerve stimulation
Haemodynamic responses to stimulation of the splanchnic and cardiac sympathetic nerves in the anaesthetized cat. **378**, 417, 1986
Tension produced in the jaw muscles of the rabbit by sympathetic stimulation. **386**, 86*P*, 1987

Sympathetic nerve terminal
Activation of acetylcholine synthesis in cat sympathetic ganglia: dependence on external choline and sodium-pump rate. With an Appendix by K. J. Worsley and R. I. Birks. **367**, 401, 1985

Sympathetic nervous system
The role of the sympathetic system in the control of insulin release in response to hyperglycaemia in conscious calves. **362**, 311, 1985
Differentiation of vasodilator and sudomotor responses in the cat paw pad to preganglionic sympathetic stimulation. **364**, 93, 1985
Sympathetic fibres in the facial nerve of the cat. **364**, 18*P*, 1985
Sympathetic modulation of cold-receptive neurones in the trigeminal system of the rat. **366**, 315, 1985
Venous mechanoreceptor input to neurones in the inferior mesenteric ganglion of the guinea-pig. **377**, 49, 1986
Two types of synaptic selectivity and their interrelation during sprouting in the guinea-pig superior cervical ganglion. **384**, 233, 1987
Autonomic control of penile erection in the dog. **384**, 525, 1987
Properties of the inspiration-related activity of sympathetic preganglionic neurones of the cervical trunk in the cat. **385**, 545, 1987
The effect of splanchnic nerve section on the sensitivity of the adrenal cortex to adrenocorticotrophin in the calf. **390**, 23, 1987
Functional types of sympathetic post-ganglionic neurones projecting into the hypogastric nerves of the cat. **390**, 34*P*, 1987
Effects of stimulating the sympathetic innervation in bursts on submandibular vascular and secretory function in cats. **393**, 91, 1987
Cardiac, renal and interscapular brown adipose tissue (IBAT) noradrenaline (NA) turnover in Long Evans and Brattleboro rats. **394**, 135*P*, 1987

Sympathetic neurone
Elemental distribution in *Rana pipiens* retinal rods: quantitative electron probe analysis. **358**, 183, 1985
Two components of muscarine-sensitive membrane current in rat sympathetic neurones. **358**, 335, 1985
Lack of nicotinic supersensitivity in frog sympathetic neurones following denervation. **363**, 211, 1985
Muscarinic and peptidergic excitation of bull-frog sympathetic neurones. **366**, 63, 1985
Characteristics of phasic and tonic sympathetic ganglion cells of the guinea-pig. **372**, 457, 1986
The effect of a transient outward current (I_A) on synaptic potentials in sympathetic ganglion cells of the guinea-pig. **374**, 273, 1986
Extracellular recordings from cervical sympathetic preganglionic neurones in the rat. **376**, 3*P*, 1986
Development of dendritic calcium currents in ganglion cells of the rat lower lumbar sympathetic chain. **377**, 349, 1986
Potassium currents evoked by brief depolarizations in bull-frog sympathetic ganglion cells. **387**, 519, 1987
Sodium currents in dissociated bull-frog sympathetic neurones. **389**, 605, 1987

Sympathetic neurone (*cont.*)
Pharmacological and physiological properties of the after-hyperpolarization current of bullfrog ganglion neurones. **394**, 315, 1987
Two calcium-activated potassium conductances in a subpopulation of coeliac neurones of guinea-pig and rabbit. **394**, 331, 1987
Sympathetic reflex
Modulation by sympathetic nerve stimulation of the digastric reflex evoked by tooth taps in the rabbit. **372**, 20*P*, 1986
Synapse
Structural and topographical influences on functional connectivity in spinal monosynaptic reflex arcs in the cat. **358**, 483, 1985
Profiles of evoked release along the length of frog motor nerve terminals. **359**, 235, 1985
Adaptation in the input–output relation of the synapse made by the barnacle's photoreceptor. **368**, 179, 1985
Post-synaptic calcium influx at the giant synapse of the squid during activation by glutamate. **369**, 183, 1985
The electrotonic location of low-resistance intercellular junctions between a pair of giant neurones in the snail *Lymnaea*. **370**, 111, 1986
Excitatory synaptic connexions between guinea-pig CA3 hippocampal cells are revealed when synaptic inhibition is suppressed *in vitro*. **372**, 14*P*, 1986
Successive events in the development of a non-rectifying electrical synapse between identified leech neurones in culture. **372**, 47*P*, 1986
Outgoing synapses of small granule-containing cells in the rat superior cervical ganglion after post-gangiionic axotomy. **374**, 1, 1986
Incoming synapses and size of small granule-containing cells in a rat sympathetic ganglion after post-ganglionic axotomy. **374**, 33, 1986
Are Merkel cell–neurite reciprocal synapses involved in the initiation of tactile responses in salamander skin? **376**, 101, 1986
Chronic block of the cervical trunk increases synaptic efficacy in the superior and stellate ganglia of the guinea-pig. **382**, 449, 1987
Quantal currents evoked by graded intracellular depolarization of crayfish motor axon terminals. **383**, 587, 1987
Influence of depolarizing pulse duration on the time course of transmitter release in lobster. **388**, 487, 1987
Post-synaptic potentials demonstrated by spike-triggered averaging in isolated slices of rat neocortex. **390**, 36*P*, 1987
Synapse formation
The selective innervation of guinea-pig superior cervical ganglion cells by sprouts from intact preganglionic axons. **358**, 239, 1985
The transneuronal induction of sprouting and synapse formation in intact mouse muscles. **360**, 387, 1985
Development of synaptic currents in immobilized muscle of *Xenopus laevis*. **364**, 57, 1985
On the neurotrophic control of acetylcholine receptors at frog end-plates reinnervated by the vagus nerve. **367**, 387, 1985
A simple model of motor nerve–muscle fibre interactions. **369**, 2*P*, 1985
Comparative development of end-plate currents in two muscles of *Xenopus laevis*. **374**, 413, 1986
A study of factors influencing synapse formation by a foreign nerve in skeletal muscle of *Rana pipiens*. **375**, 449, 1986
Activation patterns of embryonic chick hind-limb muscles following blockade of activity and motoneurone cell death. **380**, 157, 1986
Two types of synaptic selectivity and their interrelation during sprouting in the guinea-pig superior cervical ganglion. **384**, 233, 1987
Specificity of synaptic regeneration in the spinal cord of the larval sea lamprey. **388**, 183, 1987
Augmented synaptic release by one excitatory axon in regions in which a synergistic axon was removed in lobster muscle. **390**, 189, 1987
Synaptic current
Synaptic excitation in cultures of mouse spinal cord neurones: receptor pharmacology and behaviour of synaptic currents. **372**, 169, 1986
Synaptic excitation
Synaptic excitation of neurones in area 17 of the cat by intracortical axon collaterals of corticogeniculate cells. **367**, 233, 1985
Amino acid receptor mediated excitatory synaptic transmission in the cat red nucleus. **376**, 13, 1986
Synaptic facilitation
Adenosine increases synaptic facilitation in the *in vitro* rat hippocampus: evidence for a presynaptic site of action. **369**, 365, 1985
Synaptic inhibition
Comparison of synaptic inhibition in the CA1 region of slices from the septal and temporal poles of the rat hippocampus. **394**, 158*P*, 1987
Synaptic potential
Membrane currents underlying the cholinergic slow excitatory post-synaptic potential in the rat sympathetic ganglion. **365**, 365, 1985
Muscarinic m_1 and m_2 receptors mediate depolarization and presynaptic inhibition in guinea-pig enteric nervous system. **368**, 435, 1985
The effect of a transient outward current (I_A) on synaptic potentials in sympathetic ganglion cells of the guinea-pig. **374**, 273, 1986
Inhibitory synaptic potentials recorded from mammalian neurones prolonged by blockade of noradrenaline uptake. **382**, 87, 1987
Cross-correlation assessment of synaptic strength of single Ia fibre connections with triceps surae motoneurones in cats. **390**, 161, 1987
A non-adrenergic, non-cholinergic slow inhibitory post-synaptic potential in neurones of the guinea-pig submucous plexus. **390**, 357, 1987
Synaptic stimulation
Synaptic activation of slow depolarization in rat supraoptic nucleus neurones *in vitro*. **387**, 273, 1987

Synaptic transmission
Enhancement of long-term potentiation in the rat dentate gyrus by post-trial stimulation of the reticular formation. **360**, 215, 1985
Heterosynaptic changes accompany long-term but not short-term potentiation of the perforant path in the anaesthetized rat. **363**, 335, 1985
Synaptic transmission at *N*-methyl-D-aspartate receptors in the proximal retina of the mud-puppy. **367**, 99, 1985
Calcium entry into voltage-clamped presynaptic terminals of squid. **367**, 143, 1985
Calcium entry and transmitter release at voltage-clamped nerve terminals of squid. **367**, 163, 1985
Inhibitors of calcium buffering depress evoked transmitter release at the squid giant synapse. **369**, 145, 1985
Synaptic block of a transmitter-induced potassium conductance in *Aplysia* neurones. **369**, 399, 1985
Synaptic block of a calcium-activated potassium conductance in *Aplysia* neurones. **369**, 439, 1985
Extracellular activation and membrane conductances of neurones in the guinea-pig deep cerebellar nuclei *in vitro*. **372**, 149, 1986
Synaptic excitation in cultures of mouse spinal cord neurones: receptor pharmacology and behaviour of synaptic currents. **372**, 169, 1986
Excitatory synaptic interactions between CA3 neurones in the guinea-pig hippocampus. **373**, 397, 1986
Estimating the time course of evoked quantal release at the frog neuromuscular junction using end-plate current latencies. **374**, 503, 1986
Calcium levels measured in a presynaptic neurone of *Aplysia* under conditions that modulate transmitter release. **375**, 625, 1986
Synaptic transmission in amphibian retinae during conditions unfavourable for calcium entry into presynaptic terminals. **376**, 411, 1986
Intracellular tetraethylammonium ions enhance group Ia excitatory post-synaptic potentials evoked in cat motoneurones. **377**, 267, 1986
Excitatory post-synaptic potentials and currents in spinal cord neurones cultured from the embryonic rat. **377**, 75*P*, 1986
Effects of excitatory amino acid antagonists on evoked and spontaneous excitatory potentials in guinea-pig hippocampus. **378**, 403, 1986
Differences in synaptic efficacy at neuromuscular junctions in frog twitch muscles. **379**, 205, 1986
Quantal release of acetylcholine evoked by focal depolarization at the *Torpedo* nerve–electroplaque junction. **379**, 461, 1986
Calcium dependence of presynaptic calcium current and post-synaptic response at the squid giant synapse. **381**, 619, 1986
Presynaptic inhibition of synaptic potentials evoked in cat spinal motoneurones by impulses in single group Ia axons. **383**, 153, 1987
Presynaptic action of neuropeptide Y in area CA1 of the rat hippocampal slice. **383**, 285, 1987
Thresholds of action potentials evoked by synapses on the dendrites of pyramidal cells in the rat hippocampus *in vitro*. **383**, 509, 1987
Quantal currents evoked by graded intracellular depolarization of crayfish motor axon terminals. **383**, 587, 1987
Botulinum toxin inhibits quantal acetylcholine release and energy metabolism in the *Torpedo* electric organ. **385**, 677, 1987
Transduction of aminergic and peptidergic signals in enteric neurones of the guinea-pig. **387**, 371, 1987
Conduction block silences parts of a chemical synapse in the leech central nervous system. **387**, 649, 1987
Inhibitory control of local excitatory circuits in the guinea-pig hippocampus. **388**, 611, 1987
Opioid depression of synaptic transmission in the mouse hypogastric ganglion *in vitro*. **390**, 53*P*, 1987

Synaptosome
Regulation of cytosolic calcium concentration in presynaptic nerve endings isolated from rat brain. **363**, 87, 1985
Inactivation of acetylcholine release from *Torpedo* synaptosomes in response to prolonged depolarizations. **368**, 293, 1985
Calcium uptake of rat brain synaptosomes as a function of membrane potential under different depolarizing conditions. **372**, 363, 1986
The regulation of cytosolic calcium in rat brain synaptosomes by sodium-dependent calcium efflux. **381**, 17, 1986
Co-operative action of calcium ions in dopamine release from rat brain synaptosomes. **387**, 415, 1987

Synovial fluid
Colloids, pressures and fluid mass inside the cavities of major limb joints in rabbits. **387**, 84*P*, 1987

Tachykinin
Tachykinins and bombesin excite non-pyramidal neurones in rat hippocampus. **379**, 417, 1986

Taenia caeci
Potential-dependent calcium inward current in a single isolated smooth muscle cell of the guinea-pig taenia caeci. **380**, 1, 1986

Tail current
Slow depolarizing and hyperpolarizing currents which mediate bursting in *Aplysia* neurone R15. **360**, 51, 1985

Taste
Susceptibility of the developing rat gustatory system to the physiological effects of dietary sodium deprivation. **393**, 413, 1987

Taste cell
Passive and active membrane properties of mud-puppy taste receptor cells. **383**, 601, 1987

Taurine
Action and localization of glycine and taurine in the cat retina. **362**, 395, 1985
Taurine transport associated with cell volume regulation in flounder erythrocytes under anisosmotic conditions. **374**, 245, 1986

Teaching
The combination of a BBC-B microcomputer network and microtext for teaching elementary physiology. **367**, 9*P*, 1985
'Minimath control theory': notes for physiology students. **369**, 24*P*, 1985
An inexpensive method for capturing, storing and analysing data from class neurophysiology experiments using a BBC microcomputer. **376**, 11*P*, 1986
Teaching changes to improve the quality of reports in laboratory courses on medical physiology. **382**, 8*P*, 1987
An interactive computer program to demonstrate the major factors in the design and execution of graded-dose bioassays. **391**, 8*P*, 1987
A large teaching laboratory network for experimental and self-teaching instruction based on ENET and the BBC-B+ microcomputer. **392**, 8*P*, 1987

Temperature
Temperature-dependent calcium sensitivity changes in skinned muscle fibres of rat and toad. **360**, 1, 1985
The relationship between a^1_{Na} and a^2_{Na} in isolated ferret ventricular trabeculae; the effects of temperature and cyanide. **361**, 20*P*, 1985
Some effects of raised body temperature on mental activity **365**, 117*P*, 1985
Human thermal responses during leg-only exercise in cold water. **391**, 399, 1987
Characteristics of C fibre baroreceptors in the carotid sinus of dogs. **394**, 291, 1987
The effect of temperature on the force-sarcomere-velocity relation in trabeculae from rat heart. **394**, 22*P*, 1987

Temperature dependence
The temperature dependence of isometric contractions of single, intact fibres dissected from a mouse foot muscle. **390**, 285, 1987
Contractions of a human skeletal muscle at different temperatures. **390**, 383, 1987

Temperature sensitivity
Effect of temperature on melanophores of the teleost *Sarotherodon spilurus in vitro*. **391**, 96*P*, 1987

Temporal cortex
Localization of visually evoked cortical activity in humans. **360**, 233, 1985

Tendon
X-ray imaging of human muscle contraction. **377**, 15*P*, 1986

Tendon compliance
Changes in the length of the human biceps brachii muscle during elbow movements. **383**, 405, 1987
Relative displacements in muscle and tendon during human arm movements. **389**, 37, 1987

Tendon organ
Interactions between motor units and Golgi tendon organs in the tibialis posterior muscle of the cat. **364**, 199, 1985
Pathway to the cerebral cortex for impulses from tendon organs in the cat's hind limb. **369**, 115, 1985

Tension
Measurement of intracellular calcium during the development and relaxation of tonic tension in sheep Purkinje fibres. **375**, 269, 1986
Tubocurarine suppresses slow calcium-dependent after-hyperpolarization in guinea-pig inferior mesenteric ganglion cells. **375**, 499, 1986
Effect of indoleamine agonists and antagonists on the response of ganglion cells in the rabbit retina. **381**, 59*P*, 1986
Stiffness and tension measurements during ATP deprivation in skinned muscle fibres of *Balanus nubilus*. **386**, 85*P*, 1987
Factors influencing the ascending limb of the sarcomere length–tension relationship in rabbit skinned muscle fibres. **390**, 119, 1987

Testis
The composition of the extracellular interstitial fluid in the rat testis. **392**, 69*P*, 1987

Tetanus toxin
The effect of lanthanum on the ultrastructure of nerve terminals in goldfish muscles paralysed with tetanus toxin. **360**, 42*P*, 1985
Long-term reduction in excitability of rat dentate granule cells after tetanus toxin. **371**, 49*P*, 1986
Long-term reduction in inhibition in rat dentate gyrus after intrahippocampal tetanus toxin. **382**, 89*P*, 1987

Tetracaine
Electrophysiological effects of tetracaine in single guinea-pig ventricular myocytes. **376**, 143, 1986

Tetraethylammonium
Intracellular tetraethylammonium ions enhance group Ia excitatory post-synaptic potentials evoked in cat motoneurones. **377**, 267, 1986
The action of external tetraethylammonium ions on unitary delayed rectifier potassium channels of frog skeletal muscle. **393**, 467, 1987

Tetrodotoxin
Tetrodotoxin-sensitive and -insensitive relaxations in the rat oesophageal tunica muscularis mucosae. **381**, 49, 1986
Sodium currents in dissociated bull-frog sympathetic neurones. **389**, 605, 1987

Thalamus
The interrelations of the ventrobasal thalamus, the somatosensory cortex and thalamic reticular nucleus: a HRP study in the rat. **358**, 10*P*, 1985
Lack of calcium potentials in principal neurones of the rat ventral LGN *in vitro*. **365**, 39*P*, 1985
N-methylaspartate receptors and synaptic excitation in the rat ventrobasal thalamus. **371**, 44*P*, 1986
The effect of intrathecally administered dopaminergic agents on nociceptive responses recorded from the thalamus in urethane-anaesthetized rats. **372**, 17*P*, 1986
Thalamic burst patterns in the naturally sleeping cat: a comparison between cortically projecting and reticularis neurones. **379**, 429, 1986
I.p.s.p.s. evoke rebound Ca^{2+} spikes in thalamic neurones in isolated rat brain slices. **382**, 90*P*, 1987

Thalamus (*cont.*)
Physiologically evoked inhibition mediated by γ-amino-butyric acid (GABA) in the rat ventrobasal thalamus (VB). **382**, 91*P*, 1987
Excitatory amino acid receptors and synaptic transmission in the rat ventrobasal thalamus. **391**, 499, 1987
Actions of acetylcholine in the guinea-pig and cat medial and lateral geniculate nuclei, *in vitro*. **392**, 147, 1987
Excitatory amino acid receptor-mediated transmission of somatosensory evoked potentials in the rat thalamus. **394**, 445, 1987

Thermogenesis
Effects of subdiaphragmatic vagotomy on energy baiance and thermogenesis in the rat. **362**, 1, 1985
Measurement of temperature changes in muscle contraction with a thermopile and amplifier designed to improve signal-to-noise ratio and resolution in time and place. **366**, 4*P*, 1985
Labile heat and changes in rate of relaxation of frog muscles. **374**, 123, 1986
Relationship between stable maintenance heat rate and mechanical performance in single muscle fibres from m. iliofibularis of *Xenopus laevis*. **377**, 97*P*, 1986
Suppression of non-shivering thermogenesis in the rat by heat-seeking behaviour during cold exposure. **380**, 541, 1986
The kinetics of heat production in response to active shortening in frog skeletal muscle. **385**, 449, 1987
Resting heat production of isolated superfused trabeculae from guinea-pig heart at 37 °C. **386**, 54*P*, 1987
Action of dantrolene on force and heat production in isolated muscle fibres of the frog. **392**, 38*P*, 1987
Oxygen dependence of heat produced by quiescent guinea-pig ventricular muscle. **392**, 39*P*, 1987
Repriming and reversal of the isometric unexplained enthalpy in frog skeletal muscle. **393**, 157, 1987
Stable maintenance heat rate and contractile properties of different single muscle fibres from *Xenopus laevis* at 20 °C. **393**, 399, 1987

Thermography
High resolution thermography and X-linked hypohidrotic ectodermal dysplasia (XED). **384**, 5*P*, 1987
A pyroelectric vidicon thermographic system for physiological and clinical use. **384**, 6*P*, 1987

Thermoreceptor
Sympathetic modulation of cold-receptive neurones in the trigeminal system of the rat. **366**, 315, 1985
Effects of fluctuating skin temperature on thermoregulatory responses in man. **378**, 241, 1986

Thermoregulation
The effect of hyperbaric nitrogen on behavioural thermoregulation in mice. **362**, 17*P*, 1985
Hypothalamic thermosensitivity in capsaicin-desensitized rats. **363**, 227, 1985
Computer pattern recognition of infra-red thermograms. **365**, 3*P*, 1985
Evidence for the involvement of the organum vasculosum laminae terminalis in the febrile response of rabbits and rats. **368**, 501, 1985
Thermosensitive neurones during sleep in cats. **369**, 60*P*, 1985
Effects of fluctuating skin temperatures on human thermoregulatory responses. **369**, 161*P*, 1985
Does hydrostatic pressure affect behavioural thermoregulation in mice? **372**, 40*P*, 1986
The effect of hypoxia on thermoregulatory responses evoked by external and central cooling in the pigeon. **373**, 60*P*, 1986
Effects of fluctuating skin temperature on thermoregulatory responses in man. **378**, 241, 1986
The effects of air movement upon respiratory evaporative heat loss from the domestic fowl at high ambient temperatures. **378**, 72*P*, 1986
Suppression of non-shivering thermogenesis in the rat by heat-seeking behaviour during cold exposure. **380**, 541, 1986
Blockade of prostaglandin E_1 hyperthermia by sodium salicylate given into the ventral septal area of the rat brain. **384**, 223, 1987
Zero gradient aural thermometer with integral measuring and reference probe. **384**, 4*P*, 1987
Effects of exposure to heat on blood platelets and red cells in man. **384**, 63*P*, 1987
An analysis on non-equilibrium water fluxes in eccrine ducts. **388**, 40*P*, 1987
The effects of hypothermia and hyperthermia on plasma potassium levels in the cat. **392**, 94*P*, 1987
The role of catecholamines in the metabolic response to cold in the rat. **394**, 132*P*, 1987

Thirst
Fluid and electrolyte handling in Long Evans and Brattleboro rat following injection of polyethylene glycol. **381**, 407, 1986
Behavioural thirst and satiation in sheep is probably mediated by oral receptors. **388**, 39*P*, 1987

Threshold
Asymmetric charge movement in contracting muscle fibres in the rabbit. **376**, 63, 1986

Thrombocyte
Transient outward currents and changes of their gating properties after cell activation in thrombocytes of the newt. **385**, 189, 1987

Thumb
Effects of prior instruction and anaesthesia on long-latency responses to stretch in the long flexor of the human thumb. **365**, 285, 1985
Facilitation of the human long-latency thumb jerk by a cortical stimulus. **381**, 7*P*, 1986

Thymus
Acetylcholine receptors of skeletal muscle cells in cultures of rat thymus glands. **362**, 349, 1985
Regeneration of thymus in ageing rats after orchidectomy: effects of testosterone. **372**, 66*P*, 1986

Thyroid
Chromatographic demonstration of heterogeneity in human autoantibodies against the TSH-receptor. **384**, 9*P*, 1987

Thyroid (*cont.*)
Thyroglobulin autoantibodies from human and obese strain (OS) chickens only recognise certain species-specific epitopes on thyroglobulin. **384**, 26*P*, 1987

Thyroid hormone
Transfer of maternal thyroid hormones to the embryo in the domestic fowl. **360**, 74*P*, 1985
Effects of thyroid hormone on calcium handling in cultured chick ventricular cells. **364**, 131, 1985
In vivo studies of exogenous human thyrotrophin. **365**, 116*P*, 1985
A comparison of the effects of 24 hours fasting and iopanoic acid on the responses in plasma thyroid hormones to T.R.H. in the domestic fowl. **373**, 34*P*, 1986
Thyroid hormone effects on lactase expression by rat enterocytes. **376**, 253, 1986
Binding of triiodothyronine by fully differentiated rat enterocytes. **376**, 267, 1986
Tension-independent and -dependent heat production during contraction of skeletal muscle of euthyroid and hypothyroid mice. **382**, 163*P*, 1987
The role of thyroid hormones in the metabolic response to cold in the rat. **386**, 73*P*, 1987

Thyrotrophin-releasing hormone
Formation of thyrotrophin-releasing hormone metabolites and their effects on growth-hormone release in the domestic fowl. **378**, 91*P*, 1986
Thyrotropin-releasing hormone stimulates a calcium-activated potassium current in a rat anterior pituitary cell line. **385**, 611, 1987
The facilitatory action of an analogue of thyrotrophin releasing hormone on spinal reflexes suppressed by endogenous opioids in the rabbit. **386**, 67*P*, 1987
Vagal role in vascular effects of TRH in the rat. **390**, 232*P*, 1987

Tight junction
Passive water flows driven across the isolated rabbit ileum by osmotic, hydrostatic and electrical gradients. **360**, 27, 1985

Tonic muscle
Calcium action potentials and calcium currents in tonic muscle fibres of the frog (*Rana pipiens*). **372**, 293, 1986
Effects of external calcium on potassium contractures in tonic muscle fibres of the frog (*Rana pipiens*). **376**, 219, 1986

Tonicity
Hypertonic shrinkage of the lattice spacing of chemically skinned cardiac muscle increases Ca sensitivity and peak force. **386**, 57*P*, 1987

Tooth
The size and distribution of mechanoreceptive fields in cat dentine. **364**, 17*P*, 1985
Selective stimulation of afferent nerves in incisor tooth-pulp of the rat. **365**, 14*P*, 1985
Cold stimulation of teeth: a comparison between the responses of cat intradental Aδ and C fibres and human sensation. **391**, 193, 1987

Tooth receptor
Evidence for a direct projection of periodontal afferents to the cerebellar cortex in the ferret. **369**, 52*P*, 1985
An electrophysiological and morphological study of the innervation and reinnervation of cat dentine. **386**, 31, 1987

Topography
Distribution of single-axon recurrent inhibitory post-synaptic potentials in a single spinal motor nucleus in the cat. **388**, 653, 1987

Toxin
Long-term changes in hippocampal physiology and learning ability of rats after intrahippocampal tetanus toxin. **368**, 343, 1985
Electromechanical effects of okadiac acid isolated from black sponge in guinea-pig ventricular muscles. **378**, 359, 1986
Properties of maintained sodium current induced by a toxin from *Androctonus* scorpion in frog node of Ranvier. **383**, 93, 1987

Trace element
Sulphate transport into vesicles prepared from human placental brush border membranes: inhibition by trace element oxides. **379**, 367, 1986

Trachea
Simultaneous measurement of airway mucus secretion and smooth-muscle tone in ferret trachea *in vitro*. **372**, 38*P*, 1986
The regional variation of potential across the tracheal epithelium of the sheep. **372**, 39*P*, 1986
Sodium and chloride transport by the tracheal epithelium of fetal, new-born and adult sheep. **375**, 377, 1986
Interaction between sodium and chloride transport in bovine tracheal epithelium. **376**, 299, 1986
Lanthanum penetration of the trachea in sensitized, challenged rats. **377**, 65*P*, 1986
The organization and structure of tracheal and bronchial blood vessels in the dog. **382**, 10*P*, 1987
Parasympathetic nervous control of tracheal vascular resistance in the dog. **385**, 135, 1987
Lung and cardiac reflex actions on the tracheal vasculature in anaesthetized dogs. **387**, 47, 1987
Measurement of mucus [H^+] and other ionic concentrations in the isolated trachea of the ferret. **387**, 15*P*, 1987
Effects of lung and cardiac reflexes on the tracheal vasculature of the dog. **387**, 61*P*, 1987
Challenge of sensitized rats with an aerosol of sensitizing antigen increases the permeability from the lumen of the trachea in life. **388**, 31*P*, 1987

Transduction
The transduction channel of hair cells from the bullfrog characterized by noise analysis. **375**, 195, 1986

Transient inward current
Relationship between the transient inward current and slow inward currents in the sino-atrial node of the rabbit. **370**, 299, 1986

Transient inward current (*cont.*)
The mechanism underlying rate-dependent changes in the transient inward current, i_{Ti}, of isolated sheep cardiac Purkinje fibres. **386**, 114*P*, 1987
The arrhythmogenic transient inward current i_{Ti} and related contraction in isolated guinea-pig ventricular myocytes. **392**, 523, 1987
Transient outward current
Quinidine-induced inhibition of a transient outward current in rabbit heart. **390**, 68*P*, 1987
A transient outward potassium current in rat cerebellar granule cell explants. **392**, 34*P*, 1987
Transmitter
The ionic selectivity and calcium dependence of the light-sensitive pathway in toad rods. **358**, 447, 1985
Pharmacological evidence for L-aspartate as the neurotransmitter of cerebellar climbing fibres in the guinea-pig. **365**, 103, 1985
Neostigmine increases the size of subunits composing the quantum of transmitter release at mouse neuromuscular junction. **367**, 489, 1985
Factors influencing an increase in spontaneous transmitter release by hypoxia at the mouse neuromuscular junction. **372**, 303, 1986
Transmitter release
Calcium sensitivity of spontaneous transmitter release in murine muscular dystrophy. **358**, 86*P*, 1985
Use of intracerebral dialysis of c.s.f. withdrawal for monitoring transmitter amine metabolism in relation to feeding behaviour in the rat. **360**, 12*P*, 1985
The modulation of 5-hydroxytryptamine release from rat forebrain synaptosomes by low concentrations of tryptophan and 5-hydroxytryptamine. **361**, 51*P*, 1985
Does contraction in the rabbit ear artery require excitatory junction potentials (e.j.p.s) and 'spikes'? **362**, 30*P*, 1985
Inhibitors of calcium buffering depress evoked transmitter release at the squid giant synapse. **369**, 145, 1985
Effects of caffeine on transmitter release in CA1 of the rat hippocampal slice. **369**, 167*P*, 1985
Voltage dependence of 5-hydroxytryptamine release at a synapse between identified leech neurones in culture. **372**, 191, 1986
Release of amino acids and a novel peptide from isolated fragments of rat cerebellar glomerulus. **373**, 28*P*, 1986
Enhancement of miniature endplate potential frequency at the frog neuromuscular junction by the photoreactive imidazole-2-diazonium cation. **373**, 65*P*, 1986
AH5183 block increases in quantal size at the frog neuromuscular junction. **373**, 66*P*, 1986
Long-term potentiation of transmitter release induced by adrenaline in bull-frog sympathetic ganglia. **374**, 515, 1986
Effects of calcium and magnesium on transmitter release at Ia synapses of rat spinal motoneurones *in vitro*. **376**, 543,
Differences in synaptic efficacy at neuromuscular junctions in frog twitch muscles. **379**, 205, 1986
Presynaptic opioid δ-receptors in the rabbit mesenteric artery. **379**, 217, 1986
The nature and origin of calcium-insensitive miniature end-plate potentials at rodent neuromuscular junctions. **381**, 607, 1986
Statistics of neuromuscular transmitter release in young and old mouse muscle. **385**, 507, 1987
The effects of *in vitro* application of purified botulinum neurotoxin at mouse motor nerve terminals. **386**, 475, 1987
Augmented synaptic release by one excitatory axon in regions in which a synergistic axon was removed in lobster muscle. **390**, 189, 1987
Transport
Studies of transport in deformable porous materials with relevance to connective tissue properties. **358**, 3*P*, 1985
Dibasic amino acid transport in horse erythrocytes. **358**, 92*P*, 1985
Kinetics of thiamin transport across the blood–brain barrier of the rat in the apparent absence of energy-producing metabolism. **372**, 69*P*, 1986
The transport of D-glucose across the blood–brain barrier of the rat in the presence of metabolic inhibitor 2,4-dinitrophenol. **372**, 70*P*, 1986
A method for studying lymphatic pumping activity in conscious and anaesthetized sheep. **378**, 109, 1986
Passive transport and binding of lead by human red blood cells. **378**, 267, 1986
The role of anion transport in the passive movement of lead across the human red cell membrane. **378**, 287, 1986
The use of the vascularly and luminally perfused rat intestine for studies of transport of ions, water and amino acids and of protein turnover. **380**, 17*P*, 1986
Calcium transport across the isolated dually perfused human placental lobule. **382**, 397, 1987
Role of taurine in the regulation of cell volume by the coelomocytes of the marine polychaete, *Glycera dibranchiata*. **382**, 201*P*, 1987
Membrane potentials of isolated cells from transport epithelia analysed using an extended Boyle-Conway theory: human nasal epithelia. **390**, 103*P*, 1987
Transport kinetics
Characteristics of L-glutamine transport in perfused rat skeletal muscle. **393**, 283, 1987
Transverse tubule
Inward rectification in the transverse tubular system of frog skeletal muscle studied with potentiometric dyes. **359**, 269, 1985
Tremor, *see* Muscle tremor
Triceps surae
Reinnervation of the lateral gastrocnemius and soleus muscles in the rat by their common nerve. **372**, 485, 1986
Trigeminal nucleus
Morphological and electrophysiological determination of the projections of jaw-elevator muscle spindle afferents in rats. **369**, 93, 1985

Trigeminal nucleus (*cont.*)
Evidence that Aδ- and C-fibres trigger post-synaptic inhibition of trigeminal nucleus caudalis convergent neurones following extrasegmental percutaneous electrical stimulation in the rat. **380**, 58*P*, 1986
Stereoselective effects of naloxone on the responses of neurones in the superficial and deeper laminae of the trigeminal nucleus caudalis in the rat. **380**, 77*P*, 1986
Properties of neurones in the rat trigeminal nucleus caudalis responding to stimulation of the ipsilateral parietal meninges. **381**, 108*P*, 1986
Heterotopic activation of Aδ and C fibres triggers inhibition of trigeminal and spinal convergent neurones in the rat. **389**, 301, 1987
A convergent input from nasal receptors and the larynx to the rostral sensory trigeminal nuclei of the cat. **393**, 147, 1987
Effects of morphine on the responses of neurones in the superficial and deeper laminae of the trigeminal nucleus caudalis in the rat. **394**, 152*P*, 1987

Trophic interaction
Acetylcholine receptors and sodium channels in denervated and botulinum-toxin-treated adult rat muscle. **382**, 69, 1987

Tryptophan
The effect of intraluminal tryptophan and phenylalanine on small intestinal motility in the conscious dog. **367**, 353, 1985

Tubocurarine, *see* Curare

Turtle cochlea
Variation of membrane properties in hair cells isolated from the turtle cochlea. **385**, 207, 1987

Ultrasound
Non-invasive assessment of superior mesenteric artery blood flow resistance in man. **364**, 73*P*, 1985

Ureter
Investigation of factors affecting the intracellular sodium activity in the smooth muscle of guinea-pig ureter. **385**, 483, 1987
Non-cholinergic slow potentials in guinea-pig inferior mesenteric ganglion (IMG) evoked by chemical and electrical stimulation of ureteric nerves. **388**, 33*P*, 1987
An investigation of sodium–calcium exchange in the smooth muscle of guinea-pig ureter. **391**, 325, 1987

Urethra
The effects of oestrogens on spontaneous activity and responses to phenylephrine of the mammalian urethra. **358**, 35, 1985
The neural and non-neural mechanisms involved in urethral activity in rabbits. **367**, 57, 1985

Uric acid
The transport of uric acid across mouse small intestine *in vitro*. **378**, 229, 1986

Urinary bladder
The effect of distension of the urinary bladder on the left ventricular dP/dt max in the anaesthetized dog. **362**, 36*P*, 1985
Forskolin mimics the hydrosmotic action of vasopressin in the urinary bladder of toads *Bufo marinus*. **365**, 307, 1985
Ion-selective micro-electrode studies of the electrochemical potentials in trout urinary bladder. **370**, 467, 1986
Non-cholinergic neurotransmission and the effects of peptides on the urinary bladder of guinea-pigs and rabbits. **374**, 103, 1986
A non-cholinergic urinary bladder mechanism in New World primates. **377**, 78*P*, 1986
The location of beta-adrenoceptor subtypes in the rat urinary bladder. **381**, 29*P*, 1986
The reaction of the ferret bladder to adrenaline: a modern demonstration of an experiment by T. R. Elliott and H. H. Dale. **382**, 5*P*, 1987
Effect of N-ethyl maleimide (NEM) on transepithelial water flow and ultrastructure of toad urinary bladder. **382**, 190*P*, 1987
Distension of the urinary bladder in the study of related cardiovascular reflexes in the dog. **386**, 3*P*, 1987
Micturition pattern and spontaneous activity in the urinary bladder during the micturition cycle in rats with infravesical outflow obstruction. **390**, 107*P*, 1987
Electrophysiological evidence that adenosine triphosphate (ATP) is a co-transmitter with acetylcholine (ACh) in isolated guinea-pig, rabbit and pig urinary bladder. **394**, 26*P*, 1987

Urinary excretion
The influence of the contraceptive pill on exercise-induced urinary excretion of minerals in humans. **372**, 64*P*, 1986
Urinary sodium, potassium and water excretion in man after a single dose of 13·8 mmol of lithium carbonate. **390**, 204*P*, 1987

Urine
Human core temperatures at various sites during rapid body heating. **369**, 194*P*, 1985
Irregularity of rest and activity: studies on circadian rhythmicity in man. **381**, 279, 1986

Uterine muscle
Modification by hormonal treatment of the agonist-induced ^{45}Ca release from the rat myometrium. **369**, 96*P*, 1985
Circadian variation in myometrial activity in the chronically instrumented pregnant sheep at 120–130 days gestation. **369**, 116*P*, 1985

Uterus
Changes in uterine growth and protein turnover in the rat during and after pregnancy. **361**, 41*P*, 1985
The effects of pregnancy and parturition on phosphorus metabolites in rat uterus studied by ^{31}P nuclear magnetic resonance. **368**, 19, 1985
A ^{31}-Phosphorus nuclear magnetic resonance study of the regulation of intracellular pH following changes in extracellular pH in rat uterine smooth muscle. **373**, 81*P*, 1986
Selectivity of calcium channels in rat uterine smooth muscle: interactions between sodium, calcium and barium ions. **384**, 247, 1987

Vagal afferent fibre
Retching evoked by stimulation of abdominal vagal afferents in the anaesthetized ferret. **358**, 103*P*, 1985
Behaviour of canine pulmonary vagal afferent receptors during sustained acute pulmonary venous pressure elevation. **394**, 249, 1987
Inhibition of calcium-dependent spike after-hyperpolarization increases excitability of rabbit visceral sensory neurones. **394**, 415, 1987
Vagal control
Respiratory modulation of muscle sympathetic and vagal cardiac outflow in man. **365**, 181, 1985
Importance of vagal input in maintaining gastric tone in the dog. **384**, 511, 1987
Vagal mechanoreceptor
Discharge characteristics of gastric mechanoreceptors during contraction and relaxation of the ferret corpus. **378**, 19*P*, 1986
Sensory innervation of the proventriculus and gizzard of the domestic chicken. **386**, 6*P*, 1987
Vagal neurone
Histochemical and electrophysiological identification of cardiac and pulmonary vagal preganglionic neurones in the cat. **372**, 87*P*, 1986
The effects of noradrenaline on neurones in the rat dorsal motor nucleus of the vagus, *in vitro*. **393**, 213, 1987
Vagal reflex
Lung and cardiac reflex actions on the tracheal vasculature in anaesthetized dogs. **387**, 47, 1987
Vagina
Changes in the bioelectrical parameters and dye (nigrosin) staining as quantitative indices of the acute action of surfactants on the vagina of ovariectomized rats. **378**, 5*P*, 1986
TRH and vaginal blood flow – effects in conscious women and anaesthetized sheep. **378**, 83*P*, 1986
Vagotomy
Effects of subdiaphragmatic vagotomy on energy balance and thermogenesis in the rat. **362**, 1, 1985
Abdominal vagotomy modifies the emetic response to radiation in the ferret. **378**, 16*P*, 1986
A comparison of the effects of vagotomy and a $GABA_B$ receptor agonist on gastric corpus pressure in the ferret. **378**, 18*P*, 1986
Vagus nerve
Depolarization of rat vagal C-fibres and sensory neurones by capsaicin *in vitro*. **360**, 14*P*, 1985
Blood glucose levels modulate efferent activity in the vagal supply to the rat liver. **364**, 105, 1985
The relative effects of electrical stimulation of myelinated and non-myelinated vagal fibres on heart rate in the rabbit. **365**, 91*P*, 1985
Neurones in the brain stem of the cat excited by vagal afferent fibres from the heart and lungs. **369**, 1, 1985
Effects of vagal deafferentation on oesophageal motility and transit in the sheep. **372**, 425, 1986
The distribution of vagal preganglionic motoneurones in two species of Amphibia. **376**, 55*P*, 1986
The effects of electrical stimulation of myelinated and non-myelinated vagal fibres on heart rate in the rabbit. **380**, 341, 1986
Amygdaloid influences on brain-stem neruones in the rabbit. **381**, 135, 1986
A permissive role for the vagus nerves in the genesis of antro-antral reflexes in the anaesthetized ferret. **381**, 377, 1986
A comparison of the effects of 5-HT and vagal stimulation on antral motility in the anaesthetized ferret. **382**, 186*P*, 1987
The effects of stimulation of non-myelinated vagal fibres on heart rate in the rabbit. **386**, 8*P*, 1987
The action of myelinated and non-myelinated vagal fibres on atrial contraction in the rabbit. **386**, 46*P*, 1987
Modulation of the vagal drive to the intramural cholinergic and non-cholinergic neurones in the ferret stomach by baclofen. **388**, 25, 1987
The effects of mechanical and chemical stimuli in the ferret stomach on vagal efferent unitary discharge. **390**, 170*P*, 1987
Activation of protein kinase C causes a depolarization of the rat isolated vagus nerve associated with increased sodium conductance. **391**, 78*P*, 1987
Reserpine, vagal adrenergic activity and stress-induced acute gastric mucosal injury in the rat. **392**, 363, 1987
The effect of selective electrical stimulation of non-myelinated vagal fibres on heart rate in the rabbit. **392**, 91*P*, 1987
The action of myelinated and non-myelinated vagal fibres on heart rate in the guinea-pig. **392**, 92*P*, 1987
Vanadate
Effects of chronic vanadate treatment on intracellular ion contents, cation fluxes and ouabain binding in cultured HeLa cells. **367**, 91*P*, 1985
Vas deferens
The use of computerized image analysis to measure the mechanical response of the isolated rat vas deferens. **358**, 5*P*, 1985
Latencies of non-adrenergic and adrenergic phases of the single shock responses in the rat vas deferens. **362**, 34*P*, 1985
The selective effects of calcium substitution with strontium on the biphasic responses of the rat isolated vas deferens. **365**, 69*P*, 1985
Post-tetanic responses of the isolated rat vas deferens. **366**, 76*P*, 1985
A cholinergic component in the biphasic tetanus of the isolated vas deferens of the rat. **366**, 120*P*, 1985
Regulation of voltage-dependent calcium channels in the guinea-pig vas deferens by the dihydropyridines nifedipine and Bay K 8644. **373**, 62*P*, 1986
The isolated vas deferens of the whale: responses to electrical stimulation and drugs. **374**, 44*P*, 1986
Effect of calmodulin antagonist, W-7 on neuromuscular responses of isolated rat vas deferens. **381**, 103*P*, 1986

Vas deferens (*cont.*)
Morphine and clonidine potentiate field stimulation-induced release of [^{3}H]noradrenaline in the isolated mouse vas deferens. **381**, 109*P*, 1986
Twitch responses of the isolated human vas deferens. **381**, 110*P*, 1986
Properties of high resistance smooth muscle cells in the isolated mouse vas deferens. **382**, 167*P*, 1987
Effect of frequency of stimulation on neurogenic responses of isolated rat epididymal vas deferens. **391**, 50*P*, 1987
Focal extracellular recording of the nerve terminal action potential and transmitter release in the guinea-pig isolated vas deferens. **392**, 116*P*, 1987

Vascular capacitance
Abdominal vascular responses to changes in carbon dioxide tension in the cephalic circulation of anaesthetized dogs. **358**, 417, 1985

Vascular permeability
Effects of albumin concentration on the hydraulic conductivity of rabbit common carotid artery wall. **358**, 117*P*, 1985

Vascular resistance
The effect of pregnancy on the changes in hind-limb vascular resistance following haemorrhage in the rabbit. **372**, 63, 1986
Changes in total peripheral resistance following long diastoles in the anaesthetized rabbit. **377**, 56*P*, 1986
Changes in regional vascular resistance following administration of α-adrenoceptor antagonists to conscious, unrestrained Long Evans rats. **381**, 18*P*, 1986
Effects of hypoxia and hypercapnia on tracheal vascular resistance in the dog. **384**, 66*P*, 1987
Parasympathetic nervous control of tracheal vascular resistance in the dog. **385**, 135, 1987
Appearance of adenosine in venous blood from the contracting gracilis muscle and its role in vasodilatation in the dog. **387**, 401, 1987
Effects of stimulation of nasal and superior laryngeal inputs on the hindlimb vasculature of anaesthetized cats. **393**, 135, 1987

Vascular smooth muscle, *see also* Smooth muscle
Effect of ouabain on tone, membrane potential and sodium efflux compared with [^{3}H]ouabain binding in rat resistance vessels. **362**, 215, 1985
Calcium–force relationships as detected with aequorin in two different vascular smooth muscles of the ferret. **369**, 269, 1985
Membrane currents in freshly-dispersed single smooth muscle cells of the rabbit ear artery. **369**, 108*P*, 1985
Pattern of response of smooth muscle of isolated bovine coronary arteries to a thromboxane A_2 analogue. **369**, 140*P*, 1985
The role of hyperpolarization in the relaxation of smooth muscle of monkey coronary artery. **371**, 257, 1986
Effect of calcium antagonists on adrenergic mechanisms in canine saphenous veins. **372**, 25, 1986
Inorganic phosphate regulates the contraction–relaxation cycle in skinned muscles of the rabbit mesenteric artery. **376**, 231, 1986
Mechanism of vasodilation induced by α-human atrial natriuretic polypeptide in rabbit and guinea-pig renal arteries. **377**, 315, 1986
Mechanical effects of changing pH in the smooth muscle of isolated guinea-pig ductus arteriosus. **377**, 121*P*, 1986
Endothelium-derived relaxing factor alters calcium fluxes in rabbit aorta: a cyclic guanosine monophosphate-mediated effect. **381**, 427, 1986
Alterations in cytoplasmic calcium sensitivity during porcine coronary artery contractions as detected by aequorin. **385**, 437, 1987
Membrane and contractile responses to 5-hydroxytryptamine in the isolated rabbit basilar artery. **386**, 52*P*, 1987
In vitro contractility of bovine retinal microvascular pericytes compared with endothelial and vascular smooth muscle cells. **387**, 64*P*, 1987
Programs to capture, store and analyse membrane and tension data from vascular smooth muscle. **388**, 4*P*, 1987
Noradrenaline increases L-type calcium current in isolated smooth-muscle cells of rabbit ear artery independently of α- and β-adrenoreceptors. **390**, 85*P*, 1987
Effects of palmitylcarnitine on the isolated rat heart and thoracic aorta. **391**, 47*P*, 1987
Photolysis of nitroprusside enhances its relaxant effect on rabbit arterial smooth muscle. **392**, 43*P*, 1987
A phosphorus nuclear magnetic resonance study of metabolites and intracellular pH in rabbit vascular smooth muscle. **393**, 57, 1987
Use of ryanodine to determine the role of the sarcoplasmic reticulum on contractions of isolated rings of rat aorta and bovine tail artery. **394**, 33*P*, 1987

Vasoactive intestinal polypeptide
The influence of indomethacin and DL-propranolol on the cardiovascular and renin responses to vasoactive intestinal polypeptide (VIP) in man. **358**, 121*P*, 1985
Electrophysiological and morphological characteristics of vasoactive intestinal peptide (VIP)-immunoreactive neurones in the isolated guinea-pig myenteric plexus. **369**, 59*P*, 1985
Vasoactive intestinal polypeptide depolarizations in cat bladder parasympathetic ganglia. **374**, 457, 1986
Electrophysiology and morphology of vasoactive-intestinal-peptide-immuoreactive neurones of the guinea-pig ileum. **378**, 1, 1986
Vasoactive intestinal peptide (VIP)-immunoreactive neurones of the isolated submucous plexus of guinea-pig ileum. **378**, 100*P*, 1986
Vasoactive intestinal polypeptide regulation of rabbit renal adenylate cyclase activity *in vitro*. **387**, 1, 1987

Vasoactive intestinal polypeptide (*cont.*)
Vasoactive intestinal polypeptide stimulates the secretion of catecholamines from the rat adrenal gland. **388**, 285, 1987
Adrenal cortical responses to vasoactive intestinal peptide in conscious hypophysectomized calves. **391**, 441, 1987
Degradation of vasoactive intestinal polypeptide (VIP) by enzymes from rat gastrointestinal tissue. **392**, 98*P*, 1987
The electrophysiological effects of vasoactive intestinal polypeptide in the guinea-pig inferior mesenteric ganglion. **394**, 67, 1987

Vasoconstriction
Hypoxia releases a vasoconstrictor substance from the canine vascular endothelium. **364**, 45, 1985
The effects of arterial blood gas tensions on pressor responses to angiotensin II in the pithed rat. **372**, 437, 1986
Hind limb vascular responses to combined stimulation of the nasal mucosa and superior laryngeal nerve in the anaesthetized cat. **373**, 18*P*, 1986
Cutaneous vasoconstrictor reflexes following unilateral cortical lesions in man. **380**, 63*P*, 1986
Peripheral venous compliance and vasomotor responses to cooling and warming in young and elderly subjects. **382**, 27*P*, 1987
Central contribution to postural vasoconstriction in the human foot. **384**, 57*P*, 1987
The relationship between foot swelling rate and postural vasoconstriction in man. **387**, 76*P*, 1987

Vasodilatation
Differentiation of vasodilator and sudomotor responses in the cat paw pad to preganglionic sympathetic stimulation. **364**, 93, 1985
Properties of a sympatho-inhibitory and vasodilator reflex evoked by superior laryngeal nerve afferents in the cat. **364**, 183, 1985
Vasodilators: do they dilate the canine iliac peripheral bed? **366**, 43*P*, 1985
The effect of inflation of an anti-gravity suit on forearm vasculature. **378**, 93*P*, 1986
Direct evidence of neurally mediated vasodilatation in hairy skin of the human foot. **382**, 105, 1987
Effects of vasodilators on abdominal vascular resistance and capacitance in anaesthetized dogs. **387**, 83*P*, 1987
β_2-Adrenoceptor mediated vasodilatations in the kidney and hindquarters of conscious, unrestrained, Long Evans rats contribute to the hypotensive effects of α_2-adrenoceptor antagonism. **388**, 18*P*, 1987
The role of myogenic relaxation, adenosine and prostaglandins in human forearm reactive hyperaemia. **389**, 147, 1987
Vascular tone variations, initiated by ammonium 'pulses', in an isolated, perfused rat tail preparation. **392**, 23*P*, 1987
Tone-overshoots during recovery of isolated (rabbit and rat) vascular preparations from ammonium-induced dilations. **392**, 47*P*, 1987

Vasomotor reflex
Modification by lung inflation of the vascular responses from the carotid body chemoreceptors and other receptors in dogs. **378**, 13, 1986

Vasopressin
Does vasopressin influence the level of cytosolic free Ca^{2+} in toad-bladder epithelial cells? **358**, 67*P*, 1985
Diurnal variations in plasma and pituitary vasopressin in the rat. **358**, 104*P*, 1985
Elevated left heart pressures inhibit vasopressin, ACTH and renin release following systemic hypotension in conscious dogs. **360**, 54*P*, 1985
Effects of vasopressin on paired-pulse potentiation in the rat hippocampal slice. **361**, 28*P*, 1985
The involvement of vasopressin in the recovery of B.P. following administration of phenoxybenzamine to conscious Long Evans rats. **361**, 69*P*, 1985
Plasma volumes, electrolytes and osmolalities in rats lacking hypothalamic vasopressin (Brattleboro strain): effects of water deprivation. **362**, 48*P*, 1985
The importance of burst interval in determining vasopressin release from the phasically stimulated rat neurohypophysis. **364**, 51*P*, 1985
Forskolin mimics the hydrosmotic action of vasopressin in the urinary bladder of toads *Bufo marinus*. **365**, 307, 1985
An osmosensitive zone on the dorsal surface of the medulla in the cat. **365**, 30*P*, 1985
Hypotension following antagonism of the cardiovascular actions of vasopressin in urethane-anaesthetized Long Evans, Wistar and Sprague–Dawley rats. **366**, 51*P*, 1985
Fluid and electrolyte handling following subcutaneous injection of polyethylene glycol in Brattleboro rats. **366**, 52*P*, 1985
The effects and interactions of angiotensin and vasopressin on the heart of unanaesthetized sheep. **367**, 1, 1985
Inhibiting the rabbit caudal ventrolateral medulla prevents baroreceptor-initiated secretion of vasopressin. **367**, 253, 1985
Selective cardiovascular and neuroendocrine effects of a κ-opioid agonist in the nucleus tractus solitarii of rats. **367**, 363, 1985
Gadolinium ions inhibit exocytotic vasopressin release from the rat neurohypophysis. **367**, 419, 1985
The effects of naloxone and haloperidol on the vasopressin response to a hypertonic stimulus in conscious rats. **369**, 122*P*, 1985
Autoradiographic localization of [^{3}H]vasopressin binding sites in Brattleboro and Long-Evans rats. **369**, 126*P*, 1985
Oral hypertonic saline causes a transient fall in plasma vasopressin in man. **369**, 189*P*, 1985
Excitation of neurones in the rat paraventricular nucleus *in vitro* by vasopressin and oxytocin. **370**, 165, 1986
Vasopressin and baroreflex sensitivity in man. **371**, 89*P*, 1986

Vasopressin (*cont.*)
The metabolic clearance rate for vasopressin and the pressor responsiveness to vasopressin in conscious male and female rats. **371**, 90*P*, 1986
The importance of neural-cardiac regulation in the control of blood pressure during vasopressin infusions in man. **371**, 91*P*, 1986
The role of brain prostaglandins in osmotic-induced vasopressin secretion in the rat. **371**, 92*P*, 1986
Fluid balance in cycling rats and ovariectomized rats treated with oestradiol benzoate. **371**, 189*P*, 1986
Vasopressin activation of polyphosphoinositide metabolism in rat anterior pituitary *in vitro*. **371**, 277*P*, 1986
Effect of trifluoperazine on rabbit cortical collecting tubular response to vasopressin. **372**, 41, 1986
Secretion *in vitro* of corticotrophin by rat adenohypophysial tissue in response to vasopressin and its analogues. **372**, 60*P*, 1986
The effect of naloxone on the vasopressin response in the rat to centrally administered hypertonic sodium chloride. **372**, 67*P*, 1986
Renal haemodynamic actions of arginine-vasopressin in the rat. **373**, 47*P*, 1986
The cardiovascular effects of vasopressin after haemorrhage in anaesthetized rats. **375**, 421, 1986
Plasma expansion does not precipitate the fall in plasma vasopressin in humans drinking isotonic fluids. **376**, 429, 1986
Sensitization of aortic and cardiac baroreceptors by arginine vasopressin in mammals. **377**, 251, 1986
Differential regional vascular effects of pressor agents in conscious Long Evans rats. **377**, 61*P*, 1986
A comparison of the vasopressin response to saline infusion and to change in dietary sodium in the human. **377**, 69*P*, 1986
Indirect evidence for frequency-dependent facilitation of intermittent conduction in the neurosecretory nerve terminals of the rat pituitary gland *in vitro*. **377**, 73*P*, 1986
Fluid and electrolyte handling in Long Evans and Brattleboro rat following injection of polyethylene glycol. **381**, 407, 1986
The influence of neurohypophysial hormones on renal function in the acutely hypophysectomized rat. **381**, 439, 1986
A synergistic effect of oxytocin and vasopressin on sodium excretion in the neurohypophysectomized rat. **381**, 453, 1986
A γ-aminobutyric-acid-mediated baroreceptor input to supraoptic vasopressin neurones in the rat. **381**, 595, 1986
The cardiovascular effects of vasopressin in the anaesthetized Brattleboro rat. **381**, 20*P*, 1986
Observations on the effect of progesterone on fluid balance and vasopressin metabolism in the rat. **381**, 38*P*, 1986
Increased sensitivity to the pressor response of AVP in subjects with mid cervical cord transection. **381**, 39*P*, 1986
The effects of hypothalamic grafts on the density of neurophysin II – immunoreactivity in the brains of hypogonadal mice. **381**, 41*P*, 1986
Arginine vasopressin (AVP) immunoreactive axons in median eminence external zone and pars distalis of fetal sheep: relationship with corticotropin releasing factor (CRF) immunoreactive axons. **381**, 107*P*, 1986
Drinking and vasopressin release following intracerebroventricular injections of hypertonic solutions in minipigs. **382**, 43*P*, 1987
The time course of the vasopressin response to hypercapnic acidosis in mechanically ventilated dogs. **382**, 59*P*, 1987
Nocodazole inhibits the water permeability response to vasopressin in isolated rabbit collecting tubules. **382**, 149*P*, 1987
A comparison of the effects of ageing on fluid balance and vasopressin metabolism in the male and female rat. **384**, 42*P*, 1987
Regional haemodynamic responses to prazosin and idazoxan administration in conscious, unrestrained Brattleboro rats. **384**, 48*P*, 1987
The role of noradrenaline and opioid peptides on osmotically stimulated vasopressin release in conscious rats. **386**, 65*P*, 1987
Evidence supporting a role for endogenous vasopressin in fever suppression in the rat. **387**, 163, 1987
Contractile effects of perivascularly applied vasopressin on the pial artery of the cat brain. **387**, 441, 1987
Hypothalamic vasopressin, oxytocin, dynorphin and enkephalin mRNA in the rat: response to an osmotic stimulus. **387**, 37*P*, 1987
Effect of intracerebroventricular vasopressin on intracranial pressure in conscious goats. **387**, 38*P*, 1987
Age-related differences in vasopressin-mediated recovery of B.P. following acute hypotension in conscious, unrestrained, Long Evans rats. **388**, 17*P*, 1987
The vasopressin response to central administration of morphine or dopamine in the conscious rat. **390**, 186*P*, 1987
Vasopressin-induced phosphatidylinositol turnover in the superior cervical ganglion of the rat is decreased after decentralization. **390**, 231*P*, 1987
Effect of vasopressin analogues on plasma concentrations of Factor VIII in man. **390**, 236*P*, 1987
Renal haemodynamic actions of pressor doses of lysine vasopressin in the rat. **391**, 407, 1987
A further comparison of the hydrosmotic responses to vasopressin (VP) and *N*-ethyl maleimide (NEM) in the isolated toad urinary bladder. **394**, 51*P*, 1987
Characteristics of inhibition of the hydrosmotic effect of vasopressin by nocodazole in isolated perfused cortical collecting tubules of the rabbit. **394**, 53*P*, 1987
Responses of carotid body blood flow and chemoreceptor activity to administration of vasopressin in the anaesthetized cat. **394**, 63*P*, 1987

Vasopressin (*cont.*)
The effect of testosterone on vasopressin secretion and fluid balance in the orchidectomized rat. **394**, 125*P*, 1987

Vein
Evidence of vascular macromolecular clearance reduction as an atherogenic factor in the rabbit inferior vena cava and abdominal aorta. **388**, 23*P*, 1987

Venom
Effects of the venom of the spider *Phoneutria nigriventer* on peripheral nerve and neuromuscular transmission in the mouse. **360**, 41*P*, 1985
Alterations in the morphology of myelinated nerve fibres caused by *Phoneutria*, *Leiurus* or *Centruroides* venom are prevented by tetrodotoxin. **365**, 27*P*, 1985

Venous return
Flow through the foramen ovale of the fetal and new-born lamb. **365**, 29, 1985

Ventilation, *see also* Breathing, Respiration
The effects of local anaesthetic aerosols of different particle size on the response to CO_2 rebreathing in man. **358**, 94*P*, 1985
Breath-holding in normal subjects and in patients with Parkinson's disease. **360**, 77*P*, 1985
The use of positive end expiratory pressure (P.E.E.P.) during the ventilation of pre-term infants. **361**, 68*P*, 1985
The effect of opening the eyes and reading on resting ventilation in man. **365**, 101*P*, 1985
A possible dopaminergic pathway stimulating breathing in fetal lambs. **365**, 105*P*, 1985
Effect of bolus injections of buffered NH_4Cl solutions into the right atrium of the dog on arterial pH and end-expiratory P_{CO_2}. **366**, 104*P*, 1985
Control of ventilation in new-born infants with sleep apnoea reported by parents. **366**, 109*P*, 1985
Control of ventilatory rhythm in the northern octopus *Eledone cirrhosa* (Lamarck) **367**, 103*P*, 1985
Didactic utility programs in respiratory physiology. **369**, 18*P*, 1985
Apparatus and programs for studying the reflex ventilatory responses to computer-generated waveforms of pulmonary gas tension in the cat. **369**, 20*P*, 1985
Ventilatory drive during face immersion in man. **370**, 13, 1986
Ventilation in intact and glossopharyngeal nerve sectioned anaesthetized rats exposed to oxygen at high pressure. **370**, 489, 1986
Ventilation and cardiac output during the onset of exercise, and during voluntary hyperventilation, in humans. **370**, 567, 1986
The respiratory response to almitrine and its dependence on inspired oxygen levels in conscious rabbits. **371**, 105*P*, 1986
The effects of arterial blood gas tensions on pressor responses to angiotensin II in the pithed rat. **372**, 437, 1986
Measurement of ventilation using a microcomputer. **374**, 7*P*, 1986
Role of the vagus nerves in the respiratory response to intravenous acid infusion in the anaesthetized rabbit. **374**, 26*P*, 1986
Hypoxic and hypercapnic ventilatory responses during adenosine infusion in man. **376**, 51*P*, 1986
A device for finger control of ventilation. **377**, 11*P*, 1986
The effect of auditory input upon resting ventilation in man. **377**, 64*P*, 1986
Changes in breathing pattern caused by almitrine in hypoxic/hypercapnic ferrets. **378**, 68*P*, 1986
Immediate ventilatory response to sudden changes in venous return in humans. **380**, 45, 1986
Influence of inspired oxygen concentration on the dynamics of the exercise hyperpnoea in man. **380**, 387, 1986
Analysis of dynamic lung values by an inexpensive combination of a wedge spirometer and a microcomputer. **380**, 4*P*, 1986
A pseudo-rebreathing technique for assessing the ventilatory response to carbon dioxide in cats. **381**, 483, 1986
The properties of a turbine device for measuring respiratory volumes in man. **382**, 12*P*, 1987
Ventilatory consequences in man of focusing on breathing and of using a face-mask. **382**, 52*P*, 1987
The early circulatory and ventilatory response to voluntary and electrically induced exercise in man. **383**, 19, 1987
In utero ventilation with oxygen augments left ventricular stroke volume in lambs. **383**, 413, 1987
The relationship between ventilation and oxygen consumption in man is the same during both moderate exercise and shivering. **383**, 455, 1987
Interrupted high-frequency ventilation (IHFV) in anaesthetized dogs. **387**, 29*P*, 1987
The effect of treadmill speed on ventilation at the start of exercise in man. **391**, 13, 1987
Human thermal responses during leg-only exercise in cold water. **391**, 399, 1987
Effects of chronic hypoxia from birth on the ventilatory response to acute hypoxia in the newborn rat. **392**, 11, 1987
Effects of β-adrenergic blockade on the ventilatory responses to hypoxic and hyperoxic exercise in man. **393**, 43, 1987
Ventilatory patterns during human speech in progressive hypercapnia. **394**, 60*P*, 1987
A dopamine antagonist and the ventilatory response to hypoxia in normal and chronically hypoxic rats. **394**, 64*P*, 1987
Ventilatory effects of potassium in hyperoxia, normoxia and hypoxia in anaesthetized cats. **394**, 172*P*, 1987

Ventilation pattern, *see also* Respiratory rhythm
Breath-by-breath relationship of expiratory airflow and cycle timing during quiet breathing in man. **358**, 95*P*, 1985
The respiratory activity of human levator costae muscles and its modification by posture. **362**, 189, 1985

Ventilation pattern (*cont.*)
A mathematical study of the ventilatory response to a deep sigh. **364**, 68*P*, 1985
Patterns of breathing in response to alternating patterns of alveolar carbon dioxide pressures in man. **376**, 31, 1986
Respiratory sinus arrhythmia in new-born infants. **385**, 1, 1987
Ventral root
Activity-dependent excitability changes in normal and demyelinated rat spinal root axons. **365**, 239, 1985
Afferent fibres in cat ventral roots: electrophysiological and histological evidence. **379**, 229, 1986
Ventral root afferent fibre
Blood pressure response evoked by ventral root afferent fibres in the cat. **370**, 255, 1986
Ventricle, *see* Cardiac ventricle
Ventricular receptor
A method of stimulation of left ventricular receptors in anaesthetized dogs. **386**, 11*P*, 1987
Respiratory responses to left ventricular pressure changes in anaesthetized dogs. **390**, 179*P*, 1987
Ventromedial hypothalamic nucleus
Electrophysiological properties and glucose responsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 127, 1986
Ionic basis for the electroresponsiveness of guinea-pig ventromedial hypothalamic neurones *in vitro*. **380**, 145, 1986
Vestibular reflex
Inferior olive control of the dynamic responses of the medial vestibular neurones to labyrinthine stimulation in the rat. **369**, 48*P*, 1985
Interaction between the vestibulo-collic reflex and the cervico-collic stretch reflex in the decerebrate cat. **387**, 19, 1987
Vestibular system
Inhibitory connections of ipsilateral semicircular canal afferents onto Renshaw cells in the lumbar spinal cord of the cat. **388**, 83, 1987
The pattern of labyrinth and neck reflexes in forelimb flexors and extensors in acute and chronic hemilabyrinthectomized cats. **392**, 103*P*, 1987
Vestibulocollic reflex
The sagittal vestibulocollic reflex and its interaction with neck proprioceptive afferents in the decerebrate cat. **359**, 17, 1985
Vestibular control of neck muscles in acute and chronic hemilabyrinthectomized cats. **366**, 281, 1985
Vestibulo-ocular reflex
The effect of opposing canal and otolith signals during off-vertical-axis rotation in the cat. **371**, 30*P*, 1986
Lesions in the cat prepositus complex: effects on the vestibulo-ocular reflex and saccades. **372**, 75, 1986
Lesions in the cat prepositus complex: effects on the optokinetic system. **372**, 95, 1986
The vestibulo-ocular reflex during human saccadic eye movements. **373**, 209, 1986
Adaptation of the vestibulo-ocular reflex does not affect the response to off-vertical axis rotation in the cat. **382**, 78*P*, 1987
Visual suppression of the vestibulo-ocular reflex in man during pseudo-random head movements. **387**, 51*P*, 1987
The effects of vertical semicircular canals on responses of dogfish extraocular muscles to tilts in different vertical planes. **392**, 65*P*, 1987
Baclofen and velocity storage: a model of the effects of the drug on the vestibulo-ocular reflex in the rhesus monkey. **393**, 703, 1987
Disabling of the oculomotor neural integrator by kainic acid injections in the prepositus–vestibular complex of the cat. **394**, 267, 1987
Vibration
Observations on a late e.m.g. response to vibration in human flexor pollicis longus. **373**, 16*P*, 1986
Observations on the automatic compensation of reflex gain on varying the pre-existing level of motor discharge in man. **374**, 73, 1986
Phase coherence in vibration-induced responses of tactile fibres associated with Pacinian corpuscle receptors in the cat. **386**, 263, 1987
Temporal patterning in the responses of gracile and cuneate neurones in the cat to cutaneous vibration. **386**, 277, 1987
Actions of single sensory fibres on cat dorsal column nuclei neurones: vibratory signalling in a one-to-one linkage. **386**, 293, 1987
Integrative processing of vibratory information in cat dorsal column nuclei neurones driven by identified sensory fibres. **386**, 311, 1987
Further observations on the visual effects of vibrating the neck muscles in man. **394**, 80*P*, 1987
Vibration reflex
Effects of ischaemia upon reflex electromyographic responses evoked by stretch and vibration in human wrist flexor muscles. **391**, 589, 1987
Virus
Differential control of azurophilic and specific granule exocytosis in Sendai-virus-permeabilized rabbit neutrophils. **383**, 115, 1987
Visceral afferent nerve
Non-cholinergic transmission in a sympathetic ganglion of the guinea-pig elicited by colon distension. **374**, 315, 1986
Non-cholinergic slow potentials in guinea-pig inferior mesenteric ganglion (IMG) evoked by colonic distension and colonic nerve stimulation. **382**, 183*P*, 1987
Temperature sensation in the anorectum of normal humans. **387**, 52*P*, 1987
Vision, *see also* Binocular vision, Colour vision
Interactions between receptive field and periphery in cat LGN cells. **358**, 14*P*, 1985
The scale of the visual pathways of the mouse and rat. **358**, 17*P*, 1985
An electroretinographic investigation of experimental myopia in chicks. **358**, 18*P*, 1985
Influence of luminance gradient reversal on complex cells in feline striate cortex. **359**, 315, 1985

Vision (*cont.*)
Residual visual function in chiasmal compression in man. **360**, 22*P*, 1985
Age and human contrast sensitivity. **360**, 25*P*, 1985
Selective block of Y optic nerve fibres in the cat and the occurrence of inhibition in the lateral geniculate nucleus. **364**, 81, 1985
Cortical magnification and the tilt after-effect in man. **364**, 36*P*, 1985
Spatial and temporal frequency selectivity of neurones in visual cortical areas V1 and V2 of the macaque monkey. **365**, 331, 1985
Development of the visual threatening reflex and the monocular visual field in human infants: cortico-subcortical integration? **366**, 96*P*, 1985
Patch-clamp recordings of the light-sensitive dark noise in retinal rods from the lizard and frog. **367**, 183, 1985
Threshold contrast elevation occurs for patterns generated by Lie transformation groups. **367**, 16*P*, 1985
Retinal image sampling as a limiting process in the visual discrimination of sine-wave gratings in man. **367**, 17*P*, 1985
Gender, the menstrual cycle and visual contrast sensitivity. **367**, 19*P*, 1985
Abnormal prolongation of visual sensations in a human subject. **367**, 20*P*, 1985
Relative latencies for the perceived onset of sinusoidal gratings of different spatial frequency in man. **367**, 23*P*, 1985
The role of binocular competition in strabismic amblyopia in kittens. **367**, 25*P*, 1985
Detection of moving local density differences in dynamic random patterns by human observers. **367**, 29*P*, 1985
Calcium content and calcium exchange in dark-adapted toad rods. **368**, 641, 1985
Spatial interaction in the domain of disparity signals in human stereoscopic vision. **370**, 619, 1986
Facilitation of vergence changes by saccades: influences of misfocused images and of disparity stimuli in man. **371**, 69, 1986
Spatial and temporal limits of vision in the achromat. **371**, 365, 1986
Spatial and temporal properties of human rod vision in the achromat. **371**, 387, 1986
The distribution of on- and off-centre X- and Y-like cells in the A layers of the cat's lateral geniculate nucleus. **375**, 561, 1986
Selective degeneration of optic nerve fibres in the cat produced by a pressure block. **376**, 461, 1986
Mossy fibres sending retinal-slip, eye, and head velocity signals to the flocculus of the monkey. **379**, 39, 1986
Continuity of orientation columns between superficial and deep laminae of the cat primary visual cortex. **381**, 95, 1986
A versatile generator of static visual noise, interfaced with the Innisfree 'Picasso' Image synthesizer. **381**, 3*P*, 1986
Acuity for fine-grain motion is better than two-dot separation hyperacuity in the peripheral field of the dark-adapted human eye. **381**, 63*P*, 1986
Dimming of flickering lights in patients with multiple sclerosis. **382**, 84*P*, 1987
Stimulus-dependent characteristics of complex cells in cat striate cortex. **382**, 173*P*, 1987
Passive cable properties and morphological correlates of neurones in the lateral geniculate nucleus of the cat. **383**, 653, 1987
The transfer of visual information across the corpus callosum: spatial and temporal properties in the cat. **384**, 619, 1987
Interhemispheric transfer of visual information in humans: spatial characteristics. **384**, 633, 1987
The dynamics of the cat retinal X cell centre. **386**, 219, 1987
The velocity dependence of direction selectivity of visual cortical neurones in the cat. **387**, 95, 1987
Contributions of inhibitory mechanisms to the shift responses of X and Y cells in the cat lateral geniculate nucleus. **388**, 199, 1987
Two mechanisms for the detection of slow motion in human vision. **388**, 46*P*, 1987
Inhibitory interactions in the human vision system revealed in pattern-evoked potentials. **389**, 1, 1987
Calcium in dark-adapted toad rods: evidence for pooling and cyclic-guanosine-3′-5′-monophosphate-dependent release. **389**, 361, 1987
Stimulus selectivity and functional organization in the lateral suprasylvian visual cortex of the cat. **389**, 569, 1987
Differences in the amplitude of X-cell responses as a function of depth in layer A of lateral geniculate nucleus in cat. **390**, 201, 1987
Two types of i.p.s.p.s recorded in projection cells of the rat lateral geniculate nucleus *in vitro*. **390**, 33*P*, 1987
Contrast affects the transmission of visual information through the mammalian lateral geniculate nucleus. **391**, 267, 1987
Amplitude-modulated gratings mask the responses of X-cells in cat LGN to gratings of the modulation frequency. **391**, 39*P*, 1987
Function of the Y optic nerve fibres in the cat: do they contribute to acuity and ability to discriminate fast motion? **392**, 35, 1987
Optical contrast ratio at low spatial frequencies in the human eye. **392**, 109*P*, 1987
Ganglion cell performance at absolute threshold in toad retina: effects of dark events in rods. **393**, 667, 1987
Improvement in human vision under bright light: grain or gain? **394**, 41, 1987
Parallel mechanisms for visual pattern discrimination in man. **394**, 121*P*, 1987

Visual acuity
Postnatal development of spatial selectivity in the lateral suprasylvian cortex of the cat. **377**, 22*P*, 1986
Organization and post-natal development of the monkey's lateral geniculate nucleus. **380**, 453, 1986

Visual contrast sensitivity
The luminance origin of the pattern electroretinogram in man. **363**, 191, 1985
The effects of pupil size and defocus on contrast sensitivity in man. **367**, 15*P*, 1985
Spatial and temporal limits of vision in the achromat. **371**, 365, 1986
Spatial and temporal properties of human rod vision in the achromat. **371**, 387, 1986
The receptive-field spatial structure of cat retinal Y cells. **384**, 49, 1987
Regional variation of contrast sensitivity across the retina of the achromat: sensitivity of human rod vision. **388**, 101, 1987

Visual cortex
Effect of bicuculline on the length-response functions of cat striate cortical cells. **358**, 15*P*, 1985
Influence of luminance gradient reversal on complex cells in feline striate cortex. **359**, 315, 1985
Localization of cortical activity associated with visual recognition in humans. **360**, 247, 1985
Subcortical non-geniculate afferents to visual cortex in the rat. **364**, 37*P*, 1985
Spatial and temporal frequency selectivity of neurones in visual cortical areas V1 and V2 of the macaque monkey. **365**, 331, 1985
Callosal connections of the visual cortex in newborn and adult Old World monkeys (*Macaca irus*). **365**, 43*P*, 1985
Noradrenaline and functional plasticity in kitten visual cortex: a re-examination. **367**, 73, 1985
Augmenting responses evoked in area 17 of the cat by intracortical axon collaterals of cortico-geniculate cells. **367**, 217, 1985
Synaptic excitation of neurones in area 17 of the cat by intracortical axon collaterals of cortico-geniculate cells. **367**, 233, 1985
Segregated output to area V5 from layer 4B of macaque monkey striate cortex. **369**, 32*P*, 1985
Binocular suppression in cat cortical neurones. **369**, 38*P*, 1985
Spatial frequency selectivity in the lateral suprasylvian areas (PMLS/PLLS) of the cat visual cortex. **369**, 40*P*, 1985
Microperfusion of noradrenaline in the visual cortex restores cortical plasticity in adult cats. **369**, 171*P*, 1985
The function and intracortical connectivity of a Meynert cell in area 17 of the cat visual cortex. **371**, 41*P*, 1986
Quantitative studies of the discharge fields of single cells in cat striate cortex. **373**, 277, 1986
Quantitative studies of enhancement and suppression zones in the receptive field of simple cells in cat striate cortex. **373**, 293, 1986
The organization of cortico-cortical connexions from area 17 to area 18 of the visual cortex of the cat. **377**, 24*P*, 1986
Continuity of orientation columns between superficial and deep laminae of the cat primary visual cortex. **381**, 95, 1986
The anatomy and physiology of area V6 of macaque monkey visual cortex. **381**, 62*P*, 1986
Interocular transfer of motion after-effects in complex cells of feline striate cortex. **381**, 99*P*, 1986
Callosal connections and cytochrome oxidase staining of visual areas V1 and V2 in the prenatal monkey (*Macaca irus*). **382**, 95*P*, 1987
The organization and post-natal development of area 18 of the cat's visual cortex. **384**, 263, 1987
Effects of dark-rearing on the development of area 18 of the cat's visual cortex. **384**, 293, 1987
The transfer of visual information across the corpus callosum: spatial and temporal properties in the cat. **384**, 619, 1987
The velocity dependence of direction selectivity of visual cortical neurones in the cat. **387**, 95, 1987
Retinal eye-motion input affects real-motion cell activity in the V3-complex of behaving macaque monkeys. **388**, 47*P*, 1987
Stimulus selectivity and functional organization in the lateral suprasylvian visual cortex of the cat. **389**, 569, 1987
Areal influences of textured fields on striate cortical neurones in the cat. **390**, 16*P*, 1987
The angle of gaze influences the responses to visual stimulation of cells in the V3-complex of macaque monkey visual cortex. **390**, 27*P*, 1987
A moving noise background modulates responses of striate neurones to moving bars in the cat but not in the monkey. **390**, 28*P*, 1987
Anatomical demonstration of the repetitive representation of the vertical meridian in area V6 of macaque monkey visual cortex. **390**, 30*P*, 1987
Linear antagonism and suppression in the visual cortex of rhesus monkey and cat. **390**, 200*P*, 1987
Neuronal responses and field potentials evoked by gratings in the macaque striate cortex. **392**, 56*P*, 1987
Estimation of the amplitudes of theoretical unitary excitatory post-synaptic potentials in neurones of the cat striate cortex by a combination of biophysical and anatomical measurement. **394**, 110*P*, 1987

Visual cortical neurone, *see* Visual neurone

Visual deprivation
Effects of visual deprivation on the development of the monkey's lateral geniculate nucleus. **380**, 493, 1986
Effects of dark-rearing on the development of area 18 of the cat's visual cortex. **384**, 293, 1987

Visual development
Organization and development of orientation columns in area 18 of the cat's visual cortex. **358**, 16*P*, 1985
The post-natal development of the axonal arborizations of Y cells of the lateral geniculate nucleus (l.g.n.) projecting to area 18 of the cat's cortex. **358**, 19*P*, 1985
Early colour deprivation in pigeon and monkey. **366**, 15*P*, 1985
Contrast sensitivity of neurones in the lateral geniculate nucleus of the neonatal monkey. **369**, 37*P*, 1985

Visual development (*cont.*)
The development of orientation-selectivity in area 18 of the visual cortex in normal and dark-reared kittens. **369**, 39*P*, 1985
Organization and post-natal development of the monkey's lateral geniculate nucleus. **380**, 453, 1986
Effects of visual deprivation on the development of the monkey's lateral geniculate nucleus. **380**, 493, 1986
Post-natal development of the retinal and cerebellar projections onto the lateral suprasylvian area in the cat. **383**, 729, 1987
Visual evoked potential
The luminance origin of the pattern electroretinogram in man. **363**, 191, 1985
Modulation of human visual evoked potentials by selective attention. **367**, 21*P*, 1985
The effects of ageing on the human visual evoked response. **367**, 22*P*, 1985
Human occipital potentials evoked by the onset of equiluminant chromatic gratings. **369**, 44*P*, 1985
Human pattern-evoked potentials recorded with textured backgrounds. **382**, 97*P*, 1987
A face-responsive visual evoked potential in man. **390**, 26*P*, 1987
Visual neurone
Spatial-frequency characteristics of neurones of area 18 in the cat: dependence on the velocity of the visual stimulus. **359**, 259, 1985
Synaptic excitation of neurones in area 17 of the cat by intracortical axon collaterals of corticogeniculate cells. **367**, 233, 1985
Visual cells selective for body movements: studies of directional tuning and sensitivity to body view. **367**, 28*P*, 1985
Somatosensory and associated visual properties of neurones in a polysensory region of macaque temporal cortex. **367**, 30*P*, 1985
A comparison of visual responses of cat lateral geniculate nucleus neurones with those of ganglion cells afferent to them. **369**, 249, 1985
Application of the *in vitro* brain slice technique to the visual cortex of the rat: intracellular recording and ultrastructural analysis. **369**, 21*P*, 1985
Electrical geometry of spiny neurones in slices of cat and rat visual cortex studied using intracellular recording and horseradish peroxidase injection. **382**, 178*P*, 1987
The velocity dependence of direction selectivity of visual cortical neurones in the cat. **387**, 95, 1987
Differences in the amplitude of X-cell responses as a function of depth in layer A of lateral geniculate nucleus in cat. **390**, 201, 1987
Light-elicited responses of monopolar neurones in the compound eye of the blowfly studied with a current-clamp method. **390**, 165*P*, 1987
Visual object recognition
Localization of visually evoked cortical activity in humans. **360**, 233, 1985
Visual pathway
The distribution of on- and off-centre X- and Y-like cells in the A layers of the cat's lateral geniculate nucleus. **375**, 561, 1986
Visual projection
Localization of cortical activity associated with visual recognition in humans. **360**, 247, 1985
Visual receptive field
Influence of luminance gradient reversal on complex cells in feline striate cortex. **359**, 315, 1985
Quantitative studies of the discharge fields of single cells in cat striate cortex. **373**, 277, 1986
Quantitative studies of enhancement and suppression zones in the receptive field of simple cells in cat striate cortex. **373**, 293, 1986
Interaction between the soma and the axon terminal of retinal horizontal cells in *Cyprinus carpio*. **375**, 121, 1986
The receptive-field spatial structure of cat retinal Y cells. **384**, 49, 1987
Stimulus selectivity and functional organization in the lateral suprasylvian visual cortex of the cat. **389**, 569, 1987
Visual response
Responses of Purkinje cells and mossy fibres in the flocculus of the monkey during sinusoidal movements of a visual pattern. **387**, 611 1987
Visual sensitivity
Improvement in human vision under bright light: grain or gain? **394**, 41, 1987
Visual system
Augmenting responses evoked in area 17 of the cat by intracortical axon collaterals of corticogeniculate cells. **367**, 217, 1985
Quantitative studies of the discharge fields of single cells in cat striate cortex. **373**, 277, 1986
Quantitative studies of enhancement and suppression zones in the receptive field of simple cells in cat striate cortex. **373**, 293, 1986
The variability of the maintained discharge of cat dorsal lateral geniculate cells. **375**, 339, 1986
Pattern discrimination in the human subject suffering visual agnosia. **377**, 67*P*, 1986
The ventral and dorsal lateral geniculate nucleus of the rat: intracellular recordings *in vitro*. **384**, 587, 1987
Membrane properties of morphologically identified X and Y cells in the lateral geniculate nucleus of the cat *in vitro*. **390**, 243, 1987
Voltage gain of signal transfer from retinal rods to bipolar cells in the tiger salamander. **391**, 125, 1987
Contrast affects the transmission of visual information through the mammalian lateral geniculate nucleus. **391**, 267, 1987
Visual transduction
Electrical properties of the light-sensitive conductance of rods of the salamander *Ambystoma tigrinum*. **371**, 115, 1986
Vitamin A
Responsiveness and ultrastructure of slowly adapting type I cutaneous mechanoreceptors in vitamin A deficient rats. **371**, 339, 1986

Vitamin C
The influx of ascorbic acid into the brain of the rat. **358**, 112*P*, 1985
The weight of the choroid plexus of the rat and its role in the passage of ascorbic acid into the brain. **366**, 32*P*, 1985
Vitamin D
The effect of vitamin D deficiency on secretion of saliva by rat parotid gland *in vivo*. **363**, 323, 1985
Vitamin E
Vitamin E deficiency in rats leads to an impairment of cerebral energy metabolism. **360**, 80*P*, 1985
Morphological and neurophysiological studies on experimental vitamin E deficiency in rats. **376**, 34*P*, 1986
Vitamin transport
Comparison of the effects of some thiamine analogues upon thiamine transport across the blood–brain barrier of the rat. **369**, 79, 1985
Voltage clamp
A fast transient outward current in the rat sympathetic neurone studied under voltage-clamp conditions. **358**, 91, 1985
Two types of calcium channels in the somatic membrane of new-born rat dorsal root ganglion neurones. **359**, 431, 1985
An extremely fast voltage clamp for Ranvier nodes. **366**, 3*P*, 1985
A transient outward current in isolated cells from the crista terminalis of rabbit heart. **368**, 243, 1985
Voltage clamp of bull-frog cardiac pace-maker cells: a quantitative analysis of potassium currents. **368**, 265, 1985
Ionic conductances in frog short skeletal muscle fibres with slow delayed rectifier currents. **368**, 359, 1985
Biochemical separation of delayed rectifier currents in frog short skeletal muscle fibres. **368**, 379, 1985
Ionic basis of the different action potential configurations of single guinea-pig atrial and ventricular myocytes. **368**, 525, 1985
Differential expression of inward and outward potassium currents in the macrophage-like cell line J774.1. **369**, 475, 1985
Changes by acetylcholine of membrane currents in rabbit cardiac Purkinje fibres. **371**, 201, 1986
Desensitization of the acetylcholine-induced increase of potassium conductance in rabbit cardiac Purkinje fibres. **371**, 239, 1986
Dose–response of acetylcholine receptor channels opened by a flash-activated agonist in voltage-clamped rat myoballs. **371**, 407, 1986
Voltage-gated potassium conductance in human T lymphocytes stimulated with phorbol ester. **372**, 405, 1986
Electrophysiological effects of tetracaine in single guinea-pig ventricular myocytes. **376**, 143, 1986
Voltage-clamp study of acutely dissociated mouse spinal neurones. **377**, 10*P*, 1986
Activation of acetylcholine receptor channels by covalently bound agonists in cultured rat myoballs. **379**, 83, 1986
A quantitative description of the sodium current in the rat sympathetic neurone. **380**, 275, 1986
Effects of membrane potential on intracellular calcium concentration in sheep Purkinje fibres in sodium-free solutions. **381**, 193, 1986
Slow membrane currents in bursting pace-maker neurones of *Tritonia*. **382**, 425, 1987
Voltage-clamp analysis of somatic γ-aminobutyric acid responses in adult rat hippocampal CA1 neurones *in vitro*. **384**, 27, 1987
Effect of prolonged depolarizations on twitch tension and intracellular sodium activity in sheep cardiac Purkinje fibres. **384**, 355, 1987
Voltage-clamp analysis of a crayfish rectifying synapse. **386**, 91, 1987
Calcium-dependent potassium conductance in guinea-pig olfactory cortex neurones *in vitro*. **387**, 173, 1987
Potassium currents evoked by brief depolarizations in bull-frog sympathetic ganglion cells. **387**, 519, 1987
An intrinsic potential-dependent inactivation mechanism associated with calcium channels in guinea-pig myocytes. **389**, 205, 1987
Tetrodotoxin-resistant sodium current of rat nodose neurones: monovalent cation selectivity and divalent cation block. **389**, 255, 1987
Sodium current in single cells from bullfrog atrium: voltage dependence and ion transfer properties. **391**, 235, 1987
The calcium current of mouse egg measured in physiological calcium and temperature conditions. **391**, 573, 1987
Kinetics and components of the flash photocurrent of isolated retinal rods of the larval salamander, *Ambystoma tigrinum*. **394**, 529, 1987
Voltammetry
Direct monitoring of central amine neurotransmitter function in the rat using *in vivo* voltammetry. **361**, 13*P*, 1985
Voluntary contraction
Behaviour of motor units of human arm muscles: differences between slow isometric contraction and relaxation. **359**, 107, 1985
Activation of the human diaphragm during maximal static efforts. **367**, 45, 1985
Thixotropic behaviour of human finger flexor muscles with accompanying changes in spindle and reflex responses to stretch. **368**, 323, 1985
Maintenance of constant arm position or force: reflex and volitional components in man. **386**, 247, 1987
Reflex excitability of human soleus motoneurones during voluntary shortening or lengthening contractions. **390**, 271, 1987
Voluntary movement
Discharge in muscle spindle afferents related to direction of slow precision movements in man. **362**, 437, 1985
Effects of prior instruction and anaesthesia on long-latency responses to stretch in the long flexor of the human thumb. **365**, 285, 1985

Vomiting
Increase in [^{3}H]-2-deoxyglucose uptake in the ferret area postrema produced by apomorphine administration or electrical stimulation of the abdominal vagus. **382**, 187*P*, 1987

Walking, *see* Locomotion

Wallerian degeneration
The long-term excitability of myelinated nerve fibres in the transected frog sciatic nerve. **368**, 309, 1985

Water balance
Water balance during aerial exposure in the freshwater crayfish. **361**, 60*P*, 1985

Water deprivation
Fluid and electrolyte handing during water deprivation in Brattleboro and Long Evans rats. **365**, 110*P*, 1985
Water deprivation: effects on fluid and electrolyte handling and plasma biochemistry in Long–Evans and Brattleboro rats. **385**, 35, 1987

Water transport
Passive water flows driven across the isolated rabbit ileum by osmotic, hydrostatic and electrical gradients. **360**, 27, 1985
Forskolin mimics the hydrosmotic action of vasopressin in the urinary bladder of toads *Bufo marinus*. **365**, 307, 1985
Effect of solute concentration on intracellular water volume and hydraulic conductivity of human blood platelets. **374**, 375, 1986
Is a heteroporous membrane the cause of volume regulation in the absence of active transport in the rabbit nephron? **382**, 202*P*, 1987

Water uptake
Comparison of absorption rates from glucose-electrolyte solutions containing citrate or betaine hydrocholoride perfusing a segment of human jejunum. **386**, 107*P*, 1987

Whole-cell current
Membrane current through adenosine-triphosphate-regulated potassium channels in guinea-pig ventricular cells. **363**, 463, 1985

Wrist
Bone densitometry of the human radius by computed tomography. **384**, 16*P*, 1987

X-ray diffraction
Lateral filamentary spacing in chemically skinned murine muscles during contraction. **360**, 135, 1985
Movements of cross-bridges during and after slow length changes in active frog skeletal muscle. **361**, 151, 1985

X-ray microanalysis
The electrolyte elements of bovine and ovine sweat-gland secretory epithelia before and during thermally induced activity. **392**, 24*P*, 1987

Xenopus
Ionic and pharmacological properties of reciprocal inhibition in *Xenopus* embryo motoneurones. **382**, 463, 1987
Properties of single sodium channels translated by *Xenopus* oocytes after injection with messenger ribonucleic acid. **386**, 73, 1987

Yolk sac
Transport of endogenous IgM across the rabbit yolk-sac splanchnopleure. **386**, 17*P*, 1987

Zinc
Effects of zinc ions on paired-pulse potentiation in the rat hippocampal slice. **360**, 35*P*, 1985
The mechanism of zinc uptake into human red blood cells. **381**, 75*P*, 1986
Ca-dependent Zn efflux from human red blood cells. **391**, 18*P*, 1987
Optical probes for Zn^{2+} ions. **394**, 6*P*, 1987
